In spite of the great incentive for vendors to enter new local markets, development into a full fledged competitor from scratch is a lengthy process that cannot be accomplished in less than three to five years. The principle reason entry takes so long is that a full file must contain substantially the same information as an established firm, *i.e.*, four to five years of debt obligation and seven years of public record information, to be an adequate substitute for credit grantors. Since credit grantors usually save their debt obligation information for approximately one year, it takes several years to collect sufficient debt information data for a full file. Similarly, the collection of public record information is normally a slow process that takes at least two years.

4. *The Effect of the Transaction.* TRW and Chilton sell credit reports in many parts of the United States. There are, however, relatively few areas in which both firms sell full file consumer credit reports. The Department found that, in most of the United States, TRW and Chilton do not compete against one another.[19] Historically, TRW's strength has been on the east and west coasts while Chilton's strength has been in the midwest. The TRW and Chilton networks are direct competitors in sixteen markets where there are few alternative sources of credit reports. In all of those markets, the HHI,[20] measured by units sold, before the acquisition, exceeded 3200 and the acquisition would cause the HHI to increase by more than 700 points.[21] The high level of concentration in those makets, combined with the difficulty of entry into local markets, led the Department to conclude that the acquisition would enable TRW to gain market power, *i.e.*, the power to control price over a substantial period of time, in those markets. Each of these sixteen areas is now served by the TRW and Chilton networks and, at most, one other network.

5. *The Proposed Final Judgment.* Under the terms of the Proposed Final Judgment, TRW was required to take corrective action in each of the sixteen affected markets. TRW would be required either to end its relationship with an affiliate in a market, thereby making the former affiliate available for a network vendor not yet in the market with a full file, or to sell a copy of its data base to another vendor which would compete in the market. The Department concluded that either action would end any threat to competition posed by the acquisition. While we recognized that neither solution would leave any market unchanged, we concluded that either eventually would prevent TRW from maintaining market power in any market.

A firm cannot gain market power when there is either a sufficient number of competitors or it is likely that new firms would enter the market in response to a small, but significant, nontransitory price increase. The two forms of relief employed by the proposed Final Judgment will prevent TRW from exercising market power either by keeping the number of competitors unchanged (by enabling a network not in the market to team up with the former TRW (or Chilton) affiliate) or my making available to an outside vendor a full file of local credit information, the creation of which is the major barrier to entry into local markets. (See page 14, *supra.*) Indeed, the Department's predictions that the proposed relief would result in new entry into these markets has been borne out in fact; companies have already committed themselves to enter those markets through the purchase of copies of data files.

The proposed Final Judgment involves minimal governmental intrusion into the market and permits credit grantors, the consumers affected by this merger, to obtain the benefits of increased national coverge of the TRW data base. The increased coverage increases the likelihood that the data base will have information on an individual who has recently moved. Furthermore, local files will improve in areas where both TRW and Chilton have been developing files, but do not yet have fully mature data bases.[22]

The Department also concluded that the proposed Final Judgment would be the least instrusive means of correcting the competiitive problems posed by the transaction. We were aware that the proposed Final Judgment would affect the interests of the affiliates with whom TRW had agreed not to reaffiliate. However, all consent decrees and, indeed, all mergers affect the interests of third parties. It is quite likely that, even in the absence of the proposed Final Judgment, some, or all, of those affiliates would have been unable to preserve their relationships with TRW. After many mergers, firms end relationships with duplicate suppliers or distributors. Similarly, after consummation of its acquisition of Chilton, TRW would have been likely to end its relationship with affiliates where there were overlapping territories. In any event, the courts repeatedly have recognized that the purpose of the antitrust laws is to protect competition rather than competitors. Preservation of the former, not the latter, was Congress' intent.[23]

G. Response to Comments

With the exception of Senator Humphrey, each of the commenters is an independent credit bureau that is currently affiliated with Chilton or TRW. While the various comments raise a number of concerns and objections to the proposed Final Judgment, they uniformly, with the exception of that of CCRC, reflect the desire of independent credit bureaus to be allowed to renew their contracts with their current vendor. However, each of the commenters appears to acknowledge that the proposed acquisition of Chilton by TRW would reduce competition in the sale of credit reports in its geographic areas. Most of the commenters argue that the United States should seek to prevent the acquisition of Chilton by TRW , *i.e.*, that the United States should not have negotiated any consent decree at all. Some commenters argue alternatively that the decree should require TRW to sell the information that it (or Chilton) owns, in lieu of refusing to extend its (Chilton's) affiliation agreement with the commenter.[24] Of singular import, however, is the fact that not a single credit grantor, the large sophisticated consumers of credit reports, has expressed any concern to the Court or the Department that the proposed Final Judgment would not adequately protect its interests.

Under these circumstances, the single issue presented here is whether the proposed Final Judgment represents a reasonable exercise of the Department of Justice's antitrust enforcement discretion. For the reasons discussed below, the United States has concluded that the proposed Final Judgment submitted to the Court is an appropriate resolution of this litigation. That proposed Final Judgment reflects a careful study of a complex business and is reasonably calculated to prevent the anticompetivie effects alleged in the Complaint. Therefore, the entry of that proposed Final Judgment is in the public interest.

1. *The Importance of Credit Inquiries.* CBC and Rochester argue that having a full file, as defined by the Complaint, is insufficient for a credit bureau to compete in a given market. They suggest that credit grantors always purchase the credit report with more credit inquiries,[25] regardless of price, service, or quality considerations.[26] CBC and Rochester assert that unless the transaction is enjoined, TRW will enhance its share of credit inquiries, thereby gaining the power to limit or exclude competition. These assertions are inaccurate; they are simply inconsistent with observable trends in the industry.

The commenters, current affiliates who will have to align themselves with a new network vendor, will not be disadvantaged in terms of credit inquiry quality by the proposed Final Judgment. That Judgment would not result in TRW increasing its share of credit inquiries in any of the commenters' markets. A credit bureau owns the data for its assigned zip codes in its vendor's computer, including the credit inquiries, and the credit bureau is free, when its contract expires, to transfer its data to another vendor. For example, since CBC owns the New Hampshire information, Chilton cannot duplicate and retain the information for TRW's use. If a credit bureau transfers its data to another vendor, its share of credit inquiries will be unaffected, and a purchaser of its

---

[17] There are now four networks. In the comments, the number of vendors is sometimes set at five and sometimes at four. This is a result of the fact that one of the companies that has been providing data processing services, Associated Credit Services, Inc. ("ACS"), is discontinuing its data processing and network activities. On August 1, 1988, ACS entered into an agreement to obtain computer services from The Credit Bureau, Incorporated of Georgia ("CBI"). After ACS discontinues its data processing activities, there will be four vendors of such services: TRW, Chilton, CBI, and Trans Union Credit Information Co. ("Trans Union").

[18] When an individual moves from one area to another, the information on that individual is transferred from the file of the credit bureau of his former residence to the file of the credit bureau at his new one within the data base.

[19] TRW has consumer information in all 32 states in which Chilton does business. However, both companies have full files in all of or portions of 11 of those states.

[20] "HHI" means the Herfindahl-Hirshman Index, a measure of market concentration calculated by squaring the market share of each firm competing in the market and then summing the resulting numbers. For example, for a market consisting of four firms with shares of 30, 30, 20, and 20 percent, the HHI is 2,600 ($30^2 + 30^2 + 20^2 + 20^2 = 900 + 900 + 400 + 400 = 2,600$). The HHI takes into account the relative size and distribution of the firms in a market. It approaches zero when a market is occupied by a large number of firms of relative equal size and reaches its maximum of 10,000 when a market is controlled by a single firm. The HHI increases both as the number of firms in the market decreases and as the disparity in size between those firms increases.

[21] Hawaii offers its own HHI calculation and concludes that the Department has understated the extent to which the concentration is likely to increase in its state, and presumably, the extent to which competition there will be reduced. The Department provided a range of HHI increases in the affected makets, rather than specific market shares and HHI calcualtions, in order to avoid revealing commerically sensitive information. We believe we adequately established the likelihood of competitive harm through less precise information on concentration. We agree with Hawaii that the threat tocompetition is substantial. However, the exact HHI is irrelevant to the question of whether the remedial action set out in the proposed Final Judgment will be effective.

[22] As we explain below, to enjoin the transaction completely would deny credit grantors the benefits they expect to gain from the transaction.

[23] *Brunswick Corp.* v. *Pueblo Bowl-O-Mat, Inc.*, 429 U.S. 477, 488, 97 S. Ct. 690, 697 (1977).

[24] "[A]t a minimum the proposed Consent Decreee should be modified to allow [CBC] and similarly situated credit bureaus to continue to contract, on a fair and reasonable basis with the successor to the Chilton/TRW operation." CBC Supplementary Comments at 2. "We object to the inclusion in the proposed final judgment of provisions that require the severance of relationships between our clients and TRW." Central Massachusetts Comments at 2.

[25] A credit inquiry is an indication that a credit grantor has purchased a credit report on an individual. Taken together, credit inquiries reveal the extent to which the person has recently sought credit.

VOL 54 ISS 47 MR 13 1989 UMI

credit reports the day after it changes affiliations will find all the inquiries it would have found the day before.[37]

The commenters' claims that the credit bureau with the most credit inquiries will always dominate a market is simply inconsistent with the existence of two or three competitors in virtually every metropolitan area in the United States. If credit grantors always chose the credit report with the greatest number of inquiries, there would only be one credit bureau in every geographic market.[38] That, of course, is not the case. Rather, most geographic markets have two or three credit bureaus.[39]

Furthermore, the evidence indicates that many geographic markets are becoming *less* concentrated as TRW, CBI, and Trans Union all enter markets throughout the United States. The opposite would be true if CBC and Rochester were correct. Entry would not be feasible because credit grantors would not purchase the report of the new entrant that would have no credit inquiries. Consequently, CBC's anecdote about its efforts to enter Cleveland actually undermines its position.[40] If credit inquiries were as important as CBC claims, entry in the face of a monopolist would be foolish and futile and CBC would not have attempted to enter the Cleveland market. Given the fact that the established firm held a monopoly position in credit inquiries, CBC must have believed that it could draw market share away from the incumbent firm (after it established a "full file") through price and service competition.[41] In the same vein, if CBC is correct, TRW acted irrationally by choosing to release the dominant firm in the New Hampshire market (CBC) rather than the credit bureau with the small market share or selling a copy of the file there.[42]

In fact, attempts by these firms to enter new markets to challenge the incumbents, who have more credit inquiries in their files, is not folly. While credit inquiries are a factor credit grantors use to assess credit report quality, they are not the *only* factor. We found that credit grantors' primary basis for selecting credit reports is whether the network has a "full file" (as defined in the Complaint) fo the area in which the consumer resides. (Complaint at 6.) Selection between full file alternatives is made on the basis of credit inquiry information, price, readability of reports, computer down time, brand loyalty, and other factors. And new entrants have been able to overcome the initial credit inquiry advantage of established credit bureaus by working hard and providing quality service.

2. *Alternate Vendors Have Incentives to Compete.* CBC, Rochester, and Hawaii also express concern that the other network vendors with whom they may contract are inadequate to meet their needs. CBC argues that it needs a partner that is well established in Boston because the New Hampshire and Boston markets are interrelated.[43]

In large measure, this argument is premised on CBC's view that the firm with the greatest number of credit inquiries automatically possesses sustained market power. For the reasons set forth above, this is not the case. This argument also is premised on the notion that CBI would not be an adequate replacement network vendor for CBC because CBI does not have the incentive or ability to compete in New England.[44] All the evidence we have gathered, however, suggests otherwise. In 1987 CBI entered the Boston market by opening an office in nearby Woburn. With its purchases of Chilton's Boston file pursuant to the proposed Final Judgment, CBI will have much the same New England coverage that Chilton had before the acquisition. CBI spent a substantial sum to purchase the files, a fact indicating its belief that the purchase of those files will greatly facilitate its entry into those areas and provide it with a competitive file offering. Nor is CBI a small company. It is significantly larger than Chilton, and has file coverage throughout most of the United States.[45] Moreover, CBI's interest in obtaining CBC's New Hampshire office as an affiliate does not appear in doubt. CBC's comments indicate that CBC's New Hampshire office will affiliate with CBI.[46] If, as CBC claims, success in one market is contingent on a presence in a neighboring market, a New Hampshire affiliate should greatly facilitate CBI's entry into the Boston market.[47]

Similarly, Hawaii's assertion that it would not be able to survive competitively with a new network vendor is contradicted by the facts. Hawaii asserts that it has only been able to compete with Chilton because of "TRW's west coast file." [48] If it affiliates with another vendor, it claims it will have only its Hawaii files, whereas TRW/Chilton will have both the more mature Chilton files and the strong Chilton/TRW mainland files. According to Hawaii, it will not be able to compete in these circumstances.[49]

Hawaii seems to be arguing that a strong West Coast file is a prerequisite to success in the state. But Chilton, the firm it asserts dominates Hawaii, has no file on the West Coast of any kind. In contrast, CBI and Trans Union have substantial files in California.[50] Consequently, if access to a good West Coast file is a prerequisite to competing in Hawaii, both CBI and Trans Union meet that requirement better than Chilton did for its owned office.[51]

Rochester's suggestion that no other network vendor would affiliate with it because of a lack of name recognition and file quality [52] is difficult to comprehend. With regard to the Rochester area (and the Buffalo metropolitan area sixty miles to the west), the Rochester Credit Center will bring its admittedly high quality files to any network that it joins. Based on their announced expansion plans and their past actions, either Trans Union or CBI would be interested in expanding their presence in upstate New York by affiliating with Rochester Credit Center. In Syracuse, the major metropolitan area to the east, Trans Union already has full files and CBI will gain full files as a result of its purchase of a copy of Chilton's files.

3. *The Importance of Tradenames.* Rochester and Hawaii also suggest that since they worked under the Chilton tradename in the past, credit grantors will fail to realize that it was they, rather than Chilton, who was responsible for their superior local credit information. Because of this alleged ignorance on the part of credit grantors, Rochester and Hawaii contend that they will not prosper even if they affiliate with a new network vendor.[53] This scenario of customer ignorance is highly improbable. On the local level, a credit bureau's success is primarily a function of its own sales efforts and those of the vendor with whom it affiliates. The credit bureaus deal continuously with local credit grantors who grow to know the people as well as their performance. Moreover, Rochester is a merchant-owned credit bureau. When a credit bureau is merchant-owned, it is owned and operated by its customers. In these circumstances, the idea that local credit grantors will be unaware of Rochester's change of affiliations is difficult to accept.

The assertion of customer ignorance is equally implausible on the national and regional credit grantor level. Rochester's and Hawaii's argument suggests that credit grantors purchase credit reports on the basis of the tradename attached rather than the quality of the information in the file. This is simply not the case. Credit grantors purchase credit reports to obtain timely, accurate information on an individual sufficient to evaluate the risks attendant to extending him or her credit. The tradename of the report is irrelevant. Credit grantors demand a report with current information of high quality to reduce their risk of loss from their credit granting activities.

Indeed, our investigation revealed that credit grantors, especially national and regional credit grantors, are very sophisticated in their ability to evaluate credit information quality on a local level. Such companies commonly do business with all four credit reporting networks. They are frequently visited by sales agents of the local credit bureau as well as those of the network vendor. Their purchasing decisions are based upon careful evaluations of file and other product quality considerations, as well as price and service factors. They often ask sales agents to provide file comparisons, comparing the number of trade lines, bits of public record information, credit inquiries, age of information and so forth, to determine which company has the best information in a given area.[54]

Hawaii raises still another concern with respect to the proposed Final Judgment's impact on electronic compilations of information.[55] It notes that most credit grantors now obtain credit reports electronically, via telecommunications lines, on either teletype machines or computer terminals. It claims that, at present, many of these devices can interact with both the Chilton and TRW data bases so that credit grantors can obtain credit reports from either company. Hawaii apparently beleives that successful affiliation with a different network vendor will be hampered by the latter's inability to join such an electronic system. However, each of the four networks has the ability to provide credit reports via teletype or computer terminals, and the computer equipment and/or software necessary to permit electronic transmission of credit reports is readily available. Nor should credit grantors experience significant additional costs. If a credit grantor has been willing to purchase or lease computer equipment that gave it access to TRW and Chilton in the past, then it should be willing to purchase or lease computer equipment that will permit it to access TRW's data base and that of the vendor with which Hawaii affiliates.

4. *The Transaction Should not be Enjoined.* As noted above, CBC, Hawaii, and Rochester all take the view, either explicitly or implicitly, that nothing less than a permanent injunction prohibiting TRW's acquisition of Chilton will provide an adequate remedy for the violation alleged in the Complaint. In effect, they argue that *no* settlement of this litigation should be permitted. Acceptance of that argument would represent an extraordinary restriction on the prosecutorial discretion of the United States. It would require this Court and the Department of Justice to undertake the substantial loss, risks, and delays of litigating to a final conclusion a case of substantial complexity, despite the Department's considered judgment that an adequate remedy can be obtained without imposing such costs on the taxpayers.

We are not aware of an instance in which a court has rejcted a proposed consent decree in its entirety in the course of a public interest review. Such a conclusion should not be reached absent a compelling demonstration of the inadequacy of other forms of relief.

The commenters have not made such a demonstration here.[56] Their

---

[37] However, TRW will have a larger share of credit inquiries in markets where it is selling a copy of its files. Consequently, the Department carefully considered the importance of credit inquiries in assessing whether such sales would be adequate to correct competitive problems. We concluded that they would for the reasons discussed, *infra*.

[38] All credit grantors would purchase credit reports from a single source because such purchases from another provider would serve to divide the credit inquiries for that area. Of course, if CBC is seriously suggesting credit reporting markets are natural monopolies, it would argue that there is no competitive problem at all, rather than that the proposed Final Judgment is insufficient.

[39] CBC, therefore, substantially understates its position when it acknowledges that the number of firms competing in a particular geographic market is usually three. CBC Comments at 4. *See also*, Complaint ¶¶ 27 through 30, setting out the number of competitors in various other markets. Similarly, Rochester admits that, under its theory, its local market should be a monopoly. Yet, in the next paragraph it acknowledges that it essentially divides the Rochester market with its TRW competitor. Rochester Comments at 4–5.

[40] In its comments CBC indicates that it has only gained a 10% market share since it entered the Cleveland market in 1982. CBC Comments at 6.

[41] CBC's experience in the Cleveland market is entirely consistent with the Department's position that *de novo* entry is difficult.

[42] TRW owns the New Hampshire file but leases it to an independent credit bureau.

[43] CBC is concerned about what it describes as the "wholesale subscriber." This relates to credit reports relating to individuals living in Boston which it will sell to credit grantors in New Hampshire. In its view, no New Hampshire credit grantor will purchase CBC's partner's reports relating to Boston when TRW has more credit inquiries there. In its supplemental comments CBC indicates that this market constitutes 18 percent of its business. CBC Supplemental Comments at 8.

[44] CBC cannot be arguing that CBI and Trans Union are inadequate networks generically, *i.e.*, wherever they do business. CBC owns offices in the states of Ohio, Indiana, Pennsylvania, New Hampshire, Vermont, Maryland, Michigan, West Virginia, and Florida. Through these various offices, it does business with each of the four networks.

[45] As a result of its agreement with ACB, CBI's file coverage will rival, if not surpass, the combined file coverage of TRW and Chilton. By CBC's calculations, CBI and TRW will be approximately the same size and Trans Union somewhat smaller. CBC Supplemental Comments at 4.

[46] CBC Comments at 8.

[47] CBC's comments indicate that its New Hampshire office will join the CBI system after the acquisition. CBC Comments at 6. It is not clear whether it already has signed a contract to this effect. In either event, CBC knows which network its New Hampshire office will join.

[48] Hawaii Comments at 6.

[49] Hawaii Comments at 10.

[50] Both CBI and Trans Union have mature files and significant market shares in Los Angeles. CBI is well established in San Francisco with a significant portion of the market and, we believe, Trans Union is developing a file there.

[51] Hawaii is concerned that it may not be able to affiliate with another vendor or sell a copy of its file to another vendor. Hawaii Comments at 2 and 5. Its explanation for this position seems to be that CBI and Trans Union might not have an interest. While this is possible, it seems unlikely. CBI and Trans Union have announced plans to have a national file and we can think of no reason why those companies would exclude Hawaii from their expansion plans. Indeed, affiliation with Hawaii should be attractive to them because it would enable them to avoid the substantial costs and extended period of information collection Hawaii acknowledges is necessary in order to sell credit reports there. Trans Union's and CBI's purchases of files pursuant to the proposed Final Judgment demonstrates their interest in expanding into new areas. It is also strong evidence that they have an interest in affiliating with credit bureaus whose contracts will not be renewed under the proposed Final Judgment.

[52] Rochester Comments at 4.

[53] Rochester Comments at 3–4 and Hawaii Comments at 8.

[54] The sophistication of credit grantors in evaluating local file quality is aptly demonstrated by their use of preference lists. Many large credit grantors, all the vendors, and some large credit bureaus (including CBC) have developed lists that identify which vendor has the best file, and which is the best alternative, in a given zip code or state.

[55] Hawaii Comments at 8.

[56] The fact that TRW has raised the price of its Boston credit reports to CBC's Pittsburgh credit bureau from $.75 to $4.00 provides no basis to conclude that TRW will gain market power if the proposed Final Judgment is entered. Rather, it suggests that the Boston office has taken an inopportune time to close a loophole that CBC has been using to its advantage. As noted above, a credit bureau can purchase credit reports from other bureaus or offices on the network at a reduced price, normally about $.75. Credit bureaus not on the network, however, generally pay the retail price, commonly $3 or $4.00. CBC's Pittsburgh bureau is affiliated with TRW and thus would normally be entitled to the wholesale price. It appears, however, that CBC has been purchasing credit reports from TRW's Boston files through Pittsburg for customers of CBC's New Hampshire credit bureau, a Chilton affiliate. The price change, then, is motivated by an effort to close the avenue by which a Chilton bureau obtains TRW credit reports at the wholesale price. The TRW really had market power in the Boston market, it would increase its wholesale prices to other TRW or Chilton bureaus, or retail price to credit grantors. We have no evidence of such price increases.

VOL 54 ISS 47 MR 13 1989 UMI

explanations of how competitive harm might occur cannot be reconciled with the fact that competition exists and is growing in local markets as the national networks seek to enter new markets. Their explanations are also premised upon their belief that credit grantors cannot be trusted to protect their interests. Since credit grantors tend to be relatively large and financially sophisticated firms, it can be presumed that they would express their concern to the Court of the United Sates if they felt that the proposed Final Judgment would reduce their competitive options in the future. The absence of any expression of concern by these customers of credit reporting services strongly confirms the correctness of the United States' competitive analysis in this case.

5. *Other Relief Options.* CBC and Hawaii argue that the Department did not give adequate consideration to other relief options.[47] They suggest that the options of forcing the outright sale of owned files and of forcing the sale of combined files are superior to that chosen by the Department. Their position, however, is predicated upon their belief that the firm that has the most credit inquiries in its file will, for that reason alone, have enduring market power. As we have shown, this position is contradicted by experience.

CBC changed its position in its supplemental comments. There it argues that the proposed Final Judgment should be modified to require divestiture of bureaus owned by TRW or Chilton rather than requiring the release of independent affiliates. CBC bases this argument on its belief that if it is forced to affiliate with another vendor, its ability to compete will be diminished, and that it is inequitable to place the burden of correcting the competitive problems of the acquisition on a non-party.[48] To avoid this hardship to itself, CBC asks that it be allowed to remain on the TRW-Chilton system and that the TRW affiliate be terminated instead. This request indicates that CBC's true concern is not preservation of competition, but avoiding the expense and inconvenience of changing affiliation. Indeed, CBC's goal might be to *reduce* competition in New Hampshire. If their argument that regional coverage and inquiries are so important is correct, CBC's dominant share of the New Hampshire market combined with TRW's position in Boston would create an even greater competitive problem in New Hampshire than the problem they see created by the relief in the Final Judgment.

In any event, there is no basis to believe that any independent credit bureau's ability to compete will be irreparably diminished. That is not to day that the proposed Final Judgment may not affect the commenters' businesses.[49] Market shares may change; there may be some costs associated with switching affiliations; and perhaps some disruption of day to day routines. However, we can conclude that any burden or cost to independent credit bureaus will not be significant[50] and that their ability to compete will not be threatened. The explanations that have been offered that suggest otherwise simply do not withstand close scrutiny.[51]

6. *The Market for Data Processing Services.* CBC and Hawaii argue that the proposed Final Judgment will not correct all the competitive problems raised by the acquisition. They note that TRW and Chilton are two of only four providers of data processing services to independent credit bureaus. In their view, the combination of TRW and Chilton will substantially lessen competition in the sale of such services to independent credit bureaus.[52] CBC also asserts that the Department's Competitive Impact Statement should have included a comprehensive discussion of concentration, entry barriers, and transaction efficiencies in a national network vendor market.[53]

CBC and Hawaii are asserting that the Court, in deciding whether the proposed Final Judgment is in the public interest, should consider alleged antitrust violations that were not the subject of the government's Complaint. They are mistaken as a matter of law. It is well established that a court's public interest inquiry is limited to an evaluation of the remedy proposed for violations alleged in the government's complaint[54] and that a court cannot base its public interest determination on antitrust concerns other than those alleged in the complaint.[55] The issue in a Tunney Act proceeding is "whether the relief provided for in the Proposed Judgment is adequate to remedy the allegations of antitrust violation as set out in the Complaint."[56] The APPA does not give a court the authority to order the United States to file a broader complaint than the Department of Justice, in the exercise of its prosecutorial discretion, has determined is appropriate.[57] In summary, there is no basis for CBC's assertion that the effects of the transaction on affiliates' access to alternative sources of data processing services is a basis for finding that the judgment is not in the public interest.[58]

[47] CBC Comments at 7 and Hawaii Comments at 9.

[48] CBC Supplemental Comments at 9.

[49] It is not unusual for a consent decree to affect the interests of third parties. *See Texaco Inc., et al.* FTC Complaints and Orders 1983–1987, ¶22,166 (July 10, 1984) (Texaco ordered to divest 1800 associated gasoline stations) (The Complaint and Consent Order are set out *In the Matter of Texaco, Inc.*, 104 F.T.C. 241 (1984)); *United States* v. *Canada Development Corp.*, 454 F. Supp. 1215 (N.D. N.Y. 1978) (Lessee defendant required to assign or sublease movie theater over lessor's objections); *United States* v. *G. Heileman Brewing Co., Inc.*, 1973–1 Trade Cas. (CCH) ¶74,589 (E.D. Mich. 1973) (Brewer required to divest brands of beer and/or production agreements); and *United States* v. *Chicago Title and Trust Co.*, 1988 Trade Cas. (CCH) ¶71,745 (N.D. Ill. 1988) (In Section 7 proceeding, title insurance company required to cancel exclusive contracts with abstractors in Illinois).

[50] Such economic consequences would not be significantly different from those resulting from the termination of duplicate suppliers or the elimination of duplicate marketing systems, actions which are routine consequences of mergers throughout the economy.

It is not at all clear that CBC would escape conversion costs if the proposed Final Judgment was modified as it suggests. If TRW consolidates the Chilton data base into its own, as it is likely to do, CBC will bear the costs of changing from the Chilton network to the TRW network. There is no reason to believe that such costs would be substantially different than the costs of changing to, for example, CBI.

[51] Given the need to allocate exclusive territories to affiliates and offices in this industry, TRW may have intended to eliminate overlapping territories in any event. The primary benefit of the transaction to TRW is the creation of a single national credit information data base.

[52] CBC Comments at 6–8 and Hawaii Comments at 2. CBC states, and we agree, that the typical number of vendors in a given market is three.

[53] CBC Supplemental Comments at 3–8.

[54] *See United States* v. *Waste Management, Inc., supra*, ¶66,861 at pages 63,048.

[55] *United States* v. *BNS, Inc.*, 858 F.2d 456, 462–63 (9th Cir. 1988). Hawaii asserts that this Court must determine whether the decree "is consistent with [the Department's] original prayer for relief" (that is, that the acquisition be enjoined). Hawaii comments at 9. The relief in a consent decree need not be identical to that prayed for in the complaint. Absent the divestiture in the overlapping markets, an injunction would have been appropriate. But the proposed Final Judgment calls for precisely that divestiture. Consequently, this Court need only determine whether the relief in the proposed Final Judgment is a reasonable enforcement means of correcting the competitive harm we have alleged.

Ct. 638 (1982). *See also, United States* v. *National Broadcasting Companies, supra*, 449 F. Supp. at 1146, citing *United States* v. *Automobile Manufacturers Ass'n*, 307 F. Supp. 617, 621 (C.D. Cal. 1969), *aff'd per curiam sub nom. City of New York* v. *United States*, 397 U.S. 248, 90 S. Ct. 1105 (1970).

[57] *United States* v. *Mid-America Dairymen, Inc., supra*, ¶61,508 at page 71,979. If CBC is correct, we would also be obligated to explain our analysis of other markets. Other possible markets, in this case, where both companies are either actual or potential competitors include mortgage reporting, debt collection, check approval, and electronic credit equipment markets.

[58] The Department's conclusion that it should not allege a violation in another market does not

Continued

For the same reasons, CBC's argument that the proper relevant market in this transaction should be the New England region is outside the scope of the Complaint and should be summarily rejected.[59] In any event, such a market definition provides no basis for finding that the proposed Final Judgment is not in the public interest because the Final Judgment corrects the competitive problems that would exist in such a market.[60]

In fact, the Department carefully considered in the course of its investigation whether the merger would produce the anticompetitive effects alleged by CBC and Hawaii. Interviews with numerous independent credit bureaus failed to elicit any significant concern that the elimination of Chilton as a competing network vendor would reduce competition in the provision of network services to such independent bureaus. More importantly, the ultimate consumers of credit reports indicated that a reduction in the number of networks from four to three would be beneficial to them. These consumers felt that they would be able to obtain more comprehensive information as a result of the merger, and that three networks were sufficient to ensure continued vigorous competition in the collection and sale of credit information.

7. *Contractural Disputes.* The CCRC comments do not go to the competitive effects of the proposed Final Judgment, but to TRW's right to sell credit information relating to individuals residing in certain Texas zip codes.[61] CCRC argues that it purchased the files concerning these individuals in 1987, and in support of its claim, it has provided the Department with a copy of its contract with TRW. CCRC asks that the United States withdraw its consent to the judgment as currently written and require that it be modfied to eliminate the requirement that TRW sell these files.

TRW has written the Department reasserting its belief that it owns the files in question. It also has submitted evidence, in the form of contract amendments, to support its position.

The Department is not in a position to resolve the contract dispute between TRW and its affiliate. Nor is the Department willing to eliminate the requirement that TRW sell these files. The requirement was included in the decree because of representations by TRW that these "full files" in its network, a representation that, if true, would result in competitive harm in the affected market.

In the Department's view, the contractural dispute between TRW and CCRC does not provide a basis to withdraw our consent to the proposed Final Judgment, to modify its scope, or for the Court to find that it is not in the public interest. In our view, reliance on TRW's representations was appropriate and TRW should bear the consequences if those representations prove to be inaccurate. Consequently, CCRC's objections should be addressed and resolved by TRW, consistent with the provisions of the proposed Final Judgment as currently drafted, or by the courts in any separate proceeding that CCRC may choose to initiate to resolve its contractural dispute with TRW.[62] If subsequent events should demonstrate that TRW cannot sell the disputed files, the proposed Final Judgment permits the parties to apply to this Court to obtain such other relief as is necessary or appropriate.[63]

*III. Conclusion*

Consequently, for the reasons set forth in the Competitive Impact Statement and this Response, the Court should find, after publication of this Response in the **Federal Register**, that the proposed Final Judgment represents a reasonable exercise of the Department of Justice's antitrust enforcement discretion, is in the public interest and should be entered.

RE: *United States v. TRW, Inc.*
Consent Decree

Dear Mr. Grossman: These comments are submitted in response to the Notice published in the **Federal Register** by the Justice Department on December 2, 1988, amended December 12, 1988. Put simply, it is the Credit Bureau Services of New Hampshire's position that the proposed Consent Decree in *United States v. TRW,* Case No. C88–4253, now pending in the Northern District of Ohio, is and will be substantially ineffective in preventing the anti-competitive effects which will result from the acquisition of Chilton by TRW. Specifically, it is our assertion that the Competitive Impact Statement filed in this matter is defective in several very serious respects:

(1) it misdefines and misconstrues the relevant product markets and the interactive relationship between various geographic markets;

(2) it misunderstands the mechanics of the credit reporting industry, and as a consequence, errs in its analysis of, *inter alia,* entry barriers and the adverse consequences of concentration of market power; and

prevent CBC from seeking more stringent relief in private litigation. *United States* v. *Associated Milk Producers, Inc.*, 394 F. Supp. 28, 45 (W.D. Mo. 1975). Indeed, CBC's interests would be more appropriately presented in separate litigation than in the determination of the public interest in the matter presently before this Court. *See United States* v. *ARA Services, Inc., supra*, ¶62,891 at page 71,389.

[59] CBC Supplemental Comments at 8. Defining the relevant geographic market is a far more complex process than CBC has undertaken. "The proper question to be asked in this case is not where the parties to the merger do business or even where they compete, but where, within the area of competitive overlap, the effect of the merger on competition will be direct and immediate." *United States* v. *Philadelphia National Bank*, 374 U.S. 321, 357, 83 S. Ct. 1715, 1738 (1963).

[60] Under the proposed Final judgment, TRW will neither release an affiliate or sell a copy of its files in every part of the region where it has full file, *i.e.*, everwhere but Vermont and Maine. The one case CBC cites in its supplemental comments actually undermines its argument for a regional market definition. In that case, an administrative law judge for the Federal Trade Commission found that the appropriate geographic markets for assessing the impact of acquisitions of credit bureaus were specific metropolitan areas. *In the Matter of Retail Credit Company*, 92 F.T.C. 1, 80–102 (1978). His decision was affirmed by the Commission, *Id.* at 131 *et seq.* On appeal, the decision of the Commission was reversed and remanded on the grounds that the Commission's conclusion that credit reports and mortgage reports constituted a single product was unsupported by the evidence. *Equifax, Inc.* v. *F.T.C.*, 168 F.2d 63 (9th Cir. 1980).

[61] CCRC claims its own approximately one-tenth of the zip codes the proposed Final Judgment requires TRW sell to Trans Union. We believe the contract dispute involves a much smaller fraction of the files that must be sold.

[62] In this regard, a contract dispute on the date of termination may exist between Chilton and Rochester. Rochester Comments at 6. Rochester has brought the matter to our attention, but indicates its belief that the matter should not be resolved in the context of this public interest determination. If this dispute should make TRW unable to comply with its obligations under the proposed Final Judgment, the parties will come before this Court for further orders and directions as may be necessary or appropriate. Proposed Final Judgment at ¶X.

[63] Proposed Final Judgment ¶¶VIII and X.

VOL 54 ISS 47 MR 13 1989 UMI

(3) as a result of the foregoing errors in analysis, its conclusions as to the efficacy of the proposed Consent Decree, and its evaluations of other possible remedies to prevent competitive harm as a result of the merger, are simply wrong.

Accordingly, we urge that the Justice Department withdraw its proposed Consent Decree, and act to prevent consummation of the proposed acquisition until a solution which genuinely addresses the serious anti-competitive effects of the acquisition can be found.

*A. The Competitive Impact Statement Misconstrues the Relevant Markets*

It is plain from a careful reading of the Competitive Impact Statement, and the conclusions reached therein, that the Justice Department has based its analysis on the premise that only one market—"provision of full file consumer credit reports"—will be affected by the acquisition of Chilton by TRW. Unfortunately, this analysis ignores the actual functioning of the credit reporting industry, and consequently provides a faulty foundation for the Department's competitive analysis model.

Initially, it must be understood that the credit reporting industry operates at two inter-dependent, yet highly distinct levels. At the level proximate to credit report customers (i.e., credit grantors) are the credit bureaus. These credit bureaus own all credit information for individuals residing within a particular geographic locale—other credit bureaus own the credit information for individuals residing within other geographic areas. As a consequence, credit bureaus engage in three different sales functions:

(1) *Local Sales.* In these sales of credit reports, a report concerning a resident of the bureau's geographic territory is sold to a customer within that territory. In this situation, the bureau is selling information which it owns.

(2) *Sales of Reports Concerning Non-Resident Individuals.* In this situation, a bureau receives a request for a credit report from a local customer concerning a resident of another bureau's geographic territory. Because the other bureau owns the credit information concerning this individual, the local credit bureau must purchase the credit report from the bureau in whose territory the subject individual resides. The sale of such reports between credit bureaus, generally at a price lower than such reports are sold directly to customers, is known in the industry as "wholesaling." The local credit bureau profits on these sales by adding a surcharge to the "wholesale" price.

(3) *Sales of Reports Concerning Resident Individuals to Other Credit Bureaus.* The flip-side of credit report sales to customers respecting non-resident individuals is the sale of credit reports concerning resident individuals to credit bureaus in other locales. The local credit bureaus profit on these sales by receipt of the "wholesale" price for each report.

Within the credit bureau level there are essentially two types of operations: wholly-owned subsidiary bureaus of corporations such as TRW and Chilton; and independent bureaus, such as the Credit Bureau Services of New Hampshire, which are affiliated by contract with vendors such as TRW and Chilton.

The second tier of the credit bureau industries—i.e., vendors such as TRW and Chilton—perform a variety of functions which are an outgrowth of the types of credit report sales engaged in by credit bureaus. In the context of local sales by credit bureaus, these vendors' role is limited to providing data processing services for the credit bureau. In other words, the vendor, for a fee, is simply storing credit information owned by the credit bureau and printing that information (or transmitting it to a computer terminal) when requested by the bureau.

In a "wholesale" credit report transaction, in which one credit bureau is buying the credit report for resale from another credit agency, the vendor has a broader function. In these transactions, in addition to providing data processing services, the vendor serves as a network for information between various credit bureaus.

The two-tiered structure of the credit report industry is confused by the fact that vendors such as TRW and Chilton also own a number of credit bureaus throughout the country. Thus, at the vendor level, TRW and Chilton compete nationwide (along with several other vendors) for contracts to provide data processing and networking services to independent credit bureaus. On the other hand, at the credit bureau level, Chilton and TRW compete through their wholly-owned bureaus with the bureaus of other vendors and with independent credit agencies, such as Credit Bureau Services of New Hampshire. At the vendor level, the product market is for data processing and networking services, and the customers in this market are independent and wholly-owned credit bureaus. At the credit bureau level, the product market is for credit reports, and the customers in this market are credit grantors.

The Competitive Impact Statement fails in any manner to address this distinction. Rather, the Competitive Impact Statement addresses the market as if there were only one product (the credit reports) and Chilton and TRW competed only in that market. In other words, this analysis, while briefly alluding to the existence of independent credit bureaus such as Credit Bureau of New Hampshire, ignores their existence in evaluating the acquisition solely in terms of competitive harm to credit grantors.

Once the over-simplification of the credit reporting industry contained in the Competitive Impact Statement is understood, the anti-competitive damages of the Chilton acquisition to customers in the upstream market (in particular, to independent credit bureaus) becomes obvious. At the beginnming of 1988, five vendors competed in this upstream market: Chilton, TRW, CBI/Equifax, Transunion and ACS. During 1988, CBI/Equifax entered into a contractual arrangement whereby ACS ceased to provide data processing and networking services. Thus, if the proposed Chilton acquisition is approved, the number of vendors will be reduced to three.

The number of credit bureaus competing in a particular geographic territory is generally three. If the number of vendors is reduced to three, competition in the vendor/credit bureau market, at least in many geographic territories, will be significantly reduced or eliminated. It is the nature of this industry that vendors deal exclusively with one bureau in a given market. Thus, if the proposed acquisition is consummated, and a credit bureau in a particular geographic market, as a result of poor service or price increases, seeks to change vendors, it will have only the potential to affiliate with one of the two vendors not now affiliated with that bureau. At present, such a bureau has a third alternative, the vendor not currently presently in the market, with whom to seek a deal. When a bureau can choose between only the two vendors already in the market, its existing market share will limit such discussions (if any) to vendors who have a relationship with a smaller independent competitor in the market—no vendor is going to discontinue its relationship with a given bureau to enter into one which will offer it a smaller volume of business.

Thus, in effect, in a market with three independent credit bureaus, the smallest bureau (in terms of market share) will have no option but continuation of its existing vendor relationship (or going out of business), the middle bureau will have but one possible alternate vendor, and only the largest bureau will have, in the best possible scenario, two alternatives to its existing vendor rather than three or four (which would have included vendors anxious to enter the market). These options will likely be even further limited by the difficulty of inducing vendors to abandon the security (or requirements) of their existing contractual relationships.

Of course, the foregoing analysis ignores an even more serious limitation upon the ability of an independent credit bureau to effectively switch vendors—the vendor-owned bureau. In the vast majority of geographic territories in which an independent credit bureau competes, one or both of the other credit bureaus are vendor-owned. Obviously, a vendor is not going to abandon its wholly-owned bureau (and the profits earned therefrom) to enter into an affiliation contract with a competing independent credit bureau, unless that independent bureau would offer a substantial increase in market share over what the vendor's wholly-owned bureau has.

The existence of a fourth and fifth vendor in the vendor-bureau market has always served to prevent any particular vendor from using its market power to control the price of services to an independent bureau. Without this protection, these vendors will dramatically increase their power over price and even, by the threat of refusing to do business, be able to seek to force such independent bureaus to sell out to the vendor.

*B. The Competitive Impact Statement Misunderstands The Mechanics Of The Credit Reporting Industry*

The Competitive Impact Statement further errs in its analysis of the entry barriers in the credit reporting industry and in its reliance solely upon the Herfindahl-Hirshman Index in measuring the anti-competitive effects of market concentration in this industry. Specifically, the Competitive Impact Statement ignores the fact that because the number of credit inquiries regarding an individual is an important factor to many credit grantors in determining whether to extend credit, and accordingly, a crucial factor in the value of a credit report, the bureau which receives the largest number of inquiries (and thereby reports those inquiries on its report) is the one perceived as the bureau selling the most useful report.

As the Competitive Impact Statement recognizes, the number of credit inquiries made respecting a particular individual is important information to credit grantors—it is established that the number of inquiries, and therefore credit activity, is an important indicator of the credit worthiness of the particular applicant. Perhaps just as importantly, the number of inquiries is perceived to impact upon the reliability of the credit report. The more frequently inquiries are made, the more often a bureau has had the opportunity to cross-check an individual credit history and thereby identify as relevant information contained in files listing a different address, marital status, or other identifying information. The credit grantors' preference for a bureau receiving the largest volume of inquiries (i.e., the bureau with the largest market share) significantly protects the market share of the dominant bureau. The Herfindahl-Hirshman Index simply does not measure this aspect of market concentration found rather uniquely in the credit reporting industry.

An example of the entrenchment a dominant firm enjoys at the credit bureau level is the experience of our own affiliated bureau in Cleveland, OH. We entered that market in 1982. In that market, our competitor enjoys an approximate 85% market share. We, on the other hand, despite having all tape and public record information (i.e., the type of information the Competitive Impact Statement deems crucial to its entry barrier analysis), have approximately 10% of the market. Our competitor charges $1.56 per report. We have charged as low as $.75, with no charge for inquiries in which no information is found, and yet have made no appreciable penetration into that market.

The Competitive Impact Statement fails to address this entrenchment of market shares in the credit bureau market. The effect of this entrenchment is to make it extremely difficult for any new entrant in a market to hope for market penetration even over the long term of more than 10%–15%. This barrier is obviously a significant disincentive to many potential entrants in this industry. Combined with the limited number of vendors available, if the acquisition is approved, it makes new bureau entries practically an impossibility. Moreover, as discussed below, such entrenchment profoundly limits the usefulness of requiring the sale of copies of bureau files as a vehicle to protect competition.

*C. Of The Possible Remedies To The Anti-Competitive Effects Of The Chilton Acquisition Outlined In The Competitive Impact Statement, The One Chosen Is The Least Efficacious*

The sum of the foregoing discussion is to point out that the Justice Department's proposed remedy to the anti-competitive effects of the Chilton acquisition simply will not prevent serious anti-competitive effects from resulting. The mere selling of copies of files and termination of affiliation agreements will have little impact in diminishing the anti-competitive effect of the acquisition. In our view, only enjoining the acquisition can completely prevent serious and irreparable harm to the vendor/bureau market in the credit reporting industry. At a minimum, the Justice Department should require divestiture of wholly-owned bureaus in those markets in which merger of bureaus will create significant market power in the remaining bureau.

That the Justice Department's current proposal will not remedy the anti-competitive injury which the Chilton acquisition will create is an inevitable conclusion from an informed understanding that the credit reporting industry is not a single market, but rather two distinct markets. The remedy of contract terminations and file sales does *nothing* to protect the more vulnerable market, the vendor-bureau relationship. In fact, in some instances this remedy reenforces the harm to this market that is inherent in the Chilton acquisition. For example, the requirement that TRW terminate its existing contracts with various independent credit bureaus primarily injures each independent bureau by forcing it to seek another, less established vendor. The bias against independent bureaus is plain—while requiring termination of numerous contracts with independent bureaus, the proposed Order does not require TRW to divest itself of a single wholly-owned bureau. Even in circumstances in which the Order requires TRW to sell off a copy of a particular file, it is not required to include the Chilton portion of the file, or to cease using information from either file in credit reports sold by its merged wholly-owned bureau. All TRW is required to do is sell off what will be perceived as a lower quality file of information to buyers who as yet have absolutely no foothold in the relevant markets and no assurance of continuing updated information.

The Competitive Impact Statement's discussion of the Department's rejection of other alternative remedies further reveals the misunderstanding of the workings of this industry. In rejecting the possibilities of requiring TRW to sell even some of its (or Chilton's) wholly-owned bureaus or of prohibiting TRW from keeping the whole merged TRW-Chilton files, the Department has failed to consider the overwhelming entrenching effect a large market share creates in this industry. Likewise, in

VOL 54 ISS 47 MR 13 1989 UMI

refusing to require TRW to sell new market entrants the combined TRW-Chilton file, the Department ignored the fact that credit grantors will inevitably perceive TRW to have more complete information, and thereby shun any purchaser of the "Chilton information only" file.

The articulated reasons for rejection of injunctive relief to prohibit the proposed acquisition even more blindly ignore the realities of the credit reporting industry. In concluding that the mere termination of vendor contracts and sale of file copies will create viable competition to TRW, the Department ignores the real barriers to entry this acquisition creates. Specifically, in markets in which affiliates are terminated, competition will decrease rather than increase, since existing independent bureaus will be forced into vendor contracts with a vendor new to an area, and likely having a smaller nationwide market share. The sale of file copies to a newcomer in a market in which the merger of Chilton and TRW bureaus has created a single bureau with overwhelming market power cannot be said, in this industry, to guarantee active competition. Rather, it guarantees an entrenched TRW bureau.

The effects of the proposed acquisition on the vendor-bureau market and upon independent bureaus is well illustrated by the acquisition's impact upon Credit Bureau Services of New Hampshire and the New Hampshire and Eastern Massachusetts markets. Credit Bureau Services of New Hampshire now uses Chilton as its vendor. Once the acquisition takes place, CBI/Equifax will take over as vendor. In the interrelated territory of Eastern Massachusetts CBI will have no immediate market (as opposed to Chilton's 40% share). Thus, in the market in which Credit Bureau Services of New Hampshiare does the vast majority of its wholesale business, it will be cut-off because of the elimination of Chilton as a possible vendor to it. Moreover, because the combination of TRW and Chilton will change the Eastern Massachusetts market from one in which their wholly-owned bureaus competed while holding roughly equal (i.e., 45–50%) market shares each into a market with one entrenched dominate (80–85% market share) bureau, Credit Bureau Services of New Hampshire, despite the Department's claims, will permanently lose a significant portion of the wholesale sub-market it now enjoys.

Similarly, other independent bureaus will be permanently harmed by this acquisition. Indeed, in any areas in which an independent bureau is presently affiliated with Chilton, and in which TRW and either Transunion or CBI/Equity do business, the independent bureau will always be confined to the new vendor it finds to contract with—no alternative will remain available. Only blocking the acquisition can prevent this permanent damage to competition.

In closing, we would note that the anti-competitive effects of the proposed acquisition have already reared their head. Credit Bureau Services of New Hampshire has for some years sought to provide its New Hampshire customers with the product they desire. Thus, when our customers have indicated they wish to obtain TRW credit reports for residents of Eastern Massachusetts, we have accommodated our customers. We have done so by obtaining the report through our affiliated bureau in Pittsburgh, Pennsylvania, which has contracted with TRW as a vendor. This practice is entirely permissible within our vendor agreement. Recently, however, and plainly in anticipation of its domination of the Eastern Massachusetts market, the TRW controlled Boston bureau has informed us that the wholesale price of its reports will increase from $.75 to $4.00 (i.e., by 533%). (Please see the attached letter of Pamela J. Lawlor to James McGinnis.) Plainly, this price increase is nothing more than an attempt to use TRW's new-found market power in Boston to leverage an increased market share throughout New England. We believe such abusive conduct is merely the beginning.

In order to supplement and clarify these concerns, we are in the process of obtaining expert economic advice and analysis. With such information, we will be supplementing these comments in the very near future. In the meantime, please do not hesitate to contact us for any clarification of these comments in the very near future. In the meantime, please do not hesitate to contact us for any clarification of these comments you would find helpful.

Very truly yours,

William H. Price,

Barry Grossman, Esq., Chief,
Communications and Finance Section, Antitrust Division, U.S. Department of Justice, Judiciary Center Building, 555 4th Street NW., Room 8104, Washington, D.C., 20001

Re: *United States v. TRW, Inc.*
Consent Decree

Dear Mr. Grossman: This letter contains the additional comments of CBC Companies regarding the Notice published in the **Federal Register** on December 2, 1988, as amended December 12, 1988, respecting the proposed Consent Decree in *United States v. TRW*, Case No. C88–4253 now pending in the United States District Court for the Northern District of Ohio. We transmitted CBC Companies' initial written comments to you on January 18, 1989, in the form of a letter from William H. Price, the President of CBC Companies.

We are offering these additional written comments to supplement and expand upon our client's concerns regarding the anticompetitive effects of the TRW acquisition and the proposed Consent Decree. As a concerned citizen and a customer of both TRW and Chilton, our client believes that the Consent Decree does not address the actual anti-competitive effects of the Chilton acquisition.

Our client has asked us to reiterate its grave concern with the harm it and other independent credit bureaus will suffer from the anticompetitive effects of the TRW acquisition of Chilton and the further anticompetitive effects of the proposed Consent Decree. Our client's position is that, at a minimum, the proposed Consent Decree should be modified to allow it and similarly situated credit bureaus to continue to contract, on a fair and reasonable basis with the successor to the Chilton/TRW operation, such as in the New England area. In addition, our client believes that unless the Consent Decree is modified to require the complete divestiture of either the Chilton or TRW credit bureau in Boston and like cities, the acquisition will not only impose severe economic harm on independent credit bureaus, but create an entrenched and dominant credit bureaus in various areas including Boston and large parts of New England.

In general, it is our view that the Consent Decree will not protect competition in at least the following respects:

(1) Although it attempts to deal with real competitive concerns, the Department's proposed Consent Decree is competitively and economically harmful relative to available alternatives and unduly disruptive and burdensome to CBC Companies and others in the industry.

(2) Under the Department's chosen "remedy" for the competitive problems caused by this acquisition, retail level concentration will in some cases rise dramatically and immediately. For example in Boston, the HHI will rise by about 4500 points and a near dominant firm is likely to be created at the credit bureau level.

(3) By reducing the number of vendors of data processing and networking services from four to three, the acquisition greatly increases concentration at the vendor/data processing level of the industry and thereby imposes a substantial risk of harm to competition, consumers, and to CBC Companies, a major purchaser of services from this level of the industry. As shown in our earlier comments, there are already indications of anticompetitive price increases.

(4) The proposed Consent Decree results in a market structure which imposes substantial additional costs on independent credit bureaus. For example, the New Hampshire operation of CBC Companies will be forced under the Consent Decree to obtain credit reports, an essential input, from a lower quality and less efficient supplier while allowing TRW to realize increased product quality and efficiency. Such a venture into "industrial policy making" is inconsistent with the Department's long held view that the free market should be permitted to determine an industry's structure.

(5) Imposing unnecessary cost increases on independent credit bureaus such as Credit Bureau Services of New Hampshire is itself harmful to competition, because it weakens the competitive constraints on the merged firm, which is likely to enjoy a near dominant position in various geographic regions of the United States, such as in parts of New England, including Boston.

Our client urges that the Department withdraw its proposed Consent Decree, and act to prevent consummation of the proposed acquisition until a reasonably equitable and genuine solution to the anticompetitive effects of the acquisition can be found. Our reasons for these concerns are set forth in the January 18th letter of William H. Price and in the following paragraphs.

**I. The Competitive Impact Statement Does Not Fully Reflect the Potential for Competitive Harm.**

As we have indicated in our earlier comments, we disagree with the Department's analysis of relevant markets and of the mechanics of the credit reporting industry. In our view, the Department's conclusions in these areas have apparently led it to underestimate the potential for competitive harm from the acquisition and choose, from legally and practically available remedies, the remedy that is least efficacious.

*A. The Department's Nearly Exclusive Focus on the Credit Bureau or "Retail" Level of the Industry, as Reflected in the Competitive Impact Statement and other Documents in this Matter, Leads to Understatement of the Competitive Dangers from the Acquisition.*

As our earlier comments indicate, the Competitive Impact Statement as well as other papers submitted by the Department in this matter do not reflect the very high (and increasing) market concentration at the vendor level in the credit reporting industry, or the impact to consumers and indepedent credit bureaus, such as those owned by the CBC Companies, of the loss of an independent source of supply and competition.

This vendor level, now occupied by only four firms will become a highly concentrated triopoly if this acquisition is consummated. According to the limited market data available to the CBC Companies, which our client believes provide reasonable approximations to national shares at the vendor level, on a national basis TRW now has about a 30 percent market share, CBI/Equifax has approximately 40 percent, Transunion has 20 percent, and Chilton 10 percent. Based on these figures, the present HHI at the vending level is 3000, far above any of the Department's enforcement thresholds, and TRW's acquisition of Chilton substantially increases this already extremely high concentration by 600 points, to 3600.

As the Department and its economists know, voluminous economic literature clearly indicates the importance of having a significant number of effective competitors in a market, and in general, three is considered to be too few. There is no generally accepted economic literature or legal authority indicating that, absent an acquisition of a failing competitor or creation of substantial efficiencies attainable only by the acquisition in question, such a concentration-increasing merger is likely to be pro-competitive.

An extensive economic analysis considering competitive risks, including the very real danger of collusion and market division at the vendor level in this industry, would be required to establish that such a concentration-increasing merger is not likely to substantially harm competition and consumers. As the Department's own *Merger Guidelines* clearly recognize, an even more extensive analysis would be required to show that purported *vendor-level* efficiencies from the acquisition could justify the real competitive risks. We believe the Department needs to further examine this concentration-swelling deal, the potential efficiencies (if any) due to combination of files and the potential competitive risks versus conceivable economic benefits at the vendor level.

Moreover, as the Department is aware, in 1988 CBI/Equifax contracted with ACS, another vendor, to take over all of its vendor functions, thereby reducing the number of independent vendors from five to four. The effect of this transaction needs to be considered.

The Department may feel that the geographic market-extension effects of both the CBI/Equifax-ACS transaction and TRW's proposed acquisition of Chilton entail significant competitive benefits and efficiencies. If so, we respectfully suggest that the Department has an obligation to discuss this rationale and the evidence on which it is based in the Competitive Impact Statement.

*B. The Competitive Impact Statement Discusses Entry Conditions Only at the Credit Bureau Level, and Should Also Consider Barriers to Entry at the Vendor Level.*

We also believe consideration needs to be given to possible entry barriers or other impediments to competition at the vendor level. We do not believe that the solutions to competitive problems identified in local markets for retail credit reports solved those problems at the vendor level.

It is clear that there are numerous barriers to entry and competition at both levels of the credit reporting industry. Particularly relevant barriers at the vendor level include the time, expertise, and capital involved in setting up computer operations, and credibility and reputation for reliability both with local merchants and financial institutions and national grantors of credit. Although such credit grantors spend substantial amounts on credit reports, the costs of credit information are quite small in

VOL 54 ISS 47 MR 13 1989 UMI

relation to the risks of, among other things, inaccurate information or inaccessibility due to computer crashes or problems in data transmission. Given these considerations, entry conditions at the vendor level need to be separately analyzed and considered to make any Consent Decree in this matter effective.

The Federal Trade Commission case ordering CBI/Equifax's predecessor firm to divest certain acquired credit bureaus provides support for the proposition that there are substantial entry barriers at both levels of the credit reporting industry *In the Matter of Retail Credit Company*, 92 F.T.C. 1 (1978). After hearing substantial testimony from industry officials, the administrative law judge reached the following finding:

There are substantial barriers to entry into credit reporting. They include the need for support and cooperation of merchants and credit grantors, adequate file information, experience in the credit reporting industry, sufficient capital, ability to offer competitive prices and services and, in certain markets, computer technology.

**Vorys, Sater, Seymour and Pease**

*In the Matter of Retail Credit Company*, Initial Decision, Findings of Fact, par. 119, (February 10, 1976) 92 F.T.C. 1, (1978) (Citations to testimony omitted).

Today, with computerization much more extensive, particularly at the vending level, the entry barriers at that level are undoubtedly higher than they were at the time the FTC considered the *Retail Credit Co.* case.

The only entry barrier the Department identifies in this entire industry is one at the credit bureau level—specifically, the time and cost involved in acquiring files of credit information. Apparently because of this view, the Department believes that requiring the sale of copies of files will alleviate any potential constraint on supply of services to users. The Department also apparently believes that severing certain contracts (such as CBC Companies' contract with Chilton in New Hampshire) and requiring that independent bureaus not deal with the merged firm will provide both demand pressures that will rapidly generate efficient and competitive entry and expansion. However, if access of file copies such as made available under the proposed Consent Decree is not the only barrier, this remedy will not be effective.

*C. The Analytical Focus and Proposed Remedy Are Apparently Based on a Faulty View of the Potential Barriers to Entry into the Retail Level of the Industry.*

The Department has identified one of the key requisites for effective competition at the credit bureau level of the industry: access on competitive terms to files of local credit information. Certainly, the time and cost of assembling a file of such information is a hurdle that any competitor must overcome. However, it is our client's belief, based on long experience in the industry, that such time and cost requirements impose much less of a restraint than they did in the past. As a result, while access to and cost of local files are important determinants of competitive success, such file access is far from the only barrier. The relevant competitive and economic question is not access to the "physical" requisites for producing a report (such as files and computers). Rather, the relevant inquiry is what are the real market requirements for gaining market acceptance.

The computerization of both the credit reporting industry and of many credit grantors has substantially reduced the time and cost investments involved in getting substantial amounts of local credit information. For example, when CBC Companies entered Cleveland in 1982, they were able rapidly to get substantial computerized files of local credit information on tape from banks and others. However, despite heavily discounted pricing, the Cleveland operation has yet to achieve a major market penetration. The reasons relate to the types of barriers cited above and noted in the FTC's *Retail Credit Co.* case, 92 F.T.C. 1 (1978).

Despite having substantial credit information, because the Cleveland operation was new, and CBC's office was small, the files had relatively little recent or current "activity" measured in terms of the number of credit grantor inquiries to the bureau. It is such very recent and ongoing inquiries which provide the cross-checks on file information which give a bureau the best credibility with local credit grantors. The importance of this file inquiry activity, in turn, explains why leading local credit bureaus maintain substantial shares in many areas.

Because credit grantors find file inquiry activity as well as the bureau's scale of local coverage so important, the proposed Consent Decree's requirement for the sale of file copies is unlikely to be of substantial or lasting competitive benefit. Our client's experience, reflecting broader marketplace realities, is that mere access to files as such does not give a firm the ability to compete effectively.

*D. The Department Uses Improper Definitions of Relevant Geographic Markets and Fails To Consider Interrelationships Among Geographic Areas.*

As discussed in our earlier comments, the Department assessed market concentration and the potential for competitive harm as well as the desirable parameters of relief based on analyses of local geographic markets. To be sure, under the standards enunciated in the *Merger Guidelines*, there are numerous localized markets for credit reporting services. However, this does not imply that *only* these localized markets are relevant for assessing the competitive impact of this transaction or of the proposed Consent Decree. Instead, numerous broader areas are highly relevant to the assessments which the Competitive Impact Statement is supposed to provide.

Although local credit bureaus and local information remain essential for many transactions and for many credit grantors, increased population mobility, ever-increasing use of nationwide mail and telephone ordering, and the widening geographic scope of many retail operations have increased the geographic scope of the information that a credit bureau must be able to provide. This both broadens the scope of certain relevant geographic markets and increases the potential importance of vendors covering appropriate geographic areas.

CBC Companies' situation in New Hampshire provides an illuminating example of the competitive importance of this broadening geographic scope of the industry. For many retailing operations, such as Filene's, New Hampshire might be considered, in effect, a "suburb" of Boston. A very substantial proportion of New Hampshire credit transactions are with residents of Boston and other parts of Massachusetts, as well as other states in the area. As a result, Credit Bureau Services of New Hampshire, is very dependent on credit information obtained through its contract with Chilton, through which it obtains all or most of its "Boston" reports from the Chilton bureau in that area.

CBC Companies estimates that about 35 percent of the reports its New Hampshire operations sell are "local reports" or inquiries about New Hampshire residents from credit grantors in that state. Since 15 percent of its reports are "inbound regional" or inquiries about New Hampshire residents from credit grantors in New England but primarily with offices in Boston, only about half of CBC Companies' New Hampshire reports concern local residents, and a substantial proportion of these reports come from outside the area and from grantors served in their own areas by other local bureaus.

A full 18 percent of our client's sales to New Hampshire credit grantors are "outbound regional" reports—inquiries from New Hampshire grantors about residents of other parts of New England, many from Boston. Thus, a substantial portion of CBC Companies' New Hampshire sales are dependent on Boston, and a major portion of the reports provided are based on information now purchased from Chilton. Given this relationship it makes little or no sense to assess competition in New Hampshire, Boston, or New England solely in terms of local concentration.

Such geographic interrelationships show that relevant credit reporting markets are not all local. The market relevant for assessing competition to provide credit reports to many New Hampshire merchants must include the Chilton Bureau serving the Boston area. The same logic shows that the relevant credit report market for many New Hampshire credit transactions must include the TRW Boston area bureau and other bureaus in various parts of New England and the Northeast.

**II. Harm to CBC and Other Independent Credit Bureaus From the Proposed Consent Decree.**

As the Department knows, the Credit Bureau Services of New Hampshire will be deprived of a supplier with whom it has had a long-term and successful relationship by the terms of the Consent Decree. It is our belief that the net effect of this contract termination is to make CBC a less effective competitor, and thereby reduce competition in New Hampshire. By being forced to deal with a new entrant in the Massachusetts credit bureau market, CBC will be able only to offer a less saleable product to its customers. The effect of the Consent Decree in New Hampshire thus will be not to create a more competitive market, but rather to decrease competition, by decreasing Credit Bureau Services of New Hampshire's ability to compete. It is our belief, therefore, that the termination of the Credit Bureau of New Hampshire's contract with Chilton Corporation after the acquisition will lessen the competition by weakening an effective competitor in the market.

Nor is the termination of contract approach, it would appear, consistent with the Department's determination that the sale of a file in a particular market will allow a new entrant sufficient entry into the market to compete effectively. Application of this concept to New Hampshire, it would appear to CBC, would dictate that TRW be required to sell its New Hampshire file, but Credit Bureau of New Hampshire be permitted to continue its contract with Chilton, or, in other words, negotiate with TRW for continuation of the Chilton contract in New Hampshire. After all, CBC is not a participant in the acquisition, and it would seem logical therefore to place the burden of remedying the anticompetitive effects in New Hampshire of the acquisition in New Hampshire by requiring a participant (TRW) to sell off its file. In our view, it is CBC, and not TRW, that is being required to subsidize the entry and expansion of vendors, such as CBI/Equifax, into the New England market. CBC and its customers will have to pay the price for the anticompetitive effect of TRW's acquisition of Chilton, rather than that cost being borne by TRW. Two solutions can correct this problem—requiring TRW to divest itself of the Chilton Bureau in Boston, or requiring TRW to sell a copy of its file in New Hampshire. In CBC's view, either alternative is preferable to making it pay the cost of correcting the anticompetitive effects of this acquisition.

In conclusion, we believe that the historical evidence does not support the effectiveness of selling a file as a remedy to the anticompetitive effects of this acquisition. Even if the Department is convinced, however, that such a sale will remedy the anticompetitive effects of this merger, CBC respectfully suggests that such a remedy could be applied in New Hampshire as well as in Massachusetts. We very much appreciate your attention to these comments.

Very truly yours,

**James P. Kennedy.**

Antitrust Division, U.S. Department of Justice, Judiciary Center Building,
555 4th Street NW., Room 8104,
Washington, DC 20001

RE: Proposed Consent Decree in *United States* v. *TRW, Inc.*, Northern District of Ohio (C88-4253)

**Dear Mr. Grossman:** I am submitting these comments on behalf of Rochester Credit Center, Inc. in response to the Notice published in the **Federal Register** by the Justice Department on December 2, 1988, which Notice was amended December 12, 1988. Rochester Credit Center is owned by a not-for-profit trade association, which in turn is owned by the entire credit-granting community, who share equally, through Board representation, their concerns for price, product, services and credit education within the community. The trade association, comprised of over 1,200 area businesses, owns the stock of Rochester Credit Center.

It is the position of Rochester Credit Center that the proposed consent decree in the above action will not prevent the anti-competitive effects that will result from the acquisition of Chilton by TRW. I speak specifically to the situation in Rochester, but I believe that the situation is the same in many other areas of the country referred to by the Justice Department in its complaint. In Rochester, it is clear to me that competition will reduced substantially if the terms of the consent decree are followed.

The Justice Department has concluded in the Competitive Impact Statement that the fact that credit vendors other than TRW and Chilton have "full files" will ensure that the number of competitors in the market will remain the same and that the market shares of various competitors will remain approximately as they were before the merger. For the reasons explained below, the presence of a "full file" is not a sufficient remedy to the ills engendered by this merger.

Rochester Credit Center also believes that with respect to its own situation, the proposed consent decree is inaccurate in one significant respect. It assumes that the termination date of the affiliation agreement between Rochester Credit Center and Chilton is June 1, 1990. As is explained later in this letter, this is not the case.

**Anti-Competitive Effect of Merger**

The Competitive Impact Statement correctly has recognized that the credit-reporting business is a highly concentrated market in which entry is very difficult. Further, in both its complaint and in its Competitive Impact Statement, the Justice Department recognizes that purchasers of consumer credit reports make their decision on which reports to buy primarily on the

VOL 54 ISS 47 MR 13 1989 UMI

basis of the quality and quantity of information in the reports.

Having recognized that the quality nd quantity of credit report information s critical, the Competitive Impact Statement concludes that so long as a credit vendor has a "full file", this is enough to satisfy the desire of purchasers of credit reports for files containing sufficient quality and quantity of information. In fact, the presence of a "full file", standing alone, does not mean that the credit grantor buying the report will deem that the file has the quality and quantity of information that it wants.

Essentially, the Competitive Impact Statement ignores the fact that while a file may be full, some files will be fuller than others. Moreover, the Competitive Impact Statement ignores the fact that for credit grantors, some names have much greater market recognition than others, and the Competitive Impact Statement also ignores how difficult entry is in the face of this name recognition.

*Quality and Quantity of File, and Name Recognition*

Paragraph "16" of the complaint filed in this action defines the information that constitutes a "full file". Rochester Credit Center does not disagree with this definition, but does disagree with the concept that one "full file" is the same as another. By way of hyperbole, an 11-man football team composed of staff personnel from Rochester Credit Center is a "full football team", but nobody would think that such a football team could compete with the San Francisco 49ers. Obviously, I do not mean to suggest that a vendor that has the "Full File" information referred to in Paragraph "16" of the complaint stands in the same relation to a vendor with a much better "Full File" as an office football team stands in relation to the Superbowl champions. However, I do mean to suggest that to credit grantors, some files are much fuller, and therefore much better, than others.

The competitive impact statement ignores an important element of market concentration, namely that the number of credit inquiries regarding an individual is a vital factor to most credit grantors when they are deciding whether to extend credit. Therefore, the credit bureau that receives the largest number of inquiries, and reports these inquiries on its report, is the bureau selling the most useful report. Its file is better than that of a competitor with a "Full File".

Not only is the number of inquiries, and therefore the credit activity, of a particular applicant an important indicator of the credit worthiness of the applicant, but it is also an important indicator of the reliability of the credit report. Under most circumstances, a credit grantor will prefer a credit bureau receiving the largest number of inquiries, which simply means the credit bureau with the largest market share. This preference among credit grantors will tend to protect the market share of the dominant bureau. In essence, a snowball effect is at work. A credit bureau with a large market share has that share because it has information desirable to credit grantors. They will turn to this bureau, thereby further enhancing the market share of that bureau.

The confidence that the credit grantor has in the name under which the local bureau does business is also an important factor that these credit grantors consider when deciding what bureau or credit vendor will be contacted for credit information. Since 1971, when Rochester Credit Center became an affiliated bureau of Chilton, each and every credit report has carried the name of Chilton within the context of the report. Rochester Credit Center has marketed its reports under the auspices of the Chilton Credimatic system, and substantial good will has been engendered for this name in the Rochester area, as I am sure it has in the other areas of the country. TRW and Chilton have recognized the value of the Chilton name in a letter they have sent to common TRW and Rochester Credit subscribers, advising them that Chilton will not become part of the TRW network in Rochester.

All credit grantors in the Rochester area are familiar with both the TRW and the Chilton reports. This familiarity will be a major advantage to the proposed TRW/Chilton entity in maintaining and attracting a greater market share. This same situation exists in the other areas referred to in the complaint and the Competitive Impact Statement.

Because credit grantors are familiar with the Chilton name, they will perceive it, and in most cases properly so, as being better. In trumpeting the fact that TRW will now have access to the best of both worlds—information from TRW and information from Chilton—TRW is marketing the Chilton name, a name developed in Rochester at great expense by Rochester Credit Center. We have no doubt that customers of Rochester Credit Center identify consumer credit reports by the Chilton name, much as a consumer using a moving van company recognizes it by the national name rather than by the name of a local carrier.

**Reduced Competition as a Result of Merger**

As a result of this proposed merger, markets in which affiliates are terminated, such as Rochester, will suffer a decrease in competition. Independent bureaus like Rochester Credit Center will have to enter into contracts with vendors new to an area, who totally lack the name recognition and the local file that leads credit grantors to certain vendors.

If the merger occurs, Rochester Credit Center's share of the market will drop dramatically. Given the way in which a company becomes entrenched in this market, it will be extremely difficult for Rochester Credit Center, whichever other national vendor it affiliates with, to develop any significant market share.

The Competitive Impact Statement recognizes that consumer credit reporting is subject to considerable economies of scale. Once a company has created a file that has the quantity and quality of information that credit grantors desire *and* the company has gained the confidence of consumers, it has a great cost advantage over a new entrant to the market. Any company considering entry into a market like Rochester must have the quality and quantity of information that goes beyond having a "full file," and must develop consumer acceptance. Consequently, a prior entrant can easily underprice it, and yet charge monopoly prices.

Indeed, the market for consumer credit reporting may be described as a natural monopoly. There are only three ways that another firm can hope to enter this market successfully. One is by use of a new, superior technology that allows it to offer the product demanded at a lower price. We know of no such technology in existence or on the horizon. The second possibility occurs when the market is expanding, the present monopolist is lazy and does not go after new business, and the new entrant can sign up new customers at a sufficiently rapid rate to overcome the costs of entry. This is unlikely to occur as Rochester is a stable community that has not grown much in the past nor is expected to expand much in the future. The third possibility results from the present monopolist giving such poor service that customers are willing to shift their business to a new entrant. We see no reason for this to occur, as we believe that TRW and Chilton provide good service to their customers.

As it happens, the Rochester area has been served primarily by a duopoly—two, roughly equal-sized firms, Chilton and its associated company, Rochester Credit Center, and TRW. They have been in a stable competitive equilibrium, from which users of their services have benefited. The proposed merger of Chilton and TRW will change this situation. TRW, combined with Chilton, will be in a position to drive Rochester Credit Center out of business. The newly-merged firm will have very deep pockets. It can afford to cut its prices and spend considerable sums on sales persuasion to take customers away from Rochester Credit Center. Ironically, Rochester Credit Center made this possibility more likely as a result of its significant and successful efforts over the years to develop market recognition for the Chilton name in this area.

Indeed, as I already mentioned, we have seen information disseminated by TRW heralding the fact that TRW will now have access to the best of both worlds—information from TRW and information from Chilton. As I explained, we have no doubt that customers of Rochester Credit Center identify consumer credit reports by the Chilton name, much as a customer using a moving van company recognizes it by the national name, rather than by the name of the local carrier.

Because of the Chilton name recognition, we expect that a significant number of customers will leave Rochester Credit Center and follow Chilton when it becomes part of TRW. It is reasonable to anticipate that this change will result in a significant shift in the current market concentration, and that TRW then will have a dominant share of the Rochester market.

TRW can take advantage of this dominant position by lowering its prices. Because of TRW's financial reserves, this decrease in prices will not likely cause it any harm. Ultimately, TRW will drive Rochester Credit Center out of business.

Of course, once Rochester Credit Center is out of the market, Rochester-area users of consumer credit reports will be left with a single supplier, TRW—a monopolist. Once it achieves this monopoly position, TRW will be able to raise its prices. At this point, entry by another firm will be very unlikely, unless one of the three REMOTE possibilities outlined above occurs. Credit grantors in the Rochester area then will have no alternative to TRW and will be forced to pay monopoly prices.

**Contractual Rights of Rochester Credit Center**

The Competitive Impact Statement assumes that Rochester Credit Center's contract with Chilton expires June 1, 1990. In fact, there is no such provision in the contract between these companies.

After receiving notice from Chilton that it intended to terminate Rochester Credit Center, I wrote to Van Smith, the President of Chilton, on November 30, 1988, asking him to specify for me the contractual language that gave Chilton the right to terminate Rochester Credit Center. He responded without specifying the contract in issue, and I wrote him again on December 15. At a later meeting with him, he acknowledged that a clarifying sentence had been left out of the Rochester Credit Center agreement, and that the agreement was ambiguous as to when it could be terminated. In fact, the agreement does not contain a specific date for termination, and Rochester Credit Center plans to litigate vigorously the position taken by Chilton and TRW that the Chilton contract with Rochester Credit Center expires on June 1, 1990.

While we recognize that this may not be a significant factor to the Justice Department, and that the Justice Department is far more interested in the competitive impact of the proposed merger, we did want to bring it to your attention.

**CONCLUSION**

We believe that an analysis of the market and a true understanding of the credit-reporting business demonstrates that the proposed merger will have significant anti-competitive effects in the Rochester area, and, we believe, in many other areas similar to Rochester. The alternative proposed in the consent decree does not, for the reasons explained, resolve the difficulty. Therefore, unless the Justice Department can develop some alternative that will permit the merger to go forward, while ensuring that competition will remain in areas such as Rochester, it is the position of Rochester Credit Center that the Justice Department should seek an injunction halting the merger.

We have set up a meeting for February 2, 1989 with officials at the Justice Department to discuss this matter further. At that time, we will be glad to answer any questions that representatives of the Justice Department have and discuss our comments in detail.

Very truly yours,

R. Gregg Helfer.

Barry Grossman, Esq., Chief,
Communications & Finance Section,
Antitrust Division, U.S. Department of Justice, 555 Fourth Street, NW.,
Washington, DC 20001

Re: *United States v. TRW, Inc.*, Civ. No. C88-4253 U.S. District Court for the Northern District of Ohio, Eastern Division

Dear Mr. Grossman: We are writing on behalf of Credit Data of Hawaii, Inc., a Hawaii corporation ("CDH"). We have been provided with the proposed Final Judgment and Competitive Impact Statement filed in the above-referenced matter.

On November 17, 1988, the United States Department of Justice ("Department") filed a civil antitrust complaint under Section 15 of the Clayton Act (15 U.S.C. § 25) alleging that the proposed acquisition of Chilton Corporation ("Chilton") by TRW, Inc. ("TRW") would violate Section 7 of the Clayton Act (15 U.S.C. § 18).

Simultaneously, the Department and TRW filed a stipulation by which they consented to the entry of a proposed Final Judgment ("Consent Decree"). On that same day, the Department filed its Competitive Impact Statement as required by the Antitrust Procedures and Penalties Act. The proposed Consent Decree approved the acquisition and required TRW to sell a copy of Chilton's consumer credit files in certain geographic areas, to sell a copy of Chilton's consumer credit files in other areas and to terminate contracts relating to the sale of network services for certain specified marketing areas, including Hawaii.

In accordance with the antitrust Procedures and Penalties Act, 15 U.S.C. § 16(b), CDH submits these comments on the Consent Decree.

As stated in the Complaint, the consumer credit reporting industry is already highly concentrated. There are currently four vendors of network services in the United States, including TRW and Chilton. (Complaint ¶ 15.) The merger of the two largest vendors of network services in the United States, leaving a total of three, raises serious questions of the continued viability of competition in the credit reporting industry. CDH, however, will focus these comments on the competitive situation in Hawaii.

The following portion of the proposed Consent Decree is the subject of this comment:

Unless such notice has already been provided, TRW is ordered and directed

VOL 54 ISS 47 MR 13 1989 UMI

to provide written notice to [Credit Data of Hawaii, Inc., Honolulu, Hawaii] of its intent to terminate contracts relating to the sale of network services for the marketing areas. . . .

It is CDH's position that the proposed final judgment should not be entered as it is not in the public interest. CDH believes it will either be unable to affiliate with or sell its files to another competitor, or if successful will not be able to compete with TRW/Chilton. Either result would be to the severe detriment of CDH. In CDH's view, the aspects of the proposed Consent Decree relating to Hawaii are likely to result in the near elimination of competition in this state. Much has been said about the dangers to competition posed by the increasing dominance of the two major forces in the credit reporting industry. However, the proposed consent judgment does not, at least in Hawaii, adequately deal with those problems.

*2. The Nature of the Credit Reporting Market*

Credit bureaus collect consumer credit information, store it in computers and sell it to credit grantors. Credit grantors use these consumer credit reports to determine whether to grant credit, or how much to grant, to individuals. Credit grantors usually receive consumer credit reports electronically through computer terminals. Vendors operate computer facilities that supply network services to credit bureaus. (Complaint ¶ 15.)

Currently, there are four vendors of network services in the United States, including TRW and Chilton. In 1988, the total United States credit reporting revenues of all vendors from the sale of network services and credit reports was about $410 million. (Complaint ¶ 15.) In 1987, TRW's sales totaled about $140 million and Chilton's totaled about $93 million. (Complaint ¶¶ 13, 14.)

Buyers purchase consumer credit reports primarily on the basis of the quality and quantity of information in the reports. (Complaint ¶ 18.) The Department claims that there is no substitute for consumer credit reports that a significant number of credit grantors would purchase in response to a small, but significant increase in the price of the reports. (Complaint ¶ 18.)

Entry into the business of providing consumer credit reports is difficult, time consuming and expensive. Generally, it takes three to five years to collect sufficient information to provide full file credit reports in a given market. Consequently, new entry by another party could not be accomplished rapidly enough in any relevant geographic area to prevent the anti-competitive results in this transaction.

Only credit bureaus that have comprehensive coverage in the local geographic area in which the consumer about whom a credit report is sought resides are considered sources of credit reports. Thus, the relevant geographic markets for purposes of an antitrust inquiry are local and bounded by the overlapping geographic areas covered by particular competing credit bureaus. (Complaint ¶ 19.) The relevant geographic market for purposes of CDH's concerns is the state of Hawaii.

*3. Background of Credit Reporting in Hawaii*

Prior to 1981, when CDH first entered into a credit-reporting contract with TRW, Chilton was the only national credit-reporting agency in Hawaii. In 1981, Chilton had been in business in Hawaii for a considerable period of time. It had developed a mature credit file. In large part, Chilton's file development and market position were possible because of Chilton's acquisition of the former Credit Bureau of Hawaii in the 1970's.

When CDH began operations, it was able to compete with Chilton only because of its relationship with TRW. Potential customers had no reason to tap the meager Hawaii file of CDH, unless they sought the large mainland file of TRW. Most important, TRW had and has significant files in the west coast. Because so many Californians relocate to Hawaii, credit customers sought access to the CDH/TW files.

After nearly eight years of developing its Hawaii credit information, CDH now has a mature file. Nonetheless, Chilton still maintains a more comprehensive local file.

When customers seek *only* local credit information, Chilton still maintains a competitive edge over CDH. CDH remains able to compete largely because of the strength of the TRW file behind it. The continued affiliation between TRW and CDH has enabled CDH to obtain roughly 30% to 35% of the market.

*4. Effect of the Final Judgment*

The Complaint alleges: "There are *two* credit bureaus that collect information for and sell full file consumer credit reports on individuals who reside in Hawaii. Based on the number of consumer credit reports sold, Chilton's owned office is the largest credit bureau and TRW's affiliate is the second largest." (Complaint, ¶ 24.)

The proposed consent judgment requires TRW to terminate its contract with CDH. According to the economic impact statement:

Termination of the affiliation agreements will ensure that the acquisition will have no effect on competition in the relevant geographic markets where the affiliates operate because affiliates will be free to enter into affiliation agreements with vendors other than TRW or Chilton. The terminated affiliates will have strong financial incentives to enter into new contractual relationships with a credit information data base service not fully represented in the local market. As a result, the number of competitors and their local market positions will remain substantially unchanged.

We respectfully submit that this view is misguided at the least and disingenuous at worst. It displays fundamental misunderstandings as to the nature of the credit reporting system in Hawaii.

First, the competitive impact statement concludes that there will be *no effect on competition* because the affiliates will be free to enter into affiliation agreements with other vendors. The conclusion that there will be no effect on competition presupposes two things: 1) not only will CDH be able to sell its file to or contract with another potential competitor, but also 2) that CDH acting alone or with one of the remaining potential competitors will be able to maintain the same market share that CDH/TRW now enjoys. Neither of these suppositions is well-founded.

While the two remaining potential competitors in Hawaii might be willing to purchase CDH's file, there is no assurance it can be sold. Right now, absent a TRW/Chilton merger, CDH has the right to enter affiliation agreements with any of the four competitors or potential competitors in Hawai. If the consent judgment becomes effective, TRW will have to terminate its agreement with CDH and will be prohibited from entering into an agreement with CDH for a period of 5 years. Chilton will no longer exist. Thus, instead of four competitors or potential competitors in Hawaii with whom CDH could contract, there remain at most two. At least one of the last competitors has a fledgling Hawaii file. It might not be advantageous to affiliate with CDH. Moreover, the remaining potential competitors might not have the interest in purchasing a file unless they are certain that the file can compete with the new TRW/Chilton file.

Even a cursory review of the market forces in Hawaii demonstrate the fallacy in the assumption that CDH will be able to successfully compete with the joint

TRW/Chilton. As set forth above, the success CDH has enjoyed in the recent past is a direct result of its relationship with TRW. CDH's less mature and less complete Hawaii file has been able to complete with Chilton because of TRW's west coast file. Certain customers now choose CDH/TRW because of its mainland files.

If CDH no longer has the TRW files to support it, it will be faced with attempting to compete head-to-head with the more established, more complete Chilton local file. If the TRW/Chilton merger goes through, the result for CDH will be even more devastating. A customer will now have the choice between a more mature Hawaii file (Chilton) coupled with a vast mainland file (TRW) or a young Hawaii file (CDH) possibly coupled with a weaker mainland file. To suggest that CDH once it is cut adrift, will retain the same market share as CDH/TRW, is naive.

To make matters worse, CDH/TRW now markets its services under the name of "TRW." Customers and potential customers are currently faced with the choice between Chilton or TRW. As stated above, credit grantors (or CDH customers) usually receive consumer credit reports electronically through computer terminals. In Hawaii, most credit grantors have been provided with terminals through which they may gain access to the credit bureaus. All new terminals are currently equipped with a number of buttons including one for Chilton and one for TRW. The name "CDH" does not appear on the computer terminals. Nor does it appear on the consumer credit report or the invoice. As far as most customers are concerned, TRW works alone. After the TRW/Chilton merger, many customers will not even know that the entity that was supplying the information under the TRW name is now independent or associated with another company.[1]

The inevitable result is that whatever market share CDH/TRW had will *not* simply shift to CDH with its new affiliate. It is far more likely that TRW will retain its share and add that to the Chilton market share.

*5. HHI*

In its Complaint, the Department stated that in 16 relevant markets (including Hawaii) the proposed acquisition would substantially increase concentration. The HHI, it reports, is currently greater than 3,200 and the acquisition of Chilton would increase the HHI by more than 700 points. (Complaint ¶ 20.)

In fact, based on the allegations in the Complaint, the HHI in Hawaii would be closer to 5,200.[2] CDH takes the position that the HHI is really somewhere in excess of 4,300.[3] Whatever figure is used, the market is considered highly concentrated based on the 1984 Department of Justice Merger Guidelines.

The increase in the HHI could be almost 4,000 if TRW and Chilton merge in Hawaii without limitation. Even with the ordered termination of the affiliation agreement between TRW and CDH, the HHI would undoubtedly rise.

Assuming that TRW/CDH has a market share of 35 percent, Chilton has a 55 percent share and a third competitor has a 10 percent share, the HHI is 4,350. If CDH affiliated with the third competitor and kept its entire market share the HHI would rise by 700 points. What is more likely, CDH might retain only a portion of its market share (*e.g.*, 20 percent) and TRW retain part (*e.g.*, 15 percent). That would leave TRW/Chilton with a 70 percent share and CDH with a 30 percent share. The resulting HHI would be 5,800 or an increase of 1,450. (As set forth above, it is unlikely that CDH would be able to retain a large market share without its TRW affiliation. The smaller CDH's share, the larger the HHI.)

According to the 1984 Merger Guidelines,

The Department is likely to challenge mergers in this region [above 1,800] that produce an increase in the HHI of more than 50 points, unless the Department concludes . . . that the merger is not likely substantially to lessen competition. However, if the increase in the HHI exceeds 100 and the post-merger HHI substantially exceeds 1,800, *only in extraordinary cases will such factors establish that the merger is not likely substantially to lessen competition.*

The merger of TRW and Chilton in Hawaii would result in a post-merger HHI *substantially* in excess of 1,800. The increase in the HHI would in all likelihood far exceed 100.[4] The Department cannot establish that the merger is not likely substantially to lessen competition.

The factors affecting the significance of market shares and concentration do not change the result. For example, this is not a market in which there are changing market conditions, nor is there ease of entry. Accordingly, the Department should have to show what extraordinary circumstances exist in Hawaii to allow competition to remain.

*6. The Consent Decree Should Not Be Approved Until The Department And TRW Demonstrate That CDH Can Remain a Viable Competitor*

To fulfill its obligations under the Antitrust Penalties and Procedures Act, 15 U.S.C. §16(e), the court must consider whether the public interest will be served by sanctioning a merger of the only two competitors in the consumer credit market in Hawaii. In support of the Consent Decree, the Department concluded that by ordering TRW to discontinue its affiliation with CDH, the competitive environment would remain unaltered. As set forth above, that is not the case.

In *United States v. National Broadcasting Co., Inc.*, 449 F. Supp. 1127 (C.D. Cal. 1978), the court, in approving a proposed consent judgment stated, "in evaluating a proposed consent decree, one highly significant factor is the degree to which the proposed decree advances and is consistent with the government's original prayer for relief." *Id.* at 1144. The court concluded that the "relief provided by the judgment is consistent with the government's general theory of liability as manifested in its complaint." *Id* at 1145. As a result, the court held "that the consent judgment, on balance, advances and is in the public interest." *Id.*

In this case, the government's original prayer for relief sought to enjoin the merger in order to protect competition. Thus, the court must determine whether the Consent Decree is consistent with that original prayer for relief. Since the effect of the Consent Decree is likely to substantially lessen competition, it should not be approved.

The Competitive Impact Statement fails to explain why other options were not considered with respect to the Hawaii market. Since CDH, without access to the TRW, files will have difficulty competing with TRW/Chilton, merely requiring TRW to terminate its contract with CDH will not result in continued competition in this state. In certain areas, the Consent Decree requires that TRW sell a copy of either the file it now owns or a copy of the file

[1] CDH will even be prevented from using the name "CDH" once the affiliation contract is terminated.

[2] This assumes that there are only two competitors in Hawaii with the following market shares: TRW—40 percent; Chilton—60 percent.

[3] Assuming TRW/CDH has a 35 percent share; Chilton has 55 percent and one or two others have 10 percent.

[4] Only if there are only two competitors in Hawaii and CDH retains its entire market share would the HHI remain the same.

VOL 54 ISS 47 MR 13 1989 UMI

it will acquire from Chilton to one of the other companies providing network services. The Competitive Impact Statement states that the Department considered but rejected the option of refusing to allow TRW to retain a copy of the consumer credit files that it must sell. It rejected this option claiming that if TRW can retain a copy of both the Chilton and TRW consumer credit files it can provide consumers with a higher quality product. However, that is basically the reason that competitors such as CDH will be unable to compete in the market.

The Department also considered and rejected requiring TRW to sell copies of the combined TRW/Chilton consumer credit files. The Department rejected this alternative because it believed that a copy of either firm's full file would be sufficient to enable the new firm to compete effectively in the relevant market. The reasons for rejecting this option were not well thought out. The Competitive Impact Statement stated, "The new firm will have all the credit information previously owned by one of the leading competitors in the market." As stated above, in Hawaii, that is not the case. If CDH is coupled with another competitor, CDH will have only the local component of its TRW/CDH files, whereas TRW/Chilton will have both the more mature Chilton files and the strong Chilton/TRW mainland files. CDH or others will remain unable to compete against these joint files.

There were other alternatives which the Department failed to accept. Since the Consent Decree as proposed by TRW and the Department will likely reduce competition in the state of Hawaii, the Consent Decree should not be approved.

If you have any questions about the foregoing or would like to discuss it with CDH, please do not hesitate to contact this office.

Very truly yours,

Margery S. Bronster.

*Deliver*

Barry Grossman, Esq., Chief, Communications and Finance Section, Antitrust Division, U.S. Department of Justice, 555 4th Street NW., Washington, D.C. 20001

Re: Proposed Final Judgment in *United States* v. *TRW, Inc.*

Dear Mr. Grossman: The comments in this letter are being submitted on behalf of Credit Data of Central Massachusetts, Inc. and Credit Data of Rhode Island, Inc. Neither of these firms is a party to the action which you have brought against TRW and neither of these firms has committed any offense under the laws of the United States. Yet, remarkably, they bear the burden of the relief sought by the proposed final judgment. I suggest that there is no precedent in case law or in the practice of the Antitrust Division for this result and it is manifestly unjust.

This matter arises out of the proposed acquisition of Chilton Corporation by TRW. The United States has filed a complaint under section 7 of the Clayton Act contending that the acquisition is unlawful in that it would lessen competition in the sale of consumer credit reports. The Antitrust Division has apparently negotiated a decree with TRW under which the Division would agree that the acquisition may be consummated. Although the decree or proposed final judgment drastically affects our clients, they have never been consulted by representatives of the Government. Indeed, so far as I know, they have never even been contacted.

The proposed final judgment reflects an assumption that there is particular concentration in certain defined geographic markets and that in these markets, TRW must agree to terminate existing affiliates. Credit Data of Central Massachusetts and Credit Data of Rhode Island are two such affiliates and they have been informed by TRW that their agreements will not be extended and will terminate on their respective anniversary dates in May and July of this year. I quote from a letter dated November 14, 1988 from TRW to Credit Data of Central Massachusetts (a copy of the full letter is attached):

"As I am sure you know, TRW is in the process of acquiring Chilton Corporation. Because of the size of the transaction, approval of the Department of Justice was required. As part of that approval process, we will be required to terminate our Computerized Credit Reporting Services Agreement made and entered into as of July 12, 1983 ("Agreement")."

It is just not right for such harm to be visited on an innocent party. We object to the inclusion in the proposed final judgment of provisions that require the severance of relationships between our clients and TRW. These provisions call for the destruction of our clients' existing business relationships and the harm is real and immediate.

Our clients have limited resources. Therefore, we request that you make our comments available to the Court before which this action is pending. We do not believe that a Court would find the proposed final judgment in its present form to be in the public interest.

Very truly yours,

William L. Patton.

**Exhibit G**

November 14, 1988.

Mr. Richard Downing, Sr., Credit Data of Central Massachusetts, Inc., 15 Howard Street, Framingham, Massachusetts 01701

Dear Mr. Downing: As I am sure you know, TRW is in the process of acquiring Chilton Corporation. Because of the size of the transaction, approval of the Department of Justice was required. As part of that approval process, we will be required to terminate our Computerized Credit Reporting Services Agreement made and entered into as of July 12, 1983 ("Agreement").

This letter is to notify you that if the acquisition of Chilton is completed, notice will be given pursuant to Section 11(b) of the Agreement that the Renewal Term will not automatically extend, and the Agreement will terminate on July 10, 1989, unless extended by mutual agreement with approval of the Department of Justice. If, for some reason the acquisition is not completed, we will notify you promptly.

If the Agreement terminates, TRW will use its best efforts to assist in a conversion of your data base to another credit reporting system, and we will work with you to make the transition as smooth as possible under the circumstances. Until that time, we will continue to provide you with the best support and service on the TRW System.

If you have any questions, please contract me directly.

Sincerely,

Edward A. Babiert, Ph.D.

*Vice President & General Manager TRW Credit Data.*

**Exhibit H**

February 8, 1989.

Mr. Barry Grossman Chief, Communications & Finance Section, Antitrust Division, U.S. Department of Justice, 555 4th Street NW., Washington, DC 20001

Dear Mr. Grossman: This firm has been retained by Centroplex Credit Reporting & Collections, Inc. (hereinafter referred to as "CCRC") which has offices in the Central Texas area and its principal place of business being 807 North 2nd Street, Killeen, Texas. This letter is being sent pursuant to the provisions of 15 U.S.C. Sec. 16(d) and is intended to be a comment on the proposed consent judgment submitted in cause no. C88-4253, styled United States of America vs. TRW, Inc. filed in the

District Court for the Northern District of Ohio, Eastern Division.

The substance of this letter is to notify the Justice Department and all parties concerned in the TRW acquisition of Chilton that the consent judgment as presently written contains errors in that it authorizes TRW to sell or transfer to Trans Union Credit Information Co. credit file information contained in the affected zip code areas which TRW does not have authority to sell or transfer. Therefore, CCRC is seeking to have the United States withdraw its consent to the judgment as presently written or in the alternative CCRC is seeking a modification of the consent judgment as presently written to eliminate the problems with the zip code regions affected by the agreement between TRW and CCRC.

**Background Regarding Relationship Between TRW & CCRC**

On July 7, 1987, CCRC and TRW entered into a computerized credit reporting service agreement for an initial term of five years. Pursuant to the terms of the agreement, there were a series of zip codes which were designated to be CCRC's data base. This data base included all of the credit information and records stored in the TRW system, no matter how or by whom collected which had a current address within the CCRC designated zip code area. A copy of those zip codes are attached as Exhibit One. Thiere also may be other zip codes affected by subsequent amendments to the agreement between CCRC and TRW.

By virture of the agreement entered into by CCRC and TRW, the credit information contained in the designated zip code areas became the property of CCRC. The agreement specifically provides that "CCRC's data base shall be the property of CCRC . . .". CCRC essentially bought TRW's corporate files for the affected regions. Since the date of the agreement, CCRC has continually updated and enhanced the credit information contained in the files for those zip code areas. This process has resulted in the expenditure of a great deal of manpower hours and expense on the part of CCRC.

The agreement further provides that TRW may purchase on an inquiry by inquiry basis the credit information contained in CCRC's data base. Likewise, CCRC may purchase on an inquiry by inquiry basis the credit information contained in the TRW data base. By virtue of this provision in the agreement, the parties recognize that each party owns the information contained in the respective data bases as separate and independent property.

The agreement also provides that the relationship between CCRC and TRW created by the agreement is not to be interpreted as a joint venture, partnership, or principal/agent relationship. Neither party has the right or authority to act for, or to assume, create or incur any obligation, liability, or responsibility of any kind, whether expressed or implied, against, in the name of or on behalf of, the other party.

**Effect of Consent Judgment on CCRC**

Paragraph V (A)(1) of the consent judgment provides that TRW has entered into an agreement to sell a copy of the consumer credit files for the geographic areas identified in attachment II of the consent judgment. More specifically, TRW has entered into a credit file sale agreement with Trans Union Credit Information Co. to sell zip code areas which are the subject of this comment letter. Those areas include some of the zip code areas which are designated CCRC data base information in the agreement between CCRC and TRW. A comparison of the zip codes designated as CCRC's data base in the agreement between TRW and CCRC and the zip code areas listed in attachment II of the consent decree reveals that at least the following zip codes are affected:

76626, 76500, 76529, 76531 through 76532, 76555 through 76556, 76575, 76581 through 76620, 76629, 76688, 76700.

There may also be other zip codes which could be affected by virtue of amendments to the agreement entered into between CCRC and TRW.

The competitive impact statement notes that TRW has entered into agreements to sell a copy of the file it *owns* to one of the other companies providing network services. Simply put, TRW has agreed to sell zip codes/data base information to a competitor of CCRC which it has no authority to sell. It has not asked for nor received CCRC's permission to sell such information.

Obviously, the sale of such information to a competitor of CCRC could have a direct and devastating effect on CCRC's operations. As noted throughout the competitive impact statement and consent judgment, the credit information contained in the credit files is extremely important in the day to day business of companies in the credit retrieval information business.

It is CCRC's position that the purpose of the proposed final judgment is to do what is in the public's best interest. Certainly it cannot be said that it is in the public's best interest to permit TRW to transfer property which rightfully belongs to CCRC and sell it to a competitor of CCRC. Once this credit data has been transferred and assimilated into a competitor's file, it may be virtually irretrievable and the damage sustained by CCRC could be devastating.

Therefore, CCRC would request that the United States withdraw its consent to the consent judgment in cause no. C88-4253, United States of America vs. TRW, Inc. or in the alternative, that the United States recommend a modification of the consent decree to eliminate the problems expressed in this comment letter.

CCRC is willing to provide any further information which United States Justice Department feels is necessary to adequately review this consent judgment including, but not limited to, the agreement entered into with TRW. Please feel free to contact me if you have any questions or comments.

Sincerely,

Robert T. Swanton, Jr.

**Exhibit 1—CCRC Area of Coverage**

CCRC's Zip Code Area for consumer credit reports will include the following zip codes:

*Texas*: 76500-76799, 76853, 76877, 78613, 78615, 78617, 78619-21, 78626, 78634, 78640-42, 78666, 78676, 78700-99.

**Exhibit I**

February 9, 1989

Barry Grossman, Esq., U.S. Department of Justice, Washington, DC 20001

Re: *United States v. TRW, Inc.*, Consent Decree

Dear Mr. Grossman: It has been called to my attention that the arrangements called for by the proposed consent decree in the referenced case could have an adverse, anticompetitive effect upon certain independent credit bureaus. In particular, the decree's requirement that Credit Bureau Services of New Hampshire terminate its arrangements for purchasing data processing and network services from Chilton Corporation (which would be acquired by TRW if the acquisition is approved) may unfairly deprive CBS-NH of the capacity to compete effectively.

I am concerned that the consent decree may inadvertently impose unwarranted and ultimately anticompetitive restrictions on CBS-NH. This would be unfair inasmuch as CBS-NH is not engaged in, or about to engage in, any anticompetitive activity or arrangements which are alleged to violate the antitrust laws in the Department's complaint.

As I understand the facts, the decree would hinder independent credit bureaus like CBS-NH from providing

VOL 54 ISS 47 MR 13 1989 UMI

full-service credit reporting to credit grantors. While the decree bars CBS–NH from access to the data processing and networking services it now obtains from Chilton, other sources of equivalent services are not readily available. As a result, CBS–NH stands to lose a sizeable portion of the wholesale sub-market it now services as an independent bureau.

In proposing arrangements to accommodate TRW's acquisition of Chilton, it seems counterproductive to impose restrictions which curtail the ability of independent credit bureaus like CBS–NH to compete effectively with credit bureaus wholly-owned by TRW and other large vendors.

I hope that the Department will give careful consideration to these concerns, as more fully expressed in the comments filed by CBS–NH in its submission to you dated January 18, 1989.

Sincerely,

Gordon J. Humphrey, USS.

**National Cooperative Research Act of 1984, CAD Framework Initiative, Inc.**

Notice is hereby given that, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), CAD Framework Initiative, Inc. ("CFI") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties to the venture and (2) the nature and objectives of the venture. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to section 6(b) of the Act, the identities of the parties to CFI and its general area of planned activity are given below:

The following entities are Corporate Members of CFI:

Advanced Micro Devices, Inc.
Alcatel NV
Apollo Computer, Inc.
AT&T Bell Laboratories
Bull, S.A.
CADENCE Design Systems, Inc.
Control Data Corp.
Daisy Systems Corp.
Digital Equipment Corporation
EDA Systems, Inc.
GE Aerospace
General Motors/Delco Electronics
Harris Semiconductor
Hewlett-Packard Company
Honeywell, Inc.
IMEC, VZW
Intergraph Corp.
International Computers Ltd.
Mentor Graphics Corporation
Microelectronics and Computer Technology Corporation
Motorola, Inc.
NCR Corp.
Nixdorf Computer AG
Objective Design, Inc.
Objectivity, Inc.
Robert Bosch GbmH
SCME Foundation Centers for Micro-Electronics
SGS Thomson Microelectronics
Siemens AG
Sony Corporation
Sun Microsystems
Texas Instruments, Inc.
Valid Logic Systems, Inc.
VIEWLOGIC Systems, Inc.
VLSI Technology
Westinghouse Electric Corp.

The following entities are Associate Members of CFI:

Delft University of Technology
Fraubofer AIS
Gesellschaft Fur Mathematik and Datenverarbeitung mbH (GMD)
Intel Corp.
PTT Research Nekar Laboratories
Semiconductor Research Corporation
Kenneth Bakalar
Bill Harding
David Jakopec
Moe Shahdad
Erwin Warabewsky

The objective of CFI is to develop industry acceptable standards, specifications and guidelines for design automation frameworks which will enable the coexistence and cooperation of a variety of computer hardware and software products used for computer aided design.

Joseph H. Widmar,

*Director of Operations, Antitrust Division.*

[FR Doc. 89–5682 Filed 3–10–89; 8:45 am]

BILLING CODE 4410–01–M

**National Cooperative Research Act of 1984, Semiconductor Research Corp.**

Notice is hereby given that, on January 30, 1989, pursuant to section 6(a) of the National Cooperative Research Act of 1984, Pub. L. 98–462 ("the Act"), Semiconductor Research Corporation ("SRC") filed a written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing certain changes in the membership of SRC. The changes consist of the deletion of GTE Laboratories, Incorporated, Ikonl Systems Group, Monsanto Company and Unisys from the SRC membership and the addition of SEMATECH, Inc.

SRC filed its notification of these membership changes for the purpose of extending the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to section 6(b) of the Act, the identities of the parties to SRC and SRC's general area of planned activity are given below.

SRC is a joint venture which, with the deletions and additions of the previously identified companies, comprises the following members:

Advanced Micro Devices, Incorporated
Applied Materials, Inc.
AT&T Technology, Incorporated
Control Data Corporation
Digital Equipment Corporation
E.I. du Pont de Nemours & Company
Eastman Kodak Company
Eaton Corporation
E–Systems, Inc.
General Electric Company/RCA
General Motors Corporation
Harris Corporation
Hewlett-Packard Company
Honeywell, Incorporated
IBM Corporation
Intel Corporation
LSI Logic Corporation
Micron Technology, Inc.
Motorola, Incorporated
National Semiconductor Corporation
NCR Corporation
Perkin-Elmer Corporation
Rockwell International Corp.
SEMATECH, Inc.

SEMI Chapter, the members of which are the following:

AG Associates
American Technical Ceramics
ASYST Technologies, Inc.
Coors Ceramics
Emergent Technologies Corporation
FSI Corporation
Genus, Inc.
Hercules Specialty Chemicals Company
Ion Implant Services
Lehighton Electronics, Inc.
Logical Solutions Technology, Inc.
MacDermid, Inc.
Micrion Corporation
Optical Specialties, Inc.
Pacific Western Systems, Inc.
Peak Systems, Inc.
Sage Enterprises, Inc.
The SEMI Group, Inc.
SILVACO Data Systems
SOHIO Engineered Materials Co.
Solid State Equipment Corp.
Technology Modeling Associates, Inc.
Thermco Systems, Inc.
VLSI Standard, Inc.
Silicon Systems, Incorporated
Texas Instruments, Incorporated
Union Carbide Corporation
Varian Associates, Incorporated
Westinghouse Electric Corporation
Xerox Corporation.

SRC's purpose is to plan, promote, coordinate, sponsor, and conduct research supportive of the semiconductor industry and directed toward:

1. Increasing knowledge of semiconductor materials and phenomena, and of related scientific and engineering subjects that are required for the useful application of semiconductors;

2. Developing new and more efficient designs and manufacturing technologies for semiconductor devices;

3. Identifying directions, limits, opportunities, and problems in generic semiconductor technologies;

4. Increasing the number of scientists and engineers proficient in research, development, and manufacture of semiconductor devices;

5. Increasing industry-university ties, establishing university semiconductor research centers with major long-term research thrusts, and developing university semiconductor research activities with more precisely defined, short-term objectives;

6. Developing more relevant graduate school education and a larger supply of graduate students in areas related to semiconductor technology;

7. Increasing the ability of universities to attract and retain competent faculty in the semiconductor field;

8. Decreasing fragmentation and redundancy in United States semiconductor research;

9. Establishing advanced research efforts for critical semiconductor technology areas that are beyond the individual resources of many SRC members; and

10. Promoting efficient communication of research results to SRC members and to the United States semiconductor community as a whole.

On January 7, 1985, SRC filed its original notification pursuant to section 6(a) of the Act. The Department of Justice ("the Department") published a notice in the **Federal Register** pursuant to section 6(b) of the Act on January 30, 1985 (50 FR 4281). SRC filed additional notifications on June 6, 1985, November 4, 1985, February 19, 1986, and September 11, 1987, notice of which the Department published on June 28, 1985 (50 FR 26850), December 24, 1985 (50 FR 52568), March 18, 1986 (51 FR 9287), and October 9, 1987 (52 FR 37849), respectively. SRC also filed additional notifications on December 19, 1988 and January 30, 1987; the Department published notice of both on February 13, 1987 (52 FR 4671). SRC also filed an additional notification on December 13, 1988, notice of which the Department published on January 13, 1989 (54 FR 1454).

Joseph H. Widmar,

**National Cooperative Research Act of 1984; Wet Welding at Greater Depths; Southwest Research Institute**

Notice is hereby given that, on January 30, 1989, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), Southwest Research Institute ("SwRI") filed a written notification simultaneously with the Attorney General and the Federal Trade Commission of a project entitled "Wet Welding at Greater Depths" disclosing (1) the identities of the parties to the project and (2) the nature and objectives of the project. The notification was filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plantiffs to actual damages under specified circumstances. Pursuant to section 6(b) of the Act, the identities of the parties to the project and its general areas of planned activities are given below.

The parties to the project are Amoco Corporation; ARCO Oil and Gas Company, a division of Atlantic Richfield Company; Chevron Corporation; Columbia Gas System Service Corporation; Exxon Production Research Company; Mobil Research and Development, Offshore Engineering; Shell Development Company, a division of Shell Oil Company; and Sun Exploration and Production Company.

The purpose of the project is to advance the state of the art of wet welding in order to develop the welding processes and consumables to a level where the welds are verifiably suitable for pipelines and critical platform members. The research and development program is designed to analyze the existing information on wet welding; to generate the information necessary to obtain an understanding of the problems of SMAW (Wet Shielded Metal Arc Welding) by experimental testing in a systematic manner; to evaluate the knowledge gained by manipulation of the welding consumables' (SMAW) composition and operating characteristics to overcome the existing shortcomings and fully test these principles; and to apply the knowledge from the SMAW tests to a different welding process (FCAW—Flux Cored Arc Welding) that could ultimately be automated for welding at great depth.

Membership in this group project remains open, and the parties intend to file additional written notification disclosing all changes in membership of this project.

Joseph H. Widmar,

*Director of Operations, Antitrust Division.*

## DEPARTMENT OF LABOR

### Office of the Secretary

### Agency Recordkeeping/Reporting Requirements Under Review by the Office of Management and Budget (OMB)

**Background**

The Department of Labor, in carrying out its responsibilities under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the reporting and recordkeeping requirements that will affect the public.

**List of Recordkeeping/Reporting Requirements Under Review**

As necessary, the Department of Labor will publish a list of the Agency recordkeeping/reporting requirements under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extensions, or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of the particular submission they are interested in.

Each entry may contain the following information:

The Agency of the Department issuing this recordkeeping/reporting requirement.

The title of the recordkeeping/reporting requirement.

The OMB and Agency identification numbers, if applicable.

How often the recordkeeping/reporting requirement is needed.

Who will be required to or asked to report or keep records.

Whether small businesses or organizations are affected.

An estimate of the total number of hours needed to comply with the recordkeeping/reporting requirements and the average hours per respondent.

The number of forms in the request for approval, if applicable.

An abstract describing the need for and uses of the information collection.

VOL 54 ISS 47 MR 13 1989 UMI

**Comments and Questions**

Copies of the recordkeeping/reporting requirements may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, telephone (202) 523-6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue NW., Room N-1301, Washington, DC 20210. Comments should also be sent to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for (BLS/DM/ESA/ETA/OLMS/MSHA/OSHA/PWBA/VETS), Office of Management and Budget, Room 3208, Washington, DC 20503 (Telephone (202) 395-6880).

Any member of the public who wants to comment on a recordkeeping/reporting requirement which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

**Employment and Training Administration**

**Job Training Partnership Act: Requirements for Acceptable Fixed Unit Price, Performance-Based Contracts**

**AGENCY:** Employment and Training Administration, Labor.

**ACTION:** Notice.

**SUMMARY:** The Department of Labor is publishing its official interpretation of the requirements for writing acceptable fixed unit price, performance-based contracts which conform to the cost classification provisions of 20 CFR 629.38(e)(2) of the Job Training Partnership Act (JTPA) regulations, and other pertinent sections of JTPA and JTPA regulations.

**EFFECTIVE DATE:** July 1, 1989, to coincide with the start of Federal Program Year 1989.

**FOR FURTHER INFORMATION CONTACT:** Dolores Battle, Administrator, Office of Job Training Programs, Employment and Training Administration, Room N-4469, 200 Constitution Avenue, NW., Washington, DC 20210; or call Robert N. Colombo, Telephone: (202) 535-0577.

**SUPPLEMENTARY INFORMATION:** The Department of Labor (DOL) is publishing the following official policy intepretation of the requirements for JTPA Title II and III agreements to serve adults and youth, which are fixed unit price, performance-based contracts

BEST COPY AVAILABLE

VOL 54 ISS 47 MR 13 1989 UMI

written under the provisions of 20 CFR 629.38(e)(2) in the current JTPA regulations. This notice follows a year-long public discussion of performance-based contracting in JTPA in a broad spectrum of forums, and in response to DOL's March 11, 1988, publication of an issues/options paper, and the August 9, 1988, publication of a proposed policy interpretation for public comment.

The March paper elicited a strong and noteworthy response from the JTPA system, in over 210 letters and position papers. These were studied and weighed by the Department prior to the August publication, which in turn generated 165 comments. The latest comments offered new points in reaction to the proposed policy interpretation and also made reference to views expressed earlier on performance contracting. The August-October comments have been fully considered by DOL in preparing the final official policy interpretation.

In a September 29, 1988, hearing of the U.S. House of Representatives' Committee on Education and Labor, a series of concerns were expressed by the General Accounting Office (GAO) that, based on results of a two-year study in progress, the JTPA system does not appear to have targeted services, particularly more intensive training, to those eligibles least ready to independently obtain jobs; that there is an important link between the quality of the training intervention provided to participants and their ability to be employed in higher skill jobs; and that on-the-job training contracts were identified which subsidized inappropriately long periods of training for jobs requiring less skilled workers.

At the same hearing, the Office of the Inspector General (OIG) of the Department of Labor provided its own independent assessment of training and accountability issues as a result of three years of its audit work. The OIG expressed concerns regarding the characteristics of participants, the impact of training received under JTPA, and the effect the OIG perceives performance-based contracting is having on program accountability. A more detailed discussion of the OIG's critique and their resultant conclusion regarding performance-based contracting will follow later in this notice.

Since a substantial number of Service Delivery Areas (SDAs) rely on performance-based agreements as their principal method of contracting for services, review of the record of JTPA programs to date in meeting the needs of at-risk individuals and the harder-to-serve portion of the JTPA-eligible population leads directly to questions concerning the impact of this particular contract mode and the impact of service provider procurement practices on overall program performance. During the past year, DOL has discussed this interconnection between performance contracting, whom the program serves, the quality of training intervention, and how Congress, the OIG and other auditors will adjudge the effectiveness of the JTPA system in addressing local and national needs for training and employment.

DOL believes that to an important extent the colloquy of the past year has been successful in developing both an appropriate policy and an understanding of the dynamics of performance contracting, and is proceeding to issue the official policy interpretation on 20 CFR 629.38(e)(2) with minor adjustments which respond to comments on the August proposed interpretation.

Since legislative proposals are now being entertained in the Congress which deal with JTPA administrative issues, including procurement, the JTPA system should be advised that this policy may serve as a interim step. A subsequent proposal for amendments to adjust JTPA in this and other areas may be made as well by the Department.

**Offical Policy Interpretation of the Requirements for Acceptable Fixed Unit Price, Performance-Based Contracts Written Under 20 CFR 629.38(e)(2)**

*Introduction*

This notice presents the Department of Labor's final official interpretation of the requirements for contracts written with JTPA service providers pursuant to 20 CFR 629.38(e)(2). It also identifies a number of policy provisions recommended for adoption by States which are not found within the specific language of 20 CFR 629.38(e)(2) and, therefore, are not required. These recommendations are, however, in the Department's judgment necessary and appropriate for the proper administration of fixed unit price, performance-based contracts given the nature of the JTPA system and of statutory design.

The official policy interpretation will follow the order of the August 9, 1988, publication of the proposed policy (53 FR 29961). The three main areas are:

—The nature of training activities properly chargeable under 20 CFR 629.38(e)(2);
—Issues surrounding current practices in the JTPA system for making payments to contractors; and
—The allowable uses for revenues in excess of costs (or "profits") realized through agreements with public and private non-profit agencies.

The statement of the official policy interpretation will be preceded by a summary of the comments received by the Department in response to the August 9 proposed policy interpretation, and by a listing of the principles which the Department followed in debating and formulating the final policy.

*Background on the Final Policy*

The policy now being issued in final form clarifies and provides greater detail regarding Federal expectations of how fixed unit price performance-based agreements are to be written under this regulation, but leaves the primary implementation of the regulation to States and to SDAs in accordance with State and local requirements and procurement codes. The decision to publish the final policy represents a continued commitment on the part of DOL to a Federal-State-local partnership between business and government to design and direct job training programs, and is consistent with original concepts for JTPA management. Since JTPA is now a mature program, with a track record of both successes and difficulties, DOL points to the general responsibility shared by all partners to address problems, and implement major adjustments and reforms as may be warranted by circumstances at the SDA, State, or national level.

In the final official policy interpretation, a good deal of flexibility has been maintained for non-Federal partners to manage JTPA under varied local structures, and to innovate in planning and operating programs as long as Federal concerns regarding the use of performance-based contracts are addressed, and there is effective compliance with procurement requirements, especially with requirements for competitive award whenever possible. SDAs and other JTPA entities which do not presently have sound procurement codes and systems in place are strongly urged to adopt new codes and modify procedures, after consulting with their State JTPA agency regarding the adequacy of any proposed system, and whether proposed changes are consistent with State policy.

DOL's official policy interpretation maintains the features outlined in the August proposed policy. Both vocationally specific and remedial skills training are authorized under the provisions of 20 CFR 629.38(e)(2) as long as training is designed to lead to placement in an occupational target. Benchmark payments for demonstrated participant attainments prior to participant placement can be the basis

of earned payments for contractors, which should facilitate greater investment in longer-term and more enriched programs for the harder-to-serve portion of the eligible population. Despite some sustained disagreement at the SDA and service provider levels with DOL's proposed policy to limit use of profits earned through performance-based agreements to additional JTPA activities, DOL's final policy defines properly earned revenues in excess of costs accrued by public and private non-profit agencies through JTPA contracts to be program income, which is to be used in accordance with JTPA regulations at 20 CFR 629.32. This will offer agencies who are successful in meeting or surpassing contract goals the incentive of gain through additional earned payments and flexibility in expanding JTPA services, but will preclude a loss in accountability for JTPA resources and possible abuse through the channeling of unrestricted-use profits into activities and enterprises not related to JTPA's statutory purpose.

Other references on performance-based contracting under JTPA include:

1. The March 15, 1983, implementation regulations for JTPA [48 FR 11061], which contained the provisions of 20 CFR 629.38(e)(2) governing the use of fixed unit price, performance contracts.

This section of JTPA regulations established conditions for contracts written for training that were fixed unit price and specified the following performance criteria for full payment:

Participants are to complete training:
—Be placed;
—In the occupation trained for;
—At not less than the wage specified in the agreement.

The source of this regulation was an administrative action on the part of DOL to transfer into JTPA an identical provision from the Comprehensive Employment and Training Act (CETA) regulations. The CETA regulation had been adopted after the enactment of the CETA Amendments of 1978, to give flexibility to certain private sector trainers to bid on a fixed price basis for performance-based training contracts without being required to break out the administrative cost component of their fixed price total.

2. The June 15, 1985 revision to JTPA Regulations (50 FR 24764), to incorporate a provision of section 131(d)(3) of JTPA on training packages for youth.

This revision resulted from section 7 of Carl Perkins Vocational Education Act of 1984, Pub. L. 98-524.

3. Training and Employment Guidance Letter (TEGL) 3-87 of November 18, 1987, entitled "Mounting Concerns Regarding 'Problem Contracts' Written under 20 CFR 629.38(e)(2)."

The TEGL resulted from a 6-month review to examine current practices in the JTPA system regarding administration of fixed unit price, performance-based contracts, and procurement systems in general. In some localities, a vacuum existed which made poor procurements, loosely written agreements not conforming fully to 20 CFR 629.38(e)(2), and questionable administrative arrangements possible. In the TEGL, DOL described a series of problems that had been identified with fixed unit price performance-based agreements, enumerated types of "problem contracts," and asked for the cooperation of States, SDAs and PICs to examine local contracting practices, focusing on compliance with procurement codes.

4. "Policy Considerations in Administering JTPA Regulations on Fixed Unit Price, Performance-Based Contracts," a February 1988 issues/options paper which was published as a Notice for 30-day comment in the **Federal Register** on March 11, 1988 (53 FR 7989).

This paper presented for public review and comment an analysis of the main issues and the Department's options for policy guidance and regulatory interpretation, or new rulemaking. The paper was released to public interest groups and was the basis for a briefing for Congressional staff from House and Senate Committees.

*Comments on the August Publication of the Proposed Policy*

Letters and detailed statements of comment were received from a total of 165 respondents, as follows:

31 States
59 Service Delivery Areas
13 Private Industry Councils
46 Service providers
7 National organizations/public interest groups
3 Members of Congress
2 Private citizens
4 Other

In general, comments were submitted by many of the same parties that had commented extensively on the March 11 Issues/Options paper publication, and commenters whose views on particular points had not changed referred to their earlier statements. Many commenters, especially a number of States, took an overall positive approach to the proposed policy, and their areas of agreement or acceptance of proposed policy were reflected in shorter comment statements. Most commenters noted DOL's evident commitment to consultaiton with its partners in the JTPA system, and DOL's incorporation of commenters' input in developing the proposed policy. There were, however, a substantial number of commenters remaining in disagreement with DOL's proposed policy, or specific portions of the proposed policy. Particularly at the SDA and service provider levels, objections were raised to any DOL policy which would limit local options in contracting under 20 CFR 629.38(e)(2) or in the use of excess revenues/"profits" generated by public and private non-profit agencies through fixed unit price, performance-based agreements.

Since the DOL official policy interpretation is of the existing JTPA regulations at 20 CFR 629.38(e)(2) and not a rewriting of JTPA regulations, a number of commenters raised potential difficulties that could develop during the conduct of audits of JTPA activities by SDAs, States, and by other auditors, should auditors apply the interpretation rather than the JTPA regulation itself in determining whether specific costs incurred under fixed unit price, performance-based contracts were allowable costs.

In the "Basic Principles" section of the Final Official Policy Interpretation, DOL has clarified that the regulation at 20 CFR 629.38(e)(2) and other applicable regulations are the proper basis for audit findings. The JTPA regulations do, however, grant binding status to the guidelines adopted by the Governor "to the extent such as consistent with Act and applicable rules and regulations" (20 CFR 627.1), and establish the authority of State rules and regulations in determining the allowability of costs (20 CFR 629.37(a)). Therefore, recipients and subrecipients operating fixed unit price, performance-based agreements must comply with Federal law and regulations, and State laws, regulations and guidelines for the purpose of audit. Importantly, this includes all State and local procurement codes and requirements in effect at the time of a JTPA procurement.

While the official policy interpretation is not intended to serve as a separate standard for the purpose of conducting financial audits, it is the official interpretation of the Department's regulations and could be brought to bear in an audit. DOL will apply this interpretation nationwide through oversight of State JTPA systems and programs. States are to use this interpretation and related State policy issuances when monitoring SDAs and their subrecipients, and in other State oversight activities.

VOL 54 ISS 47 MR 13 1989 UMI

Prior to the September 29 Congressional hearing, the Department's OIG commented formally on the August 9 proposed policy, recommending that the JTPA regulation at 20 CFR 629.38(e)(2) be eliminated. The OIG noted its position was based on "the result of a significant amount of audit work in the area of JTPA fixed unit price contracting," and its concerns that the intent of Congress regarding Section 106 of JTPA, "Limitations on certain costs," be met. The Employment and Training Administration respects the OIG's perspective and its concerns for accountability, but has recognized since the summer of 1987 that any regulatory move to eliminate fixed unit price agreements written under 20 CFR 629.38(e)(2) so as to be chargeable 100 percent to the training cost category would be profoundly disruptive to the JTPA system, both philosophically and practically. As indicated in earlier publications, the Department is fully aware of the strong preference on the part of many PICs for a rewards-sanctions, payment for documented performance approach in the procurement of service providers. This philosophy evolved early in the implementation of JTPA, as an extension of the performance standards-driven design of the Act, and pursuant to rules and guidelines for allowability of costs and for procurement issued by States under the Governor's authority.

As a practical matter, it would not appear possible to eliminate the provisions of paragraph (e)(2) of § 629.38, without full consideration of the likely impact on SDAs at this time, nearly 5 years after JTPA was implemented. Small and mid-sized jurisdictions, which chose to become service delivery areas and are now fully institutionalized and have private-sector volunteers committed to locally directed programs, would experience a serious crisis if the flexibility of 20 CFR 629.38(e)(2) were eliminated, and local public or private resources were not available to subsidize overhead. Any decision to return to mandatory allocation of all contract costs, including those written as fixed unit price, performance-based agreements, would, in the Department's view, occur most appropriately at the time of future legislative amendment, when this decision could be made in conjunction with overall considerations of the delivery system structure, the nature of costs, and desired program results.

The OIG further recommended in its comments that, should 20 CFR 629.38(e)(2) be retained, the regulation be amended to incorporate DOL's new clarifying language and standards of accountability directly into the regulation. The Employment and Training Administration (ETA) has openly discussed this possibility with the JTPA community during the dialogue of the past year, and has concluded that Federal efforts to obtain the cooperation of State and local partners to review and as necessary improve contracting practices have been largely successful. The response of the JTPA system, while frequently expressing misgivings about a perceived change in the Federal role, has impressed the Department with the commitment of the commenters to their programs, and the quality of study that has been directed towards the questions of performance contracting and procurement in general. It would appear that on a decentralized basis, States and SDAs have improved practices, initiated new policies, and have begun monitoring compliance with local, legally required procurement systems in a way that substantially addresses the OIG's valid interest in more complete accountability. The Department plans, resultantly, to take the OIG's recommendation for regulatory amendment under advisement, and await developments during the next program year to determine whether States, SDAs, and service providers have complied with the official interpretation of 20 CFR 629.38(e)(2), or whether a revision of the regulation specifying Federal-level definitions and controls is necessary.

**Training Activities Chargeable Under 20 CFR 629.38(e)(2)**

Taken together, commenters expressed strong support for the concept of core training in performance-based contracting, which may be either occupational training or basic skills/remediation training geared to make participants employment competent. In the final policy, DOL has clarified that the "retraining services" enumerated under Section 314(d)(1) of the Economic Dislocation and Worker Adjustment Assistance Act (EDWAA) (Title VI Subtitle D, Pub. L. 100-418, 102 Stat. 1107) will satisfy this *core* training requirement, with the exclusion of out-of-area job search and relocation (Section 314 (d)(1), items (D) and (E)). The final policy also emphasizes that core training must be the primary purpose of contracts written under the 20 CFR 629.38(e)(2) regulation.

A number of commenters, especially at the SDA and service provider levels, argued that it is impractical and prohibitively burdensome for the Department's interpretation to require that each contract separately price each training curriculum to be provided under a contract charged per 20 CFR 629.38(e)(2). Contracts may be written for program-year long training services from a community college, for example, without knowing in advance the specific training needs and, thus, curricula that individual JTPA participants will require to successfully compete for local employment. The Department has decided to accept the rationale offered by several commenters that a tightly drawn proposal for training can be constructed, based on planned types of training to be offered, the duration of each type, and instructional, material and facility costs involved. Such a proposal can specify a proposed fixed unit price for each type of training curriculum, which then can be assessed for price reasonableness during the analysis of proposed costs required by the State/local procurement system, prior to award. The final official policy interpretation has been adjusted accordingly.

The Department reviewed comments on the proposed policy's requirement for specification of the elements of training packages charged under 20 CFR 629.38(e)(2). The Department believes that the training package concept as outlined contains sufficient flexibility for service providers to tailor an individual participant's program, while requiring the level of detail needed for proposers to construct a price and the JTPA procurement officers to determine price reasonableness.

The August 9 proposed policy under "Specifications for acceptable contracts" did not, in the view of many commenters, adequately allow for the realities of on-the-job training (OJT) agreements. As was the case earlier in the development of DOL's performance-based contracting policy, the arguments put forth suggested that DOL rethink its position. DOL has in the past assumed that OJT agreements would most naturally continue to be in the form of cost reimbursable contracts written directly with private employer trainers, or in the form of cost reimbursable general contracts written with one agency, community organization, or for-profit entity which in turn develops and writes specific OJT contracts with interested employers. Having shifted to the performance contracting mode as the preferred method, many SDAs and PICs contract the OJT portion of their overall JTPA system using fixed unit price, performance-based contracts. DOL's proposed policy requiring contract specificity in OJT would apply equally to any general OJT contract written by an SDA, and commenters

pointed out that the policy as proposed would effectively preclude a performance-based general contract enabling small-sized contracts, geographically dispersed with rural employers, and contracts for immediate training positions developed with employers on a short turn around basis.

The Department has strongly encouraged maximal use of OJT in JTPA programs, research under JTPA and previous program legislation having demonstrated that this method of training on the average to be the most effective pathway to placement, retention and long-term wage gain for eligible trainees. Further, DOL understands that a general contractor is frequently used to market OJT, develop contracts, and often provide centralized participant recruitment, counseling services, alternative placement, if needed, and retention followup. Consistent with DOL's present emphasis, a general contractor might be responsible to provide ancillary basic skill remediation which the harder-to-serve portion of the local JTPA-eligible population may require in order to successfully participate in OJT. Given these considerations, the section "Specifications for acceptable contracts" has been revised to include a new discussion on OJT contracts, which lays out guidelines for acceptable general contractor arrangements for OJT written on a fixed unit price basis under 20 CFR 629.38(e)(2).

Most commenters endorsed DOL's recommendation that States establish policies for performance-based agreements to be structured to serve more of the harder-to-serve in the local eligible population, through expanded skill remediation capabilities and adjustments to the unit price to reflect costs and performance risks undertaken in successfully training and placing such persons. Several commenters stated that focus on the harder-to-serve might deflect JTPA away from higher skill job opportunities and the technical training needed to prepare for these jobs. The challenge to prepare the JTPA population for emerging jobs is generally recognized in the employment and training community to be an unavoidable dynamic of the changing labor market, and "creaming" strategies or low-investment training interventions, while possible in the short run, will in the longer run fail both local employers and local JTPA-eligible jobseekers. PICs and SDA managers can use their procurement process, whether through cost reimbursement or fixed price, performance-based contracts, to refocus their JTPA system on longer term interventions. An SDA's proposal solicitation can specify not only increased investment of JTPA funds in training, but also put a premium on outside training, services, and support that a proposer may be able to leverage with JTPA dollars, for a total approach that better enables participants to remain in and benefit from longer skill training.

The August 9 proposed policy's provision regarding umbrella contracts (and contracts termed "blanket" and "comprehensive service") caused a number of SDAs and several States with large rural districts to disagree. The Department believes that it is possible to write broad-based training contracts carefully so that the contracts conform to all of the requirements for acceptable fixed price contracts chargeable to training under 20 CFR 629.38(e)(2), with additional effort in proposal development and in procurement review. If it does not appear possible to conform with these guidelines within a given locality, it is not acceptable to the Department that such agreements be entered into, reflecting a lack of the full specificity regarding deliverables which is required for any contract to be priced during procurement. The Department will not make it easy to contract for undefined services by condoning the use of the administrative cost flexibility under 20 CFR 629.38(e)(2), so that such a contract is chargeable 100 percent to the training cost category. No change has been made, therefore, in this provision for the final policy interpretation.

**Payments to Contractors**

The body of comments on this section of the proposed policy were reviewed to determine what adjustments, in balance, should be made to arrive at a responsible final policy. The Department has made several adjustments.

On the question of the amount of the total contract that should be held back to "ride" on the full performance, placement record of the contractor, a national organization and a number of service providers expressed concern that SDAs and other contracting agencies may establish excessively high holdbacks that could drive service providers without other cash reserves out of the JTPA business. DOL understands the argument that excessively close-fisted policies also can actually drive up unit prices for the same deliverables, as a result of greater payment delay and carrying costs for those contractors willing to bid. Language has been added to the provision on payments withheld to suggest that States and SDAs consider these possible disincentives to community based service providers when establishing or revising their holdback policies.

One commenter raised an important question regarding the need of recipients and subrecipients to maintain records allowing for the proper allocation of costs charged to JTPA should a fixed unit price, performance-based contract be found not to have met the provisions specified at 20 CFR 629.38(e)(2), or should the contract have failed to meet a preestablished performance threshold and not qualify under State/SDA rules to be charged 100 percent to the training cost category.

In considering this comment, DOL has reviewed requirements that have applied to all of JTPA since the inception of programs under the Act. The March 15, 1983 regulations [48 FR 11080-11083] contain a number of important references to the types of records necesary for a subrecipient to collect and maintain in order to demonstrate compliance with the Act and those rules, interpretations and definitions adopted by the State in accordance with the Governor's authority (20 CFR 627.1). At 20 CFR 629.35, in paragraph (a), the Governor is directed to ensure that financial systems within the State provide fiscal control and accounting procedures sufficient to permit the tracing of expenditures to establish that funds have not been used in violation of any restrictions on their use. Paragraphs (e) through (f) of this subsection indicate the State's responsibility to see that all financial, participant and others records and supporting documentation are maintained for a period of three years.

The JTPA regulation at 20 CFR 629.38(a) and (b) provides that allowable costs shall be charged against the training, administration, and participant support cost categories, and properly allocated. Paragraphs (c) and (d) outline the Governor's responsibility to ensure that programs administered at the State level and the SDA level "plan, control, and charge expenditures against the afforementioned cost categories." This same language is repeated at 20 CFR 631.13(a)(1) and (2), in "Additional Title III Administrative Standards and Procedures." Therefore, States have an ongoing responsibility to issue specific cost accounting and recordkeeping requirements to SDAs and statewide programs within the State, so that all JTPA programs, including those contracted for on a fixed unit price, performance basis, can demonstrate expenditures have been controlled against applicable cost limits.

VOL 54 ISS 47 MR 13 1989 UMI

A related recordkeeping requirement regards the treatment of program income under State rules. Since as discussed elsewhere in this policy interpretation, revenue in excess of cost accrued by public and private non-profit agencies through performance-based agreements has been determined by DOL to be program income, State accounting and recordkeeping requirements established under 20 CFR 629.32, "program income" are to include a method for determining what amount of program income has been accrued by contractors, and a method for maintaining records on the expenditure of such income.

A number of commenters indicated difficulty accommodating themselves to the failed contract concept which was strongly recommended under "Threshold for Contract Performance in Order to Qualify for Provisions at 20 CFR 629.38(e)(2)." Among these commenters were several who make a strong case that "failed contracts" is in fact a front-end, procurement award problem, and noted that improved proposal review should eliminate service providers incapable of placement results. Other stated that contractors who achieve unacceptably low placement records will, under local SDA policies, earn very little payment. The Department introduced the concept in the August 9 publication precisely because it has been seen possible under some payment policies for a contractor to fail to place most participants per a performance contract's goals, but still be substantially reimbursed for costs.

In this circumstance, the Department does not believe the contract to be truly "performance based" and, therefore, concludes that the cost of such a failed contract should be allocated among the regular JTPA cost categories of administration, services, and training. In the proposed policy, the Department did not peg a performance threshold at which "failure" occurs, considering this question one best taken up by States and SDAs in the context of improvements to their procurement systems. Some SDAs with smaller allocations have indicated that the size of their normal 15 percent administrative budget does not allow much leeway should a contract written under 20 CFR 629.38(e)(2) be later deemed to fail, and find unacceptable the fiscal uncertainty that they might inadvertently exceed their administrative allowance and owe the Federal Government for an overexpenditure. After weighing these comments, the Department has adjusted the wording for this provision from "strongly recommends" to "recommends", with the suggestion that jurisdictions not able to incorporate this provision recognize the particular emphasis they must place on proposal review and on sound practices for payments earned prior to full performance.

The Department does not believe it prudent to endorse non-contingent benchmark payments for intake, enrollment, and assessment activities performed by contractors. Local policies can provide for up-front advances to contractors needing funds to cover this portion of their program, and advances can be offset by contractor earnings once measurable benchmarks involving participant attainments in actual training are achieved. On the other hand, the Department having accepted the extensive arguments offered by States, SDAs, and national organizations that benchmark payments for measurable pre-placement attainments could be legitimately earned if payment was made for documented benchmarks, there would appear to be no benefit to now encourage or require States to adopt policies advocated by one commenter which would treat all payments prior to full performance as a form of advance, not earned but contingent on placement.

In response to a number of commenters, the Department still believes that the matter of trainees who drop out prior to completing their training but who self-place in the general occupational field is relevant in determining what a contractor might earn for providing a segment of training before the participant quit the program and, therefore, should logically be reflected in a reduced full payment.

**Revenues in Excess of Costs Accrued by Public and Private Non-Profit Agencies**

The Department believes that the position taken in the August 9 proposed policy interpretation is the right position, and is not dissuaded from its position by comments received from a number of respected sources in the JTPA community. Properly earned revenues in excess of costs realized by public and private non-profit agencies through the provision of JTPA services under performance-based contracts should properly be classified as program income, and administered consistent with the purposes of JTPA and in accordance with State policy. The principle of gain is maintained; an agency earning program income has the flexibility to expand its JTPA activities, initiating additional training or experimenting with new training approaches. The concept of free-use profit, which could be diverted from JTPA purposes to other functions and purposes of an agency, is not acceptable to DOL nor to Congressional commenters, regardless of the worth of many of the intended non-JTPA related uses that have been described. The Department agrees with a number of commenters that the question of excessive profits is a separate and important question, applying equally to contracts with private for-profit service providers as well as private non-profit and public agencies excessive profits are controlled through strong procurement systems, which emphasize competition whenever possible; which require proposals to specify all training, services and other deliverables to be provided; which require contracts to be carefully written to preclude low-option services billed as full price interventions; and which carefully evaluate the reasonableness of proposed costs before contracts are awarded. To preserve the soundness of the JTPA system, it is necessary both to ensure that contractor profits are reasonable, given the risks and costs involved, and that public and private non-profit sector organizations do not divert JTPA's limited resources for other purposes.

**Official Interpretation of the Requirements of 20 CFR 629.38(e)(2)**

Basic Principles of the Department in Establishing an Official Policy Interpretation:

—The Department of Labor's overall objective is to provide operational guidance within the framework of the current 20 CFR 629.38(e)(2) regulation, but proper administration of performance-based contracts calls for the establishment of some new policies, which DOL will recommend for State adoption.

—Since the purpose of the policy interpretation is to provide operational guidance on the application of fixed unit price contracting under the existing JTPA regulation at 20 CFR 629.38(e)(2), it should be clarified that DOL did not prepare the policy interpretation to serve as a standard for conducting financial audits, but as the official interpretation of the Department's regulations, this policy could be brought to bear in an audit. Also, it should be noted that financial audits will continue to be performed based on the requirements of Federal law, the JTPA Act and regulations, and compliance with State law, State/local procurement codes and other applicable State/local policies (including provisions governing competition, sole-source awards,

proposal evaluation, documentation of the reasonableness of proposed costs, etc.). All State regulations and official policies issued pursuant to the Governor's authority to establish within-State requirements for JTPA programs provide an appropriate, legally binding basis for State and Federal financial audits.

—DOL will apply this policy interpretation through its oversight of State JTPA systems and program administration. States are to utilize the DOL policy interpretation and any related State policy issuances in conducting monitoring and State oversight of SDAs and subrecipients. DOL will also apply the policy interpretation in the field through the special review work and in-depth program reviews DOL conducts at the State and substate levels from time to time.

—There is no entitlement on the part of the system to the use of performance-based contracts per 20 CFR 629.38(e)(2). It is available only if DOL and State specifications for these contracts are met.

—Performance-based contracting can enhance the capabilities of the JTPA system only when it is implemented carefully within the structure of good State/SDA procurement systems and policies. Poor procurement systems, or failure to comply fully with systems undermines the validity of the concept. Performance-based agreements should be procured competitively, whenever practicable. It is the Department's expectation that sole-source procurements will be made in an objective manner and fully documented, in accordance with sound State/SDA systems.

—The Department continues to maintain that properly written, performance-based contracts under 20 CFR 629.38(e)(2) are not required to separately report or break out administrative costs for reimbursement or routine accounting purposes. However, as provided under JTPA regulations at 20 CFR 629.35 and subsections 629.38(a) through (d) and 631.13(a), sufficient records must be maintained to allow costs to be properly charged should the contractor fail to meet the provisions of 20 CFR 629.38(e)(2) or applicable State procurement policy.

—In exchange for the advantage offered by the performance contracting mode, the JTPA system must accept that risk is an inherent feature, both for service providers and SDAs.

—DOL is committed to maintaining the opportunity for rewards and incentives for successful operators, but recognizes that public and private non-profit agency excess revenue accruing from contracts must remain within the JTPA system.

—The new policy framework for performance-based contracts should be undertaken within the context of current policy objectives for the JTPA system, namely: increase the level of participation of at-risk populations in the program; increase the quality of the training intervention; expand the amount of basic skills training being provided; and thus improve the quality of placements for JTPA participants.

—The Department has undertaken the establishment of new policy on performance-based contracting collegially, making clear DOL objectives and DOL's rethinking and reformulation of issues, with the goal that the JTPA system fully understand and accept DOL's objectives even if there is not full agreement on all aspects of the Department's interpretation.

—Explicit instruction needs to be provided by both DOL and States on the elements necessary for an acceptable performance-based contract.

—It is clear that technical assistance is needed for procurement in general and specifically for the new performance-based contracting policy. This may include assistance to States in setting rules.

States and SDAs should implement DOL's interpretations and policy guidance regarding 20 CFR 629.38(e)(2) within the framework of the principles stated above.

*Elements of the Department's Interpretation*

I. Training Activities Chargeable

A. Definition of allowable adult and youth training activities for the purposes of 20 CFR 629.38(e)(2):

• Training must consist of a core of either occupational training or basic skills/remediation training, or both. For programs authorized under the EDWAA amendments to JTPA, core training will consist of the activities authorized under JTPA section 314(d)(1), "retraining services", with the exclusion of out-of-area job search and relocation (section 314(d)(1), items (D)(E)). The provision of core training activities must be the primary purpose of contracts written under this regulation governing fixed unit price, performance-based agreements charged 100 percent to the JTPA cost category.

• All training must be geared to make participants employment compentent and must be tied to a specific or a general occupational target. This training need not involve a specific job title, but can encompass a range of jobs with similar entry requirements.

• Placement must be at or above the specific wage in the agreement, and reflect an appropriate entry wage rate for the specific or general occupational target, given the relative skill level of trainees. Again, this can mean a range of jobs. For example, the skills needed for a data entry technician allow entry into jobs with different occupational titles and types of companies.

B. Clarification of the allowability of training packages for the purposes of 20 CFR 629.38(e)(2):

Acceptable elements may include but are not limited to outreach, intake, skill assessment and employability development planning, participant services, basic skills development, counseling, pre-employment/work maturity training, job search assistance, and followup services, provided that a core of basic skills and/or specific occupational training per I.A. above is the primary purpose of the contract. Also, the program must be designed for all participants to receive the core training.

C. Specifications for acceptable fixed unit price, performance-based contracts:

• In general, these contracts are to be written in accordance with sound procurement practices and applicable codes. This includes methods for assuring arm's length negotiation of contracts, proposal review which verifies and documents the reasonableness of proposed costs, and, whenever possible, competition for award.

• Each contract must clearly list and separately price each type of training curriculum to be provided. Curricula are to be priced by type, duration, and other factors governing instructional costs, material costs, or facility costs, and each contract must specify the fixed unit price of each type of planned training.

All elements constituting the training package must be clearly spelled out in the contract. This includes the course schedule for each element, the hours and/or the numbers of weeks of training, the expected number of participants who would require the element, the policy regarding non-completers and the measurable outcome.

• Pursuant to State/SDA policies, the contract must clearly indicate the organization which is providing the training, participant services and administration being charged to the contract. Care is to be given to assuring

VOL 54 ISS 47 MR 13 1989 UMI

that only those administrative costs attributable to the training are chargeable under the contract. However, DOL is not promulgating a Federal requirement stipulating that performance-based contract document separately list administrative costs, or requiring a separate reporting of actual administrative costs.

• Job Search Assistance (JSA) designs. Services and participant sequences that do *not* involve core training per I.A. above such as JSA-only interventions, are not chargeable under the 20 CFR 629.38(e)(2) regulation.

• On-the-Job Training (OJT). When written as fixed unit price, performance-based contracts rather than as cost-reimbursable agreements, it is recommended that contracts for OJT be written directly with the employer or other service provider whenever possible, particularly in the case of large contracts and those developed in advance. However, in order to facilitate the writing of small OJT agreements, especially contracts for one or small groups of trainees and to facilitate offering OJT through interested employers across large, less populated SDAs, it is also acceptable for OJT agreements to be developed during the program year pursuant to one general contract with a public agency, community based organization, or other JTPA service provider, provided that the general contract specifies the types and duration of OJT to be developed and other services to be performed so that proposed costs can be fairly analyzed, and that the awarding of the general contract is in accordance with State/local procurement requirements. Additionally, a general contract for OJT must identify whatever outreach, recruitment, participant training, counseling, placement, followup or other services the general contractor agrees to provide within its own organization, what will be provided by the employers actually conducting the OJT, and what planned services may be provided with or without cost by the other agencies and subcontractors. The general contractor must be required to ensure the reasonableness of all elements of subcontractor cost, and document its subcontract negotiations.

In addition to clear delineation of deliverables, providers, and costs, a general contract for OJT must be priced using some rational method, for example, based on local historical costs for OJT, and factoring in the cost of any enhancements through outside skill remediation or any new services planned to improve upon local OJT quality and placement retention.

• Further, it is strongly recommended that States establish policies for performance-based contracts to be designed to accommodate and encourage service to more at-risk populations. This might involve an additional adjustment to the unit price to provide increased financial incentive for training and placing a more at-risk population.

D. Allowability of Umbrella Contracts:

All contracts, including umbrella, blanket, or comprehensive service contracts must meet the requirements of elements I.A., B., and C. above in order to qualify for the cost charging provisions under 20 CFR 629.38(e)(2). The costs of fixed unit price, performance-based agreements which do not satisfy these requirements must be allocated among the normal JTPA cost categories of training, participant support, and administration.

E. Clarification Regarding Training Packages for Youth:

Contracts may be written under 20 CFR 629.38(e)(2) for training packages for youth, which stipulate full performance as attainment of one or more PIC-recognized competency skill areas per the list of positive outcomes found in Section 106(b)(2) of JTPA, or if the training results in employment.

**II. Payments to Contractors Under 20 CFR 629.38(e)(2)**

A. Full Payment. Full payment of the full unit price must be contingent upon:

• Completion of training;

• Placement in the occupation trained for or within a general occupational target;

• At not less than the wage rate specified in the agreement.

Also, the Department recommends (but does not require) that States/SDAs set a policy indicating this wage rate should reflect the entry level wage for the occupational target.

• The agreement must provide for a method to reduce payment in cases where individuals do not complete the training but do place successfully in an occupation specified, or complete the training and are placed below the specified wage level. For example, a participant is word processing drops out in the fifth week of a 10-week training program, but obtains a training related job within the general occupational target at or above the specified wage.

Further, the Department recommends (but does not require) that State/SDA policies provide that participants who leave before entering core training per I.A. above either

—Cannot be the basis of any payment earned by the contractor; or

—Are only the basis for earned payments that are apportioned or prorated among the regular JTPA cost categories, and not charged 100 percent to training.

B. Partial earned payments for attainment of performance benchmarks. The Department has determined that in specific circumstances performance short of full peformance/placement can be the basis of earned payments for partial performance when:

• The performance is measureable and documented and include training per I.A. above;

• The payment schedule amount for any intermediate benchmark is not more than the estimated costs of providing that increment of the planned training. However, the subtotal of possible payment schedule amounts for all performance benchmarks prior to full performance/placement must be clearly less than the point at which the contractor's costs are covered, in order to ensure the principle of contractor risk and to stimulate contractor performance to earn full payment.

• Costs associated with intake, enrollment and assessment activities alone without participation in core training can not be the basis of earned benchmark payments chargeable 100 percent to the training cost category per 20 CFR 629.38(e)(2).

C. Advance Payments. All payments made to contractors prior to full performance/placement that do not conform to the above requirements for benchmarks must be considered advances contingent on the full performance/placement record of the contract.

D. Guidance on Payments to be Withheld Prior to Full Performance. Whether payments made to contractors prior to full performance/placement are advance payments or partial earned payments for the attainment of performance benchmarks, in principle a significant portion of the total fixed price should be held back until earned through placement. States and SDAs have latitude to adjust the amount held back to accommodate longer-term and more intensive programs serving at-risk populations, recognizing the operational needs of contractors for funds. As a matter of general guidance, an amount equal to 25 to 30 precent of the total contract cost would appear to be a prudent and significant holdback level, well below reimbursement of total contractor expenses, and insuring that contracts are consistent with the performance-based contracting concept of risk prior to full performance.

Conversely, States and SDAs should recognize the disincentive effect that parsimonious payment policies and holdbacks might have on their potential JTPA service providers. A balance needs to be struck between natural PIC/SDA interests in ensuring contractor performance, and good judgment in administering policies that are amenable to responsible potential deliverers, including community based organizations.

E. Threshold for Contract Performance in Order to Qualify for Provisions at 20 CFR 629.38(e)(2).

In the Department's consideration of payment issues, it was determined that there is a level of contract placement performance below which the contract should be viewed as failed. Failed contracts should not be afforded under State/SDA policies the advantage of assigning all costs to training according to the provisions of 20 CFR 629.38(e)(2). Therefore, the Department recommends (but does not require) that States and SDAs define a threshold level of placement performance below which a performance-based contract written under 20 CFR 629.38(e)(2) would be determined to have failed. States and SDAs should establish procedures for properly charging of all costs of such failed contracts among the regular three JTPA cost categories. This threshold level should be appropriately specified, taking into account greater or lesser contractor risk in terms of length, complexity of training, and the population to be served by a contract.

F. Direct Contracts Versus Tiered Administrative Structures. Contracts which qualify for the cost allocation provisions of 20 CFR 629.38(e)(2) are contracts for the direct provision of training by an agency, institution, or business, and must not, with the exception of OJT as dicussed in section I. of this policy interpretation, involve intermediary administrative entities. Such an entity, if needed, are to be charged to the administrative cost category. This element of DOL's interpretation does not preclude subcontracting on a fee payment or on a cost reimbursement basis by the training contractor of some specialized client services if this is determined to be more effective and efficient, and is authorized by State/SDA policies and the contract document.

**III. Revenues in Excess of Costs, or "Profits"**

Public or private non-profit contractor revenues in excess of costs (which have been properly earned) are to be treated as program income pursuant to 20 CFR 629.32. Accordingly, these funds may be retained by the service provider (or by the SDA or the Governor) to underwrite additional training or training related services pursuant to the project or program which generated them, consistent with the purposes of JTPA. As with other JTPA program income, contractors are to comply with State accounting and recordkeeping requirements, so that the amount of program income accured by the contractor can be determined, and the contractor maintains records which account for the use of these funds, in anticipation of possible audit.

**Conclusion**

The above final official policy interpretation on contracting under the 20 CFR 629.38(e)(2) regulation follows a long consultative process during which the Department, and later other Federal agencies, have presented concerns regarding the acceptability of some of the applications extant in the JTPA system, and have raised larger and related questions about procurement practrices in general, and what training the JTPA system produces for eligible persons needing training and jobs. States, SDAs and private sector volunteers who partner with the Federal Government and make JTPA happen have shared a considerable amount of information with the Department describing the realities of training contracts, and how they believe the flexibility 20 CFR 629.38(e)(2) can be legitimately used. Commenters have touched on nearly all aspects of program operations in their correspondence, given the extent of performance contracting today. The Department appreciates the great amount of thinking that went into the response from the system, and particularly the effort to have performance-based contracting understood in context. DOL believes that States and SDAs have exhibited a willingness to respond not only with discussion, but with changes and improvements that are now completed or in progress. The dialogue has been very educational for DOL, and as the Department developed a better understanding, it has been possible to update the agency's thinking on performance contracting and adopt modified policies without losing sight of Federal concerns for sound and defensible practices. The process of developing the final policy interpretation has been brought to this point without a modification to the present JTPA regulation at 20 CFR 629.38(e)(2), or a change in the basic partnership arrangement for the administration of JTPA which the 1983 regulations established.

Signed at Washington, DC, this 8th day of March 1989.

## Mine Safety and Health Administration

**[Docket No. M-89-16-C]**

### SBM Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

SBM Coal Company, R.D. 2, Box 97A, Hegins, Pennsylvania 17938 has filed a petition to modify the application of 30 CFR 75.1400 (hoisting equipment: general) to its M & R Slope (I.D. No. 36-05495) located in Northumberland County, Pennsylvania. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that cages, platforms or other devices which are used to transport persons in shafts and slopes be equipped with safety catches or other approved devices that act quickly and effectively in an emergency.

2. Petitioner states that no such safety catch or device is available for the steeply pitching and undulating slopes with numerous curves and knuckles present in the main haulage slopes of this anthracite mine.

3. Petitioner further believes that if "makeshift" safety devices were installed they would be activated on knuckles and curves when no emergency existed and cause a tumbling effect on the conveyance.

4. As an alternate method, petitioner proposes to operate the man cage or steel gunboat with secondary safety connections securely fastened around the gunboat and to the hoisting rope, above the main connecting device. The hoisting ropes would have a factor of safety in excess of the design factor as determined by the formula specified in the American National Standard for Wire Rope for Mines.

5. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

**Request for Comments**

Persons interested in this petition may furnish written comments. These comments must be filed with the Office

VOL 54 ISS 47 MR 13 1989 UMI

of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before April 12, 1989. Copies of the petition are available for inspection at that address.

Dated: March 2, 1989.

**Patricia W. Silvey,**

[Docket No. M-89-18-C]

**Whitley Gap Mining, Inc.; Petition for Modification of Application of Mandatory Safety Standard**

Whitley Gap Mining, Inc., P.O. Box 120, Gray, Kentucky 40734 has filed a petition to modify the application of 30 CFR 75.313 (methane monitor) to its Mine No. 1 (I.D. No. 15-16210) located in Knox County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that a methane monitor be installed on electric tractors used to load coal at the face. The monitor is required to be kept operative and properly maintained and frequently tested.

2. No methane has been detected in the mine.

3. The three-wheel tractors are permissible DC-powered machines, with no hydraulics. The bucket is a drag type, where approximately 30-40% of the coal is hand loaded. Approximately 20% of the time that the tractor is in use, it is used as a man trip and supply vehicle.

4. As an alternate method, petitioner proposes to use hand-held continuous oxygen and methane monitors instead of methane monitors on three-wheel tractors. In further support of this request, petitioner states that:

(a) Each three-wheel tractor would be equipped with a hand-held continuous monitoring methane and oxygen detector and all persons would be trained in the use of the detector;

(b) Prior to allowing the coal loading tractor in the face area, a gas test would be performed to determine the methane concentration in the atmosphere. When the elapsed time between trips does not exceed 20 minutes, the air quality would be monitored continuously after each trip. This would provide continuous monitoring of the mine atmosphere for methane to assure the detection of any methane buildup between trips;

(c) Each monitor would be removed from the mine at the end of the shift, and would be inspected and charged by a qualified person. The monitor would also be calibrated monthly.

5. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

**Request for Comments**

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before April 12, 1989.

Copies of the petition are available for inspection at that address.

Date: March 2, 1989.

## NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES

**Agency Information Collection Activities Under OMB Review**

**AGENCY:** National Endowment for the Arts.

**ACTION:** Notice.

**SUMMARY:** The National Endowment for the Arts (NEA) has sent to the Office of Management and Budget (OMB) the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

**DATE:** Comments on this information collection must be submitted by April 12, 1989.

**ADDRESSES:** Send comments to Mr. Jim Houser, Office of Management and Budget, New Executive Office Building, 726 Jackson Place, NW., Room 3002, Washington, DC 20503; (202-395-7316). In addition, copies of such comments may be sent to Mrs. Anne C. Doyle, National Endowment for the Arts, Administrative Services Division, Room 203, 1100 Pennsylvania Avenue, NW., Washington, DC 20506; (202-682-5401).

**FOR FURTHER INFORMATION CONTACT:** Mrs. Anne C. Doyle, National Endowment for the Arts, Administrative Services Division, Room 203, 1100 Pennsylvania Avenue, NW., Washington, DC 20506; (202-682-5401) from whom copies of the documents are available.

**SUPPLEMENTARY INFORMATION:** The Endowment requests a review of a new collection of information. This entry is issued by the Endowment and contains the following information:

(1) The title of the form; (2) how often the required information must be reported; (3) who will be required or asked to report; (4) what the form will be used for; (5) an estimate of the number of responses; (6) the average burden hours per response; (7) an estimate of the total number of hours needed to prepare the form. This entry is not subject to 44 U.S.C. 3504(h).

*Title:* Resource Information/ Accessible Programs.

*Frequency of Collection:* Annually.

*Respondents:* State or local governments.

*Use:* Materials and information compiled will be used to assist Endowment grantees in making their programs more available to special constituencies. Individuals requiring assistance would be referred to a specific program in their state or region and/or sent copies of the information provided.

*Estimated Number of Respondents:* 56.

*Average Burden Hours per Response:* 2.

*Total Estimated Burden:* 112.

**Anne C. Doyle,**

*Administrative Services Division, National Endowment for the Arts.*

## NATIONAL SCIENCE FOUNDATION

**Meeting; Engineering Advisory Committee**

The National Science Foundation announces the following meeting:

*Name:* Advisory Committee for Engineering.

*Date and Time:*

March 30-31, 1989

9:30 a.m.-4:45 p.m., March 30, 1989 (open)

8:00 a.m.-9:00 a.m., March 31, 1989 (closed)

9:00 a.m.-12:00 Noon, March 31, 1989 (open)

*Place:* National Science Foundation, 1800 "G" Street, NW., Room 540, Washington, DC 20550.

*Type of Meeting:* Partially Closed.

*Contact Person:* Mrs. Mary Poats, Executive Secretary, Advisory Committee for Engineering, Room 537, National Science Foundation, Washington, DC 20550, Telephone: (202) 357-9571.

*Minutes:* Mrs. Mary Poats at the above address.

*Purpose of Meeting:* To provide advice, recommendations, and counsel on major goals and policies pertaining to Engineering programs and activities.

*Reason for Closing:* The personnel matters being discussed include information of a personal nature where disclosure would constitute unwarranted invasions of personal privacy. These matters are within exemption 6 of U.S.C. 552b(c), Government in the Sunshine Act.

*Authority to Close Meeting:* The determination made on February 22, 1989 by the Director of the National Science Foundation pursuant to the provisions of section 10 (d) of Pub.L. 92-463.

*Agenda:*

*Friday, March 31, 1989, Room 540—8:00 a.m. to 9:00 a.m.—Closed*

Discussion of personnel issues.

*Thursday, March 30, 1989, Room 540—9:30 a.m. to 4:45 p.m., and Friday, March 31, 1989, Room 540—9:00 a.m. to 12:00 Noon—Open*

Discussion on issues, opportunities and future directions for the Engineering Directorate; discussion of Engineering Directorate budget situation as well as other items.

**M. Rebecca Winkler,**

*Committee Management Officer.*

**Advisory Panel For Physiological Processes; Meeting**

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92 463, the National Science Foundation announces the following meeting:

*Name:* Advisory Panel for Physiological Processes.

*Date and Time:* April 3-7, 1989 8:30 a.m. to 5:00 p.m.

*Place:* Room 1243, National Science Foundation, 1800 G Street NW., Washington, DC 20550.

*Type of Meeting:* Part Open—

April 4-12:00 p.m.-1:00 p.m. (open)

April 5-12:00 p.m.-1:00 p.m. (open)

April 6-12:00 p.m.-1:00 p.m. (open)

All other times the meeting is closed.

*Contact Person:* Dr. Ernest J. Peck, Program Director, Physiological Processes, Room 321, National Science Foundation, Washington, DC 20550, Telephone (202) 357-7975.

*Purpose of Advisory Panel:* To provide advice and recommendations concerning support for research in Physiological Processes.

*Agenda:*

*Open*—General discussion of the current status and future plans of the Physiological Processes Program.

*Closed*—To review and evaluate research proposals as part of the selection process for awards.

*Reason for Closing:* The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

**M. Rebecca Winkler,**

*Committee Management Officer.*

## NUCLEAR REGULATORY COMMISSION

**Documents Containing Reporting or Recordkeeping Requirements; Office of Management And Budget Review**

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Notice of the Office of Management and Budget review of information collection.

**SUMMARY:** The Nuclear Regulatory Commission has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Type of submission—new, revision, or extension: Extension.

2. The title of the information collection: Reactor Operator and Senior Rector Operator Licensing Training and Requalification Programs.

3. The form number if applicable: N/A.

4. How often the collection is required: Semi-annually and annually.

5. Who will be required to asked to report: All reactor licensees and applicants for an operating license.

6. An estimate of the number of responses: 209 annually.

7. An estimate of the total number of hours needed to complete the requirement or request: 1,099 annually; approximately 7.7 hours per response.

8. Section 3504(h), Pub. L. 96-511 does not apply.

9. Abstract: Requests copies of training and requalification material from reactor licensees/applicants. This training material will be used by appropriate NRC staff to develop operator and senior operator licensing and requalification examinations.

**ADDRESS:** Copies of the submittal will be made available for inspection or copying for a fee at the NRC Public Docment Room, 2120 L Street, NW., Washington, DC.

**FOR FURTHER INFORMATION CONTACT:** Comments and questions can be directed by mail to the OMB reviewer: Nicolas B. Garcia, Paperwork Reduction Project (3150-0101), Office of Management and Budget, Washington, DC 20503.

Comments can also be communicated by telephone at (202) 395-3084.

NRC Clearance officer is Brenda J. Shelton, (301) 492-8132.

Dated at Bethesda, Maryland, this seventh day of March, 1989.

For the Nuclear Regulatory Commission.

**Joyce A. Amenta,**

*Designated Senior Official for Informatice Resources Management.*

[Docket No. 40-8964]

**EXXON Coal and Minerals Co.; Final Finding of No Significant Impact Regarding Termination of the Source and Byproduct Material License for Operation of Highland In-Situ Pilot Test Project, Converse County, WY**

March 2, 1989.

**AGENCY:** U.S. Nuclear Regulatory Commission.

**ACTION:** Notice of final finding of no significant impact.

**1. Proposed Action**

The proposed administrative action is to terminate the source and byproduct material license authorizing Exxon Coal and Minerals Company to operate the Highland In-situ Pilot Test Project facility located in Converse County, Wyoming.

**2. Reasons for Final Finding of No Significant Impact**

The Exxon Highland Pilot Test Project operated from 1978 to 1981. Groundwater restoration activities began in 1981 and continued until 1988. The

VOL 54 ISS 47 MR 13 1989 UMI

staff's evaluation and approval of restoration activities is documented in a memorandum dated October 19, 1987.

The NRC staff approved a decommissioning plan for the Highland Project on March 18, 1988. Facility decommissioning activities were conducted between July and September 1988. The staff review of the decommissioning activities is documented in a memorandum dated March 2, 1989. Exxon requested that remaining facilities and responsibilities at the site be transferred to Everest Minerals Corporation, holder of Source and Byproduct Material License No. SUA-1511. Everest Minerals Corporation agreed to accept full responsibility for all remaining facilities by letter dated October 20, 1988.

Based on the staff reviews referenced above, the Commission has determined that no significant impact will result from the proposed administrative action. The following statements support the final finding of no significant impact and summarize the conclusions resulting from the environmental evaluations.

A. Ground-water quality at the site has been restored to background levels.

B. Facility decommissioning activities were conducted in accordance with an NRC-approved plan.

C. Remaining facilities and responsibilities at the site were transferred to Everest Minerals Corporation by issuance of an amendment to Source Material License No. SUA-1511 on February 17, 1989.

In accordance with 10 CFR Part 51.33(a), the Director, Uranium Recovery Field Office (URFO), made the determination to issue a final finding of no significant impact in the **Federal Register**. Concurrent with this finding, Source Material License SUA-1084 for the Exxon Highland Pilot Test Project will be terminated.

The environmental evaluations setting forth the basis for the finding are available for public inspection and copying at the Commission's Uranium Recovery Field Office at 730 Simms Street, Golden, Colorado, and at the Commission's Public Document Room at 1717 H Street, Washington, DC.

Dated at Denver, Colorado, this 2d day of March, 1989.

For the Nuclear Regulatory Commission.

**Edward F. Hawkins,**

*Branch Chief, Uranium Recovery Field Office, Region IV.*

## OFFICE OF MANAGEMENT AND BUDGET

### Circular No. A-76; Amendment

**AGENCY:** Office of Management and Budget.

**ACTION:** Issuance of Transmittal Memorandum No. 8 amending OMB Circular No. A-76, "Performance of Commercial Activities."

**SUMMARY:** This Notice contains Transmittal Memorandum No. 8, dated March 1, 1989, to Circular No. A-76, "Performance of Commercial Activities."

This Transmittal Memorandum updates the federal pay assumptions and updates the inflation factor used for computing non-pay categories (supplies, equipment, etc.) for Fiscal Years 1990 through 1994 to reflect the assumptions contained in the President's FY 1990 Budget.

The inflation factor for non-pay categories for 1994 is new. Figures for 1990 through 1993 remain at the rates specified in Transmittal Memorandum No. 6, dated March 4, 1988.

The revision does not require any agency to (1) create or maintain a duplicative control/monitoring/reporting system or (2) adopt any additional controls, not presently in compliance with the Federal Acquisition Regulations (FAR).

**FOR FURTHER INFORMATION CONTACT:** Linda Mesaros, Office of Federal Procurement Policy, Office of Management and Budget, (202) 395-3300.

**Allan V. Burman,**

*Deputy Administrator and Acting Administrator.*

Dated: February 28, 1989.

BILLING CODE 3110-01-M

## POSTAL SERVICE

### Privacy Act of 1974; New System of Records

**AGENCY:** Postal Service.

**ACTION:** Notice of new system of records.

**SUMMARY:** The purpose of this document is to publish advance notice of the creation of a new system of records, USPS 040.030, "Customer Programs—Auction Customer Address File." The system will contain names and addresses of persons who wish to be on a mailing list to receive advance notice of Dead Parcel Branch auctions.

**EFFECTIVE DATE:** The proposed action will be effective without further notice on May 12, 1989, unless comments are received which would result in a contrary determination.

**ADDRESS:** Comments may be mailed to the Records Office, U.S. Postal Service, 475 L'Enfant Plaza, SW., Washington, DC 20260-5010, or delivered to Room 10670 at the above address between 8:15 a.m. and 4:45 p.m. Comments received also may be inspected during the above hours in Room 10670.

**FOR FURTHER INFORMATION CONTACT:** Betty Sheriff (202) 268-5158.

**SUPPLEMENTARY INFORMATION:** Dead Parcel Branches of the Postal Service must periodically conduct public auctions to dispose of unclaimed merchandise and claim-paid items. The proposed system of records will comprise a list of names and addresses of auction attendees and others who indicate a desire to be notified in advance of future auctions. Advance notice to interested persons performs a customer service while optimizing revenue from auctions conducted to dispose efficiently of dead parcel matter.

Customers desiring this service will enter their name and address on a sheet available at each auction. That information will be transferred onto an automated address file which will be accessible only by Dead Parcel Branch personnel responsible for maintaining the file and making the mailings. The possibility of infringement upon any individual's privacy rights is almost non-existent since the information collected is limited to names and addresses, is password-protected, and is subject to both the disclosure restrictions imposed by the Privacy Act as well as the Postal Reorganization Act (39 U.S.C. 412) which prohibits the Postal Service from releasing lists of postal customers.

A new system report, as required by 5 U.S.C. 552a(o) of the Privacy Act, has been submitted to OMB and Congress, pursuant to paragraph 4b of Appendix I to OMB Circular No. A-130, "Federal Agency Responsibilities for Maintaining Records About Individuals," dated December 12, 1985.

Accordingly, the proposed system description follows:

**USPS 040.030**

**System Name:**

Customer Programs—Auction Customer Address File.

**System Location:**

Post offices having Dead Parcel Branches.

**Categories of Individuals Covered by the System:**

Customers who wish to be on a mailing list to receive notices of future Dead Parcel Branch auctions.

**CATEGORIES OF RECORDS COVERED BY THE SYSTEM:**

Customer names and addresses.

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

39 U.S.C 401, 404.

**PURPOSE(S):**

To maintain a list of names and addresses of customers who wish to be on a mailing list to receive notices of future Dead Parcel Branch auctions.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

1. When the Postal Service becomes aware of an indication of a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, or in response to the appropriate agency's request upon a reasonable belief that a violation has occurred, the relevant records may be referred to the appropriate agency, whether Federal, State, local, or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation, or order issued pursuant thereto.

2. A record from this system may be disclosed to the Department of Justice, to other counsel representing the Postal Service or in a proceeding before a court or adjudicative body before which the Postal Service is authorized to appear, when (a) the Postal Service; or (b) any postal employee in his or her official capacity; or (c) any postal employee in his or her individual capacity whom the Department of Justice has agreed to represent; or (d) the United States when it is determined that the Postal Service is likely to be affected by the litigation, is a party to litigation or has an interest in such litigation, and such records are determined by the Postal Service or its counsel to be arguably relevant to the litigation, provided, however, that in each case, the Postal Service determines that disclosure of the records is a use of the information that is compatible with the purpose for which it was collected.

3. Disclosure may be made to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual

4. Information from this system may be disclosed to an expert consultant, or other person who is under contract to the Postal Service to fulfill an agency function, but only to the extent necessary to fulfill that function. This may include disclosure to any person with whom the Postal Service contracts to reproduce, by typing, photocopy or other means, any record for use by Postal Service officials in connection with their official duties or to any person who performs clerical or stenographic functions relating to the official business of the Postal Service.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**

**STORAGE:**

Paper records or magnetic disks.

**RETRIEVABILITY:**

Customer name.

**SAFEGUARDS:**

Paper records and disks are kept in locked cabinets; automated data is password protected.

**RETENTION AND DISPOSAL:**

Records are kept for one year after entry and then destroyed by deletion (if automated) or by shredding (if paper).

**SYSTEM MANAGER(S) AND ADDRESS:**

APMG, Rates & Classification Department, Headquarters, Washington, DC 20260-5300.

**NOTIFICATION PROCEDURE:**

Customers wishing to know whether information about them is maintained in this system of records should address inquiries to the manager of the Dead Parcel Branch. Inquiries should contain full name and address.

**RECORD ACCESS PROCEDURE:**

Requests for access should be made in accordance with the Notification Procedure above and the USPS Privacy Act regulations regarding access to records and verification of identity set forth at 39 CFR 266.6.

**CONTESTING RECORD PROCEDURE:**

See Notification and Record Access Procedures above.

**RECORD SOURCE CATEGORIES:**

Attendees of auctions and others who ask to receive notice of future actions.

**Fred Eggleston,**

*Assistant General Counsel Legislative Division.*

[FR Doc. 89-5645 Filed 3-10-89; 8:45 am]

BILLING CODE 7710-12-M

## SECURITIES AND EXCHANGE COMMISSION

**[Release No. 34-26802; File No. SR-NYSE-88-44]**

### Self-Regulatory Organizations; Order Approving Proposed Rule Change by New York Stock Exchange, Inc., Relating to Amended Debt and Equity Listing Fees and the Adoption of an Advance Billing Schedule

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 ("Act") and Rule 19b-4 thereunder,[2] the New York Stock Exchange, Inc. ("NYSE" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission") on December 30, 1988, a proposed rule change to amend certain Exchange debt and equity listing fees and listed company billing procedures. In its filing, the NYSE stated that the purpose of the proposed rule change is to offset the increased costs of supplying services provided by the Exchange, including manpower, automation, utilities and other costs associated with providing marketplace facilities and services. These fees are effective commencing January 1, 1989.

Notice of the proposed rule change was provided by the issuance of a Commission release (Securities Exchange Act Release No. 26483, January 23, 1989) and by publication in the **Federal Register** (54 FR 4358, January 30, 1989). The Commission received no comments on the proposed rule change.

For purposes of the initial listing of debt issues on the NYSE, the Exchange calculates bond listing fees (including outstanding unlisted debt) on a sliding scale based on the maturity and total par value of the particular bond issue. There are four maturity ranges for purposes of the initial listing of debt issues on the NYSE: 1-5 years, 6-14 years, 15-25 years and 26 or more years. Likewise, there are four par valuation intervals for purposes of the initial listing of debt issues on the NYSE, with the base rate set at $0-$500 million par value and regressive rates set for the remaining par value increments of $250 million. Utilizing these parameters, the Exchange calculates a debt issue's initial listing fee by multiplying each one million dollars of par value by the appropriate fee assigned to the issue's maturity range.[3] Currently, bond issues

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b-4.

[3] To illustrate this, assume that a $1,250,000,000 seven year note is listed on the Exchange. Under the proposed rule change, the issuer would be billed $202,500: the first $500-M par value at $220 per

Continued

VOL 54 ISS 47 MR 13 1989 UMI

with a maturity of five (5) years or less are charged a rate of $100 per million dollars for the first $0–$500 million par value. Under the proposed rule change, this amount would be increased to $115. All other maturity and par valuation categories would be increased under the proposed rule change in (5) dollar increments in amounts ranging from five (5) to fifteen (15) dollars.

The Exchange is also increasing the initial and continuing fee schedules applied to NYSE-listed company equity issues. For purposes of the initial listing of equity issues on the NYSE (as well as "warrants or similar securities"), the Exchange would increase the base original listing fee for issuers from $34,700 to $36,800. In addition to the base fee, there is a minimum initial listing fee which has been increased from $1,400 to $1,500, and a per share fee, which has been increased in amounts ranging from $100 to $950 per million shares for the applicable share amount. Additionally, the maximum listing fee for stock splits has been reduced from $500,000 to $250,000, the fee charged for reincorporations has been increased from $5,000 to $5,300 and the fee charged for supplements (*i.e.*, minor information changes to previous applications) has been increased from $400 to $430.

The continuing annual fee payable each year for every equity security listed on the Exchange is equal to the greater of the per-share fee calculation or the applicable range minimums. The Exchange is increasing the per-share fee $100 per million shares for the first two million shares and $50 for each million shares in excess of two million. The Exchange is also increasing the minimum ranges in amounts ranging from $630 to $4,100. Moreover, a maximum continuing annual fee of $500,000 has been established.

Finally, the Exchange is adopting an advance billing schedule affecting initial and continuing listing fees for both debt and equity issues. The advanced billing schedule will be phased in for listed companies over a three-year period. In January 1989, all companies will receive a pro-rated bill based upon the number of calendar days from the anniversary date of listing to December 31, 1988, in addition to the fee for the first four months of 1989. In January 1990, all companies will be billed for the eight remaining months of 1989 and the first eight months of 1990. In January 1991, all companies will be billed for the four remaining months of 1990 and the full year, 1991. In January 1992, all companies will be on a twelve month advance billing schedule. All original listings will be converted immediately to the advance billing cycle. These companies will receive a pro-rated bill based upon the number of calendar days from their listing date to December 31 of the listing year.

The Commission believes that the proposed rule change is consistent with section 6(b) of the Act, and the rules and regulations thereunder applicable to a national securities exchange. More specifically, the Commission believes that the proposed rule change is consistent with section 6(b)(4) of the Act, which requires the equitable allocation of reasonable dues, fees, and other charges among Exchange members and other persons using its facilities.[4] The current increases do not appear excessive in relation to previous fees, and the Commission has not received any comments against the new fees. Accordingly, the Commission believes that it is appropriate to approve the proposed rule change.

It is Therefore Ordered, Pursuant to section 19(b)(2) of the Act, that the above mentioned rule change is hereby approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[5]

Dated: March 6, 1989.

Jonathan G. Katz,

*Secretary.*

[FR Doc. 89-5671 Filed 3-10-89; 8:45 am]

BILLING CODE 8010-01-M

million; the next $200-$04 at $140 per million; and the final $200-$04 at $80 per million. This bill represents a 4.6 percent increase, since the issuer would have been billed $199,700 under the Exchange's 1988 fee structure.

[4] We note that the equity and bond listing fees were last increased January 1, 1988. *See* SR–NYSE–87–42 (Rel. 34–25295, January 28, 1988; 53 FR 3281, February 4, 1988) (accelerated approval of increased equity listing fees), and SR–NYSE–87–50 (Rel. 34–25313, February 4, 1988; 53 FR 4088, February 11, 1988) (approval of increased bond listing fees).

[5] *See* 17 CFR 200.30–3(a)(44).

## DEPARTMENT OF TRANSPORTATION

### Office of the Secretary

### Horizon Air/San Juan Airlines, Inc.; U.S.-Canada Commuter Endorsement Transfer

**AGENCY:** Office of the Secretary, DOT.

**ACTION:** Order 89–3–22, transfer of U.S.-Canada commuter endorsement, order to show cause, undocketed.

**SUMMARY:** By Order 89–3–22, the Department proposes to transfer the U.S.-Canada transborder commuter endorsements for the Seattle-Vancouver, Bellingham-Vancouver, Seattle-Victoria and Port Angeles-Victoria routes from San Juan Airlines, Inc. to Horizon Air Industries, Inc., d/b/a Horizon Air. The Department proposes to make the transfer effective upon Horizon's receipt of the requisite operating authority from the Government of Canada. The endorsements would remain in effect for a period of five years for the Bellingham-Vancouver, Seattle-Victoria and Port Angeles-Victoria routes and for the balance of the five-year endorsement currently held by San Juan for the Seattle-Vancouver route. The Department is tentatively rejecting the request of NPA, Inc., a United Express commuter, for a carrier selection case to select a carrier to serve the routes. The Department tentatively concludes that the transfer request of the carriers is analogous to a certificate route transfer case under section 401(h) of the Federal Aviation Act rather than a route award case and that NPA has presented no compelling reasons for the Department to consider this case any differently.

**DATES:** Objections to the Department's tentative decision are due March 22, 1989; answers are due not later than March 29, 1989.

**ADDRESS:** Objections and comments should be addressed to the Licensing Division, P–45, U.S. Department of Transportation, 400 Seventh Street SW., Room 6412, Washington, DC 20590 and should be served on all parties listed in ordering paragraph 6 of Order 89–3–22.

Dated: March 6, 1989.

Patrick V. Murphy, Jr.,

*Deputy Assistant Secretary for Policy and International Affairs.*

[FR Doc. 89-5732 Filed 3-10-89; 8:45 am]

BILLING CODE 4910-62-M

### Order to Show Cause; Federal Express Corporation and the Flying Tiger Line Inc.; Transfer of Certificate Authority

**AGENCY:** Department of Transportation.

**ACTION:** Tentative approval of a transfer of certificate authority pursuant to section 401(h)—Docket 46025.

**SUMMARY:** Federal Express Corporation and The Flying Tiger Line, on December 20, 1988, jointly filed an application in Docket 46025 seeking approval of the transfer of Flying Tiger's operating authority to Federal Express, pursuant to section 401(h) of the Federal Aviation Act. In Order 89–3–21, issued March 8, 1989, the Department has tentatively decided to approve the transfer of Flying Tiger's operating authority (certificate and exemption) to Federal Express. The Department is inviting interested persons to show cause why this tentative decision should not become final. Those wishing to comment on the tentative conclusions, or having objections to the issuance of an order approving the transfer of certificate authority should file a statement containing evidence and arguments in support of their comments or objections.

**DATES:** Statements containng all evidence and arguments in support of comments or objections in Docket 46025 should be filed by March 22, 1989. Answers to the comments and objections shall be due March 29, 1989. Parties to the docket listed above may obtain a service copy of the order by calling the Documentary Services Division at (202) 366–9329 or by writing to the address below.

**ADDRESSES:** Statements containing all evidence and arguments in support of comments or objections, and answers to the comments or objections should be filed in Docket 46025, addressed to the Documentary Services Divisions, U.S. Department of Transportation, 400 Seventh Street, SW., Room 4107, Washington, DC 20590, and should be served on all parties listed in that docket.

Dated: March 8, 1989.

Patrick V. Murphy,

*Deputy Assistant Secretary for Policy and International Affairs.*

BILLING CODE 4910-62-M

### Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q during the Week Ended March 3, 1989.

The following application for certificates of public convenience and necessity and foreign air carrier permits were filed under Subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 et. seq.). The due date for answers, conforming application, or motion to modify scope are set forth below for each application. Following the answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket No.: 46148

*Date Field:* February 27, 1989.

*Due Date for Answers, Conforming Applications, or Motion to Modify Scope:* March 27, 1989.

*Description:* Application of Federal Express Corporation, pursuant to Section 401 of the Act and Subpart Q of the Regulations, requests issuance of an amended certificate of public convenience and necessity for Route 472, so as to authorize foreign air transportation of property and mail between a point or points in the United States, on the one hand, and a point or points in Canada, on the other hand, subject to conditions.

Docket No.: 46149

*Date Field:* February 28, 1989.

*Due Date for Answers, Conforming Applications, or Motions to Modify Scope:* March 28, 1989.

*Description:* Application of American Airlines, Inc., pursuant to Section 401 of the Act and Subpart Q of the Regulations, applies for a certificate of public convenience and necessity to authorize service between a point or points in the United States ad a point or points in New Zealand.

### Coast Guard

[CGD 89-018]

### Commercial Fishing Industry Vessel Advisory Committee; Meeting

**AGENCY:** Coast Guard, DOT.

**ACTION:** Notice of public meeting.

**SUMMARY:** Pursuant to section 10(a) of the Federal Advisory Committee Act (Pub. L. 92–463; U.S.C. App I) notice is hereby given of a meeting of the Commercial Fishing Industry Vessel Advisory Committee. The meeting will begin at 9:30 a.m. on March 29, 1989, at the Department of Transportation, 400 7th Street, SW., Washington, DC, in Room 2230. Any subcommittees formed may agree to meet on March 30th, and rooms will be arranged. The agenda is as follows:

—Introduction.
—Swearing in of members.
—Discussion of Committee purpose and Charter.
—Selection of Chairperson and Vice Chairperson.
—Introduction of USCG programs relating to fishing vessel safety.
—Administrative Procedures Act.
—Committee organizational structure.
—Implementation of the Commercial Fishing Industry Vessel Safety Act.
—Work program and establishment of subcommittees.
—Future meeting dates.
—Adjournment.

The purpose of the Committee is to provide consultation and advice to the Commandant, U.S. Coast Guard, on all areas of commercial fishing vessel safety.

The meeting is open to the public. Members of the public may present written or oral statements at the meeting.

**FOR FURTHER INFORMATION CONTACT:** Mr. Norman W. Lemley, Executive Director, Commercial Fishing Industry Advisory Committee; or LTJG Wes J. Westphal II, Marine Technical and Hazardous Materials Division (G-MTH), Room 1218, U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593–0001; or telephone (202) 267–0001.

Dated: March 3, 1989.

J.D. Sipes,

[Summary Notice No. PE–89–8]

### Petition for Exemption; Summary of Petitions Received; Dispositions of Petitions Issued

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of petitions for exemption received and of dispositions of prior petitions.

**SUMMARY:** Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR Part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR Chapter I), dispositions of certain petitions previously received, and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

**DATE:** Comments on petitions received must identify the petition docket number

VOL 54 ISS 47 MR 13 1989 UMI

involved and must be received on or before: April 3, 1989.

**ADDRESS:** Send Comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-10), Petition Docket No. _____, 800 Independence Avenue, SW., Washington, DC 20591.

**FOR FURTHER INFORMATION CONTACT:** The petition any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC-10), Room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-3132.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, DC, on February 28, 1989.

**Denise Donohue Hall,**

*Manager, Program Management Staff, Office of the Chief Counsel.*

**Petitions for Exemption**

*Docket No.:* 25776.
*Petitioner:* Lynch Flying Service, Inc.
*Regulations Affected:* 14 CFR 43.3(g).
*Description of Relief Sought:* To allow properly certificated and trained petitioner's pilots to remove and replace passenger seats, ambulatory stretchers, and base assemblies in its Cessna 400 aircraft.

*Docket No.:* 24941
*Petitioner:* The Perris Valley Skydiving Center.
*Section of the FAR Affected:* 14 CFR 105.43.
*Description of Relief Sought/ Disposition:* To allow foreign parachutists to participate in the petitioner's parachute jumps without complying with the parachute equipment and packing requirements of § 105.43.
*Denial, February 23, 1989, Exemption No. 5021*

*Docket No.:* 24998.
*Petitioner:* Aeron International Airlines, Inc.
*Regulations Affected:* 14 CFR 121.371(a) and 121.378.
*Description of Relief Sought/ Disposition:* To extend Exemption No. 4742 that permit petitioner to contract with specific foreign repair facilities for the performance of maintenance, preventive maintenance, and alterations on certain Canadair CL-44 aircraft components, accessories, engines, and propellers.
*Grant, January 31, 1989, Exemption No. 4742A*

*Docket No.:* 25484
*Petitioner:* Bohlke International Airways.
*Sections of the FAR Affected:* 14 CFR 43.3(g).
*Description of Relief Sought/ Disposition:* To amend Exemption No. 4911 that allows appropriately trained and certificated pilots employed by the petitioner to remove and install aircraft cabin seats, and certain stretcher and base assemblies in petitioner's Aero Commander 690V and Piper Seneca aircraft. The amendment would add the Cessna 402 Aircraft to the exemption

**Federal Highway Administration**

**Environmental Impact Statement; Raleigh and Summers Counties, West Virginia**

**AGENCY:** Federal Highway Administration (FHWA), DOT.

**ACTION:** Notice of intent.

**SUMMARY:** The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for the proposed New River Parkway project in Raleigh and Summers Counties, West Virginia.

**FOR FURTHER INFORMATION CONTACT:** Billy R. Higginbotham, Division Administrator, Federal Highway Administration, 550 Eagan Street, Suite 300, Charleston, WV 25301; Telephone: (304) 348-3093.

**SUPPLEMENTARY INFORMATION:** The FHWA, in cooperation with the West Virginia Department of Highways, will prepare an Environmental Impact Statement (EIS) on a proposal to construct the New River Parkway. The New River Parkway, which was included as a demonstration project in the 1987 Surface Transportation and Uniform Relocation Assistance Act (STURAA), proposes construction of a new road from the intersection of Raleigh County Route 26 and West Virginia Route 20 near Hinton, West Virginia to Interstate 64 near its crossing of the New River at the Raleigh-Summers County line. The proposed road will follow the New River Gorge National River for approximately 10 miles and replace approximately 9 miles of existing local access road.

The facility is proposed to be designed as a parkway to provide visitors to the New River Gorge National River access to the river and scenic overlooks. The facility will also provide improved access for local residents to homes in the area.

Alternatives under consideration include: (1) taking no action; and (2) construction of a new two-lane road as a parkway with several alternate schemes being considered which include various alignments both on new location and along the existing local service route.

Letters describing the proposed action and soliciting comments will be sent to appropriate federal, state, and local agencies, and to private organizations and citizens who have previously expressed or are known to have interest in this proposal. A public meeting followed by a public hearing will be held in the project area after completion of the Draft EIS. Public notice will be given of the time and place of the meeting and hearing. The Draft EIS will be available for public and agency review and comment prior to the public meeting and public hearing. No formal scoping meeting is planned at this time.

To ensure that the full range of issues related to this proposed action is addressed and all significant issues identified, comments and suggestion are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation of federal programs and activities apply to this program)

Issued on March 3, 1989.

**Maritime Administration**

[Docket S-846]

**Mormac Marine Transport, Inc.; Application for Permission Under Section 805(a) of the Merchant Marine Act, 1936, as Amended**

By letter dated March 9, 1989, Mormac Marine Transport, Inc. (formerly Moore McCormack Bulk Transport, Inc.), (Mormac) has requested pursuant to section 805 of the Merchant Marine Act, 1936, as amended (Act), and Article II-13 of Operating-Differential Subsidy Agreement (ODSA) No. MA/MSB-295, written permission for Mormac to be affiliated with a company that will provide domestic coastwise Great Lakes service and whose officers and directors hold positions with and own a pecuniary interest in Mormac Marine Group, Inc. (Mormac Marine), the parent company of Mormac.

On March 23, 1987, the Maritime Administrator granted written permission for Mr. James R. Barker to own a pecuniary interest in, and to control Interlake Holding Company (Interlake Holding) and Mormac Marine and through them, the Interlake Steamship Company (Interlake), Interlake Leasing II, Inc. (Leasing) and Mormac for the same scope of domestic ownership and operations by Interlake and Leasing as is contained in Article I-11 of Mormac's ODSA. On July 14, 1988, the Maritime Administrator modified that permission in order to permit common ownership and control of the companies by both Mr. Barker and Mr. Paul R. Tregurtha. Mormac is now requesting permission to amend Mormac's section 805(a) permission in order to permit a company owned by Mr. Barker and Mr. Tregurtha to acquire three Great Lakes vessels currently owned and operated by Rouge Steel Company (Rouge).

Pursuant to a Purchase and Sale Agreement to be entered into by and between Rouge and Lakes Shipping Company, Inc., Lakes Shipping Company, Inc. will be purchasing three self-unloading cargo vessels from Rouge, the SS BENSON FORD, the SS WILLIAM CLAY FORD, and the MS HENRY FORD II. These vessels will be used exclusively in service to the Great Lakes in a manner similar to their current service as Rouge-owned vessels. The vessels will be used primarily to carry iron ore, limestone, and coal for Rouge, in accordance with the terms of a ten-year contract of affreightment between Rouge and Lakes Shipping Company, Inc.

Mormac indicates that since the vessels will essentially continue in service as they have been used by Rouge, the acquisition of these vessels by Lakes Shipping Company, Inc. will not result in any change in competitive conditions for U.S.-flag vessels providing service on the Great Lakes. In addition, Lakes Shipping Company, Inc. and Mormac are entirely separate corporate entities that will maintain separate and discrete accounts.

Mormac believes that no U.S.-flag competitor of the Rouge vessels will be subject to unfair competition nor will the operation of these vessels by an affiliate of Mormac be prejudicial to the purposes and policies of the Act.

Mormac is requesting that the scope of domestic operations permitted under ODSA MA/MSB-295 be modified to incorporate the operations of Lakes Shipping Company, Inc. and that Mormac's permission granted on July 14, 1988, with respect to the common ownership of Mormac Marine and Interlake Holding be modified to permit common ownership, officers and directors by and among Interlake Holding, Mormac Marine, and Lakes Shipping Company, Inc.

Any person, firm, or corporation having any interest in the application for section 805(a) permission and desiring to submit comments concerning the application must file written comments in triplicate, to the Secretary, Maritime Administration, Room 7300, Nassif Building, 400 Seventh Street SW., Washington, DC 20590, by the close of business 5:00 p.m. on March 17, 1989. If such comments deal with section 805(a) issues, they should be accompanied by a petition for leave to intervene. The petition should state clearly and concisely the grounds of interest and the alleged facts relied on for relief.

If no petitions for leave to intervene on section 805(a) issues are received within the specified time, or if it is determined that petitions filed do not demonstrate sufficient interest to warrant a hearing, the Maritime Administration will take such action as may be deemed appropriate.

In the event petitions regarding the relevant section 805(a) issues are received from parties with standing to be heard, a hearing will be held, the purpose of which will be to receive evidence under section 805(a) relative to whether the proposed operations (a) could result in unfair competition to any person, firm, or corporation operating exclusively in the coastwise or international service, or (b) would be prejudicial to the objects and policy of the Act relative to domestic operations.

(Catalog of Federal Domestic Assistance Program Nos. 20.804 Operating-Differential Subsidies (ODS))

By Order of the Maritime Administrator.

Date: March 9, 1989.

### Customs Service

[T.D. 89-36]

### Tuna Fish; Tariff-Rate Quota for the Calender Year 1989

**AGENCY:** Customs Service, Department of the Treasury.

**ACTION:** Announcement of the quota quantity for tuna for Calendar Year 1989.

**SUMMARY:** Each year the tariff-rate quota for tuna fish described in item 1604.14.20, HTSUS, is based on the United States canned tuna production for the preceding calendar year.

**EFFECTIVE DATES:** The 1989 tariff-rate quota is applicable to tuna fish entered, or withdrawn from warehouse, for consumption during the period January 1 through December 31, 1989.

**FOR FURTHER INFORMATION CONTACT:** Karen L. Cooper, Chief, Quota Branch, Regulatory Trade Programs Division, Office of Trade Operations, Office of Commercial Operations, U.S. Customs Service, Washington, DC 20229, (202/566-8592).

It has now been determined that 34,806,335 kilograms of tuna may be entered for consumption or withdrawn from warehouse for consumption during the Calendar Year 1989, at the rate of 6 percent ad valorem under item 1604.14.20, HTSUS. Any such tuna which is entered, or withdrawn from warehouse, for consumption during the current calendar year in excess of this quota will be dutiable at the rate of 12.5 percent ad valorem under item 1604.14.30 HTSUS.

Dated: February 28, 1989.

## VETERANS ADMINISTRATION

### Establishment of Department of Veterans Affairs

**AGENCY:** Veterans Administration.

**ACTION:** Notice.

**SUMMARY:** The Department of Veterans Affairs Act redesignates the Veterans Administration as the Department of Veterans Affairs, an executive department in the executive branch of the Government.

**EFFECTIVE DATE:** March 15, 1989.

**ADDRESS:** The Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420.

**FOR FURTHER INFORMATION CONTACT:** Linda M. Combs, Acting Associate Deputy Administrator for Management (004), (202) 233-5438.

**SUPPLEMENTARY INFORMATION:** The Department of Veterans Affairs Act (Pub. L. 100-527) redesignates the Veterans Administration as the Department of Veterans Affairs, an executive department in the executive branch of the Government.

**I. Organization**

The statute provides that the Department of Veterans Affairs be headed by the Secretary of Veterans Affairs. Other principal officials are a Deputy Secretary, a Chief Medical Director, a Chief Benefits Director, a Director of the National Cemetery System, a General Counsel, an Inspector General, and no more than six Assistant Secretaries. Each of these officials will be appointed by the President with the advice and consent of the Senate.

**II. Redesignations**

The Department of Medicine and Surgery of the Veterans Administration shall be redesignated as the Veterans Health Services and Research Administration of the Department of Veterans Affairs; the Department of Veterans Benefits of the Veterans Administration shall be redesignated as the Veterans Benefits Administration of the Department of Veterans Affairs; and the Office of Inspector General of the Veterans Administration, established in accordance with the Inspector General Act of 1978, is redesignated as the Office of Inspector General of the Department of Veterans Affairs.

**III. References**

References in any Federal law, Executive Order, rule, regulation, or delegation of authority, or any document of or pertaining to the Veterans Administration shall be deemed to refer as follows:

(a) The Administrator of Veterans Affairs is the Secretary of Veterans Affairs;

(b) The Veterans Administration is the Department of Veterans Affairs;

(c) The Deputy Administrator of Veterans Affairs is the Deputy Secretary of Veterans Affairs;

(d) The Chief Medical Director of the Veterans Administration is the Chief Medical Director of the Department of Veterans Affairs;

(e) The Department of Medicine and Surgery of the Veterans Administration is the Veterans Health Services and Research Administration of the Department of Veterans Affairs;

(f) The Chief Benefits Director of the Veterans Administration is the Chief Benefits Director of the Department of Veterans Affairs;

(g) The Department of Veterans Benefits of the Veterans Administration is the Veterans Benefits Administration of the Department of Veterans Affairs;

(h) The Chief Memorial Affairs Director of the Veterans Administration is the Director of the National Cemetery System of the Department of Veterans Affairs; and

(i) The Department of Memorial Affairs of the Veterans Administraitos is the National Cemetery System of the Department of Veterans Affairs.

**IV. Continuing Effect of Legal Documents**

All orders, determinations, rules, regulations, permits, grants, contracts, certificates, licenses, and privileges which have been issued, made, granted, or allowed to become effective by the President, by the Administrator of Veterans Affairs, or by a court of competent jurisdiction, in the performance of functions of the Administrator or the Veterans Adminstration and which are in effect on March 15, 1989, continue in effect according to their terms until modified, terminated, superseded, set aside, or revoked in accordance with law by the President, the Secretary, or other authorized official, by a court of competent jurisdiction, or by operation of law.

**V. Proceedings Not Affected**

The provisions of the Act shall not affect any proceedings or any application for any benefits, service, license, permit, certificate, or financial assistance pending before the Veterans Administration at the time this Act takes effect, but such proceedings and applications shall continue. Orders shall be issued in such proceeding, appeals shall be taken therefrom, and payments shall be made pursuant to such orders, as if this Act had not been enacted, and orders issued in any such proceedings shall continue in effect, until modified, terminated, superseded, or revoked by a duly authorized official, by a court of competent jurisdiction, or by operation of law.

**VI. Suits Not Affected**

The Act shall not affect suits commenced before March 15, 1989, and in all such suits, proceedings shall be had, appeals taken, and judgments rendered in the same manner and with the same effect as if the Act has not been enacted.

**VII. Nonabatement of Actions**

No suit, action, or other proceeding commenced by or against the Veterans Administration, or by or against any individual in the official capacity of such individual as an officer of the Veterans Administration, shall abate by reason of enactment of the Act.

**VIII. Property and Resources**

The contracts, liabilities, records, property, and other assets and interests of the Veterans Administration shall, after the effective date of this Act, be considered, to be the contracts, liabilities, records, property, and other assets and interests of the Department of Veterans Affairs.

Dated: March 8, 1989.

# Sunshine Act Meetings

Federal Register
Vol. 54, No. 47
Monday, March 13, 1989

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

**FEDERAL DEPOSIT INSURANCE CORPORATION**

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:06 p.m. on Tuesday, March 7, 1989, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session to consider matters relating to: (1) The possible closing of certain insured banks; and (2) an assistance agreement pursuant to section 13(c) of the Federal Deposit Insurance Act.

In calling the meeting, the Board determined, on motion of Director C.C. Hope, Jr. (Appointive), seconded by Mr. Robert J. Herrmann, acting in the place and stead of Director Robert L. Clarke (Comptroller of the Currency), concurred in by Chairman L. William Seidman, that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

The meeting was held in the Board Room of the FDIC Building located at 500-17th Street, NW., Washington, DC.

Dated: March 8, 1989.

Federal Deposit Insurance Corporation.

**Robert E. Feldman,**

*Deputy Executive Secretary.*

**TENNESSEE VALLEY AUTHORITY**

Meeting No. 1414

**TIME AND DATE:** 10 a.m. (c.s.t.), Wednesday, March 15, 1989.

**PLACE:** Andrew Johnson Theater, Tennessee Performing Arts Center, 505 Deaderick Street, Nashville, Tennessee.

**STATUS:** Open.

AGENDA

Approval of minutes of meeting held on February 15, 1989.

Discussion Item

1. TVA Staff will report on Regional Ozone—A Southern Perspective

Action Items

*New Business*

A—Budget and Financing

A1. Adoption of Supplemental Resolution Authorizing 1989 Series A Power Bonds.
A2. Resolution Authorizing the Chairman and Other Executive Officers to Take Further Action Relating to Issuance and Sale of 1989 Series A Power Bonds.
A3. Retention of Net Power Proceeds and Nonpower Proceeds and Payments to the U.S. Treasury in March 1989, Pursuant to Section 26 of the TVA Act.
A4. Board Adoption of the Tennessee Valley Authority Financial Statements, September 30, 1988.
A5. Modification to Fiscal Year 1989 Power Capital Budget—Wilson, Tennessee, 500-kV Substation to Replace High-Side Coils of 500-kV Spare Transformer.

C—Power Items

C1. Letter Agreement with Tallahatchie Valley EPA for Power Supply to Grenada and Hardy, Mississippi, Areas.
C2. Revision to 5 Percent Interruptible Power Arrangements.

E—Real Property Transactions

E1. Sale of Permanent Easement Affecting 0.73 Acres of Ocoee No. 2 Railroad Right-of-Way in Polk County, Tennessee.
E2. Abandonment of Easement Rights to Polk County Board of Education Affecting 294 Acres of Polk County Board of Education Property Located Near Apalachia Dam in Polk County, Tennessee.
E3. Grant of 30-Year Easement to Bluff City, Tennessee, Affecting Approximately 4 Acres of Boone Reservoir Land in Sullivan County, Tennessee.
E4. Proposed 19-Year Lease Agreement with Tennessee Wildlife Resources Agency Affecting Approximately 13.1 Acres of Norris Reservoir Land and 1.3 Acres of Melton Hill Reservoir Land in Anderson County, Tennessee.
E5. Sale of Term Easement for Marine Repair and Fabrication Facility Affecting Approximately 5.99 Acres of Pickwick Reservoir Land in Tishomingo County, Mississippi.
E6. Deed Modification to the Anderson County Sportsman's Club Affecting Approximately 2.3 Acres of Norris Reservoir Land in Anderson County, Tennessee.
E7. Proposed 30-Year Easement to Colbert County Commission Affecting Approximately 12.13 Acres of Pickwick Reservoir Land in Colbert County, Alabama.
E8. Proposal to Lease TVA Land for the Commercial Operation of Running Water Recreation Area on Nickajack Reservoir in Marion County, Tennessee.

F—Unclassified

F1. Supplement No. 15 to Personal Services Contract No. TV–61664A with Massachusetts Institute of Technology.
F2. Filing of Condemnation Cases.

F3. Supplement No. 12 to Personal Services Contract No. TV–53532A with Hartford Steam Boiler Inspection and Insurance Company.
F4. 1990 Corporate Environmental Agenda.

**CONTACT PERSON FOR MORE INFORMATION:** Alan Carmichael, Manager of Public Affairs, or a member of his staff can respond to requests for information about this meeting. Call (615) 632–8000, Knoxville, Tennessee. Information is also available at TVA's Washington Office (202) 479–4412.

Dated: March 8, 1989.

Edward S. Christenbury,
*General Counsel and Secretary.*

# Corrections

Federal Register
Vol. 54, No. 47
Monday, March 13, 1989

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents and volumes of the Code of Federal Regulations. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

## FEDERAL RESERVE SYSTEM

**12 CFR Part 208**

**[Regulation H; Docket No. R-0660]**

**Membership of State Banking Institutions in the Federal Reserve System; Investment in Stock of Investment Companies**

*Correction*

In rule document 89-3714 beginning on page 7180 in the issue of Friday, February 17, 1989, make the following corrections:

**§ 208.124 [Corrected]**

1. On page 7181, in the 2nd column, in § 208.124(b), in the 23rd line, before "12" remove the parenthesis.

2. On page 7182, in the first column, in § 208.124(c)(6)(ii), in the eighth line, "determined" was misspelled.

3. On the same page, in the second column, in footnote [1], in the last line, "SVC." should read "Svc.".

BILLING CODE 1505-01-D

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

**Food and Drug Administration**

**21 CFR Part 184**

**[Docket No. 78N-0349]**

**Certain Glycerides; Affirmation of Gras Status**

*Correction*

In rule document 89-3935 beginning on page 7401 in the issue of Tuesday, February 21, 1989, make the following correction:

**§ 184.1903 [Corrected]**

On page 7404, in the third column, in § 184.1903(c)(2), in the last line, "§ 170.3(n)(39)" should read "§ 170.3(n)(38)".

BILLING CODE 1505-01-D

## VETERANS ADMINISTRATION

**38 CFR Part 4**

**Systemic Diseases, Temporary Total Evaluations Based on Periods of Hospitalization or Surgery, Regular Scheduler Assignment of a Total Evaluation Based on Total Industrial Impairment**

*Correction*

In rule document 89-2803 beginning on page 4280 in the issue of Monday, January 30, 1989, make the following correction:

On page 4282, in § 4.88a, in the second column, under "6318 Melioidosis", in the fourth line, "military" should read "miliary".

# Department of Transportation

**Federal Aviation Administration**

**14 CFR Parts 121 and 135**
**Exit Row Seating; Notice of Proposed Rulemaking**

VOL 54 ISS 47 MR 13 1989 UMI

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Parts 121 and 135

[Docket No. 25821; Notice No. 89-8]

RIN: 2120-AC75

# Exit Row Seating

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to regulate exit row seating aircraft operated by U.S. air carrier and commercial operators (certificate holders). This is needed to ensure that only persons who are determined by the certificate holder to be able, without assistance, to activate an emergency exit and to take the additional actions needed to ensure safe use of that exit in an emergency are seated in exit rows. This action is intended to further safety for all passengers.

DATE: Comments must be received on or before June 12, 1989.

ADDRESSES: Comments on this notice may be mailed, in triplicate, to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-10), Docket No. 25821, 800 Independence Avenue, SW., Washington, DC 20591. Comments delivered must be marked Docket No. 25821. Comments may be examined in Room 915G weekdays between 8:30 a.m. and 5 p.m., except on Federal holidays.

FOR FURTHER INFORMATION CONTACT: Ms. Irene H. Mields or Mr. John Walsh, General Legal Services Division (AGC-100), Office of the Chief Counsel, 800 Independence Avenue, SW., Washington, DC 20591. Telephone: (202) 267-3473.

SUPPLEMENTARY INFORMATION:

## Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Comments relating to the environmental, energy, or economic effects that might result from adoption of the proposals contained in this notice are invited. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. ." The postcard will be dated and time stamped and returned to the commenter.

All communications received on or before the closing date for comments will be considered by the Administrator before taking action on the proposed rule. The proposal contained in the notice may be changed in light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each substantive public contact with FAA personnel concerning this rulemaking will be filed in the docket.

## Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA-430, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 267-3484. Requests must identify the notice number of this NPRM. Persons interested in being placed on the mailing list for future NPRM's also should request a copy of Advisory Circular No. 11-2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedures.

In an effort to make this information available in an accessible format to individuals who are blind or visually impaired and to other individuals who are print handicapped, the FAA will make available for copying a number of audio cassette tapes of the entire NPRM (and the accompanying initial regulatory evaluation) in the FAA Rules Docket, Room 915G, FAA Headquarters, 800 Independence Avenue, SW., Washington, DC. In addition, single cassette tapes will be available in the Public Affairs Offices of the agency's nine regional headquarters; at the Mike Monroney Aeronautical Center, Oklahoma City, Oklahoma; and at the FAA Technical Center, Atlantic City, New Jersey.

## Summary of Proposed Rule

A passenger aircraft crashes. Inside the cabin, there are many survivors. A fire begins. If the passengers are to stay alive, they must get out of the aircraft as soon as they can. Seconds mean the difference between life and death. This is the scenario on which a crashworthiness standard is based. Many other FAA rules attempt to prevent a crash from ever happening. A crashworthiness rule assumes that a survivable crash has happened and then asks what can be done to maximize people's chances of getting out alive.

This proposed rule on exit row seating concerns a crashworthiness standard. Exit doors must be opened quickly and properly if an emergency evacuation is to succeed. Often, crewmembers are not in a position to lead this part of the evacuation. Passengers sitting near the doors must perform the functions on which their lives, and the lives of their fellow passengers, depend.

What are some of these functions? First, a passenger must be able to locate the door and quickly follow the instructions for using it. Door operations and instructions differ from airplane to airplane. A delay in figuring out how to operate the door can cost precious seconds; operating it improperly can injure or result in the deaths of passengers. Second, a passenger must be able physically to open the door. Doors are often heavy and clumsy to manipulate, and not every passenger can open them quickly.

Third, a person must be able to determine when to open the door. This involves being able to respond to shouted or hand-signalled instructions from flight attendants, as well as being able to tell when opening an exit would be too dangerous (e.g., because of fire on the adjacent wing). Fourth, a person must be able to go quickly through the open exit, so as not to cause a traffic jam at the door, and perhaps assist other passengers to leave the danger zone around the aircraft. Fifth, a passenger must devote full attention to his or her emergency task. A passenger who must care for small children, for example, may be unable to do so.

The proposed rule says simply that airlines should seat in exit rows only persons who appear able to perform these and other relevant functions in an emergency evacuation. Persons who cannot perform all the functions may sit in any other seat. Airlines also would have to take new steps to inform passengers sitting in exit rows about what they would have to do in an emergency evacuation. By following the proposed requirements, airlines would minimize the likelihood of passenger-caused evacuation delays that could cost lives.

The rule would result in some persons being seated in seats other than those in exit rows, based on the application of neutral, functional criteria. For example, young children, persons who were too large or too small, persons with some disabilities, and elderly persons who are physically frail would be seated in a location other than an exit row.

## Background

The Air Carrier Access Act of 1986 ("the Act") (Pub. L. 99-435, October 2, 1986) prohibits discrimination in air transportation on the basis of handicap. The Act also requires that measures taken to eliminate such discrimination take into account the safety of all passengers. Specifically, it provides:

> (c) (1) No air carrier may discriminate against any otherwise qualified handicapped individual, by reason of such handicap, in the provision of air transportation.
>
> (2) For the purposes of paragraph (1) of this subsection the term "handicapped individual" means any individual who has a physical or mental impairment that substantially limits one or more major life activities, has a record of such an impairment, or is regarded as having such an impairment.
>
> . . . . .
>
> Sec. 3. Within one hundred and twenty days after the date of enactment of this Act, the Secretary of Transportation shall promulgate regulations to ensure non-discriminatory treatment of qualified handicapped individuals consistent with the safe carriage of all passengers on air carriers.

In order to formulate regulatory proposals implementing the Act, the Secretary of Transportation formed an advisory committee consisting of representatives from groups of persons with disabilities, the Government, and the air transportation industry (52 FR 19861; May 28, 1987). The Committee began meeting on June 3, 1987, under the guidance of the Federal Mediation and Conciliation Service and was scheduled to present its recommendations to the Secretary in December 1987.

The Committee was unable to reach a consensus regarding a recommendation on exit row seating, which had been an issue of some concern to the Committee. Consequently, the Department had the responsibility of proposing for its own provision on this subject, which it did in a notice of proposed rulemaking (NPRM) published June 22, 1988 (53 FR 23674). Concerning exit row seating, that NPRM proposed that carriers be prohibited from excluding persons from any seat on the basis of handicap, except in order to comply with an FAA safety rule. This FAA NPRM, amending 14 CFR Parts 121 and 135, proposes restrictions on exit row seating on the basis of neutral, nondiscriminatory criteria applicable to all passengers. The statutory authority for Part 121 is 49 U.S.C. 1354(a), 1355, 1356, 1357, 1401, 1421-1430, 1472, 1485, and 1502; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983). The statutory authority for Part 135 is 49 U.S.C. 1354(a), 1355(a), 1421-1431, and 1502; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983).

## Previous FAA Rulemaking Activity

Exit row seating has been the subject of FAA rulemaking in the past. In Notice 74-25 (July 2, 1974; 39 FR 24667), the FAA proposed a regulation, § 121.584, which would have provided that a handicapped person capable of traveling alone (e.g., a blind or a deaf person) could not be denied transportation so long as the person could be seated in any seat other than:

> The two seats nearest an exit, and any seat in a row immediately adjacent to an exit with the exception of the farthest seat from the exit in that row.

In other words, the two seats nearest an exit would have been unavailable to all handicapped persons in all cases, and other seats in an exit row would have been unavailable as well, depending on the length of the row, with the exception of the seat farthest from the exit.

That proposal was not adopted. The FAA chose instead to adopt in Amendment 121-133 a rule allowing each certificate holder to develop procedures appropriate to its own operations and aircraft (42 FR 18362; April 7, 1977). The FAA, however, issued an advisory circular (AC 120-31; March 25, 1977, the same date as Amendment 121-133) to assist certificate holders in developing their own procedures, which provided guidance on seating.

Paragraph 9 of the advisory circular states:

> 9. *SEATING HANDICAPPED PASSENGERS.* FAA's Civil Aeromedical Institute has conducted research to determine where handicapped passengers should be seated in an aircraft operated under Parts 121 and 135 so that, in the event of an emergency evacuation, they can leave the aircraft, either unassisted or assisted, by the safest and most expedient route while not slowing the evacuation.
>
> a. Those nonambulatory handicapped passengers should be seated in aisle seats where they would be near the end of lines of passengers being evacuated through floor-level, nonoverwing exits. Tests revealed that due to the narrow aisle width, an accompanying attendant trying to lift the handicapped person would temporarily block the aisle and hinder other passengers attempting to evacuate. Once the mainstream of evacuating passengers has passed, the attendant and the handicapped passenger can normally catch up to the flow since there is a bunching at the exit. Two nonambulatory passengers with attendants should not be seated directly across the aisle from each other because their attendants would interfere with each other while attempting to remove the nonambulatory passengers from their seats.
>
> b. To determine the amount of assistance nonambulatory passengers will require to evacuate the aircraft, an agent should first ask the passengers what their capabilities are. If there is some question as to whether an individual is ambulatory or nonambulatory, the agent may ask him to perform a simple test such as transferring from a wheelchair, unaided, to another seat. Additionally, the passenger may furnish evidence of his capability, such as a driver's license or a statement signed by a qualified professional person (e.g. a physician or physical therapist).
>
> c. Ambulatory handicapped passengers should be seated in areas in which evacuation would normally occur through a floor-level, nonoverwing exit.

The FAA's intent, in issuing this rule and advisory circular, was that carriers would adopt reasonable seating policies consistent with the FAA's advice and consequently, to a significant extent, consistent with other carriers' policies.

The FAA's experience, including a review of a large number of carrier policies carried out in connection with the work of the advisory committee, suggests that FAA's intent has not been realized fully. Some carriers have not established seating policies fully consistent with the advisory circular. Carrier policies appear to be inconsistent with one another in a number of cases. Further, information available to the Committee shows that certificate holder personnel, in excluding persons from those seats, may have done so in the mistaken notion that an existing FAA regulation required it or may have alluded to a non-existent regulation to "settle the argument." This, in turn, has led to increased pressure to remove restrictions on seating handicapped persons in exit rows. Under these circumstances, the FAA has determined that it is necessary to consider regulatory requirements concerning exit row seating.

The need to review and reconsider the FAA position is heightened by the provision of the Air Carrier Access Act NPRM, referred to above. Concerning seat assignments, proposed § 382.31 states:

> Carriers shall not exclude any person from a seat in an exit row or other location or require that a person sit in a particular seat, on the basis of handicap, except in order to comply with the requirements of an FAA safety regulation.

This formulation contemplates consideration of an FAA proposal on this subject. Unless the FAA promulgates a safety regulation on exit row seating, the proposed provision of the rule implementing the Air Carrier Access Act would abolish all air carrier seating policies in effect, and it would prohibit the institution of new ones, regardless of valid safety considerations. For all the foregoing

VOL 54 ISS 47 MR 13 1989 UMI

reasons, the FAA has determined to reexamine the issue of exit row seating.

**Findings of Civil Aeromedical Institute Studies**

The FAA reviewed in detail the results of research conducted by the FAA's Civil Aeromedical Institute (CAMI) to assess the effects of handicapped passengers aboard an aircraft during an emergency evacuation. CAMI's project was undertaken in response to the Civil Aeronautics Board's (CAB) request for clear safety standards in this area. Basically, the position of the CAB in 1972 was similar to that of the FAA today. It recognized that handicapped persons were encountering inconsistent practices and policies in the provision of air carriage. The CAB recommended that appropriate actions be taken, looking towards the issuance of safety regulations on this pressing problem. "Flight Standards Technical Division Report on Air Transportation of Handicapped Persons," June 1973, p. 3.

As discussed further herein, the FAA elected not to regulate directly, in regard to exit row seating or other issues relating to the carriage of handicapped persons. Instead, it issued § 121.586 of the Federal Aviation Regulations (FAR), "Authority to refuse transportation," which allows air carriers to establish their own procedures for persons who may need assistance in an emergency evacuation.

In light of the FAA's experience under the current regulation, FAA finds that the CAMI research supports restrictions on exit row seating. A CAMI report on the subject states that:

> The average ambulatory handicapped passenger appears to possess adequate mobility for escape. He could be seated anywhere in the cabin except in an exit row or a primary overwing exit route * * * "Emergency Escape of Handicapped Air Travelers," Report FAA-AM 77-11, July 1977, p. 36.

[A copy of this report has been entered in the Regulatory Docket].

This report was prepared for possible publication in scientific journals and, therefore, included certain observations and tests conducted by the researchers that were not contained in the 1973 report by the FAA's Flight Standards Service, "Air Transportation of Handicapped Persons," Project Report No. 73-740-120A. Although both reports are based on the tests conducted in 1973, only the 1973 report, which contains no direct conclusions on exit row seating, was available at the time Amendment 121-133 was adopted.

The research does make a number of findings relevant to the seating of persons with disabilities. The agency simply did not have available the full, considered opinions of the researchers at the time Amendment 121-133 was adopted. Among the research findings are the following:

> In proceeding to exit doors from given seats, handicapped persons exceeded the exit time of unimpaired people by 22 to 1,189 percent.
>
> *Id.*, Tables 1 and 2, at 6, 7.
>
> Persons with disabilities increased the exit time through floor-level exits in all cases, ranging from 3.9 seconds to 49.8 seconds. In the case of window exits, the increases ranged from 3.4 to 42.5 seconds.
>
> *Id.*, Tables 10 and 11, at 31 and 32.
>
> In general, evacuation times increased as the number of handicapped subjects was increased. Researchers found the increase to be most significant in the totally handicapped category, less significant in the lower limb and partial immobility category, and least significant in the upper limb and sensory handicap category. Increases occurred, however, in all categories.
>
> *Id.*, at 29.
>
> Although the time needed to evacuate anthropomorphic dummies was somewhat higher than would have been the case for most human beings, the times required by actual persons with disabilities also were greater than those of the able persons.
>
> *Id.*, at 29.

In regard to evacuation times, § 121.291(a) of the FAR requires all certificate holders to demonstrate that each type and model of airplane with a seating capacity of more than 44 passengers can be evacuated in 90 seconds or less. The evacuations must be conducted in accordance with Appendix D to Part 121 of the FAR, which calls for the tests to be conducted with a representative passenger load of persons in normal health. At least 30 percent must be females; at least 5 percent must be over 60 years of age with a proportionate number of females; at least 5 percent but not more than 10 percent must be children under 12 years of age, prorated through that age group. Three life-size dolls, not included as part of the normal passenger load, must be carried by passengers to simulate live infants 2 years old or younger. Crewmembers, mechanics, and training personnel, who maintain or operate the airplane in the normal course of their duties, may not be used as passengers. Other conditions also must be representative, such as the seating density and arrangements, carry-on baggage, etc., but only 50 percent of the emergency exits can be made available.

Rapid evacuation is necessary, of course, due to the hazards of fire, smoke, explosion, and flooding in the event of an inadvertent water landing. It is vital, therefore, to minimize delays in every possible way. In the CAMI study, the researchers concluded that seating location could be used to minimize the delays. Clearly, it would be neither desirable nor feasible to limit passenger loads to those "in normal health," as in the emergency evacuation demonstrations required for transport category airplane certification. On the other hand, persons with handicaps should not be exposed to injuries that can be avoided nor should they impede the evacuation of other passengers. Instead, they should be seated where these dangers are minimized.

In the CAMI studies, information for the study of seat location was drawn from a variety of tests. These included: (1) An evaluation of individuals with handicaps, where individuals moved from one of three designated seat locations to a specific exit; (2) evaluation of handicapped passengers who required assistance to move to an exit; (3) evaluation of the evacuation of totally incapacitated passengers; (4) evaluation of the evacuation of grouped handicapped passengers; (5) evaluation of mixed group evacuations; (6) evaluation of the effect of exit configuration on evacuation; and (7) a separate evaluation of the evacuation of a paraplegic subject. *Id.*, at 4 through 28.

Subjects were recruited from a variety of sources. Nonhandicapped subjects were FAA employees or were hired through the University of Oklahoma Office of Research Administration. Most handicapped subjects were recruited from participating organizations, such as the Oklahoma Foundation for the Disabled, the Oklahoma League for the Blind, the United Cerebral Palsy Rehabilitation Workshop of Greater Oklahoma City, and The Carver School. *Id.*, at 2.

One hundred sixty-two subjects, ranging in age from 18 to 84 years, participated. Eight had disabilities resulting from cerebral palsy; four from arthritis; three from polio; four from multiple sclerosis; two from muscular dystrophy; and five from birth defects. Eighteen were paraplegics; 2 were quadriplegics; and 15 were hemiplegics. Twelve were classified as elderly, either on the basis of age alone or on their physical condition. Their ages ranged from 55 to 84. Fifteen were blind; one was classified as legally blind; and eight were partially sighted. In addition, 22 normally-sighted persons performed as simulated blind passengers. Two were in casts and seven had fractures, amputations, or breaks that had mended poorly and affected their mobility. Seventeen had mental deficiencies and 7 had mental illnesses (depression or schizophrenia). Two had no handicap and were capable of speed running. Four were obese, and four were deaf. *Id.*, Appendix B.

Especially relevant to this proposed rulemaking are the results of the CAMI tests on group evacuations. The research team found that seating of handicapped passengers in a normal passenger population during normal flight conditions results in, at most, an occasional minor inconvenience to other passengers. They found, however, that under circumstances where the passenger cabin must be speedily evacuated, placement of the handicapped passengers becomes important.

Information for the study of seat location was drawn from three test series: using an actual handicapped passenger in a passenger population of 24; using simulated handicapped passengers in a passenger population of 23; and using simulated handicapped passengers in a passenger population of 50. The simulated passengers were anthropomorphic dummies, to avoid injury to persons with actual disabilities.

Five tests involving the actual handicapped person, who required an assistant to carry him from the plane, showed that better evacuation times generally resulted when the handicapped passenger and his assistant were seated away from the exit. This enabled the assistant to position the handicapped person on his back properly, without delaying passengers behind him and without experiencing difficulties himself, due to crowding and shoving. *Id.*, at 19.

In tests involving subjects simulating total incapacitation, one man assisting a fairly light dummy worked skillfully into the flow of passengers without delay. Evacuation of a 200-pound dummy from a seat near the exit was more difficult, and a delay of about 3 seconds resulted. *Id.*, at 19.

Placing the dummies at the farthest point from the exit, the extreme end of the passenger population, allowed the cabin attendant to establish a good evacuation flow immediately. The total evacuation of 23 live passengers took only 25.04 seconds. There was little delay in this test because most passengers were not detained by the action required to move the dummies and because their assistants had ample time to position them for transport while the forward line of passengers was evacuating. *Id.*, at 23.

When the simulated handicapped persons were placed in forward positions, only 6 passengers (including 2 dummies) exited in the same time (20 seconds) that 17 passengers exited when the dummies were placed at the farthest point from the exit. *Id.*, at 23.

Passengers with upper limb and sensory handicaps had the least delaying effect on passenger flow times once their seatbelts were released. *Id.*, at 34. The tests, however, measured only their capacity to move from their seats to an exit under optimum conditions. To safeguard the subjects, none were asked to use evacuation slides. None were asked to open emergency exits and to perform the other tasks addressed herein, all of which are much more demanding than the relatively simple task of leaving a seat and moving forward to an exit without the dangers of flame, smoke, debris, and panic.

It has been suggested by some persons that there may be little or no relationship between a passenger's rate of movement from a seat to an emergency exit and his or her ability to open the exit and perform the other functions stated in the proposed rule. The FAA requests commenters to provide copies of any studies that support that thesis. The CAMI studies do not point to that conclusion.

Videotapes of the experiments, which are discussed further herein and copies of which have been placed in the docket, show the effect of various disabilities on movement from the seats to the doors. In many cases, it is readily apparent that the cause of slow progress, such as the immobilized arm of a stroke victim, also would affect the person's ability to open a door.

The videotapes also show that some passengers with a fairly good rate of movement down an aisle would have trouble, nevertheless, opening the door. A paraplegic with strong shoulders and arms, for example, could drag himself or herself toward the exit but would not have the stability to stand and remain upright to operate the door or window mechanisms.

The tests revealed that evacuation of the control group (persons with no handicaps) consistently was faster than that of groups with handicaps. Further, the evacuation time increase in all handicapped groups, when the evacuation test involved a window exit rather than a floor-level exit. It is significant that this rather modest increase in complexity, from a floor-level to a window exit test, resulted in increased evacuation times.

It is logical to conclude that additional complexity, such as finding and operating mechanisms, would impose additional burdens on persons with handicaps and cause delays.

Given the results of the tests, the researchers concluded that the average ambulatory handicapped passenger could be seated anywhere in the cabin except in an exit row or an overwing exit route, where he or she might impede the early stages of an evacuation or be injured by the rush of other passengers. This approach, which differs from that originally proposed in Notice 74-25 in 1974, serves as the basis for the present proposal. *Id.*, at 36.

Further, the researchers also found that "if nonambulatory passengers are seated in a group, the group should be seated in the cabin so that they, and their assistants, would be at the end of a line of evacuees so as not to interfere with the evacuation of other passengers and to avoid crowding by other passengers during their preparation for evacuation." *Id.*, at 36. Clearly, this preferred seating position for nonambulatory persons is incompatible with sitting in an exit row, which by nature is at the beginning of a line of evacuees.

It should be noted that seating "at the end of a line of evacuees" does not necessarily mean being seated at the back of the airplane or being the last person to evacuate. The location of the emergency exits determines the end of the line. Between a forward exit door and a window exit, for example, it is likely that two exit flows will develop—one toward the door and one toward the window. The break between the two flows will tend to come at midpoint between the two exits.

While it always is possible that one of the exits will become inoperable in an emergency, thereby changing the anticipated passenger flow, the FAA studies show that the seating proposed results in the expeditious evacuation of the greatest number of passengers.

The question has arisen as to whether certificate holders should ensure that at least one seat is occupied in each emergency exit row. The FAA does not believe that such a requirement is necessary. Nearby passengers who are able to perform the necessary functions could move into an empty row rapidly to perform the necessary functions.

It also has been suggested that the seats in all exit rows be removed or the aisles widened. The FAA does not believe that either approach would remove the need for positioning persons capable of performing the necessary functions near enough to the emergency exits to perform the evacuation functions that may be required.

VOL 54 ISS 47 MR 13 1989 UMI

**Additional Research**

In addition to reviewing the CAMI documents, FAA staff took part in recurrent flight attendant training during October 1987 to observe and experience first-hand an evacuation drill at a major certificate holder. The information available from this training program was instructive. In the training devices of this certificate holder alone, there were at least 11 types of doors or emergency exits, each of which required varying degrees of strength and agility to open and each of which operated somwhat differently from the others. It is reasonable to conclude that, given the differences in operating instructions and techniques, sight also would play a major role in successfully opening the door or exit in a timely fashion.

In addition, the FAA reviewed scenes from a videotape, made at the time of the 1973 CAMI study, which showed actual, as well as simulated, handicapped persons, in the process of evacuating a simulated transport category airplane fuselage section. While the study's statistics provide ample evidence of the difference between the evacuation times of passengers with and without disabilities, the film provides very graphic evidence of the difficulties of movement associated with certain types of disabilities. These tapes are also made part of the rulemaking docket.

The FAA also reviewed a study completed in October 1970, by the Office of Aviation Medicine of the FAA, entitled, "Survival in Emergency Escape from Passenger Aircraft." (Document No. AM 70-16). This document discusses human factors relating to survival in emergency escapes from passenger aircraft. Data was secured from three actual accidents, with a total of 321 passengers, 105 of whom lost their life.

The accidents involved a United Airlines DC-8, which crashed during a landing at Stapleton Field, Denver; a United Airlines Boeing 727, which crash-landed at Salt Lake City Municipal Airport; and a Trans World Airlines (TWA) Boeing 707-331, which crashed on takeoff from Fiumicino Airport in Rome, Italy. The study, a copy of which has been entered in the Regulatory Docket, deals in detail with the emergency evacuations; the behavior of the passengers; their seat locations, the age, sex, and other characteristics of the passengers; the causes of death or injury, and the effect of the crashes on the emergency exits.

This study concluded that:

> In aircraft accidents in which decelerative forces do not result in massive cabin destruction and overwhelming trauma to passengers, survival is determined largely by the ability of the uninjured passenger to make his way from a seat to an exit *within time limits imposed by the thermotoxic environment.*

(Emphasis added.) *Id.* at 57.

That is, it is crucial that people evacuate quickly before heat, flames, toxic fumes, or an explosion kill or injure them.

In addition, the FAA reviewed a "Protection and Survival Laboratory Memorandum," No. AAM-119-87-6, dated November 5, 1987, based on CAMI "Accident/Incident Bio-Medical Data Reports." This memorandum has been placed in the rulemaking docket. At the time of the November 5, 1987, memorandum, the CAMI Cabin Safety Data Bank contained 3,382 entries. Of these, 132 pertained to problems of persons with handicaps or with characteristics that are likely to affect their ability to activate an emergency exit and to take the additional actions needed to ensure safe use of that exit in an emergency. The memorandum focused on 50 of these entries. While information in such a document is subject to additional evaluation or change on review of the data, conduct of additional testing, or receipt of additional facts, the memorandum lends support to the CAMI conclusions regarding problems encountered by the disabled and others during evacuation. The FAA also reviewed the 50 entries individually. All included problems affecting persons with disabilities, handicaps, the aged, children, the obese, and others having characteristics which could affect the evacuation process.

While the memorandum included some reports of successful, rapid evacuation by persons with disabilities, the reports show rather dramatically that certain factors generally impede rapid evacuation—advanced age or extreme youth; parental responsibilities for minors; physical disabilities; obesity; injury or ill health, etc. Many of the persons impeded by these factors required the assistance of others to escape.

It should be noted that in seven of the above cases, this assistance was provided by certificate holder crewmembers, persons in related occupations, or persons especially trained for emergencies such as fire, police, and military personnel, while assistance by other passengers was observed to only four of the cases. While it is conceivable that there were more instances of such assistance, the figures are in line with data obtained by the FAA in its study of three major aircraft accidents. The FAA found that while still aboard, passengers usually did not attempt to help others unless they were members of their own family. "Survival in Emergency Escape from Passenger Aircraft, AM 70-16, October 1970," at 15 and 88.

In regard to assistance to handicapped passengers, the CAMI researchers found:

> Assisting handicapped passengers in an aircraft cabin is difficult because of space limitations generated by the seat configurations. Fixed armrests, restrictive seat pitch (distance between similar points on seats), and restrictive aisle widths made assistance difficult and interfered with movement. Passenger congestion also interfered with those assisting handicapped subjects. Assistance in operating the seat belt was necessary for most handicapped subjects, especially those who lacked strength or muscular coordination.
>
> Deaf subjects required visual demonstration or written notes describing what they were expected to do * * * It should be noted that although some deaf passengers could read lips, they missed oral announcements unless they knew to expect them.
>
> * * * * *
>
> Assisting passengers with partial or total paralysis * * * a special problem. The aisle did not provide enough space for an assistant to help directly from the side, and leading these subjects from the front only slightly improved movement rates * * * Carrying would have been necessary to move severely afflicted subjects at an acceptable rate in a survival situation * * *
>
> Cerebral palsy victims vary in degree of mobility limitations. Total or partial inability to coordinate muscular movements limits many of them to a slow, unsteady walk * * * Five of the eight cerebral palsy subjects, who normally used wheelchairs, moved less than 1 ft./s (one foot per second), a rate inadequate for emergency aircraft evacuations.

"Emergency Escape of Handicapped Air Travelers," 1977 document, at 14 through 16.

In regard to passengers who had to be carried, their rate of egress depended upon a number of factors, such as the skill with which their assistants positioned them for carrying, obstructions caused by other passengers, but most important, where they had been seated.

As previously discussed herein, five tests with a paraplegic and an assistant showed that better evacuation times (for evacuees as a whole) generally resulted when the handicapped passenger and his assistant were seated far from the exit since the assistant could position the paraplegic without obstruction and then stay with the flow of traffic.

In one test, a paraplegic passenger was allowed to evacuate the cabin without assistance. The study reports:

> He positioned himself in the aisle so that a feet first scoot was possible. Although his movements were quick, he fell behind when traffic really began to move and delayed those behind him about 4 s. The obvious effort to avoid overrunning the paraplegic undoubtedly was a major reason that the total delay was more than 2 s.

*Id.* at 19.

The FAA notes in this connection that 2 seconds can mean the difference between life and death in the aftermath of a crash inasmuch as evacuation might be terminated abruptly by an explosion at any point. *See, e.g.*, "Survival In Emergency Escape From Passenger Aircraft," FAA Report AM 70-16, October 1970, at 35-36.

As a result of the studies and other available data and information, the FAA has concluded that it is more probable than not that persons with handicaps that prevent them from performing certain evacuation functions would be likely to impede emergency evacuation if seated in an exit row. This is especially true in an emergency where an exit row occupant is responsible for opening the exit. The data provide support for the FAA's conclusion that rulemaking is necessary to avoid the establishment or continuation of practices that are in derogation of the safety of all passengers.

**Safety Under the Air Carrier Access Act**

The Air Carrier Access Act protects the civil rights of handicapped persons and clearly mandates continued concern for safety. Further, safety constituted an important theme in the legislative history. The Senate Report focused on this issue at several points. It states that the statute "does not mandate any compromise of existing DOT or Federal Aviation (FAA) safety regulations." Sen. Rept. 99-400, August 13, 1986, p. 4. The FAA's existing rules allowing carriers to establish their own procedures for persons who may need assistance in an emergency evacuation (§ 121.586 of the FAR) does not cover specifically the role of exit row seating in air safety. Consequently, the FAA now must address the issue directly. In drafting this proposed rule to regulate exit row seating, the FAA has remained mindful of both the words of the Act and the expressed congressional intent regarding safety and civil rights.

The FAA notes, for example, that the Senate Report states that it was intended that the certificate holders will not "impose upon handicapped travelers any regulations or restrictions unrelated to safety and unrelated to the nature and extent of any individual's handicap." *Id.* at 4.

In a statement made on the Senate floor, Senator Robert Dole added:

> Our intent * * * is that so long as the procedures of each airline [concerning the transportation of handicapped passengers] are safe as determined by the FAA, there should be no restrictions placed upon air travel by handicapped persons. Any restrictions that the procedures may impose must be only for safety reasons found necessary by the FAA. * * *

Congressional Record, August 15, 1986, at S11785.

This proposed rule follows both the letter and the spirit of the Act and the expressed congressional intent.

It is clear that the principles enunciated by the courts with respect to discrimination under Section 504 of the Rehabilitation Act apply to the Air Carrier Access Act. The legislative history shows that the Congress passed the Air Carrier Access bill specifically to close a gap in the Rehabilitation Act. During consideration of the Senate bill, S. 2703, Senator Dole stated specifically that the purpose of the legislation is to "overturn the recent Supreme Court decision in the case of Paralyzed Veterans of America versus the Department of Transportation. This case, which was handed down by the high court in the closing days of its spring term, held that section 504 of the Rehabilitation Act of 1973 'is not applicable' to U.S. carriers, except for those few small regional carriers who receive direct Federal subsidies." Congressional Record, August 15, 1986, at S11784. Senator Alan Cranston and Senator Howard M. Metzenbaum also addressed this point. *Id.* at S11787.

Similarly, in discussing the House version of the bill, H.R. 5274, Congressman John Paul Hammerschmidt stated:

> Unfortunately, our efforts on behalf of the handicapped were set back by the recent Supreme Court decision in the case of Paralyzed Veterans of America versus DOT. In that case, the Court decided that the Rehabilitation Act, which prohibits discrimination against the handicapped, did not apply to [unsubsidized] air travel * * *

Congressional Record, September 16, 1986, at H7193.

Congressman Gary L. Ackerman expressed similar intent:

> As you know, Mr. Speaker, last summer I introduced similar legislation to amend the Federal Aviation Act immediately following the Supreme Court ruling that major airlines cannot be forced to comply with the Rehabilitation Act because they do not receive direct Federal assistance.

*Id.*, at H7194.

Given this recognition of the interrelationship and the Congressional history of the Air Carrier Access Act, logic requires that the standards set by the Supreme Court in *Southeastern Community College (Davis)* and in *Alexander*, regarding "reasonable accommodation" and "meaningful access," apply to the Air Carrier Access Act as well as to section 504 of the Rehabilitation Act. The seating restriction is narrowly defined, and this proposed regulation would not constitute a barrier to meaningful access to air carrier transportation.

In addition, the proposed rule is in accord with governing judicial decisions. The Supreme Court has held that nondiscrimination on the basis of handicap does not require the imposition of undue financial and administrative burdens, nor does it require modifications that would result in a fundamental alteration of the nature of a program. *Southeastern Community College* v. *Davis*, 442 U.S. 397 (1979); *American Public Transit* v. *Lewis*, 665 F.2d 1272 (D.C. Cir. 1981). Various courts have decided that *either* an undue financial or administrative burden may be used as the basis for refusing to accommodate in a particular manner. *Majors* v. *Housing Authority of DeKalb County*, 652 F.2d 454, 457 (5th Cir. 1981); *Rhode Island Handicapped Action Committee* v. *Rhode Island Public Transit Authority*, 549 F. Supp. 562, 610 (D.R.I. 1982), reversed in part, vacated in part, and remanded on other grounds, 718 F.2d 490, (1st Cir. 1983).

In *Alexander* v. *Choate*, 469 U.S. 287, 105 S.Ct. 712 (1985), the Supreme Court again examined the extent of accommodation required for persons with disabilities, finding that in *Southeastern* a balance was struck between "two powerful but countervailing considerations—the need to give effect to the statutory objectives and the desire to keep section 504 [of the Rehabilitation Act] within manageable bounds." *Alexander*, at 299.

The Supreme Court concluded in *Alexander* that "The balance struck in *Davis* [*Southeastern*] requires that an otherwise qualified handicapped individual must be provided with *meaningful access* to the benefit that the grantee offers * * * to assure meaningful access, *reasonable accommodations* in the grantee's program or benefit may have to be made." (Emphasis supplied.) *Alexander*, at 301.

These principles and section 3 of the Act require carriers to ensure meaningful access to air transportation while considering the potential safety impact of seating policies that are necessary to transporting passengers

VOL 54 ISS 47 MR 13 1989 UMI

with the maximum degree of safety. Banning all persons with disabilities from particular seats, or requiring all disabled persons to sit in particular seats, would be unlawful discrimination; but the exclusion of persons with certain disabilities from the seats covered by the rule for legitimate safety reasons does not deprive them of "meaningful access" to air carrier transportation. Exit rows provide only a small fraction of the available seating in the air carrier fleet. The FAA does not propose to bar any persons from seating that does not adversely affect their safety or that of other passengers. Furthermore, the rule specifically provides that a person with a disability cannot be denied transportation as a result of the safety restrictions.

**Emergency Evacuations—Exit Row Passenger Functions**

From a safety standpoint, a person who sits in an exit row or, in cases where there is no aisle, in any seat that has direct access to an exit must be able to accomplish a number of tasks under a variety of conditions without assistance. These include:

*Locating the Exit*

In order to be able to locate the exit in an emergency, the passenger in an exit row must be able to comprehend and identify that he/she is in such a row. The primary means of such comprehension and identification is seeing the exit, as well as its placards, and recognizing their significance. Although a person familiar with one or more aircraft seating configurations might be able to recognize that he/she is in an exit row by counting seat rows, that method is not reliable. Seating configurations vary from certificate holder to certificate holder and even from aircraft to aircraft in the same fleet. Further, the ability to remember seating configurations is not something that can be discerned by ordinary means of observation. It would not be practical to expect that a certificate holder assigning seats could identify a person with that ability, or be sure that one who claims such ability actually has it. It has been suggested that special briefings could be given to blind persons to inform them of their exit row occupancy and to familiarize them with the door or window mechanism. During an actual evacuation, however, there is no guarantee that the nearest exit will be operable or should be used. The FAA's study of three major accidents (Report AM–70–18), described previously herein, includes data on this point. In the Denver accident, the left window exits became unusable due to fire on the wing. Debris blocked the main, rear boarding door. Fire destroyed the slide at the aft galley door after about 20 persons used it. Other passengers then had to jump—a situation with special hazards for blind and other handicapped passengers. In the Salt Lake City accident, fire on the left side of the fuselage drove persons away from the window exits there to the right side instead. In the Rome crash, fire spread to the left side of the aircraft, hampering the escape of passengers from that side. Further, the forward galley door was not used due to fire. "Survival in Emergency Escape from Passenger Aircraft," at 11, 12, 22, 31, and 33. Clearly all passengers benefit if the persons seated in an exit row can determine quickly whether its door or window remains operable or conditions outside allow its use.

*Recognizing, Comprehending the Instructions for Use, and Operating the Exit Opening Mechanism*

These tasks call for the ability to locate and identify the mechanism and the range and direction of motion required to use the mechanism effectively. They require the ability to perceive and understand the normally available directions pertaining to use of the mechanism. Ascertaining the complete directions for opening an exit often requires observation of both the exit itself, which may have on it a graphic illustration regarding the direction of motion of the mechanism required to open the exit, and a passenger information card and/or video tape presentation. These contain further graphic illustrations of the complete set of actions required for use of the opening mechanism.

It should be emphasized that these presentations rely on graphic displays as well as on words. Reliable oral interpretation of the graphics for the benefit of a blind person by another passenger depends on the ability of the person attempting to convey the information. There would be no practical way to test this in advance. Similarly, relying on another passenger to translate instructions would be impractical in the case of persons who do not speak the same language. In addition, other passengers have no legal duty to convey such information to a handicapped, non-English speaking, or illiterate passenger, and it would not be feasible to require them to demonstrate such an ability.

Further, many passenger information cards focus on main handles of the exit, on the assumption that passengers will be able to see or read further instructions or find adjunct mechanisms. To illustrate, at the Flight Attendants Recurrent Training Course, the following were noted:

An overwing window exit generally will have a handle marked "Pull" or "Pull Down," but no placard or information concerning the other hand grip which must be located and grasped at the same time as the movable handle. Both must be grasped to enable the person opening the exit window to move it out of the way to prevent blockage of the exit.

Certain operating mechanisms are not integral parts of the exit doors but may be located adjacent to the exit door. Still others have covers, labeled with words indicating they should be removed to allow use of the mechanism in an emergency.

On power-assisted exit doors, in addition to the mechanism for opening it, there often is an arming device located near the opening handle. If activated by mistake, it will prevent the door from opening. Sighted persons can differentiate this handle from the door mechanisms, which are fully labelled. No instructions are provided to passengers in connection with the arming devices because they are intended for crew use only. Yet, their proximity to the opening handles presents a chance that a person, who cannot discern the difference between the two mechanisms, inadvertently could render the exit useless. Once this occurs, it is not reversible without the assistance of trained mechanics.

Several persons have suggested that the locations and types of mechanisms may pose problems for persons other than those with disabilities. They recommend more detailed instructions on both the passenger evacuation cards and near the emergency exits. The FAA invites further comment on this issue.

*Assessing Conditions*

This requirement includes both sensory and cognitive abilities. The primary sense involved is sight. Cognitive abilities include the capacity to judge danger. Young children, for example, may lack the ability to make the required judgments. Opening an exit in an emergency may increase the danger to which all passengers are exposed, if doing so allows an external fire or even its smoke to enter the cabin. Danger to passengers also can be increased if they are encouraged to use an exit which might open onto dangerous conditions, such as jagged metal, ice, water, unexpected distance to the ground or some condition which might be avoided by using another exit.

It has been suggested that a blind person could be advised orally of a sighted person's assessment without derogating the safety of others. The FAA does not agree that this offers a practical alternative to excluding blind people from exit rows. Emergencies are more likely than not to foster confusion. To add a requirement for one person to assess conditions and relay that assessment to another before an emergency exit can be opened, solely to provide that other with the right to sit in an exit row, would be to increase danger unnecessarily.

It also has been suggested that a blind person can assess the danger presented by external fire through the sense of touch. The argument is that a blind person could sense an external fire by feeling the inside of the door. While that may be true in some cases, this argument is not valid in the case of fire that is not yet near enough to the airplane or of sufficient intensity to cause the inside of the door to be warm enough to warn against opening the door. Large, modern aircraft are extremely well-insulated. At 30,000 feet, a passenger cannot feel the intense cold (as low as –70 degrees centigrade) by placing a hand on the fuselage.

In addition, this assertion does not deal with the dangers presented by smoke, jagged metal, and other hazards such as those mentioned above. The certificate holders train crewmembers to "feel" the door while looking out the window to assess conditions, but this action is designed to cause a pause for assessment of viewed conditions before reaching for the exit operating mechanism. It is not considered an independent means of assessment.

In some doors, prism windows now allow visual assessment along the full length of the aircraft all the way to the ground to determine whether fire or obstacles are present. Clearly, blind persons cannot make such an assessment.

Automatic slides fail from time to time. When this happens, the person nearest the exit must recognize that manual deployment will be necessary, find the manual deployment handle, and operate it. If this fails, it may be necessary to find and communicate the need for a totally different means of escape. Sighting flashing door lights, following floor lights, or seeing the hand signals of others may be necessary for effective escape leadership. While this leadership may fall to a passenger outside the exit row, it will do so more rapidly if those in the exit row can quickly and accurately assess the state of that exit.

Finally, it has been suggested that blind persons are better able to function in the dark and actually may be more useful than sighted persons in an emergency evacuation. It is not certain, however, that in any given crash scenario darkness will be so complete as to render sight useless. Crashes involving fire and smoke may lead ultimately to total darkness in the cabin, but data available to the FAA at this time indicate that light cues usually are available. These may come from the fire itself, airport or other lighting, red emergency lights near the doors, and floor track lights. Even in dense smoke, an open door may appear shades lighter than the balance of the surroundings and draw passengers to safety.

*Assessing Whether a Slide Can Be Used Safely*

This includes judging whether the slide has extended, whether it terminates in a safe area, whether the physical integrity of the slide is adequate for its use, and whether passengers are accumulating on the slide in such numbers as to threaten its integrity.

*Stowing or Securing the Exit Door*

The action needed to stow or secure the exit door expeditiously and safely varies widely. On power-assisted doors, no separate action beyond turning the handle may be required. Removal of an exit window, however, will require maneuvering a 40- to 60-pound, approximately 2- x 3-foot window over the adjacent seat back into the row behind the exit or onto seats in the balance of the exit row. This requires strength, sight to ensure that others are out of harm's way of the detached window, and speaking ability to issue the appropriate orders or warnings to passengers in the way.

In stowing doors that swing outward, such as those on some Boeing 727 models, care must be taken to avoid falling out of the airplane. A handle near the door is provided for just this purpose, and its purpose is obvious to a sighted person attempting to open the door. In the passenger information cards of one major certificate holder, this handle is visible in pictures of the door, but its use is not discussed. This makes it unlikely that it would be revealed to a blind person being apprised of the exit operating instructions by a sighted companion. Such communication was suggested by at least one witness appearing before the advisory committee as being all a blind person would need to function as effectively as a sighted person in regard to opening an emergency exit safely and expeditiously. A similar argument could be made with respect to passengers who cannot read the language in which the instructions are presented. It is the FAA's position that such instruction or explanation by another person constitutes an unnecessary delay factor and simply points to the need for placing sighted persons in exit rows.

*Safely Using the Exit*

This includes passing expeditiously through the exit and assessing, selecting, and following a safe path away from the exit. A person leading the way out of an exit in an emergency should have the agility to exit quickly, the strength to assist other passengers, and the ability to avoid hazards such as water, jagged metal, unexpected heights (such as might be caused by failed or damaged slides), and rescue vehicles and associated equipment.

*Following Oral Directions or Hand Signals From a Crewmember*

During an anticipated evacuation, survival may depend on the ability of persons in exit rows to see, hear, and understand the instructions issued by crewmembers. As discussed previously herein, exits may become inoperable or unavailable due to fire, structural damage, or damage to slides. In some situations, opening an exit may exacerbate the danger by allowing flames or smoke to rush into the cabin. The potential for such danger is increased if persons in these exit rows cannot see it or hear and understand shouted directions and warnings from crewmembers.

**Other Options for Exit Row Seating**

In addition to the proposal in this NPRM, the FAA considered a number of other options in regard to exit row seating.

The first of these was the approach originally proposed in Notice 74–25 in 1974. Basically, this would have prohibited handicapped passengers from sitting in all exit row seats except the seat farthest from the exit. The FAA did not select this approach for the following reasons. (1) In the event the remaining seats in the exit row were not assigned, the sole passenger in that row could be a handicapped person; (2) similarly, if the other passengers became incapacitated, the sole passenger in that row could be a handicapped person; and (3) even if the other passengers were able-bodied, a handicapped person in the exit row would be more likely than an able-bodied person to cause some delay in establishing the evacuation

VOL 54 ISS 47 MR 13 1989 UMI

flow, as demonstrated in the CAMI studies.

The second approach was suggested by a representative of one of the groups of persons with disabilities. This called for only the seat adjacent to a window exit to be reserved for only persons capable of performing the necessary functions. Again, this approach presupposed the survival or undiminished capacity of the able-bodied person during an accident or emergency landing. Further, it would have allowed handicapped persons to sit in floor-level exit rows. This approach is not viable, given the available data on evacuation flow.

The FAA's objective in this proposal is to maximize the likelihood for survival. In order to do so, it is necessary that only persons capable of performing the necessary functions be seated in exit rows, to enhance the ability of all passengers to evacuate safely. Persons in exit rows may have to work as a team. In the window exit rows, for example, the task of removing the window hatch ordinarily would fall to the person next to the window hatch. The window hatches weigh 45 to 80 pounds and must be manuevered either over the back of the seat to the next row or placed on the seat next to the window exit seat. In either case, nearby passengers must have the capacity to recognize the need for moving out of the way rapidly and have the capacity to do so. In addition, the whole row of passengers must be capable of performing the necessary functions because the seat adjacent to the emergency exit may be unoccupied.

The initial evacuees also may have to work as a team on the ground. In a high wind, it may be necessary for several persons to hold down a slide and to catch passengers (especially disabled ones) and assist them away from the slide. The FAA invites comments, however, on the other options considered as well as any other options the agency may not have considered.

**Other Issues**

One issue that has been raised concerning exit row seating is whether there should be restrictions on seating persons who have been consuming alcohol in exit rows or on serving alcohol to persons seated in exit rows. Section 121.575 of the FAR prohibits a certificate holder from boarding, or serving alcohol to, a passenger who appears intoxicated. In any event, this proposed rule would apply to inebriated persons just as it applies to any other person who could not be expected to perform the functions described herein in an emergency exit row during an evacuation. The FAA seeks comment on whether more specific requirements are needed on this subject.

Another concern that has been expressed relates to the questionable need for exit row seating restrictions, in light of the allegedly negligible probability that a crash would occur with a handicapped person sitting in an exit row. The suggestion is that this limited chance should be balanced against the inconvenience to persons who are removed from exit row seats assigned by mistake or inadvertence.

This suggestion overlooks the purpose of crashworthiness rules such as proposed herein. Crashworthiness rules are designed to deal with the post-crash environment by creating the greatest possible chance for survivors to escape the aircraft. Another example of a crashworthiness measure is the use of seatbelts. Very rarly do passengers encounter turbulence that requires fastened seatbelts during flight. It is well-established, however, that a fastened seatbelt may be the difference between saving and losing a life.

The FAA's goal in this matter is safety for the maximum number of people possible. It is clear from the studies discussed herein that any delay in beginning the flow of persons through an exit works to the detriment of all those trying to use the exit. The FAA studies show that persons without handicaps are less likely to cause such delays than are persons with handicaps. The studies also show that a handicapped person, who might cause a substantial delay at the head of an exit queue, can be accommodated once the queue is established and moving without detriment to the flow rate or to his or her own escape through an exit.

The FAA seeks any additional studies or data concerning the issues raised by this rulemaking. For example, FAA has heard references to an evacuation exercise the National Federation of the Blind conducted in conjunction with World Airways in 1985. However, FAA has been unable to obtain tapes or other reports relating to that exercise.

**Requirements for Compliance With the Rule**

In order to comply with the proposed regulations, certificate holders would have to develop procedures and revise their pertinent handbooks, for review and approval by the principal operations inspectors (POI's) at the FAA Flight Standards District Offices that hold their certificates. The procedures would not become effective until final approval is granted by the Director, Flight Standards Service in Washington.

To ensure that the procedures of all certificate holders are consistent with the regulations, explicit criteria for the selection of exit row occupants have been included in the proposed rule. To be approved, a certificate holder's procedures would have to include the criteria and address all of the functions enumerated in the proposed regulations as ones that may fall to a person in an exit row.

The procedures also would have to include provisions by each certificate holder to make available at each airport it serves and at each seat affected by the proposed regulations the information advising the occupying passenger that he or she may be called upon to perform the enumerated functions.

Certificate holders also would have to include provisions for verifying the appropriateness of exit row seating assignments prior to takeoff and for briefing passengers on the need to identify themselves and to move out of the exit row if they cannot meet the criteria or do not wish to be responsible for performing the required functions. For example, a procedure might consist of a flight attendant asking questions to ensure that a person seated in an exit row can hear and understand English. The flight attendant would then instruct the passenger briefly as to the responsibilities of sitting in that seat, and the person would indicate whether he or she felt capable of performing those functions. Any procedure that ensures that the criteria are applied in a non-discriminatory manner would be acceptable. The FAA invites comments on the best way to accomplish this.

Approval will be based solely upon the safety aspects of the certificate holders' procedures. The FAA's approval of procedures will not insulate the certificate holder, therefore, from challenges based upon discrimination or other matters not related to safety.

As with any changes to Part 121 or 135, certificate holders' procedures would have to provide for training, as already required by FAA regulations in 14 CFR Part 121, specifically, §§ 121.415, "Crewmember and dispatcher training requirements"; 121.417, "Crewmember emergency training"; 135.295, "Initial and recurrent flight attendant crewmember testing requirements"; and 135.319, "Crewmember training requirements". Accordingly, proposed §§ 121.585 and 135.127 contain no separate requirement for training.

In developing the foregoing proposed compliance procedures, the FAA considered eliminating the requirement for submission of the procedures to the FAA for approval. The rationale presented for nonsubmission include: (1) The proposed rule is very explicit and could be implemented with minimal written procedures; (2) passengers with complaints based either on safety or discrimination have adequate recourse to the FAA or the Office of the Secretary of Transportation, whether or not written procedures have been submitted for approval; and (3) since the rule could be implemented with minimal written procedures, there would be little to review and approve, and the cost of submission would not be warranted.

On the other hand, the FAA considered the following factors: (1) Representatives of handicapped groups have expressed strong disapproval of the fact that the procedures developed by certificate holders under § 121.586, "Authority to refuse transportation", were submitted solely for review and not for approval by the FAA. A compliance mechanism that eliminates even the submission of the procedures may be considered a step in the wrong direction, regardless of the proposed rule's increased level of detail; (2) if the procedures are not submitted for approval, the FAA will have to rely solely on complaints to determine the compliance of the certificate holders; (3) without ready access to the procedures, the FAA will be in a less informed position, when attempting to resolve a problem informally; and (4) there is no guarantee that each certificate holder will interpret the proposed rule in exactly the same way.

The FAA welcomes comments on this matter.

The requirements would be applicable to all part 135 air taxi operators and commercial operators, as well as to Part 121 domestic, flag, and supplemental air carriers and commercial operators of large aircraft. The FAA considered limiting the applicability of § 135.127, however, to aircraft having a passenger seating configuration of more than 19 passengers.

Many small aircraft do not have complicated assist mechanisms, such as evacuation slides, and have fewer types of doors and fewer passengers to evacuate in an emergency. It is conceivable that these factors may make it less necessary to restrict exit row seating. On the other hand, damage to an aircraft that precludes the use of even one evacuation route may have a greater impact in a small aircraft than in a large one. Further, the limited space for movement actually may increase the need for seating restrictions. The FAA invites comments on the extent to which the proposed rule should apply to Part 135 commuter and on-demand air carriers and commercial operators.

**Compliance Dates**

As previously discussed herein, the Department of Transportation has proposed a rule to implement the Air Carrier Access Act, to which the FAA's proposed exit row rule relates. It is the intention of the Department that both proposed rules, if adopted, become effective simultaneously to the extent possible, to avoid a hiatus between the existing procedures of certificate holders, concerning exit row seating, and the requirements established through amending Parts 121 and 135.

While the Department recognizes that the existing procedures of certificate holders may have many shortcomings, they presently constitute the only available mechanism for monitoring emergency exit row seating from the standpoint of safety. The FAA believes that a hiatus would not be in the best interests of safety and that the present procedures must be used until proposed §§ 121.585 and 135.127, if adopted, become effective.

The Department also recognizes that both the certificate holders and the handicapped groups have concerns regarding the timing of the implementation. The certificate holders' concerns relate to the length of time that it would take to train their personnel before the provisions of both rules become fully effective. The handicapped groups, particularly with respect to Part 382, are concerned that there be no needless delays in the implementation of the provisions. The issue of the timing of the effective dates for both rules will be resolved on the basis of comments received on this proposal.

**Regulatory Evaluation Summary**

*Analysis of Benefits and Costs*

The FAA has estimated the costs and benefits associated with this proposed rule by analyzing it section by section.

This proposal would replace the industry's inconsistent policies and inconstant practices with a uniformly applicable rule. The proposed rule provides a comprehensive set of procedures, based on explicit criteria, that can be carried out with only minimal training cost. Changes to the appropriate parts of the crewmembers' manuals and appropriate segments of airlines' training programs are made periodically as a matter of routine. The provisions of this proposal would be incorporated routinely into those manuals and training programs at little additional cost. Factors such as an accelerated training schedule, if used, could result, however, in some additional training costs. Presently, the FAA does not anticipate this will be necessary.

The requirement for passengers to comply with instructions, or be subject to denial of transportation at the discretion of the certificate holder, would impose no cost because such a requirement is presently industry practice reflecting section 902(j) of the Federal Aviation Act of 1958 (49 U.S.C. 1472(j)).

The requirement that certificate holders make available, at each seat affected, information advising the occupant of the functions he or she might be called upon to perform in an emergency and the requirement that passenger information cards be presented in multiple languages would cost, at maximum, approximately $310,000 for all potentially affected seats under the proposed applicability in both Part 121 and Part 135. The maximum approximate cost per aircraft would range from $20 to $60 for Part 135 commuters with more than 19 seats and airplanes operating under Part 121. The maximum approximate cost per aircraft for Part 135 commuters with 19 or fewer seats and for air taxis would average $5.

The cost of making copies of the criteria available at airports would be negligible. The incremental cost of printing the procedures and making them available at each airport would range from less than $100 to probably no more than $1,000 per year for each Part 121 operator and Part 135 commuter operator, depending on the number of airports each operator serves. Air taxi operators likely would incur only the negligible costs of using a copying machine to copy the criteria.

The requirement for verification of appropriately occupied affected seats prior to closing all passenger entry doors preparatory to taxi or pushback would be accomplished during the currently-required baggage stowage check with no delay of flight or incremental cost.

The required inclusions in the passenger briefings are minimal expansions and would be accomplished at no cost.

Accommodating a passenger being relocated from an exit row seat when non-exit row seats are fully booked would involve no cost. That person would not be denied transportation, nor would any cost result from moving another passenger, who is willing and able to assume the evacuation functions that may be required, into an exit row seat.

The certificate holder's submission of procedures to the FAA would involve a negligible administrative cost for the transaction.

VOL 54 ISS 47 MR 13 1989 UMI

Since no passenger would be denied transportation, there would be no loss of revenue.

The potential benefits that would be derived from this proposed rule are substantial. The FAA estimates the potential benefits based on a broad body of information which is discussed in detail elsewhere in this NPRM. Of particular import is the information contained in a study completed in October 1970 by the FAA's Office of Aviation Medicine, entitled "Survival in Emergency Escape from Passenger Aircraft" (Report No. AM-70-16), which concluded that in aircraft accidents in which decelerative forces do not result in massive cabin destruction and overwhelming trauma to passengers, survival is determined largely by the ability of the uninjured passenger to make his or her way from a seat to an exit within time limits imposed by the thermotoxic environment. Seconds can mean the difference between life and death in the aftermath of a crash inasmuch as evacuation might be terminated abruptly by an explosion at any point.

The reason for this proposed rulemaking is a concern for potential derogation of safety. Any effort to calculate monetary values for expected saved lives would be speculative, since there is no historical base from which to derive valid estimates. Nevertheless, the FAA estimates that the proposed rules would account for a benefit of substantial numbers of lives saved as contrasted with potential loss of life in the absence of such regulations.

It is obvious that the prevention of only one life lost in an accident would alone more than pay for the cost of this proposed rule. The data clearly indicate that the proposed rule would be justified on a benefit-to-cost basis. Each proposed section in Part 121 and Part 135 is identified and explained in the detailed section-by-section analysis contained in the full Regulatory Evaluation placed in the docket.

*Regulatory Flexibility Determination*

Since there would be only negligible cost associated with this rule for an operator, the FAA has determined that the proposal would not have a significant economic impact, positive or negative, on a substantial number of small entities.

*Trade Impact Statement*

Since this proposed rule would affect only Part 121 and Part 135 certificate holders regarding seating of passengers in exit rows, the FAA has determined that the proposed regulation would not have an impact on international trade.

**Federalism Implications**

The regulations proposed herein would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with Executive Order 12612, it is determined that such a regulation does not have federalism implications warranting the preparation of a Federalism Assessment.

**Conclusion**

For the reasons discussed in the preamble and based on the findings in the Regulatory Flexibility Determination and the International Trade Impact Analysis, the FAA has determined that this proposed regulation is not major under Executive Order 12291 and certifies that this rule, if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. This proposal is considered significant under Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). An initial regulatory evaluation of the proposal, including a Regulatory Flexibility Determination and Trade Impact Analysis, has been placed in the regulatory docket. A copy may be obtained by contacting the person identified under "FOR FURTHER INFORMATION CONTACT."

**List of Subjects**

*14 CFR Part 121*

Transportation, Air safety, Safety, Aviation safety, Air transportation, Air carriers, Airplanes, Aircraft, Handicapped.

*14 CFR Part 135*

Transportation, Air safety, Safety, Aviation safety, Air transportation, Air carriers, Airplanes, Aircraft, Handicapped.

**The Proposal**

Accordingly, the FAA proposes to amend Parts 121 and 135 of the Federal Aviation Regulations (14 CFR Parts 121 and 135) as follows:

## PART 121—CERTIFICATION AND OPERATIONS: DOMESTIC, FLAG, AND SUPPLEMENTAL AIR CARRIERS AND COMMERCIAL OPERATORS OF LARGE AIRCRAFT

1. The authority citation for 14 CFR Part 121 continues to read as follows:

**Authority:** 49 U.S.C. 1354(a), 1355, 1356, 1357, 1401, 1421–1430, 1472, 1485, and 1502; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983).

2. New § 121.585 is added to read as follows:

**§ 121.585 Exit row seating.**

(a) Each certificate holder shall determine, to the extent necessary to perform the applicable functions of paragraph (d) of this section, the suitability of each person it permits to occupy a seat in a row of seats that provides the most direct access to an exit (including all of the seats in the row from the fuselage to the first aisle inboard of the exit or, in cases where there is no aisle, in any seat that has direct access to an exit), in accordance with this section. These determinations shall be made in a non-discriminatory manner consistent with the requirements of this section, by persons designated in the certificate holder's required operations manual.

(b) No certificate holder may seat a person in a seat covered by this section if the certificate holder determines that the person would likely be unable to perform one or more of the applicable functions in paragraph (d) of this section because—

(1) The person lacks sufficient mobility, strength, or dexterity in both arms and hands, and both legs, to reach upward, sideways, and downward to the location of door and exit-slide operating mechanisms; to grasp and push, pull, turn, or otherwise manipulate those mechanisms; to push, shove, pull, or otherwise open doors; to lift out, hold, deposit on nearby seats, or maneuver over the seatbacks to the next row objects the size and weight of over-wing window exit doors; to remove obstructions of similar size and weight; to reach the exit expeditiously; to maintain balance while removing obstructions; to exit expeditiously; to stabilize an escape slide after deployment; and to assist others in getting off an escape slide;

(2) The person lacks sufficient cognitive capacity to perform one or more of those functions without the assistance of an adult companion, parent, or other relative;

(3) The person lacks the ability to read and understand instructions related to emergency evacuation provided by the certificate holder in printed, handwritten, or graphic form;

(4) The person lacks sufficient visual capacity to perform one or more of the applicable functions in paragraph (d) of this section without the assistance of visual aids beyond contact lenses or eyeglasses;

(5) The person lacks sufficient aural capacity to hear and understand instructions shouted by flight attendants, without assistance beyond a hearing aid, and the ability to understand the language spoken by the flight attendants;

(6) The person lacks the ability adequately to impart information orally to other passengers; or

(7) The person has:

(i) A condition or responsibilities, such as caring for small children, that might be likely to prevent the person from performing one or more of the applicable functions listed in paragraph (d) of this section; or

(ii) A condition that might be likely to cause the person harm if he or she performs one or more of the applicable functions or result in harm that would prevent the person from performing one or more of the applicable functions listed in paragraph (d) of this section.

(c) Each passenger shall comply with instructions given by a crewmember or other authorized employee of the certificate holder, implementing exit row seating restrictions established in accordance with this section.

(d) Each certificate holder shall include on passenger information cards, presented in the languages used by the certificate holder for passenger information cards, at each seat affected by this section, the following information: In the event of an emergency in which a crewmember is not available to assist, passengers occupying an exit row seat (or any seat that has direct access to an exit) may be called upon to perform the following functions:

(1) Locate the exit;

(2) Recognize the exit opening mechanism;

(3) Comprehend the instructions for operating the exit;

(4) Operate the exit;

(5) Assess whether opening the exit will increase the hazards to which passengers may be exposed;

(6) Followed oral directions and hand signals given by a crewmember;

(7) Stow or secure the exit door so that it will not impede use of the exit;

(8) Assess the condition of an escape slide, activate the slide, and stabilize the slide after deployment to assist others in getting off the slide;

(9) Pass expeditiously through the exit; and

(10) Assess, select, and follow a safe path away from the exit.

(e) Each certificate holder shall include, on passenger information cards at all seats affected by this section, the criteria set forth in paragraph (b) of this section, presented in the languages used by the certificate holder for passenger information cards.

(f) Each certificate holder shall make available for inspection by the public at all passenger loading gates and ticket counters at each airport where it conducts passenger operations, written procedures established for making determinations in regard to exit row seating.

(g) No certificate holder shall allow all passenger entry doors to be closed in preparation for taxi or pushback unless at least one required crewmember has verified that each occupied seat affected by this section is occupied by a person the crewmember determines is likely to be able to perform the applicable functions in paragraph (d) of this section.

(h) Each certificate holder shall include in its passenger briefings a reference to the passenger information cards, required by paragraphs (d) and (e), the criteria set forth in paragraph (b), and the functions set forth in paragraph (d) of this section.

(i) Each certificate holder shall include in the briefings and in the written criteria a request that a passenger identify himself or herself to allow reseating if he or she—

(1) Cannot meet the criteria set forth in paragraph (b) of this section;

(2) Has a nondiscernible condition that will prevent him or her from performing the applicable functions listed in paragraph (d) of this section;

(3) May suffer bodily harm as the result of performing one or more of those functions; or,

(4) Does not wish to perform those functions. A certificate holder shall not require the passenger to disclose his or her reason for needing reseating.

(j) Each certificate holder shall expeditiously honor a passenger's request to be relocated to a seat not affected by this section.

(k) In the event a certificate holder determines in accordance with this section that a passenger assigned to an exit row seat is not likely to be able to perform the functions described in paragraph (d) of this section, or a passenger requests a non-exit row seat, the certificate holder shall relocate the passenger to a non-exit row seat.

(l) In the event of full booking in the non-exit row seats, the certificate holder shall move a passenger, if necessary to accommodate a passenger being relocated from an exit row seat, who is willing and able to assume the evacuation functions that may be required, to an emergency exit row seat. Persons being moved out of an emergency exit row seat shall not be denied transportation.

(m) A certificate holder may deny transportation or exit row seating to any passenger who refuses to comply with instructions given by a crewmember or other authorized employee of the certificate holder, implementing exit row seating restrictions established in accordance with this section.

(n) In order to comply with this section,

(1) Certificate holders shall develop procedures that:

(i) Include the criteria enumerated in paragraph (b) of this section;

(ii) Address all of the functions enumerated in paragraph (d) of this section;

(iii) Provide for airport information, passenger information cards, crewmember verification of appropriate seating in exit rows, passenger briefings, seat assignments, and denial of transportation as set forth in paragraphs (e) through (i) and (o) of this section;

(2) Certificate holders shall submit their procedures for preliminary review and approval to the principal operations inspectors assigned to them at the FAA Flight Standards District Offices that hold their certificates.

(o) Certicate holders shall:

(1) Deny transportation only on the basis of refusal to comply with instructions as set forth in paragraph (c) of this section; and

(2) Assign seats prior to boarding consistent with the criteria in paragraph (b) and the functions in paragraph (d) of this section, to the maximum extent feasible.

(p) The procedures required by paragraph (m) of this section will not become effective until final approval is granted by the Director, Flight Standards Service, Washington, DC. Approval will be based solely upon the safety aspects of the certificate holders' procedures.

## PART 135—AIR TAXI OPERATORS AND COMMERCIAL OPERATORS

3. The authority citation for Part 135 continues to read as follows:

**Authority:** 49 U.S.C. 1354(a), 1355(a), 1421 through 1431, and 1502; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983)

4. New § 135.127 is added to read as follows:

**§ 135.127 Exit row seating.**

(a) Each certificate holder shall determine, to the extent necessary to perform the applicable functions of paragraph (d) of this section, the suitability of each person it permits to

VOL 54 ISS 47 MR 13 1989 UMI

occupy a seat in a row of seats that provides the most direct access to an exit (including all of the seats in the row from the fuselage to the first aisle inboard of the exit or, in cases where there is no aisle, in any seat that has direct access to an exit), in accordance with this section. These determinations shall be made in a non-discriminatory manner consistent with the requirements of this section, by persons designated in the certificate holder's required operational manual.

(b) No certificate holder may seat a person in a seat covered by this section if the certificate holder determines that the person would likely be unable to perform one or more of the applicable functions in paragraph (d) of this section because—

(1) The person lacks sufficient mobility, strength, or dexterity in both arms and hands, and both legs, to reach upward, sideways, and downward to the location of door and exit-slide operating mechanisms; to grasp and push, pull, turn, or otherwise manipulate those mechanisms; to push, shove, pull, or otherwise open doors; to lift out, hold, deposit on nearby seats, or maneuver over the seatbacks to the next row objects the size and weight of over-wing window exit doors; to remove obstructions of similar size and weight; to reach the exit expeditiously; to maintain balance while removing obstructions; to exit expeditiously; to stabilize an escape slide after deployment; and to assist others in getting off an escape slide;

(2) The person lacks sufficient cognitive capacity to perform one or more of those functions without the assistance of an adult companion, parent, or other relative;

(3) The person lacks the ability to read and understand instructions related to emergency evacuation provided by the certificate holder in printed, handwritten, or graphic form;

(4) The person lacks sufficient visual capacity to perform one or more of the applicable functions in paragraph (d) of this section without the assistance of visual aids beyond contact lenses or eyeglasses;

(5) The person lacks sufficient aural capacity to hear and understand instructions shouted by flight attendants, without assistance beyond a hearing aid, and the ability to understand the language spoken by the flight attendants;

(6) The person lacks the ability adequately to impart information orally to other passengers; or,

(7) The person has:

(i) A condition or responsibilities, such as caring for small children, that might be likely to prevent the person from performing one or more of the applicable functions listed in paragraph (d) of this section; or

(ii) A condition that might be likely to cause the person harm if he or she performs one or more of the applicable functions or result in harm that would prevent the person from performing one or more of the applicable functions listed in paragraph (d) of this section.

(c) Each passenger shall comply with instructions given by a crewmember or other authorized employee of the certificate holder, implementing exit row seating restrictions established in accordance with this section.

(d) Each certificate holder shall include on passenger information cards, presented in the languages used by the certificate holder for passenger information cards, at each seat affected by this section, the following information: In the event of an emergency in which a crewmember is not available to assist, passengers occupying an exit row seat (or any seat that has direct access to an exit) may be called upon to perform the following functions:

(1) Locate the exit;

(2) Recognize the exit opening mechanism;

(3) Comprehend the instructions for operating the exit;

(4) Operate the exit;

(5) Assess whether opening the exit will increase the hazards to which passengers may be exposed;

(6) Follow oral directions and hand signals given by a crewmember;

(7) Stow or secure the exit door so that it will not impede use of the exit;

(8) Assess the condition of an escape slide, activate the slide, and stabilize the slide after deployment to assist others in getting off the slide;

(9) Pass expeditiously through the exit; and

(10) Assess, select, and follow a safe path away from the exit.

(e) Each certificate holder shall include, on passenger information cards at all seats affected by this section, the criteria set forth in paragraph (b) of this section, presented in the languages used by the certificate holder for passenger information cards.

(f) Each certificate holder shall make available for inspection by the public at all passenger loading gates and ticket counters at each airport where it conducts passenger operations, written procedures established for making determinations in regard to exit row seating.

(g) No certificate holder shall allow all passenger entry doors to be closed in preparation for taxi or pushback unless at least one required crewmember has verified that each occupied seat affected by this section is occupied by a person the crewmember determines is likely to be able to perform the applicable functions in paragraph (d) of this section.

(h) Each certificate holder shall include in its passenger briefings a reference to the passenger information cards required by paragraphs (d) and (e), the criteria set forth in paragraph (b), and the functions set forth in paragraph (d) of this section.

(i) Each certificate holder shall include in the briefings and in the written criteria a request that a passenger identify himself or herself to allow reseating if he or she—

(1) Cannot meet the criteria set forth in paragraph (b) of this section;

(2) Has a nondiscernible condition that will prevent him or her from performing the applicable functions listed in paragraph (d) of this section;

(3) May suffer bodily harm as the result of performing one or more of those functions; or

(4) Does not wish to perform those functions. A certificate holder shall not require the passenger to disclose his or her reason for needing reseating.

(j) Each certificate holder shall expeditiously honor a passenger's request to be relocated to a seat not affected by this section.

(k) In the event a certificate holder determines in accordance with this section that a passenger assigned to an exit row seat is not likely to be able to perform the functions described in paragraph (d) of this section, or a passenger requests a non-exit row seat, the certificate holder shall relocate the passenger to a non-exit row seat.

(l) In the event of full booking in the non-exit row seats, the certificate holder shall move a passenger, if necessary to accommodate a passenger being relocated from an exit row seat, who is willing and able to assume the evacuation functions that may be required, to an emergency exit row seat. Persons being moved out of an emergency exit row seat shall not be denied transportation.

(m) A certificate holder may deny transportation or exit row seating to any passenger who refuses to comply with instructions given by a crewmember or other authorized employee of the certificate holder, implementing exit row seating restrictions established in accordance with this section.

(n) In order to comply with this section,

(1) Certificate holders shall develop procedures that:

(i) Include the criteria enumerated in paragraph (b) of this section;

(ii) Address all of the functions enumerated in paragraph (d) of this section;

(iii) Provide for airport information, passenger information cards, crewmember verification of appropriate seating in exit rows, passenger briefings, seat assignments, and denial of transportation as set forth in paragraphs (e) through (i) and (o) of this section;

(2) Certificate holders shall submit their procedures for preliminary review and approval to the principal operations inspectors assigned to them at the FAA Flight Standards District Offices that hold their certificates.

(o) Certificate holders shall:

(1) Deny transportation only on the basis of refusal to comply with instructions as set forth in paragraph (c) of this section; and

(2) Assign seats prior to boarding consistent with the criteria in paragraph (b) and the functions in paragraph (d) of this section, to the maximum extent feasible.

(p) The procedures required by paragraph (m) of this section will not become effective until final approval is granted by the Director, Flight Standards Service, Washington, DC. Approval will be based solely upon the safety aspects of the certificate holders' procedures.

Issued in Washington, DC, on March 7, 1989.

D.C. Beaudette,

*Acting Director, Flight Standards Service.*

Intergovernmental Review of Department of Education Programs and Activities; Notice of Proposed Rulemaking

BEST COPY AVAILABLE

VOL 54 ISS 47 MR 13 1989 UMI

**DEPARTMENT OF EDUCATION**

**34 CFR Parts 250, 300, 315, 324, 332, 366, 368, 385, 396, 400, 607, 608, 609, 624, 628, 629, 630, 631, 637, 639, 643, 644, 645, 648, 649, 656, 657, 658, 692, 745, 755, and 773**

**Intergovernmental Review of Department of Education Programs and Activities**

**AGENCY:** Department of Education.

**ACTION:** Notice of Proposed Rulemaking.

**SUMMARY:** The Secretary proposes to issue regulations implementing changes in coverage for Department of Education programs subject to Executive Order 12372 (Intergovernmental Review of Federal Programs). These changes are required in order to comply with an Office of Management and Budget (OMB) memorandum, issued March 14, 1985, amending the criteria for inclusion and exclusion of State review under the Executive Order. This notice is also required in order to provide an opportunity for public comment on proposed revisions to the lists of included and excluded programs, and selection by each State of the programs to be subject to that State's review process.

**DATE:** Comments must be received on or before June 12, 1989.

**ADDRESSES:** All comments concerning these proposed rules should be addressed to F. LeRoy Walser, Office of Intergovernmental and Interagency Affairs, Department of Education, 400 Maryland Avenue, SW. FOB–6, Room 3059, Washington, DC 20202.

**FOR FURTHER INFORMATION CONTACT:** F. LeRoy Walser, Telephone: (202) 732–3669.

**SUPPLEMENTARY INFORMATION:** Executive Order 12372 provides an opportunity for States to review applications for Federal assistance programs which directly affect State and local governments. The Executive Order, signed July 14, 1982, is designed "to foster an intergovernmental partnership and a strengthened federalism by relying on State and local processes for the State and local government coordination and review of proposed Federal financial assistance and direct Federal development."

On June 24, 1983 (at 48 FR 29158), the Department published regulations at 34 CFR Part 79 implementing the Executive Order. The Department published amendments to these regulations (at 51 FR 20823, June 9, 1986) to implement changes in criteria for program coverage issued in OMB's March 14, 1985, memorandum entitled "Procedural Changes in Agency Implementation of Executive Order 12372."

The Department has reviewed all of its current programs for coverage under the Executive Order according to the revised OMB criteria. Under these criteria, a Federal assistance program or activity is included for State review unless the program or activity does not directly affect State or local governments, is proposed Federal legislation, regulation, or budget formulation, or involves one of the following: (1) National security, (2) procurement, (3) direct payments to individuals, (4) financial transfers for which Federal agencies have no funding discretion or direct authority to approve specific sites or projects (*e.g.*, Chapter 2 of the Education Consolidation and Improvement Act of 1981), (5) research and development that is national in scope, and (6) assistance to federally-recognized Indian tribes).

The Department proposes two new appendices which would supersede those previously published. These appendices would implement the new OMB criteria for coverage and add certain programs that were enacted or amended prior to passage of Augustus F. Hawkins-Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988, Pub. L. 100–297. Any changes in coverage or new coverage required by Pub. L. 100–297 will be made in the regulations developed to implement the Act. At Appendix A are programs proposed for inclusion for State review under Executive Order 12372; at Appendix B are programs proposed for exclusion from State review and the justification for the proposed exclusion.

**Executive Order 12291**

These proposed regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

**Regulatory Flexibility Act Certification**

Since these proposed regulations would implement the opportunity for review of existing programs by State and local governments, would simplify consultation with Department, and would allow State and local governments to establish cost effective consultation procedures, the Secretary certifies that these proposed regulations would not have a significant economic impact on a substantial number of small entities.

**Paperwork Reduction Act of 1980**

These proposed regulations have been examined under the Paperwork Reductioin Act of 1980 and have been found to contain no information collection requirements.

**Invitation To Comment**

Interested persons are invited to submit comments and recommendations regarding these proposed regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 3059, FOB–6, 400 Maryland Avenue, SW., Washington, DC 20202, between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week, except Federal holidays.

To assist the Department in complying with specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, the Secretary invites comment on whether there may be further opportunities to reduce regulatory burdens found in these proposed regulations.

**Assessment of Educational Impact**

The Secretary particularly requests comments on whether the proposed regulations in this document would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

**List of Subjects**

*38 CFR Part 250*

Administrative practice and procedure, Education, Indian education.

*34 CFR Part 300*

Administrative practice and procedure, Education, Education of handicapped, Equal educational opportunity, Privacy, Private schools.

*34 CFR Part 315*

Education, Education of handicapped, Education—research, Government contracts, Student aid, Teachers.

*34 CFR Part 324*

Education, Education of handicapped, Education—research, Local edcational agency, School, State educational agency.

*34 CFR Part 332*

Education, Education of handicapped.

*34 CFR Part 366*

Education, Grant programs—social programs, Vocational rehabilitation.

Colleges and universities, Education, Education of disadvantaged, Educational study programs, Equal educational opportunity, Science and technology.

*34 CFR Part 639*

Colleges and universities, Education, Educational study programs, Law.

*34 CFR Part 643*

Colleges and universities, Education, Education of disadvantaged, Education of handicapped.

*34 CFR Part 644*

Colleges and universities, Education of disadvantaged, Education, Education of handicapped.

*34 CFR Part 645*

Colleges and universities, Education, Education of disadvantaged, Education of handicapped.

*34 CFR Part 648*

Bilingual education, Education, Education of disadvantaged, Education of handicapped, Government contracts.

*34 CFR Part 649*

Colleges and universities, Education, Energy, Mineral resources, Mines, Scholarships and fellowships.

*34 CFR Part 656*

Colleges and universities, Cultural exchange programs, Education, Educational study programs, Foreign languages, Fellowships, Resource center.

*34 CFR Part 657*

Education, Educational study programs, Fellowships.

*34 CFR Part 658*

Colleges and universities, Education, International education.

*34 CFR Part 692*

Education, State-administered-education, Student aid.

*34 CFR Part 745*

Education, Government contracts, Sex discrimination.

*34 CFR Part 755*

Colleges and universities, Education, Local educational agency, State educational agency.

*34 CFR Part 773*

Colleges and universities, Education, Libraries.

Dated: December 19, 1988.

**Lauro F. Cavazos,**

*Secretary of Education.*

The Secretary proposes to amend Parts 250, 300, 324, 332, 366, 368, 385, 396, 400, 607, 608, 609, 624, 628, 629, 630, 631, 637, 639, 643, 644, 645, 648, 649, 656, 657, 658, 692, 706, 745, 755, and 773 of Title 34 of the Code of Federal Regulations as follows:

## PART 250—INDIAN EDUCATION ACT—GENERAL PROVISIONS

1. The authority citation for Part 250 is revised to read as follows:

**Authority:** 20 U.S.C. 241aa–241ff, 1211a, 1221h, 3385, 3385a, unless otherwise noted.

2. Section 250.3 is amended by revising paragraph (e) to read as follows.

**§ 250.3 What regulations apply to these programs?**

* * * * *

(e) 34 CFR Part 79 (Intergovernmental Review of Department of Education programs and Activities), except that applications for assistance submitted by Federally recognized Indian tribes are not subject to review under Part 79, and Part 79 does not apply to 34 CFR Parts 252, 253, and 256.

(Authority: 20 U.S.C. 241aa–241ff, 1211a, 3385, 3385a)

## PART 300—ASSISTANCE TO STATES FOR EDUCATION OF HANDICAPPED CHILDREN

3. The authority citation for Part 300 continues to read as follows:

**Authority:** 20 U.S.C. 1411–1420, unless otherwise noted.

**§ 300.3 [Amended]**

4. Section 300.3(a)(1) is amended by removing "Programs) and Part 77 (Definitions)." and adding, in their place, "Programs) Part 77 (Definitions), Part 78 (Education Appeal Board), and Part 79 (Intergovernmental Review of Department of Education Programs and Activities)."

## PART 315—PROGRAM FOR SEVERELY HANDICAPPED CHILDREN

5. The authority citation for Part 315 continues to read as follows:

**Authority:** 20 U.S.C. 1424, unless otherwise noted.

6–8. In § 315.3, paragraphs (b)(3), and (4) are revised and a new paragraph (b)(5) is added to read as follows:

**§ 315.3 What regulations apply to this program?**

* * * * *

(b) * * *

(3) Part 77 (Definitions that Apply to Department Regulations);

(4) Part 78 (Education Appeal Board); and

(5) Part 79 (Intergovernmental Review of Department of Education Programs and Activities).

(Authority: 20 U.S.C. 1424, 20 U.S.C. 3474(a))

## PART 324—RESEARCH IN EDUCATION OF THE HANDICAPPED PROGRAM

9. The authority citation for Part 324 continues to read as follows:

**Authority:** 20 U.S.C. 1441–1444, unless otherwise noted.

10. In § 324.3, paragraphs (b)(3) and (4) are revised and a new paragraph (b)(5) is added to read as follows:

VOL 54 ISS 47 MR 13 1989 UMI

**§ 324.3 What regulations apply to this program?**

* * * * *

(b) * * *

(3) Part 77 (Definitions that Apply to Department Regulations);

(4) Part 78 (Education Appeal Board); and

(5) Part 79 (Intergovernmental Review of Department of Education Programs and Activities).

(Authority: 20 U.S.C. 1441–1444)

**PART 332—EDUCATIONAL MEDIA RESEARCH, PRODUCTION, DISTRIBUTION, AND TRAINING**

11. The authority citation for Part 332 is revised to read as follows:

**Authority:** 20 U.S.C. 1451–1452, unless otherwise noted.

**§ 332.3 [Amended]**

12. Section 332.3 is amended by removing "77 and" and adding, in their place, the words "77, 78, and 79, and".

**PART 366—CENTERS FOR INDEPENDENT LIVING**

13. The authority citation for Part 366 is revised to read as follows:

**Authority:** 29 U.S.C. 711(c) and 796(e), unless otherwise noted.

**§ 366.3 [Amended]**

14. Section 366.3(a) is amended by removing the word "and" each place it appears, and by adding the words "and Part 79 (Intergovernmental Review of Department of Education Programs and Activities)," before the period at the end of the sentence.

**PART 369—VOCATIONAL REHABILITATION SERVICE PROJECTS**

15. The authority citation for Part 369 is revised to read as follows:

**Authority:** 29 U.S.C. 711(c), 732, 750, 775, 777a (a)(1) and (e)(3), 777b, 777f and 796g, unless otherwise noted.

**§ 369.3 [Amended]**

16. Section 369.3(a) is amended by removing the word "and", and by adding "and Part 79 (Intergovernmental Review of Department of Education Programs and Activities), except that Part 79 does not apply to the Handicapped American Indian Vocational Rehabilitation Service Projects (34 CFR Part 371)" before the period at the end of the sentence.

**PART 385—REHABILITATION TRAINING**

17. The authority citation for Part 385 is revised to read as follows:

**Authority:** 29 U.S.C. 711(c), 744, and 776, unless otherwise noted.

**§ 385.3 [Amended]**

18. Section 385.3(a) is amended by removing the word "and", and by adding "and Part 79 (Intergovernmental Review of Department of Education Programs and Activities)," before the period at the end of the sentence.

**PART 396—TRAINING OF INTERPRETERS FOR DEAF INDIVIDUALS**

19. The authority citation for Part 396 is revised to read as follows:

**Authority:** 29 U.S.C. 744(d), unless otherwise noted.

20. In § 396.3, paragraphs (a) (3) and (4) are revised and a new paragraph (b)(5) is added to read as follows:

**§ 396.3 What regulations apply to this program?**

* * * * *

(a) * * *

(3) Part 77 (Definitions that Apply to Department Regulations);

(4) Part 78 (Education Appeal Board); and

(5) Part 79 (Intergovernmental Review of Department of Education Programs and Activities).

* * * * *

(Authority: 29 U.S.C. 774(d))

**PART 400—VOCATIONAL EDUCATION PROGRAMS—GENERAL PROVISIONS**

21. The authority citation for Part 400 continues to read as follows:

**Authority:** 20 U.S.C. *et seq.*, unless otherwise noted.

**§ 400.3 [Amended]**

22. Section 400.3(f) is amended by adding "except that Part 79 does not apply to any applications submitted by an Indian tribal organization that is eligible under 34 CFR 410.2(a)(1) of the Indian and Hawaiian Natives Program (34 CFR Part 410)" before the period at the end of the sentence.

**PART 607—STRENGTHENING INSTITUTIONS PROGRAMS**

23. The authority citation for Part 607 continues to read as follows:

**Authority:** 20 U.S.C. 1057–1059, 1066–1066f, unless otherwise noted.

**§ 607.6 [Amended]**

24. Section 607.6(a) is amended by removing "Regulations; and Part 78 (Education Appeal Board)." and adding in their place "Regulations); Part 78 (Education Appeal Board); and Part 79 (Intergovernmental Review of Department of Education Programs and Activities)."

**PART 608—STRENGTHENING HISTORICALLY BLACK COLLEGES AND UNIVERSITIES PROGRAM**

25. The authority citation for Part 608 continues to read as follows:

**Authority:** 20 U.S.C. 1060 through 1063a, 1063c and 1066c, unless otherwise noted.

**§ 608.3 [Amended]**

26. Section 608.3(a) is amended by removing the word "and", and adding "and 34 CFR Part 79 (Intergovernmental Review of Department of Education Programs and Activities)," before the period at the end of the sentence.

**PART 609—STRENGTHENING HISTORICALLY BLACK GRADUATE INSTITUTIONS PROGRAM**

27. The authority citation for Part 609 continues to read as follows:

**Authority:** 20 U.S.C. 1063b and 1066c, unless otherwise noted.

**§ 609.3 [Amended]**

28. Section 609.3(a) is amended by removing the word "and" and adding "and 34 CFR Part 79 (Intergovernmental Review of Department of Education Programs and Activities)," before the period at the end of the sentence.

**PART 624—INSTITUTIONAL AID PROGRAMS—GENERAL PROVISIONS**

29. The authority citation for Part 624 continues to read as follows:

**Authority:** 20 U.S.C. 1051–1066c, unless otherwise noted.

**§ 624.5 [Amended]**

30. Section 624.5(a) introductory text is amended by removing "and", and adding in its palce a comma after "(Direct Grant Programs)" and adding "34 CFR Part 79 (Intergovernmental Review of Department of Education Programs and Activities)," after "(Definitions)".

**PART 628—ENDOWMENT CHALLENGE GRANT PROGRAM**

31. The authority citation for Part 628 continues to read as follows:

**Authority:** 20 U.S.C. 1065a, unless otherwise noted.

32. In § 628.5, paragraph (b)(1)(v) is added and paragraph (b)(2) is revised to read as follows:

**§ 628.5 What regulations apply to the Endowment Challenge Grant Program?**

* * * * *

(b)(1) * * *

(v) The regulations in 34 CFR Part 79.

(2) Except as specifically indicated in paragraph (b)(1) of this section, the Education Department General Administrative Regulations (EDGAR) in 34 CFR Parts 74 through 77 do not apply.

(Authority: 20 U.S.C. 1065a)

**PART 629—VETERANS EDUCATION OUTREACH PROGRAM**

33. The authority citation for Part 629 continues to read as follows:

**Authority:** 20 U.S.C. 1070e–1, unless otherwise noted.

34. In § 629.4, paragraph (a)(5) is added to read as follows:

**§ 629.4 What regulations apply?**

* * * * *

(a) * * *

(5) 34 CFR Part 79 (Intergovernmental Review of Department of Education Programs and Activities).

* * * * *

(Authority: 20 U.S.C. 1070e–1, 1088)

**PART 630—FUND FOR THE IMPROVEMENT OF POSTSECONDARY EDUCATION**

35. The authority citation for Part 630 continues to read as follows:

**Authority:** 20 U.S.C. 1135–1135e–2, 1135e–1135e–1, unless otherwise noted.

**§ 630.4 [Amended]**

36. Section 630.4(a)(1) is amended by removing the word "and" and by adding before the period at the end of the sentence "and Part 79 (Intergovernmental Review of Department of Education Programs and Activities)".

**PART 631—COOPERATIVE EDUCATION PROGRAM—GENERAL**

37. The authority citation for Part 631 continues to read as follows:

**Authority:** 20 U.S.C. 1133–1133b, unless otherwise noted.

**§ 631.4 [Amended]**

38. Section 631.4(a)(1) is amended by removing the word "and", and by adding before the period at the end of the sentence "and 79 (Intergovernmental Review of Department of Education Programs and Activities)".

**PART 637—MINORITY SCIENCE IMPROVEMENT PROGRAM**

39. The authority citation for Part 637 continues to read as follows:

**Authority:** 20 U.S.C. 1135b–1135b–3, 1135d–1135d–6, unless otherwise noted.

**§ 637.3 [Amended]**

40. Section 637.3(a) is amended by removing the word "and", and by adding before the period at the end of the sentence, "and Part 79 (Intergovernmental Review of Department of Education Programs and Activities)".

**PART 639—LAW SCHOOL CLINICAL EXPERIENCE PROGRAM**

41. The authority citation for Part 639 continues to read as follows:

**Authority:** 20 U.S.C. 1134s–1134t, unless otherwise noted.

**§ 639.3 [Amended]**

42. Section 639.3(a) is amended by removing the word "and" after the words "(Direct Grant Programs)" and adding, in its place, a comma, and by removing the word "(Definitions)" and adding, in its place, the words "(Definitions that Apply to Department Regulations), and 34 CFR Part 79 (Intergovernmental Review of Department of Education Programs and Activities)".

**PART 643—TALENT SEARCH PROGRAM**

43. The authority citation for Part 643 continues to read as follows:

**Authority:** 20 U.S.C. 1070d–1, unless otherwise noted.

**§ 643.5 [Amended]**

44. Section 643.5(a) is amended by removing the word "and" and adding, in its place, a comma and by adding before the period at the end of the sentence, "and 34 CFR Part 79 (Intergovernmental Review of Department of Education Programs and Activities)".

**PART 644—EDUCATIONAL OPPORTUNITY CENTERS PROGRAM**

45. The authority citation for Part 644 continues to read as follows:

**Authority:** 20 U.S.C. 1070d–1c, unless otherwise noted.

**§ 644.5 [Amended]**

46. Section 644.5(a) is amended by removing the word "and" and adding, in its place, a comma, and by adding before the period at the end of the sentence "and 34 CFR Part 79 (Intergovernmental Review of Department of Education Programs and Activities)".

**PART 645—UPWARD BOUND PROGRAM**

47. The authority citation for Part 645 continues to read as follows:

**Authority:** 20 U.S.C. 1070d, 1070d–1a, unless otherwise noted.

**§ 645.5 [Amended]**

48. Section 645.5(a) is amended by removing the word "and" and adding, in its place, a comma and by adding before the period at the end of the sentence ", and 34 CFR Part 79 (Intergovernmental Review of Department of Education Programs and Activities)".

**PART 646—STUDENT SUPPORT SERVICES PROGRAM**

49. The authority citation for Part 646 continues to read as follows:

**Authority:** 20 U.S.C. 1070d, 1070d–1b, unless otherwise noted.

**§ 646.5 [Amended]**

50. Section 646.5(a) is amended by removing the word "and" and adding, in its place, a comma, and by adding before the period at the end of the sentence ", and 34 CFR Part 79 (Intergovernmental Review of Department of Education Programs and Activities)".

**PART 649—PATRICIA ROBERTS HARRIS FELLOWSHIPS PROGRAM**

51. The authority citation for Part 649 continues to read as follows:

**Authority:** 20 U.S.C. 1134d–1134f, unless otherwise noted.

**§ 649.3 [Amended]**

52. Section 649.3(a) is amended by removing the word "and" after the words "Department Regulations)," and by adding after the words "Appeal Board)," "and Part 79 (Intergovernmental Review of Department of Education Programs and Activities),".

**PART 656—NATIONAL RESOURCE CENTERS PROGRAM FOR LANGUAGE AND AREA OR LANGUAGE AND INTERNATIONAL STUDIES**

53. The authority citation for Part 656 is revised to read as follows:

**Authority:** 20 U.S.C. 1122, unless otherwise noted.

**§ 656.6 [Amended]**

54. Section 656.6(c) is amended by removing the word "and" and adding, in its place, a comma, and by adding before the period at the end of the sentence ", and 34 CFR Part 79 (Intergovernmental Review of Department of Education Programs and Activities)".

VOL 54 ISS 47 MR 13 1989 UMI

**PART 657—FOREIGN LANGUAGE AND AREA STUDIES FELLOWSHIPS PROGRAM**

55. The authority citation for Part 657 is revised to read as follows:

**Authority:** 20 U.S.C. 1122, unless otherwise noted.

56. Section 657.4(c) is amended by removing the word "and" and adding, in its place, a comma, and by adding before the period at the end of the sentence ", and 34 CFR Part 79 (Intergovernmental Review of Department of Education Programs and Activities)".

**PART 658—UNDERGRADUATE INTERNATIONAL STUDIES AND FOREIGN LANGUAGE PROGRAM**

57. The authority citation for Part 658 is revised to read as follows:

**Authority:** 20 U.S.C. 1124, unless otherwise noted.

**§ 658.3 [Amended]**

58. Section 658.3(c) is amended by removing the word "and" and adding, in its place, a comma, and by adding before the period at the end of the sentence ", and 34 CFR Part 79 (Intergovernmental Review of Department of Education Programs and Activities)".

**PART 662—STATE STUDENT INCENTIVE GRANT PROGRAM**

59. The authority citation for Part 629 is revised to read as follows:

**Authority:** 20 U.S.C. 1070c–1070c–4, unless otherwise noted.

**§ 662.3 [Amended]**

60. Section 662.3(b) is amended by removing the word "and", and by adding before the period at the end of the sentence ", and Part 79 (Intergovernmental Review of Department of Education Programs and Activities)".

**PART 745—WOMEN'S EDUCATIONAL EQUITY ACT PROGRAM**

63. The authority citation for Part 745 continues to read as follows:

**Authority:** 20 U.S.C. 3341–3348, unless otherwise noted.

**§ 745.3 [Amended]**

64. Section 745.3(a)(1) is amended by removing the word "and" and adding, in its place, a comma, and by adding before the period at the end of the sentence ", and Part 79 (Intergovernmental Review of Department of Education Programs and Activities)".

**PART 755—SECRETARY'S DISCRETIONARY PROGRAM FOR MATHEMATICS, SCIENCE, COMPUTER LEARNING, AND CRITICAL FOREIGN LANGUAGES**

65. The authority citation for Part 755 is revised to read as follows:

**Authority:** 20 U.S.C. 2992, unless otherwise noted.

**§ 755.3 [Amended]**

66. Section 755.3(a)(1) is amended by removing the word "and" and adding, in its place, a comma, and by adding before the period at the end of the sentence ", and Part 79 (Intergovernmental Review of Department of Education Programs and Activities)".

**PART 773—COLLEGE LIBRARY RESOURCES PROGRAM**

67. The authority citation for Part 773 is revised to read as follows:

**Authority:** 20 U.S.C. 1021 *et seq.*, unless otherwise noted.

**§ 773.4 [Amended]**

68. Section 773.4(a) is amended by removing "and" after "(Direct Grant Programs)" and adding, in its place, a comma, and by removing "(Definitions);" and adding, in its place, "(Definitions that Apply to Department Regulations), and Part 79 (Intergovernmental Review of Department of Education Programs and Activities);".

[Editorial Note: The following Appendices will not appear in the Code of Federal Regulations.]

**Appendix A—Programs Proposed for Inclusion for State Review Under Executive Order 12372**

| Program Name | CFDA # |
|---|---|
| Adult education—state administered program. | 84.002. |
| Bilingual education | 84.003. |
| Desegregation of public education | 84.004. |
| College library resources | 84.008. |
| Supplemental educational opportunity grants. | 84.007. |
| Follow through | 84.014. |
| National resource centers and fellowship program for language and area or language and international studies. | 84.015. |
| Undergraduate international studies and foreign language program. | 84.016. |
| Research in education of the handicapped. | 84.023. |
| Handicapped children's early education program. | 84.024. |
| Services for deaf-blind children and youth. | 84.025N. |
| Handicapped media services and captioned films. | 84.026. |
| Assistance to states for education of handicapped children. | 84.027. |
| Regional resource and federal centers. | 84.028. |
| Training personnel for the education of the handicapped. | 84.029. |
| Clearinghouse for the handicapped program. | 84.030. |
| Strengthening institutions program | 84.031A. |
| Strengthening historically black colleges and universities. | 84.031B. |
| Endowment challenge grant program | 84.031G. |
| Public library services | 84.034. |
| Interlibrary cooperation | 84.035. |
| Library career training-fellowships | 84.036. |
| Library research and demonstration | 84.039. |
| School assistance in federally affected areas—construction. | 84.040. |
| Student support services program | 84.042. |
| Talent search | 84.044. |
| Upward bound | 84.047. |
| Vocational education—basic grants to states. | 84.048. |
| Vocational education—consumer and homemaking education. | 84.049. |
| Vocational education—state advisory councils. | 84.053. |
| Cooperative education | 84.055. |
| *Indian education—formula grants to local education agencies and tribal schools. | 84.060. |
| *Indian education—special programs and projects. | 84.061. |
| *Indian education—adult indian education. | 84.062. |
| Veterans education outreach program. | 84.064. |
| Educational opportunity centers | 84.066. |
| State student incentive grant program. | 84.069. |
| *Indian education—grants to Indian controlled schools. | 84.072. |
| National diffusion network | 84.073. |
| Patricia Roberts Harris program (fellowships for graduate and professional studies program). | 84.075. |
| Bilingual vocational training | 84.077. |
| Postsecondary education programs for handicapped persons. | 84.078. |
| Women's educational equity | 84.083. |
| Program for severely handicapped children. | 84.086. |
| Strengthening research library resources. | 84.091. |
| Graduate and professional study | 84.094. |
| Law school clinical experience | 84.097. |
| Bilingual vocational instructor training | 84.099. |
| Bilingual vocational instructional materials, methods, and techniques. | 84.100. |
| Vocational education Hawaiian native program. | 84.101C. |
| Training program for special program staff and leadership personnel. | 84.103. |
| Fund for the improvement of postsecondary education. | 84.116. |
| Minority science improvement program. | 84.120. |
| Law-related education program | 84.123. |
| Territorial teacher training assistance program. | 84.124. |
| State vocational rehabilitation services program. | 84.126. |
| Rehabilitation service projects | 84.128. |
| Rehabilitation training | 84.129. |
| Centers for independent living | 84.132. |
| Migrant education high school equivalency program. | 84.141. |
| College facilities loan program | 84.142. |
| Migrant education—interstate and intrastate coordination program. | 84.144. |
| Federal real property assistance program. | 84.145. |
| Transition program for refugee children. | 84.146. |

| Program Name | CFDA # |
|---|---|
| College assistance migrant program | 84.149. |
| Neglected or delinquent transition services. | 84.152. |
| Business and international education | 84.153. |
| Library services and construction act—construction. | 84.154. |
| Removal of architectural barriers to the handicapped. | 84.155. |
| Secondary education and transitional services for handicapped youth. | 84.158. |
| Training interpreters for deaf individuals. | 84.160. |
| Client assistance for handicapped individuals. | 84.161. |
| Emergency immigrant education assistance act. | 84.162. |
| Library services and construction act, title IV—basic grants to Indian tribes and Hawaiian native (Indian tribes excluded from coverage). | 84.163B. |
| Strengthening teacher skills and instruction in mathematics and science. | 84.164. |
| Magnet schools assistance | 84.165. |
| Library literacy program | 84.167. |
| Secretary's discretionary program for mathematics, science, computer learning, and critical foreign languages. | 84.166. |
| Construction, reconstruction, and renovation of academic facilities program. | 84.172. |
| Preschool grants for handicapped children program. | 84.173. |
| State assistance for vocational education-support programs by community based organizations. | 84.174. |
| Paul T. Douglas teacher scholarship program. | 84.176. |
| Independent living for older blind adults. | 84.177. |
| Leadership in educational administration development. | 84.178. |
| Technology, media and materials program. | 84.180. |
| Early intervention programs for infants and toddlers with handicaps. | 84.181. |
| Drug-free schools and communities program-training and demonstration grants to institutions of higher education, and federal activities program. | 84.184. |
| Drug-free schools and communities—state and local programs. | 84.186. |
| The state supported employment services program. | 84.187. |
| Drug-free schools and communities—regional centers programs. | 84.188. |
| Adult education for the homeless program. | 84.192. |
| Vocational education-national programs: demonstration centers for the retraining of dislocated workers. | 84.193. |
| Education of the homeless | 84.196. |
| College library technology and cooperation program. | 84.197. |
| Workplace literacy partnerships program. | 84.198. |
| Vocational education-national cooperative demonstration program. | 84.199. |
| School dropout demonstration assistance program. | 84.201. |
| Star schools program | 84.203. |
| State vocational education comprehensive career guidance and counseling program. | No CFDA #. |
| State vocational education industry-education partnerships. | No CFDA #. |
| Vocational education-state equipment pools. | No CFDA #. |
| Vocational education-national programs: model centers for vocational education for older individuals. | No CFDA #. |

*Except applicants that are Federally recognized Indian tribes

**Appendix B.—Programs Proposed For Exclusion From Review Under Executive Order 12372 With Exclusion Justifications**

| Program | CFDA No. |
|---|---|
| Interest subsidy grants for academic facilities loans. | 84.001 |
| Exclusion Justification: Funds under this program were determined by prior action and the government's commitment is for the life of the loan. Since no application to the Federal government is involved, States do not review this program. | |
| Education of handicapped children in State operated schools. | 84.009 |
| Exclusion Justification: Funds under this program are determined by a statutory formula. Therefore, the Department has no discretion in approving specific sites or in determining the amount of allocations. | 84.009 |
| Educationally deprived children: local educational agencies. | 84.010 |
| Exclusion Justification: Funds under this program are determined by a statutory formula and distributed to participating local education agencies. Therefore, the Department has no discretion in approving specific sites or in determining the amount of allocations. | |
| Migrant education: State formula grant program. | 84.011 |
| Exclusion Justification: Funds under this program are determined by a statutory formula and distributed to State education agencies. Therefore, the Department has no discretion in approving specific sites or projects or in determining the amount of allocations. | |
| Educationally deprived children State administration. | 84.012 |
| Exclusion Justification: Funds under this program are determined by a statutory formula and distributed to State education agencies. Therefore, the Department has no discretion in approving specific sites or projects or in determining the amount of allocations. | |
| Neglected and delinquent children | 84.013 |
| Exclusion Justification: Funds under this program are determined by a statutory formula and distributed to State education agencies. Therefore, the Department has no discretion in approving specific sites or projects or in determining the amount of allocations. | |
| International research and studies | 84.017 |

| Program | CFDA No. |
|---|---|
| Exclusion Justification: This program provides assistance for the conduct of research, studies and surveys and the development of instructional materials for modern languages and area and international studies. Research is national in scope and is conducted by individual scholars. | |
| Fulbright-Hays training grants—faculty research abroad. | 84.019 |
| Exclusion Justification: This program supports research projects conducted abroad by individual research scholars in cooperation with bi-national commissions, U.S. embassies, foreign ministries of education, and institutions of higher education abroad. Research is of national and international scope. | |
| Fulbright-Hays training centers—foreign curriculum consultants. | 84.020 |
| Exclusion Justification: This program awards grants to institutions of higher education for the selection of curriculum specialists from abroad to assist U.S. institutions or groups of institutions in the development of programs of research and study in the United States. This program does not affect State or local governments because the recruitment of individual candidates is made by U.S. embassies, Fulbright Commissions abroad, or foreign ministries of education. | |
| Fulbright-Hays training grants, group projects abroad. | 84.021 |
| Exclusion Justification: This program awards grants to individuals through eligible institutions in the United States and abroad in cooperation with Fulbright Commissions, U.S. Embassies, and foreign ministries of education for the purpose of engaging in group projects in research, training, and curriculum development. Projects conducted abroad and at institutions in the United States are national in scope and do not directly affect State or local governments. | 84.021 |
| Fulbright-Hays training grants—doctoral dissertation research abroad. | 84.022 |
| Exclusion Justification: This fellowship program provides payments to individuals who have been advanced to doctoral degree candidacy in foreign languages and area studies. Individual projects are conducted abroad and therefore the research has no impact on States or local governments. | |
| Guaranteed student loan program and plus (auxiliary) loan program. | 84.032 |
| Exclusion Justification: These programs authorize low interest loans available from lenders such as banks and credit unions to help defray costs of education at participating institutions. The loans are provided directly to the student or to parents of the student. | |
| College work-study program | 84.033 |
| Exclusion Justification: This program provides jobs for undergraduate and graduate students. Participating institutions receive direct allocations of Federal funds according to national and State funding formulas. Funds are ultimately paid directly to students. | |

VOL 54 ISS 47 MR 13 1989 UMI

| Program | CFDA No. |
|---|---|
| Perkins loan program to schools | 84.037 |
| Exclusion Justification: | |
| Funds for this program provide reimbursement for the value of loan cancellations as prescribed by statute. The Department has no discretion in determining the amount of these reimbursements. | |
| Perkins direct student loan program | 84.038 |
| Exclusion Justification: | |
| This program provides low-interest loans to both undergraduate and graduate students. This is a matching funds program with the institution contributing one-ninth of the project award. The annual allocation is distributed to participating institutions according to national and state funding formulas. | |
| School assistance in federally affected areas: Maintenance and operations. | 84.041 |
| Exclusion Justification: | |
| This program makes financial payments to school districts. Funds under this program are distributed to participating local educational agencies that are affected by the presence of Federal activity or property, or by Presidentially-declared disasters. Once eligibility is established, the Department of Education has no discretion in approving sites or projects, or in determining allocation amounts. | |
| National vocational education research program. | 84.051 |
| Exclusion Justification: | |
| This program is designed to provide support to the National Center for Research in Vocational Education for which a location is chosen every five years; six curriculum development and demonstration centers; and several other contractors to engage in research and curriculum development and demonstration. Contracts may only be awarded to projects of national significance in vocational education and to develop and provide information to facilitate national planning and policy development. | |
| Pell grant program | 84.063 |
| Exclusion Justification: | |
| This program is a student financial assistance program based on a formula. Payments are made directly to individual students to pursue college or other postsecondary education goals. | |
| Indian education—grants to Indian controlled schools. | 84.072 |
| Exclusion Justification: | |
| This program is designed to meet the special needs of Indian children. Single Points of Contact may not review applications submitted by Federally recognized Indian tribes. Other applicants under this program must submit applications to Single Points Of Contact for review as required by this Order. | |
| Arts in Education | 84.084 |
| Exclusion Justification: | |
| Legislation for this program identifies the two grantees: The Kennedy Center and the National Committee on Arts for the Handicapped and therefore, the Department has no funding discretion. | |
| Indian education fellowship for Indian students. | 84.087 |
| Exclusion Justification: | |
| This program provides fellowships to individual Indian students to enable them to pursue studies at accredited colleges or institutions of higher education. | |
| Vocational education Indian and Hawaiian Native Program. | 84.101A |
| Exclusion Justification: | |
| This program provides grants and contracts to federally recognized Indian tribal governments that are eligible to contract with the Secretary of the Interior for the administration of programs under the Indian Self-Determination Act or under the Act of April 16, 1934. | |
| Educational research and development. | 84.117 |
| Exclusion Justification: | |
| This program is designed to provide grants and contracts to institutions of higher education, public and private non-profit organizations, and local and State educational agencies to support the conduct of educational research and development that is of national scope. | |
| Handicapped American Indian vocational rehabilitation service projects. | 84.128 |
| Exclusion Justification: | |
| This program is designed to provide vocational rehabilitation services solely to handicapped American Indians who reside on Federal or State reservations in order to prepare for suitable employment. | |
| National Institute on disability and rehabilitation research. | |
| Exclusion Justification: | |
| The Institute provides financial support for research conducted by over 200 organizations throughout the United States and internationally and for scholarly exchange. Research priorities are based on areas of national scope such as spinal cord injury; physical restoration and psycosocial rehabilitation; and telecommunications. Therefore, they do not directly affect local areas or governments. | |
| Allen J. Ellender fellowship program | 84.133 |
| Exclusion Justification: | |
| As directed by Congress, the Close Up Foundation is the recipient of this contract which purpose is to enable economically disadvantaged students and their teachers to participate in a week long government studies program to increase their understanding of the Federal Government. | |
| Consolidation of Federal programs for elementary and secondary education. | 84.151 |
| Funds under this program are distributed as block grants which are determined by a statutory formula and distributed to State educational agencies. The Department has no discretion in approving specific sites or in determining the amount of allocations. | |
| Handicapped special studies—State evaluation studies. | 84.158 |
| This program funds projects for data collection activities and studies; investigations; evaluations (to assess the impact and effectiveness of programs assisted under the Education of the Handicapped Act); and for the development, publication and dissemination of the Annual Report to Congress required under the Act. The projects address issues and research of national scope and the findings are used by national audiences, such as researchers, policy makers and Congress. | |
| Library services and construction act—title IV—basic grants to Indian tribes. | 84.163A |
| Exclusion Justification: | |
| This program provides assistance to Federally recognized Indian tribes. | |
| Jacob Javits fellowship program | 84.170 |
| Exclusion Justification: | |
| This program provides fellowships to students of superior ability selected on the basis of demonstrated achievement and exceptional promise, for study at the doctoral level in selected fields of the arts, humanities, and the social sciences. Individuals apply directly to the Department and the calculated stipend is directly awarded to the fellow through the institution. | |
| Robert C. Byrd honors scholarship program. | 84.185 |
| Exclusion Justification: | |
| This program provides financial assistance to States to award scholarships to individuals who have demonstrated outstanding academic achievement and who show promise of continued academic achievement. Funds are determined by a statutory formula and the Department has no discretion on amount of allocations. | |
| Adult education—national adult education discretionary program. | 84.191 |
| Projects funded under this program will be research based and national in scope. No specific state or region will be targeted. | |
| Drug-free schools and communities—Hawaiian natives. | 84.999c |
| Exclusion Justification: | |
| Funds under this program are awarded only to Hawaiian natives and the Department has no discretion in selecting recipients. | |
| General assistance to the Virgin Islands. | No CFDA No. |
| Exclusion Justification: | |
| This grant is specifically mandated for the Virgin Islands by Section 1524 of PL 95-561. | |
| Inexpensive book distribution | No CFDA No. |
| Exclusion Justification: | |
| Grant recipient is designated in legislation. | |

**DEPARTMENT OF HEALTH AND HUMAN SERVICES**

**National Institutes of Health**

**Recombinant DNA Research: Actions Under Guidelines**

**AGENCY:** National Institutes of Health, PHS, DHHS.

**ACTION:** Notice of actions under NIH guidelines for research involving recombinant DNA molecules.

**SUMMARY:** This notice sets forth three actions to be taken by the Director, National Institutes of Health (NIH), under the May 7, 1986, NIH Guidelines for Research Involving Recombinant DNA Molecules (51 FR 16958).

**EFFECTIVE DATE:** March 13, 1989.

**FOR FURTHER INFORMATION CONTACT:** Additional information can be obtained from Ms. Rachel E. Levinson, Office of Recombinant DNA Activities, Office of Science Policy and Legislation, National Institutes of Health, Building 31, Room B1C34, 9000 Rockville Pike, Bethesda, Maryland 20892, (301) 496-9838.

**SUPPLEMENTARY INFORMATION:** Today three actions are being promulgated under the NIH Guidelines for Research Involving Recombinant DNA Molecules. These three proposed actions were published for comment in the **Federal Register** of September 2, 1988 (53 FR 34246), and reviewed and recommended for approval by the NIH Recombinant DNA Advisory Committee (RAC) at its meeting on October 3, 1988. A transcript of that meeting is available from the Office of Recombinant DNA Activities at the address given above.

In accordance with Section IV–C–1–b of the NIH Guidelines, these actions have been found to comply with the NIH Guidelines and to present no significant risk to health or to the environment.

Part I of this announcement provides background information and decisions on the actions under the NIH Guidelines. Part II provides a summary of the actions. Part III provides a correction to a notice published in the **Federal Register** on October 26, 1988 (53 FR 43410).

## I. Background Information and Decisions on Actions Under the NIH Guidelines

### *A. Human Gene Transfer Proposal*

Three National Institutes of Health (NIH) intramural scientists, Dr. W. French Anderson, National Heart, Lung, and Blood Institute, and Drs. R. Michael Blaese and Steven A. Rosenberg, National Cancer Institute, have submitted a proposal involving transfer of a bacterial gene coding for neomycin phosphotransferase into the cells of human patients. The gene is to be used as a marker to trace the path of "tumor infiltrating lymphocytes," or TIL, administered as part of an ongoing experimental cancer treatment.

The proposal was first received in June and July 1988, by a number of internal NIH review committees charged with oversight of the safety of proposed experiments. Concern for safety extends from the patients to the health care personnel and the researchers. The institutional review boards of the two sponsoring institutes and the NIH Institutional Biosafety Committee (IBC) all gave "conditional approval" with certain stipulations. Among these stipulations was a requirement that the Recombinant DNA Advisory Committee (RAC) grant its approval of the same procedure.

On July 29, 1988, the Human Gene Therapy Subcommittee of the Recombinant DNA Advisory Committee met to consider the gene transfer proposal and deferred approval pending receipt of additional data. This public meeting was announced in the **Federal Register** on June 24, 1988 (53 FR 23806). The Subcommittee provided specific questions to be answered by the investigators prior to the October 3, 1988, RAC meeting.

During a telephone conference on September 29, 1988, the Subcommittee members and consultants participating in the conference decided unanimously to defer approval of the proposal because the questions posed at the July 29, 1988, meeting had not yet been answered by the additional data which had been provided.

The October 3, 1988, public meeting of the RAC was announced in the September 2, 1988, **Federal Register** (53 FR 34246). At this meeting, the RAC received and discussed data not made available previously to the Human Gene Therapy Subcommittee. Based on these data, the RAC recommended that NIH approve this protocol by a vote of 16 in favor, 5 opposed, and no abstentions. In addition to the RAC review, I requested that the entire protocol, including data presented at the October 3, 1988, meeting and any additional data obtained since that date, be reviewed by the Subcommittee at its December 9, 1988, public meeting (53 FR 45591).

This request was duly carried out, and the Human Gene Therapy Subcommittee voted unanimously to approve the protocol by a vote of 12 in favor, none opposed, and no abstentions.

Following that meeting, the Office of Recombinant DNA Activities sent a mail ballot to RAC members, including the motion approved by the Subcommittee and the minutes of the December 9, 1988, meeting of the Human Gene Therapy Subcommittee. The results of the ballot were 21 in favor, none opposed, 3 abstentions.

The motion approved by the Subcommittee and the RAC is as follows:

> To approve the human gene transfer proposal submitted by Drs. Anderson, Blaese, and Rosenberg with the following stipulations:
>
> 1. There will be no more than 10 patients in the initial trial;
> 2. The patients selected will have a life expectancy of about 90 days;
> 3. The patients give fully informed consent to participate in the trial; and
> 4. The investigators will provide additional data before expanding the trial by adding patients or by inserting a gene for therapeutic purposes.

Points 1 through 3 of the motion were adopted by the RAC at the October 3, 1988, meeting. Point 4 of the motion was added by the Subcommittee on December 9, 1988, making explicit a policy that had been agreed upon at the October 3, 1988, RAC meeting.

Approval to implement this proposal has now been recommended by: The Clinical Research Subpanels of both sponsoring institutes, the NIH Institutional Biosafety Committee, the NIH Recombinant DNA Advisory Committee (RAC), the Human Gene Therapy Subcommittee of the RAC, and the Food and Drug Administration Vaccines and Related Biologic Products Advisory Committee.

Through data obtained in animal experiments, the investigators have demonstrated to the satisfaction of the above review committees that the use of amphotropically packaged retroviral vectors does not pose a public health risk to patients or to health care personnel, even in the event of accidential exposure to experimental material. Therefore, I have determined that this protocol does not present a risk to public health or to the environment.

After reviewing the relevent records and documentation, I accepted this recommendation, and approval to conduct this experiment has been given to Drs. Anderson, Blaese, and Roseberg.

### *B. Amendment of Section I–C of the NIH Guidelines*

Section I–C of the NIH Guidelines currently reads as follows:

> The Guidelines are applicable to all recombinant DNA research within the United States or its territories which is conducted at or sponsored by an institution that receives any support for recombinant DNA research from the National Institutes of Health (NIH). This includes research performed by the NIH directly.
>
> An individual receiving support for research involving recombinant DNA must be associated with or sponsored by an institution that can and does assume the responsibilities assigned in these Guidelines.
>
> The Guidelines are also applicable to projects done abroad if they are suported by NIH funds. If the host country, however, has established rules for the conduct of recombinant DNA projects, then a certificate of compliance with those rules may be submitted to NIH in lieu of compliance with the NIH Guidelines. The NIH reserves the right to withhold funding if the safety practices to be employed abroad are not reasonably consistent with the NIH Guidelines.

In a letter date January 9, 1987, Mr. Edward Lee Rogers, Counsel for the Foundation on Economic Trends, and Mr. Jeremy Rifkin, Foundation on Economic Trends, Washington, DC, proposed that the following text be inserted after the first sentence of the third paragraph of section I–C:

> For purposes of the preceding sentence, the term 'project' includes any research or development of the recombinant organism or other product or process in question, including all such work that is reasonably foreseeable when the NIH support is received. NIH support includes both money grants and any type of in-kind support, including research conducted directly by NIH, supplies, equipment, the use of facilities, and biological research materials. NIH support has been given where the source of funds or in-kind support is, directly or indirectly, the NIH.

This proposed amendment of section I–C was initially published for comment in the **Federal Register** of March 11, 1987 (52 FR 7525), prior to a scheduled RAC meeting on June 15, 1987. The June 15, 1987, meeting was postponed and rescheduled on September 21, 1987. Accordingly, this proposed amendment was published again for comment in the **Federal Register** of August 11, 1987 (52 FR 29900).

After extensive discussion at its meeting on September 21, 1987, the RAC voted to establish a working group to make recommendations regarding international projects and to report back to the full RAC.

A Working Group on International Projects met at the NIH on February 1, 1988 (53 FR 806). After much discussion, the working group voted seven in favor, none opposed, and no abstentions that the following proposed revision of the last paragraph of Section I–C be published for comment:

> The NIH Guidelines are also applicable: (1) To projects done abroad if they are supported by NIH funds, or (2) to research done abroad if it involves deliberate release into the environment or testing in humans of materials containing recombinant DNA developed with NIH funds and the research is a direct extension of the development process. If the host country, however, has established rules for the conduct of recombinant DNA projects, then a written assurance of compliance with those rules may be submitted to NIH in lieu of compliance with the NIH Guidelines. Alternatively, if the host country does not have such rules, written acceptance by an appropriate government office of the host country is necessary in lieu of compliance with the NIH Guidelines. The NIH reserves the right to withhold funding if the safety practices to be employed abroad are not reasonably consistent with the NIH Guidelines.

After extensive discussion of this proposed amendment of Section I–C and attempts to draft revised language, the RAC recommended that the many issues raised be referred back to the working group for further consideration.

A Working Group on International Projects met at the NIH on August 15, 1988 (53 FR 27670). The working group recommended that the following proposed revision of the last paragraph of Section I–C be published for comment:

> The NIH Guidelines are also applicable to recombinant DNA projects done abroad:
>
> 1. If they are supported by NIH funds; or
> 2. If they involve deliberate release into the environment or testing in humans of materials containing recombinant DNA developed with NIH funds, and if the institution that developed those materials sponsors or participates in those projects. Participation includes research collaboration or contractural agreements, but not mere provison of research materials.
>
> If the host country has established rules for the conduct of recombinant DNA projects, then the project must be in compliance with those rules. If the host country does not have such rules, the proposed project must be reviewed by an NIH-approved IBC or equivalent review body and accepted in writing by an appropriate national governmental authority. The safety practices to be employed abroad must be reasonably consistent with the NIH Guidelines.

The proposed language was published for public comment in the **Federal Register** on September 2, 1988 (53 FR 34246). No comments were received in response to the notice. This language was reviewed at the October 3, 1988, RAC meeting and accepted with one modification. After the word "authority" in the final paragraph, the phrase "of the host country" was added. This motion passed unanimously by a vote of 20 in favor, none opposed, and no abstentions.

I accept these recommendations, and Section I–C has been amended accordingly.

### *C. Proposed Amendment of Section I–B*

RAC member, Dr. Anne Vidaver of the University of Nebraska, proposed that the following paragraph regarding transposons be added to Section I–B, Definition of Recombinant DNA Molecules:

> Unmodified transposons (wild-type) that become inserted into a genome, even if carried by a recombinant vector or plasmid, are not subject to these guidelines. For example, it is common to use vectors that either are naturally unstable (suicide vector) in a desired host or that can be rendered unstable by manipulating physiological conditions. In the process of suicide (inability of the vector to replicate), transposon transfer may occur. This process is not considered recombinant DNA.

Transposable genetic elements or transposons are mobile DNA segments that can insert into a few or several sites in a genome. Such insertions, unlike classical recombination events, do not require DNA sequence homology and are independent of recombination systems. Many transposons have been discovered in microorganisms and other organisms. They may be insertion sequences that do not carry genes related to a phenotype such as drug resistance, lactose or raffinose utilization, arginine biosynthesis, mercury resistance, or enterotoxin production. Transposable elements also include self-replicating elements such as the entire bacteriophage genomes of Mu and Psi.

This proposal appeared in the **Federal Register** on September 2, 1988 (53 FR 34246), for public comment. Two suggestions for modifying the proposed language were received and discussed at the October 3, 1988, RAC meeting.

A substitute motion was developed as follows:

> Genomic DNA of plants and bacteria that has acquired a transposable element, even if the latter was donated from a recombinant vector no longer present, is not subject to these Guidelines unless the transposon itself contains recombinant DNA.

The motion to recommend approval of this modification to Section I–B of the Guidelines was passed by a vote of 18 in favor, none opposed, and no abstentions.

I accept this recommendation, and Section I–B of the Guidelines is amended accordingly.

## II. Summary of Actions

### *A. Human Gene Transfer Proposal*

The following section is added to Appendix D:

> Appendix D–XIII

VOL 54 ISS 47 MR 13 1989 UMI

Drs. W. French Anderson, R. Michael Blaese, and Steven Rosenberg of the National Institutes of Health, Bethesda, Maryland, can conduct experiments in which a bacterial gene coding for neomycin phosphotransferase will be inserted into a portion of the tumor infiltrating lymphocytes (TIL) of cancer patients using a retroviral vector, N2. The marked TIL then will be combined with unmarked TIL, and reinfused into the patients. This experiment is an addition to an ongoing adoptive immunotherapy protocol in which TIL are isolated from a patient's tumor, grown in culture in the presence of interleukin-2, and reinfused into the patient. The marker gene will be used to detect TIL at various time intervals following reinfusion.

Approval is based on the following four stipulations:

1. There will be no more than 10 patients in the initial trial;
2. The patients selected will have a life expectancy of about 90 days;
3. The patients give fully informed consent to participate in the trial; and
4. The investigators will provide additional data before expanding the trial by adding patients or by inserting a gene for therapeutic purposes.

*B. Amendment of Section I–C of the NIH Guidelines*

Section I–C of the Guidelines is modified to read as follows:

The Guidelines are applicable to all recombinant DNA research within the United States or its territories which is conducted at or sponsored by an institution that receives any support for recombinant DNA research from the National Institutes of Health (NIH). This includes research performed by NIH directly.

An individual receiving support for research involving recombinant DNA must be associated with or sponsored by an institution that can and does assume the responsibilities assigned in these Guidelines.

The NIH Guidelines are also applicable to recombinant DNA projects done abroad:

1. If they are supported by NIH funds; or
2. If they involve deliberate release into the environment or testing in humans of materials containing recombinant DNA developed with NIH funds, and if the institution that developed those materials sponsors or participates in those projects. Participation includes research collaboration or contractual agreements, but not mere provision of research materials.

If the host country has established rules for the conduct of recombinant DNA projects, then the project must be in compliance with those rules. If the host country does not have such rules, the proposed project must be reviewed by an NIH-approved IBC or equivalent review body and accepted in writing by an appropriate national governmental authority of the host country. The safety practices to be employed abroad must be reasonably consistent with the NIH Guidelines.

*C. Proposed Amendment of Section I–B*

Section I–B is modified to read as follows:

In the context of these Guidelines recombinant DNA molecules are defined as either (i) molecules which are constructed outside living cells by joining natural or synthetic DNA segments to DNA molecules that can replicate in a living cell, or (ii) DNA molecules that result from the replication of those described in (i) above.

Synthetic DNA segments likely to yield a potentially harmful polynucleotide or polypeptide (e.g., a toxin or a pharmacologically active agent) shall be considered as equivalent to their natural DNA counterpart. If the synthetic DNA segment is not expressed in vivo as a biologically active polynucleotide or polypeptide product, it is exempt from the Guidelines.

Genomic DNA of plants and bacteria that has acquired a transposable element, even if the latter was donated from a recombinant vector no longer present, is not subject to these Guidelines unless the transposon itself contains recombinant DNA.

**III. Correction to Notice of Actions Published in the Federal Register on October 28, 1988 (53 FR 43418)**

Two phrases were inadvertently dropped from *Part II., D. Revision of Appendix C–IV.* Appendix C–IV should read as follows:

Any asporogenic Bacillus subtilis or asporogenic Bacillus licheniformis strain which does not revert to a sporeformer with a frequency greater than 10, can be used for cloning DNA with the exception of those experiments listed below.

For these exempt laboratory experiments, BL1 physical containment conditions are recommended.

For large-scale (LS) fermentation experiments, the appropriate physical containment conditions need be no greater than those for the host organism unmodified by recombinant DNA techniques; the IBC can specify higher containment if it deems necessary.

OMB's "Mandatory Information Requirements for Federal Assistance Program Announcements"(45 FR 39592) requires a statement concerning the official government programs contained in the *Catalog of Federal Domestic Assistance.* Normally NIH lists in its announcements the number and title of affected individual programs for the guidance of the public. Because the guidance in this notice covers not only virtually every NIH program but also essentially every Federal research program in which DNA recombinant molecule techniques could be used, it has been determined to be not cost effective or in the public interest to attempt to list these programs. Such a list would likely require several additional pages. In addition, NIH could not be certain that every Federal program would be included as many Federal agencies, as well as private organizations, both national and international, have elected to follow the NIH Guidelines. In lieu of the individual program listing, NIH invites readers to direct questions to the information address above about whether individual programs listed in the *Catalog of Federal Domestic Assistance* are affected.

Dated: March 2, 1989.

**James B. Wyngaarden,**

*Director, National Institutes of Health.*

Part V

# Environmental Protection Agency

**40 CFR Part 300**

**National Priorities List for Uncontrolled Hazardous Sites; Final Federal Facility Site Update; Final Rule**

VOL 54 ISS 47 MR 13 1989 UMI

**ENVIRONMENTAL PROTECTION AGENCY**

**40 CFR Part 300**

**[FRL-3533-8]**

**National Priorities List for Uncontrolled Hazardous Waste Sites; Final Federal Facility Site Update**

**AGENCY:** Environmental Protection Agency.

**ACTION:** Final rule.

**SUMMARY:** The Environmental Protection Agency ("EPA") is amending the National Oil and Hazardous Substances Contingency Plan ("NCP"), 40 CFR Part 300, which was promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 ("CERCLA") (amended by the Superfund Amendments and Reauthorization Act of 1986 ("SARA")) and Executive Order 12580 (52 FR 2923, January 29, 1987). CERCLA requires that the NCP include a list of national priorities among the known releases or threatened releases of hazardous substances, pollutants, or contaminants throughout the United States, and that the list be revised at least annually. The National Priorities List ("NPL"), initially promulgated as Appendix B of the NCP on September 8, 1983 (48 FR 40658), constitutes this list and is being revised today by the addition of eight Federal facility sites to the Federal section of the NPL, the expansion of two Federal facilty sites already on the NPL, and the reclassification of one site already on the NPL to a Federal facility site. EPA has reviewed public comments on the listing of these sites and has decided that they meet the eligibility requirements and listing policies of the NPL. Information supporting these actions is contained in the Superfund Public Dockets. Elsewhere in today's Federal Register is a notice describing the policy under which some of these Federal facility sites are being added to the NPL. This rule results in a final NPL of 799 sites, 41 of them in the Federal section: 370 sites are proposed to the NPL, 22 of them in the Federal section. Final and proposed sites now total 1,169.

**EFFECTIVE DATE:** The effective date for this amendment to the NCP shall be April 12, 1989. CERCLA section 305 provides for a legislative veto of regulations promulgated under CERCLA. Although *INS v. Chadha*, 462 U.S. 919, 103 S. Ct. 2764 (1983), cast the validity of the legislative veto into question, EPA has transmitted a copy of this regulation to the Secretary of the Senate and the Clerk of the House of Representatives. If any action by Congress calls the effective date of this regulation into question, the Agency will publish a notice of clarification in the Federal Register.

**ADDRESSES:** Addresses for the Headquarters and Regional dockets follows. For further details on what these dockets contain, see section I of the "Supplementary Information" portion of this preamble.

Tina Maragousis, Headquarters, U.S. EPA CERCLA Docket Office, Waterside Mall, 401 M Street SW., Washington, DC 20460, 202/382-3046.

## I. Introduction

*Background*

In 1980, Congress enacted the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. sections 9601-9657 ("CERCLA" or the "Act"), in response to the dangers of uncontrolled or abandoned hazardous waste sites. CERCLA was amended in 1986 by the Superfund Amendments and Reauthorization Act ("SARA"), Pub. L. No. 99-499, stat. 1613 *et seq.* To implement CERCLA, the Environmental Protection Agency ("EPA" or "the Agency") promulgated the revised National Oil and Hazardous Substances Contingency Plan ("NCP"), 40 CFR Part 300, on July 16, 1982 (47 FR 31180) pursuant to CERCLA section 105 and Executive Order 12316 (46 FR 42237, August 20, 1981). The NCP, further revised by EPA on September 16, 1985 (50 FR 37624) and November 20, 1985 (50 FR 47912), sets forth guidelines and procedures needed to respond under CERCLA to releases or threatened releases of hazardous substances, pollutants, or contaminants. On December 21, 1988 (53 FR 51394), EPA proposed revisions to the NCP in response to SARA.

Section 105(a)(8)(A) of CERCLA, as amended by SARA, requires that the NCP include criteria for determining priorities among releases or threatened releases throughout the United States for the purpose of taking remedial action and, to the extent practicable, take into account the potential urgency of such action for the purpose of taking removal action. In response to that mandate, EPA developed a model for assessing the relative risk posed by sites (the "Hazard Ranking System" or "HRS").

Section 105(a)(8)(B) of CERCLA, as amended by SARA, requires that the statutory criteria provided by the HRS be used to prepare a list of national priorities among the known releases or threatened releases of hazardous substances, pollutants, or contaminants throughout the United States. The list, which is Appendix B of the NCP, is the National Priorities List ("NPL"). Section 105(a)(8)(B) also requires that the NPL be revised at least annually.

An original NPL of 406 sites was promulgated on September 8, 1983 (48 FR 40658). The NPL has been expanded since then, most recently on July 22, 1987 (52 FR 27620). The Agency has also published a number of proposed rulemakings to add sites to the NPL, most recently Update #7 on June 24, 1988 (53 FR 23988). EPA announced on June 10, 1986 (51 FR 21056), that it would list Federal facility sites in a separate section of the NPL, using the same technical criteria that qualify non-Federal sites.

EPA may delete sites from the NPL when no further response is appropriate, as provided in the NCP at 40 CFR 300.66(c)(7). To date, the Agency has deleted 24 sites from the NPL, 8 of them since the June 1988 proposed rule. They are:

- September 1, 1988 (53 FR 33811)
  —Tri-City Oil Conservationist, Inc., Tampa, Florida
  —Varsol Spill (once listed as part of Biscayne aquifer), Miami, Florida
- December 23, 1988 (53 FR 51780)
  —Toftdahl Drums, Brush Prairie, Washington
- January 19, 1989 (54 FR 2124)
  —Matthews Electroplating, Roanoke County, Virginia
- February 13, 1989 (54 FR 6521)
  —Presque Isle, Erie, Pennsylvania
- February 21, 1989 (54 FR 7424)
  —Parramore Surplus, Mount Pleasant, Florida
- February 22, 1989 (54 FR 7548)
  —Cooper Road, Voorhees Township, New Jersey
- February 22, 1989 (54 FR 7549)
  —Krysowaty Farm, Hillsborough, New Jersey.

EPA has also published several notices of intent to delete sites.

This rule adds eight Federal facility sites to the NPL, expands two Federal facility sites, and reclassifies one private site to a Federal facility site. EPA has carefully considered public comments submitted for the sites in today's final rule. This rule results in a final NPL of 799 sites, 41 of them in the Federal section; 370 sites are in proposed status, 22 of them in the Federal section. With these changes, final and proposed sites now total 1,169.

EPA includes on the NPL sites at which there are or have been releases or threatened releases of hazardous substances, pollutants, or contaminants. The discussion below may refer to "releases or threatened releases" simply as "releases", "facilities", or "sites".

*Information Available to the Public*

The Headquarters and Regional public dockets for the NPL (see **ADDRESSES** portion of this notice) contain documents relating to the scoring of sites in this final rule. The dockets are available for viewing "by appointment only" after the appearance of this notice. The hours of operation for the Headquarters dockets are from 9:00 a.m. to 4:00 p.m., Monday through Friday excluding Federal holidays. Please contact individual Regional dockets for hours.

The Headquarters docket contains HRS score sheets for each final site, a Documentation Record for each site describing the information used to compute the score, pertinent information for any site affected by special study waste, information for sites affected by the policy for listing sites subject to the Surface Mining Control and Reclamation Act of 1977 (SMCRA), a list of documents referenced in the Documentation Record, comments received, and the Agency's response to those comments. The Agency's responses are contained in the "Support Document for the Revised National Priorities List—Final Federal Facility Site Update, March 1989."

Each Regional docket includes all information available in the Headquarters docket for sites in that Region, as well as the actual reference documents, which contain the data EPA relied upon in calculating or evaluating the HRS scores for sites in the Region. These reference documents are available only in the Regional dockets. They may be viewed "by appointment only" in the appropriate Regional Docket or Superfund Branch office. Requests for copies may be directed to the appropriate Regional docket or Superfund Branch.

An informal written request, rather than a formal request, should be the ordinary procedure for obtaining copies of any of these documents.

EPA has published a statement describing what background information (resulting from the initial investigation of potential CERCLA sites) the Agency discloses in response to Freedom of Information Act requests (52 FR 5578, February 25, 1987).

## II. Purpose and Implementation of the NPL

*Purpose*

The primary purpose of the NPL is stated in the legislative history of CERCLA (Report of the Committee on Environment and Public Works, Senate Report No. 96-848, 96th Cong., 2d Sess. 60 (1980)):

> The priority lists serve primarily informational purposes, identifying for the States and the public those facilities and sites or other releases which appear to warrant remedial actions. Inclusion of a facility or site on the list does not in itself reflect a judgment of the activities of its owner or operator. It does not require those persons to undertake any action, nor does it assign liability to any person. Subsequent government action in the form of remedial actions or enforcement actions will be necessary in order to do so, and these actions will be attended by all appropriate procedural safeguards.

The purpose of the NPL, therefore, is primarily to serve as an informational and management tool. The initial identification of a site for the NPL is intended primarily to guide EPA in determining which sites warrant further investigation to assess the nature and extent of the public health and environmental risks associated with the site and to determine what CERCLA-financed remedial action(s), if any, may be appropriate. The NPL also serves to notify the public of sites EPA believes warrant further investigation.

Federal facility sites are eligible for the NPL pursuant to the NCP at 40 CFR 300.66(c)(2). However, section 111(e)(3) of CERCLA, as amended by SARA, limits the expenditure of CERCLA monies at Federally-owned facilities. Federal facility sites are also subject to the requirements of CERCLA section 120, added by SARA.

*Placing Sites on the NPL*

There are three mechanisms for placing sites on the NPL. The principal mechanism is the application of the HRS. The HRS serves as a screening device to evaluate the relative potential of uncontrolled hazardous substances to cause human health or safety problems, or ecological or environmental damage. The HRS score is calculated by estimating risks presented in three potential "pathways" of human or environmental exposure: Ground water, surface water, and air. Within each pathway of exposure, the HRS considers three categories of factors "that are designed to encompass most aspects of the likelihood of exposure to a hazardous substance through a release and the magnitude or degree of harm from such exposure": (1) Factors that indicate the presence or likelihood of a release to the environment; (2) factors that indicate the nature and quantity of the substances presenting the potential threat; and (3) factors that indicate the human or environmental "targets" potentially at risk from the site. Factors within each of these three categories are assigned a numerical value according to a set scale. Once numerical values are computed for each factor, the HRS uses mathematical formulas that reflect the relative importance and interrelationships of the various factors to arrive at a final site score on a scale of 0 to 100. The resultant HRS score represents an estimate of the relative "probability and magnitude of harm to

VOL 54 ISS 47 MR 13 1989 UMI

the human population or sensitive environment from exposure to hazardous substance as a result of the contamination of ground water, surface water, or air" (47 FR 31180, July 16, 1982). Those sites that score 28.50 or greater on the HRS are eligible for the NPL.

Under the second mechanism for adding sites to the NPL, each State may designate a single site as its top priority, regardless of the HRS score. This mechanism is provided by section 105(a)(8)(B) of CERCLA, as amended by SARA, which requires that, to the extent practicable, the NPL include within the 100 highest priorities, one facility designated by each State representing the greatest danger to public health, welfare, or the environment among known facilities in the State.

The third mechanism for listing, included in the NCP at 40 CFR 300.66(b)(4) (50 FR 37624, September 16, 1985), has been used only in rare instances. It allows certain sites with HRS scores below 28.50 to be eligible for the NPL if all of the following occur:

- The Agency for toxic Substances and Disease Registry of the U.S. Department of Health and Human Services has issued a health advisory which recommends dissociation of individuals from the release.
- EPA determines that the release poses a significant threat to public health.
- EPA anticipates that it will be more cost-effective to use its remedial authority than to use its removal authority to respond to the release.

All sites in this update are being included on the NPL based on HRS scores.

Federal agencies have the primary responsibility under CERCLA section 120(c) for identifying Federal facility sites. In conjunction with EPA Regional Offices, the Federal agencies perform investigations, sampling, monitoring, and scoring of sites. Regional Offices then conduct a quality control review of the candidate sites. EPA Headquarters conducts further quality assurance audits to ensure accuracy and consistency among the various offices participating in the scoring. The Agency then proposes the sites that meet one of the three eligibility criteria for listing (and EPA's listing policies) and solicits public comment on the proposal. Based on these comments and further review by EPA, the Agency determines final HRS scores and lists those sites that still qualify for the final NPL.

In response to CERCLA section 105(c), as amended by SARA, EPA has proposed revisions to the HRS (55 FR 51532, December 23, 1988). EPA intends to issue the revised HRS as soon as possible. However, until the proposed revisions have been subject to public comment and put into effect, EPA will continue to propose and promulgate sites using the current HRS, in accordance with CERCLA section 105(c)(1) and Congressional intent, *see*, e.g., S. Rep. No. 11, 99th Cong., 1st Sess. 41 (1985); 131 *Cong. Rec.* S–11831 (daily ed., Sept. 18, 1985) (statement of Sen. Baucus).

## III. Statutory Requirements and Listing Policies

CERCLA restricts EPA's authority to respond to certain categories of releases of hazardous substances, pollutants, or contaminants by expressly excluding some substances, such as petroleum, from the response program. In addition, CERCLA section 105(a)(8)(B) directs EPA to list priority sites "among" the known releases or threatened releases of hazardous substances, pollutants, or contaminants, and section 105(a)(8)(A) directs EPA to consider certain enumerated and "other appropriate" factors in doing so. Thus, as a matter of policy, EPA has the discretion not to use CERCLA to respond to certain types of releases. For example, EPA has chosen not to list sites that result from contamination associated with facilities licensed by the Nuclear Regulatory Commission (NRC), on the grounds that NRC has the authority and expertise to clean up releases from those facilities (48 FR 40661, September 8, 1983). Where other authorities exist, placing the site on the NPL for possible remedial action under CERCLA may not be appropriate. Therefore, EPA has chosen to defer certain types of sites from the NPL even though CERCLA may provide authority to respond. If, however, the Agency later determines that sites not listed as a matter of policy are not being properly responded to, the Agency may place them on the NPL.

In the proposed revisions to the NCP (53 FR 51394, December 21, 1988), the Agency is considering extending the deferral policy, under certain circumstances, to include other Federal authorities and States that have corrective action authority. The Agency is also considering extending the policy to sites where the potentially responsible parties enter into enforcement agreements for site cleanup under CERCLA. EPA notes that even if another authority is applicable to Federal facilities, the cleanup of such sites will not be deferred, and Federal Facilities will continue to be included in the NPL, consistent with CERCLA section 120(d)(2).

### *Releases from Federal Facility Sites*

On June 10, 1986 (51 FR 21054), the Agency announced a decision on components of a policy for generally deferring from listing those non-Federal sites that are subject to Subtitle C of the Resource Conservation and Recovery Act (RCRA). The policy was intended to reflect RCRA's broadened corrective action authorities as a result of the Hazardous and Solid Waste Amendments of 1984 (HSWA). In announcing the RCRA policy, the Agency reserved for a later date the question of whether this or another policy would be applied to Federal facility sites that include one or more RCRA hazardous waste management units, and thus are subject to RCRA Subtitle C corrective action authorities.

On May 13, 1987 (52 FR 17991), the Agency announced its intent to adopt a policy that would allow Federal facility sites to be placed on the NPL regardless of whether RCRA Subtitle C corrective action authorities are applicable.

Elsewhere in today's Federal Register is a notice describing the policy for placing on the NPL those sites located on Federally-owned or -operated facilities that meet the eligibility criteria (e.g., HRS score of 28.50 or greater) set out in the NCP for listing on the NPL, even if the Federal facility is also subject to the corrective action authorities of RCRA Subtitle C. Thus the June 10, 1986 RCRA deferral policy (51 Fr 21057), applicable to private sites, will not be applied to Federal facility sites.

The Agency believes that placing Federal facility sites with or without RCRA-regulated hazardous waste management units on the NPL is consistent with the intent of section 120 of SARA and will serve the purposes originally intended by the NCP at 40 CFR 300.66(e)(2)—to advise the public of the status of Federal Government cleanup efforts (50 FR 47931, November 20, 1985). In addition, listing will help other Federal agencies set priorities and focus cleanup efforts on those sites presenting the most serious problems.

### *Releases from Special Study Wastes and Mining Sites*

Section 105(g) of CERCLA, as amended by SARA, requires additional information before sites involving RCRA "special study wastes" can be added to the NPL (53 FR 23982, June 24, 1988). One of the sites being expended in this rule (Weldon Spring Quarry/Plant/Pits) involves such wastes. The same site also involves mining wastes, which are addressed under a SMCRA applicability policy also explained on June 24, 1988 (53 FR 23988). A memorandum has been placed in the docket addressing the application of the special study waste and SMCRA policies to this site.

## IV. Disposition of Sites in Today's Final Rule

This final rule adds eight Federal facility sites to the Federal facility section of the NPL (Table I), finalizes the expansion of two Federal facility sites already on the NPL, and reclassifies one site already on the NPL to a Federal facility site.

TABLE I.—NATIONAL PRIORITIES LIST, FEDERAL FACILITY SITES, NEW FINAL (BY GROUP) MARCH 1989

| NPL Gr.[1] | St | Site Name | City/County | Response category [2] | Cleanup status [3] |
|---|---|---|---|---|---|
| 1 | NM | Cal West Metals (USDOE) | Lemitar | D | |
| 4 | AL | Anniston Army Depot (SE Ind Area) | Anniston | R | I |
| 7 | IL | Savanna Army Depot Activity | Savanna | R | |
| 8 | PA | Letterkenny Army Depot (PDO Area) | Franklin County | R | |
| 10 | DE | Dover Air Force Base | Dover | R | I |
| 11 | IL | Joliet Army Ammo Plant (LAP Area) | Joliet | R | |
| 13 | WA | Fairchild Air Force Base (4 Areas) | Spokane County | R | |
| 15 | LA | Louisiana Army Ammunition Plant | Doyline | R | |

Number of New Final Federal Facility Sites: 8.

[1] Sites are placed in groups (Gr) corresponding to groups of 50 on the final NPL.
[2] V—Voluntary or negotiated response; R—Federal and State response; F—Federal enforcement; S—State enforcement; D—Category to be determined.
[3] I—Implementation activity underway, one or more operable units; O—One or more operable units completed; others may be underway; C—Implementation activity completed for all operable units.

### *New Final Sites*

The eight new Federal facility sites in today's final rule are subject to the corrective action authorities of RCRA Subtitle C. EPA is placing these sites on the NPL consistent with the listing policy for Federal facilities, described elsewhere in today's Federal Register. They include six sites reproposed for the NPL on July 22, 1987 (52 FR 27643), and two sites proposed on June 24, 1988 (53 FR 23988). The Agency received comments on two of the sites reproposed on July 22, 1987; no comments were received on the remaining six sites.

The Agency received technical comments on the proposal to list the Letterkenny Army Depot (Property Disposal Office Area), Franklin County, Pennsylvania, and the Anniston Army Depot (Southeast Industrial Area), Anniston, Alabama. EPA's response to these comments is discussed in the "Support Document for the Revised National Priorities List—Final Federal Facility Site Update, March 1989" which is available in the appropriate Superfund Dockets.

### *Site Expansions*

The Agency is finalizing two site expansions in this rule, the expansion of the Rocky Mountain Arsenal (RMA) site in Denver, Colorado, to include Basin F, a 93-acre lagoon on the site, and the expansion of the Weldon Spring Quarry (USDOE/Army) site in St. Charles County, Missouri, to include the Weldon Spring Feed Materials plant and Raffinate Pits.

The approach of expanding a site to include a contiguous area that is contributing to a contamination problem, rather than proposing a second separate site, is within the Agency's authority and is consistent with past practice. For instance, in the first NPL proposal on December 30, 1982 (47 FR 58476), EPA proposed to list a 23-mile stream bed (the "Silver Bow Creek site"), and finalized that site on September 8, 1983 (48 FR 40658). The Agency then proposed on June 10, 1986 (51 FR 21101) to expand the site to include an additional area which EPA determined to be significantly contributing to the contamination; the Silver Bow Creek expansion was finalized on July 22, 1987 (52 FR 27627). EPA has broad authority to address contamination, as reflected in CERCLA section 104(d)(4), which allows the Agency to treat related, noncontiguous facilities as one for the purpose of remedial action, and in CERCLA section 101(9), which defines a "facility" under CERCLA to include any site or area where a hazardous substance has been placed or "come to be located."

The Agency received comments from one party opposing the proposal to expand the RMA site; EPA had proposed this expansion on July 22, 1987 (52 FR 27643) when the RMA site was added to the final NPL. EPA believes that it is appropriate to include Basin F in the RMA listing.

Basin F is located on section 36 of the approximately 40 designated land sections at the RMA property. The RMA/NPL site, as originally listed, includes the bulk of the Arsenal property, and indeed physically surrounds the Basin F area. EPA has identified Basin F as a major source of ground water contamination which mixes with ground water contamination from other sources at the Arsenal, making coordinated response necessary. Basin F also represents a major source of surface contamination, although that situation is being addressed by a CERCLA interim response action at Basin F. The Agency believes that the site definition for RMA should be expanded to include Basin F so that EPA will have the option of seeking a comprehensive remedy under CERCLA for contamination at the contiguous areas of Basin F and the original RMA/NPL site.[1]

Basin F was excluded from the RMA site (as initially proposed and promulgated) because EPA believed that Basin F might be subject to RCRA Subtitle C corrective action authorities, and thus might be appropriate for deferral under the Agency's September 8, 1983 NPL/RCRA policy (48 FR 40662 and further discussed at 49 FR 40323–40324, 40336 (October 15, 1984)). EPA subsequently learned that Basin F should not, in fact, have been deferred to RCRA based on the policy in effect when RMA was proposed for lising.[2]

[1] In the case of the Basin F expansion, a non-contiguous site expansion analysis is not technically required. Information developed during the course of the remedial investigation/feasibility study confirms that contamination extends from the original RMA/NPL site to the Basin F area. This provides an additional basis for including Basin F within the original NPL site at RMA, because the statute provides that a CERCLA "facility" includes the site or area where hazardous substances have "come to be located" (CERCLA section 101(9)). The definition of a "site," reflected by the original HRS listing package, is continually refined as the CERCLA process progresses and more information on the extent of contamination is developed.

[2] Basin F stopped receiving RCRA hazardous wastes prior to July 26, 1982 (the effective date of the land disposal regulations) and did not certify closure prior to January 26, 1983; thus, it was not

Continued

VOL 54 ISS 47 MR 13 1989 UMI

Rather, it should have been included in the original RMA site under the 1983 policy.

Basin F also qualifies for listing under the current policy. Passage of HSWA in 1984 gave the Agency additional authorities under RCRA to order corrective action at all units at a RCRA facility, including those that were known as "non-regulated" units; thus, on June 10, 1986 (51 FR 21057), the Agency announced a revised NPL/RCRA policy which provided for the deferral from listing of certain RCRA sites where corrective action authorities are available (again, including sites with non-regulated units). However, that revised policy applied only to *non*-Federal facility sites, and thus not to Basin F. Thus, the June 1986 revised policy did not supersede the September 1983 RCRA listing policy *with respect to* Federal facilities. On May 13, 1987 (52 FR 17991–17993), the Agency asked for comment on a policy for listing Federal sites regardless of RCRA applicability, and on July 22, 1987 (52 FR 27645–27649), the Agency discussed that policy with specific application to Basin F. Elsewhere in today's Federal Register, the Agency formally announced its policy of listing Federal facility sites on the NPL, even if they are also subject to RCRA authorities, as generally discussed in the May and July 1987 notices. Thus, Basin F is appropriate for inclusion in the NPL site under current Agency policy.

Further specific comments concerning the expansion of the RMA site are discussed in the Support Document for this rule, which is available in the Superfund docket.

The second Federal facility site being expanded in this rule is the Weldon Spring Quarry (USDOE/Army), St. Charles County, Missouri. It was placed on the final NPL on July 22, 1987 (52 FR 27620). On June 24, 1988, EPA proposed to expand the site to include the Weldon Spring Feed Materials Plant and Raffinate Pits, which are located less than 3 miles from the Quarry and are linked to the contamination at the original site. The site contains mining wastes from uranium ore processing; an addendum discussing special study wastes at the site is included in the Superfund dockets. In addition, the site was abandoned prior to the August 3, 1977 enactment of the Surface Mining Control and Reclamation Act of 1977 ("SMCRA"). Consistent with the policy for listing SMCRA sites on the NPL, a statement covering SMCRA applicability at the site is included in the dockets. No comments were received on the proposed expansion of this site, or on the special study waste and SMCRA addenda. The expanded site is now being placed on the final NPL under the name "Weldon Spring Quarry/Plant/Pits (USDOE/Army)".

*Site Reclassification*

Finally, this rule reclassifies one site—W. R. Grace Co., Inc. (Wayne Plant), Wayne, New Jersey—as a Federal facility site; that site had been proposed for the NPL on September 8, 1983 (48 FR 40674). W.R. Grace Co., Inc., bought the facility in 1957 and owned it until September 18, 1984, when the facility was acquired by the U.S. Department of Energy (USDOE). USDOE changed the name of the site to the Wayne Interim Storage Site (WISS). On September 21, 1984 (49 FR 37070), the site was placed on the final NPL under its original name. The site will now be included in the Federal facility section of the NPL. The site name is being changed to "W. R. Grace & Co., Inc./Wayne Interim Storage Site (USDOE)" to more accurately reflect the ownership and status of the site.

## V. Contents of the NPL

The eight new sites added to the NPL in today's rule (Table 1) and the one reclassified site have been incorporated into the Federal section of the NPL by their group number. Sites on the NPL are arranged according to their HRS scores and presented in groups of 50 sites to emphasize that minor differences in HRS scores do not necessarily represent significantly different levels of risk. EPA considers the sites within a group to have approximately the same priority for response actions. The Federal facility section appears at the end of this final rule, and will be codified as part of Appendix B to the NCP.

Each entry on the NPL contains the name of the facility and the State and city or county in which it is located. For informational purposes, each entry is accompanied by one or more notations reflecting the status of response and cleanup activities at these sites at the time this list was prepared. Because this information may change periodically, these notations may become outdated.

## VI. Regulatory Impact Analysis

The costs of cleanup actions that may be taken at sites are not directly attributable to placement on the NPL, as explained below. Therefore, the Agency has determined that this rulemaking is not a "major" regulation under Executive Order 12291. EPA has conducted a preliminary analysis of economic implications of today's amendment to the NCP. EPA believes that the kinds of economic effects associated with this revision are generally similar to those effects identified in the regulatory impact analysis (RIA) prepared in 1982 for the revisions to the NCP pursuant to section 105 of CERCLA and the economic analysis prepared when amendments to the NCP were proposed (50 FR 5862, February 12, 1985). The Agency believes the anticipated economic effects related to adding eight sites to the NPL can be characterized in terms of the conclusions of the earlier RIA and the most recent economic analysis. This rule was submitted to the Office of Management and Budget for review as required by Executive Order 12291.

*Costs*

EPA has determined that this rulemaking is not a "major" regulation under Executive Order 12291 because inclusion of a site on the NPL does not itself impose any costs. It does not establish that EPA will necessarily undertake remedial action, nor does it require any action by a private party or determine its liability for site response costs. Costs that arise out of site responses result from site-by-site decisions about what actions to take, not directly from the act of listing itself. In addition, all sites in this final rule are Federally-owned or -operated, and CERCLA section 111(e)(3) prohibits use of the Trust Fund for remedial actions at Federal facilities.

*Benefits*

The real benefits associated with today's amendment placing additional sites on the NPL are increased health and environmental protection as a result of increased public awareness of potential hazards.

As a result of the additional CERCLA remedies, there will be lower human exposure to high-risk chemicals, and higher-quality surface water, ground water, soil, and air. These benefits are expected to be significant, although difficult to estimate in advance of the remedial investigation/feasibility study of each site. Associated with the costs are significant potential benefits and cost offsets. The distributional costs of carrying out remedies at sites on the NPL have corresponding "benefits" in that funds expended for a response generate employment, directly or indirectly (through purchased materials).

subject to RCRA corrective action requirements available at that time, and qualified as a "non-regulated unit." It was not appropriate for deferral to RCRA under the September 1983 policy.

## VII. Regulatory Flexibility Act Analysis

The Regulatory Flexibility Act of 1980 requires EPA to review the impacts of this action on small entities, or certify that the action will not have a significant impact on a substantial number of small entities. By small entities, the Act refers to small businesses, small government jurisdictions, and nonprofit organizations.

While modifications to the NPL are considered revisions to the NCP, they are not typical regulatory changes since the revisions do not automatically impose costs. The placing of sites on the NPL does not in itself require any action of any party, (e.g., contractors operating government-owned facilities), nor does it determine the liability of any party for the cost of cleanup at the site. Further, because this final rule involves Federally-owned or -operated facilities, the number of small entities that could be affected will be small.

The impacts (from cost recovery) on small governments and nonprofit organizations would be determined on a similar case-by-case basis.

## List of Subjects in 40 CFR Part 300

Air pollution control, Chemicals, Hazardous materials, Intergovernmental relations, Natural resources, Oil pollution, Reporting and recordkeeping requirements, Superfund, Waste treatment and disposal, Water pollution control, Water supply.

Date: March 6, 1989.

**Jonathan Z. Cannon,**

*Acting Assistant Administrator, Office of Solid Waste and Emergency Response.*

40 CFR Part 300 is amended as follows:

## PART 300—[AMENDED]

1. The authority citation for Part 300 is revised to read as follows:

**Authority:** 42 U.S.C. 9605; 42 U.S.C. 9620; 33 U.S.C. 1321 (c)(2); E.O. 11735 (38 FR 21243); E.O. 12580, (52 FR 2923).

2. In Appendix B of Part 300, the Federal Section (by group) table is revised to read as set forth below.

**Appendix B**

# Environmental Protection Agency

40 CFR Part 300
The National Priorities List for Uncontrolled Hazardous Waste Sites; Listing Policy for Federal Facilities; Notice of Policy Statement

BEST COPY AVAILABLE

VOL 54 ISS 47 MR 13 1989 UMI

**ENVIRONMENTAL PROTECTION AGENCY**

**40 CFR Part 300**

**[FRL-3536-8]**

**The National Priorities List for Uncontrolled Hazardous Waste Sites; Listing Policy for Federal Facilities**

**AGENCY:** Environmental Protection Agency.

**ACTION:** Notice of policy statement.

**SUMMARY:** The Environmental Protection Agency ("EPA") is announcing a policy relating to the National Oil and Hazardous Substances Contingency Plan ("NCP"), 40 CFR Part 300, which was promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 ("CERCLA") (amended by the Superfund Amendments and Reauthorization Act of 1986 ("SARA")) and Executive Order 12580 (52 FR 2923, January 29, 1987). CERCLA requires that the NCP include a list of national priorities among the known releases or threatened releases of hazardous substances, pollutants, or contaminants throughout the United States, and that the list be revised at least annually. The National Priorities List ("NPL"), initially promulgated as Appendix B of the NCP on September 8, 1983 (48 FR 40658), constitutes this list.

This notice describes a policy for placing on the NPL sites located on Federally-owned or -operated facilities that meet the NPL eligibility criteria set out in the NCP, even if the Federal facility is also subject to the corrective action authorities of Subtitle C of the Resource Conservation and Recovery Act ("RCRA"). EPA had requested public comment on this policy on May 13, 1987 (52 FR 17991); comments received are contained in the Headquarters Superfund Public Docket. Elsewhere in today's **Federal Register** is a rule adding Federal facility sites to the NPL in conformance with this policy.

**EFFECTIVE DATE:** This policy is effective immediately.

**ADDRESSES:** The Headquarters Superfund Public Docket is located at the U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. It is available for viewing "by appointment only" from 9:00 a.m. to 4:00 p.m., Monday through Friday, excluding Federal holidays. Telephone 202/382-3046.

**FOR FURTHER INFORMATION CONTACT:** Joseph Kruger, Hazardous Site Evaluation Division, Office of Emergency and Remedial Response (OS-230), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, or the Superfund Hotline, phone (800) 424-9346 (or 382-3000 in the Washington, DC, metropolitan area.)

**SUPPLEMENTARY INFORMATION:**

Table of Contents

I. Introduction
II. Development of the Policy for Listing Federal Facility Sites
III. Coordination of Response Authorities at Federal Facility Sites on the NPL
IV. Response to Public Comments

## I. Introduction

In 1980, Congress enacted the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. sections 9601-9657 (CERCLA or "the Act"), in response to the dangers of uncontrolled or abandoned hazardous waste sites. CERCLA was amended in 1986 by the Superfund Amendments and Reauthorization Act ("SARA"), Pub. L. No. 99-499, 100 Stat. 1613 *et seq.* To implement CERCLA, the Environmental Protection Agency ("EPA" or "the Agency") promulgated the revised National Oil and Hazardous Substances Contingency Plan ("NCP"), 40 CFR Part 300, on July 16, 1982 (47 FR 31180), pursuant to CERCLA section 105 and Executive Order 12316 (46 FR 42237, August 20, 1981). The NCP, further revised by EPA on September 16, 1985 (50 FR 37624) and November 20, 1985 (50 FR 47912), sets forth guidelines and procedures needed to respond under CERCLA to releases and threatened releases of hazardous substances, pollutants, or contaminants. In response to SARA, EPA proposed revisions to the NCP on December 21, 1988 (53 FR 51394).

Section 105(a)(8)(A) of CERCLA, as amended by SARA, requires that the NCP include criteria for "determining priorities among releases or threatened releases throughout the United States for the purpose of taking remedial action and, to the extent practicable taking into account the potential urgency of such action, for the purpose of taking removal action." Removal action involves cleanup or other actions that are taken in response to releases or threats of releases on a short-term or temporary basis (CERCLA section 101(23)). Remedial action tends to be long-term in nature and involves response actions which are consistent with a permanent remedy for a release (CERCLA section 101(24)). Criteria for determining priorities for possible remedial actions under CERCLA are included in the Hazard Ranking System ("HRS"), which EPA promulgated as Appendix A of the NCP (47 FR 31219, July 16, 1982).[1]

Section 105(a)(8)(B) of CERCLA, as amended by SARA, requires that the statutory criteria provided by the HRS be used to prepare a list of national priorities among the known releases or threatened releases of hazardous substances, pollutants, or contaminants throughout the United States. The list, which is Appendix B of the NCP, is the National Priorities List ("NPL"). Section 105(a)(8)(B) also requires that the NPL be revised at least annually.

A site can undergo CERCLA-financed remedial action only after it is placed on the final NPL as provided in the NCP at 40 CFR 300.66(c)(2) and 300.68(e). Although Federal facility sites are eligible for the NPL pursuant to the NCP at 40 CFR 300.66(c)(2), section 111(e)(3) of CERCLA, as amended by SARA, limits the expenditure of Superfund monies at Federally-owned facilities. Federal facility sites also are subject to the requirements of CERCLA section 120, added by SARA.

This notice announces the Agency's policy of including on the NPL Federal facility sites that meet the eligibility requirements (e.g., an HRS score of 28.50), even if such facilities are also subject to the corrective action authorities of Subtitle C of the Resource Conservation and Recovery Act ("RCRA"), 42 U.S.C. 6901-6991(i). Elsewhere in today's **Federal Register** EPA is adding Federal facility sites to the NPL in conformance with this policy.

## II. Development of the Policy for Listing Federal Facility Sites

CERCLA section 105(a)(8)(B) directs EPA to list priority sites "among" the known releases or threatened releases of hazardous substances, pollutants, or contaminants, and section 105(a)(8)(A) directs EPA to consider certain enumerated and "other appropriate" factors in doing so. Thus, as a matter of policy, EPA has the discretion not to use CERCLA to respond to certain types of releases.

When the initial NPL was promulgated (48 FR 40662, September 8, 1983), the Agency announced certain listing policies relating to sites that might qualify for the NPL. One of these policies was that RCRA land disposal units that received hazardous waste after July 26, 1982 (the effective date of the RCRA land disposal regulations) would generally not be included on the NPL. On April 10, 1985 (50 FR 14117), the Agency announced that it was considering revisions to that policy based upon new authorities of the Hazardous and Solid Waste Amendments of 1984 ("HSWA") that allow the Agency to require corrective action at solid waste management units of RCRA facilities in addition to regulated hazardous waste management units.

On June 10, 1986 (51 FR 21057), EPA announced several components of a final policy for placing RCRA-regulated sites on the NPL, but made clear that the policy applied only to non-Federal sites. The Policy stated that the listing of non-Federal sites with releases that can be addressed under the expanded RCRA Subtitle C corrective action authorities generally would be deferred. However, certain RCRA sites at which Subtitle C corrective action authorities are available would generally be listed if they had an HRS score of 28.50 or greater and met at least one of the following criteria:

- Facilities owned by persons who have demonstrated an inability to finance a cleanup as evidenced by their invocation of the bankruptcy laws.
- Facilities that have lost authorization to operate, and for which there are additional indications that the owner or operator will be unwilling to undertake corrective action.
- Sites, analyzed on a case-by-case basis, whose owners or operators have a clear history of unwillingness to undertake corrective action.[2]

On June 10, 1986 (51 FR 21060), EPA stated that it would consider at a later date whether this revised policy for deferring non-Federal RCRA-regulated sites from the NPL should apply to Federal facilities.

On October 17, 1986, SARA took effect, adding a new section 120 to CERCLA devoted exclusively to Federal facilities. Section 120 explains the applicability of CERCLA to the Federal Government, and generally sets out a scheme under which contaminated Federal facility sites should be included in a special docket, evaluated, placed on the NPL (if HRS scores so warrant), and addressed pursuant to an Interagency Agreement with EPA.

As part of its deliberations on a Federal facilities listing policy, EPA considered pertinent sections of SARA and the proposed policy concerning RCRA corrective action at Federal facilities with RCRA-regulated hazardous waste management units (51 FR 7722, March 5, 1986). Specifically, that policy stated that:

- RCRA section 3004(u) subjects Federal facilities to corrective action requirements to the same extent as privately-owned or -operated facilities.
- The definition of a Federal facility boundary is equivalent to the property-wide definition of facility at privately-owned or -operated facilities.

The Agency determined that the great majority of Federal facility sites that could be placed on the NPL have RCRA-regulated hazardous waste management units within the Federal facility property boundaries, subjecting them to RCRA corrective action authorities. Therefore, application to Federal facilities of the March 5, 1986 boundary policy and the June 10, 1986 RCRA deferral policy would result in placing very few Federal facility sites on the NPL. However, CERCLA and its legislative history indicate that Congress clearly intended that Federal facility sites generally be placed on the NPL and addressed under the process set out in CERCLA section 120(e). Thus, EPA concluded that the RCRA deferral policy applicable to private sites might not be appropriate for Federal facilities. On May 13, 1987 (52 FR 17991), the Agency announced that it was considering adopting a policy for listing Federal facility sites that are eligible for the NPL, even if they are also subject to the corrective action authorities of Subtitle C of RCRA; public comment was specifically requested on this approach.

Congress' intent that Federal facility sites should be on the NPL, even if RCRA corrective action authorities apply, is evidenced by the nature of the comprehensive system of site identification and evaluation set up by CERCLA section 120, added by SARA. First, in section 120(c), EPA is required to establish a "Federal Agency Hazardous Waste Compliance Docket," based on information submitted under sections 103 and 120(b) of CERCLA, *and* sections 3016, 3005, and 3010 of RCRA.[3]

Thus, the docket is based heavily on information provided by Federal facilities that are subject to RCRA. If Congress had intended that Federal facilities subject to RCRA authorities should not also be examined under the Federal facility provisions of CERCLA, then the legislators would not have directed EPA to develop a docket of facilities (for evaluation *under CERCLA*) composed largely of Federal facilities subject to RCRA.

Second, the Agency is also directed, in CERCLA section 120(d), to "take steps to assure that a preliminary assessment is conducted *for each facility on the docket*," and where appropriate, to include such facilities on the NPL if the facility meets "the criteria established in accordance with section 105 under the National Contingency Plan for determining priorities among releases." (EPA does apply the CERCLA section 105 criteria—the Hazard Ranking System (HRS)—to Federal, as well as private, sites.) Here again, if Congress had intended that Federal facilities subject to RCRA authorities not be placed on the NPL, then the legislators would not have required EPA to evaluate for the NPL all Federal facilities in the docket—the large majority of which are subject to RCRA authorities.

Third, Congress set up the Interagency Agreement (IAG) process (CERCLA section 120(e) (2)-(4)) to evaluate the need for cleanups of Federal facility sites. If all Federal facility sites subject to RCRA Subtitle C were deferred from listing and attention under CERCLA, few Federal sites would come within the IAG process, contrary to Congressional intent.

Rather, Congress intended that EPA list, and evaluate in the IAG process, all Federal facility sites that are eligible for the NPL, including those facilities subject to RCRA Subtitle C authorities. As Senator Robert T. Stafford stated during the floor debate on section 120 of SARA (subsequently section 120 of CERCLA:

> [T]he amendments require a comprehensive nationwide effort to identify and assess *all* Federal hazardous waste sites that warrant attention. 132 Cong. Rec. S 14902 (daily ed., October 3, 1986) (emphasis added).

EPA has long expressed the view that placing Federal facility sites on the NPL serves an important informational function and helps to set priorities and focus cleanup efforts on those Federal sites that present the most serious problems (50 FR 47931, November 20, 1985).

[1] EPA proposed major revisions to the HRS on December 23, 1988 (53 FR 51962); however, the current HRS applies to the listing of sites on the NPL until the revised HRS is finalized and takes effect. CERCLA section 105(c)(1).

[2] On August 6, 1986 (53 FR 30002/30005), EPA published additional information on Agency policy concerning criteria to determine if an owner or operator is unwilling or unable to undertake corrective action.

[3] Section 3016 of RCRA provides for the inventory of Federal sites where RCRA hazardous waste "is stored, treated, or disposed of or has been disposed of at any time"; section 3005 of RCRA requires the filing of information necessary for the issuance of permits (or the obtaining of interim status) to treat, store, or dispose of hazardous waste under RCRA; and RCRA section 3010 requires notifications that a RCRA hazardous waste is being generated, transported, treated, stored, or disposed of.

VOL 54 ISS 47 MR 13 1989 UMI

EPA believes that today's decision not to apply the June 1988 NPL/RCRA policy (for non-Federal sites) to Federal facilities is consistent with section 120(a)(2) of CERCLA, which provides that "all guidelines, rules, regulations and criteria which are applicable to * * * inclusion on the National Priorities List, or applicable to remedial actions * * * shall also be applicable to [Federal facilities]." Given Congressional intent that Federal facility sites should be included on the NPL, EPA interprets section 120(a)(2) to mean that the criteria to list sites should not be more exclusionary than the criteria to list non-Federal sites on the NPL. As discussed in the May 13, 1987, notice on the policy (52 FR 17982-3), most Federal facilities include RCRA-regulated hazardous waste management units and thus, almost all waste contamination areas within facility boundaries are subject to RCRA corrective action authorities; in addition, key exclusions in the non-Federal RCRA deferral policy are not applicable to Federal facilities. Thus, if the non-Federal RCRA deferral policy were applied to Federal sites, very few Federal sites would be listed.

The Agency believes that although section 120(a)(2) evidences Congress' intent that the Federal agencies comply with the same baseline of requirements applicable to private sites, the section does not require that all policies and requirements applicable to private and Federal facility sites be identical. Indeed, Congress specifically set out a series of requirements which apply to Federal facilities in a manner different from, or in addition to, those applicable to private sites, e.g., the preparation of a separate Federal Agency Hazardous Waste Compliance Docket (section 120(c)); the notification required before Federal agencies may transfer property (section 120(h)); and the entire process for signing Interagency Agreements at Federal facility sites (section 120(e) (2)-(4)).

Just as Congress recognized that there are unique aspects of Federal facilities requiring additional or special attention in the contexts just named, special attention is also required in deciding what listing/deferral policy should apply to Federal versus private sites. EPA's opinion is that significant differences inherent in the rules to which Federal facility sites and private sites are subject under CERCLA and the NPL dictate that different listing and deferral policies should be crafted for each class of facilities.

For private sites, the only legal significance of NPL listing is that the site becomes eligible for *Fund-financed* remedial action, as provided in the NCP at 40 CFR 300.68(e)(2) and 300.68(e)(1) (removal actions and enforcement actions can be taken at private sites regardless of NPL status). Indeed, EPA recently suggested in the preamble to proposed revisions to the NCP (53 FR 51418, December 21, 1988) that it may be appropriate to view the non-Federal NPL "as a list for informing the public of hazardous waste sites that appear to warrant * * * remedial action through CERCLA funding alone." This relationship between the NPL and the availability of Fund monies (at private sites) is a central factor behind EPA's deferral policies. EPA has concluded that by deferring to other statutes like RCRA, "a maximum number of potentially hazardous waste sites can be addressed and EPA can direct its CERCLA efforts (and Fund monies, if necessary) to those sites where remedial action cannot be achieved by other means" (53 FR 51418, December 21, 1988). However, this goal of maximizing the use of limited Fund monies does not apply to Federal facility sites.

Federal facility sites on the NPL are not eligible for *Fund-financed* remedial actions (except in the very limited cases described in CERCLA section 111(e)(3)), pursuant to the NCP at 40 CFR 300.68(e)(3). Thus, the deferral of Federal facility sites from the NPL would not result in significant economies to the Fund, although it could do harm to the informational and management goals of including Federal facility sites on the NPL, as well as Congressional intent. Although the Agency might have decided to defer Federal facility sites subject to RCRA based on a desire to avoid duplication in remedial actions (another of the purposes behind RCRA deferral for private sites), EPA has concluded that this goal may be accomplished satisfactorily for Federal facilities through the process, set out in CERCLA section 120 (e)(2)–(e)(4), of developing comprehensive IAGs. As discussed in detail below, EPA will attempt to use the IAG process to achieve efficient, comprehensive solutions to site problems, and where appropriate, to divide responsibilities for cleanup among the various applicable authorities.

Finally, the deferral of Federal facility sites to RCRA-authorized States, in lieu of evaluation under the IAG process, may be inconsistent with the intent of CERCLA section 120(g), which provides that "no authority vested in the [EPA] Administrator under this section [120] may be transferred" to any person. 42 U.S.C. 9620(g).

### III. Coordination of Response Authorities at Federal Facility Sites on the NPL

EPA recognizes that when it takes action under CERCLA to address a facility that is also subject to RCRA authorities, there is some risk of overlap or even conflict. Such conflict situations are not a problem where EPA is responsible for carrying out the requirements of both RCRA and CERCLA (since any jurisdictional overlaps can be managed within EPA). However, an overlap of authority may yield disagreements as to how a site should be cleaned up where a State has been authorized to carry out all or part of the RCRA program.[6]

However, this potential overlap between RCRA and CERCLA cleanup authorities is the result of Congressional design, not site listings. EPA neither intends nor believes that site listings themselves create a conflict between CERCLA and RCRA (or State law); rather, any conflict stems from the overlap of the corrective action authorities of the two statutes. The overlap exists whenever EPA takes CERCLA action at a site that has regulated hazardous waste management units subject to a State's RCRA program or other State law. EPA can take such CERCLA actions at sites *not* on the NPL as well as at sites on the NPL.[7] (Such conflicts may also occur at private sites as well as at Federal facility sites.) There may also be cases where the applicability of both RCRA and CERCLA authorities at NPL sites does *not* create a conflict—for example, where the RCRA hazardous waste management units are not included within the area to be addressed under CERCLA, or where the release is exempt from action under RCRA. Thus, conflict between RCRA and CERCLA corrective actions can occur at virtually any point in the process or not at all.

How RCRA authorities are affected (if at all) when CERCLA also applies to a site is a matter that varies greatly, depending upon the facts of the site. In some cases, the NPL site is physically distinct from the RCRA-regulated

[6] EPA recognizes that many States have hazardous waste laws independent of that upon which the State's authorized RCRA program may be based. Although this policy statement focuses primarily on the mechanism for applying RCRA (by EPA or authorized States) to Federal facilities on the NPL, the same analysis would apply to non-RCRA State laws that potentially overlap with CERCLA response authorities.

[7] Removal actions, as well as remedial actions ordered under section 106 of CERCLA, may be taken at non-NPL sites. *See* 40 CFR 300.68(c)(2) and 300.68(e)(1).

hazardous waste management units, and corrective action or closure at the regulated units may proceed under RCRA, while at the same time a cleanup action is proceeding at another area of the property under CERCLA, without the risk of inconsistency or duplication of response action. In other cases, the releases or contaminant plumes may overlap, such that a comprehensive solution under one statute may be the most efficient and desirable solution. The questions of which authority should control, and of how to avoid potential duplication or inconsistency, are often implementation issues, to be resolved in light of the facts of the case and after consultation between EPA and the concerned State.

EPA's belief is that in most situations, it is appropriate to address sites comprehensively under CERCLA, pursuant to an enforceable agreement (i.e., an IAG under CERCLA section 120), signed by the Federal facility, EPA, *and*, where possible, the State. In some circumstances, it may be appropriate under an IAG to divide responsibilities, focusing CERCLA activity only on certain prescribed units, leaving the cleanup of other units under the direct control of RCRA authorities, such as where the RCRA-regulated hazardous waste management unit is physically distinct from the CERCLA contamination and its cleanup would not disrupt CERCLA activities. Alternatively, the IAG can prescribe divisions of responsibility, such as stating that CERCLA will address ground water contamination while RCRA will address the closure of regulated hazardous waste management units. Any disagreements in the implementation of the IAG would be resolved by the signatory parties under the dispute resolution terms of the IAG.

Of course, there may be cases where a RCRA-authorized State declines to join the IAG process, or agreement on the terms of an IAG cannot be achieved. For instance, State officials may decide that the proper closure of a landfill should be accomplished through excavation, while CERCLA officials may determine that the same area should be managed differently as part of a comprehensive CERCLA action at the site. Although EPA will try to resolve any such conflicts and achieve agreement with the State in the IAG process, there may be cases where the conflicting views of EPA and the State concerning corrective action cannot be resolved.

CERCLA section 122(e)(6), entitled "inconsistent response actions," gives specific guidance on this point:

INCONSISTENT RESPONSE ACTION.—When either the President, or a potentially responsible party pursuant to an administrative order or consent decree under this Act, has initiated a remedial investigation and feasibility study [RI/FS] for a particular facility under this Act, no potentially responsible party may undertake any remedial action at the facility unless such remedial action has been authorized by the President.

As the Conference Report on SARA noted, section 122(e)(6) was included in the bill "to clarify that no potentially responsible party [PRP] may undertake any remedial action at a facility unless such remedial action has been authorized by the President" (or his delegate, EPA)[8]. *See* H.R. Rep. 962, 99th Cong., 1st Sess. at 254 (1986). *See also* 132 Cong. Rec. S14919 (daily ed., October 3, 1986) ("This is to avoid situations in which the PRP begins work at a site that prejudices or may be inconsistent with what the final remedy should be or exacerbates the problem.")[9] This authorization requirement applies to any remedial actions taken by a PRP, including those actions ordered by a State, as both types of action could be said to present a potential conflict with a CERCLA-authorized action.[8]

[8] The authority under section 122(e)(6) to authorize a remedial action to continue after the initiation of an RI/FS at an NPL site has been delegated in the EPA Administrator. *See* Executive Order 12580, section 4(d)(1) (52 FR 2923, January 29, 1987). For most non-NPL sites, the general authority for carrying out the requirements of CERCLA section 122 has been delegated to the Federal agencies for sites under their jurisdiction or control; however, the ability of the Federal agencies to authorize sites under section 122(e)(6) is limited by the provisions of section 120(e)(4), as discussed below.

[9] Congress' intent that CERCLA actions should proceed without potential conflict with other remedial action is also suggested by the language in section 7002(b)(2)(B) of RCRA, which states that RCRA citizen suits alleging an imminent and substantial endangerment may not be brought if EPA: has commenced an action under CERCLA section 106 (or RCRA 7003); is engaging in a removal action under CERCLA section 104; or has incurred costs to begin an RI/FS under CERCLA and is diligently proceeding with remedial action; or has obtained a court order (including a consent decree) or issued an administrative order under CERCLA section 106 or RCRA section 7003, and a responsible party is diligently conducting a removal, an RI/FS, or proceeding with remedial action pursuant to that order. Similarly, RCRA section 1006(b) directs the Administrator to "integrate all provisions of [RCRA] for purposes of administration and enforcement and shall avoid duplication to the maximum extent practicable," with appropriate provisions of laws (such as CERCLA) granting regulatory authority to EPA.

[8] "Remedial action" is very broadly defined in section 101(24) of CERCLA as actions consistent with a permanent remedy at a site, including confinement of a release of hazardous substances, cleanup of hazardous substances, etc. EPA believes that remedial actions within the meaning of the term may include those taken under statutes other than CERCLA, including corrective action under RCRA.

CERCLA section 122(e)(6) does not constitute a prohibition on RCRA corrective action at CERCLA sites; rather, it provides a mechanism by which the Agency must approve of remedial actions commenced at sites after an RI/FS has been initiated under CERCLA. Such an approach would help to avoid duplicative and wasteful cleanup actions. This authorization mechanism would not affect normal hazardous waste management requirements under RCRA, such as complying with manifest, 90-day storage, and labeling requirements; any RCRA-regulated hazardous waste management units operating at a CERCLA site must continue to comply with RCRA hazardous waste management requirements, even if a CERCLA response action is underway. The Agency also intends to authorize many State RCRA actions to continue, e.g., where the RCRA action addresses a unit distinct from the CERCLA contamination, and where the RCRA action will not disrupt CERCLA activities.

Even where EPA decides that it is not appropriate to authorize a RCRA or other State action to continue under CERCLA section 122(e)(6) in order to avoid disruption or duplicative actions, CERCLA section 120(f) specifically provides that participation by State officials in remedy selection "shall be provided in accordance with section 121," and CERCLA section 121(d) specifically provides a process for taking account of "applicable or relevant and appropriate requirements" (ARARs) of RCRA (as well as other State and Federal statutes) when a remedy is selected. If any State requirements are waived pursuant to CERCLA section 121(d)(4), the affected State may obtain judicial review of such waiver, and even if unsuccessful, may ensure that those requirements are met by providing the necessary additional funding pursuant to CERCLA section 121(f)(3)(B). As the Agency has noted repeatedly in the past, "it is EPA's expectation that remedies selected and implemented under CERCLA will generally satisfy the RCRA corrective action requirements, and vice versa" (52 FR 17993, May 13, 1987, and 52 FR 27645, July 22, 1987).[9]

The discretion under CERCLA section 122(e)(6) not to authorize a PRP to go forward with a remedial action at a site

[9] To the extent that this policy may be read as inconsistent with the district court's opinion in *State of Colorado v. U.S. Department of the Army*, C.A. No. 88-C-2526 (D. Colo., February 24, 1989), EPA disagrees with that opinion.

VOL 54 ISS 47 MR 13 1989 UMI

after a CERCLA remedial investigation/feasibility study (RI/FS) has begun—even if that action has been ordered by a State—is generally available at both private and Federal facility sites. However, CERCLA section 120(a)(4) provides that State laws shall apply to remedial actions—including those under CERCLA —at *Federal facility* sites that are *not* on the NPL, thus, acting as a general limitation on the more general section 122(e)(6).[10] Of course, no such limitation applies to Federal facility sites once they are placed on the NPL.

The plain language of section 122(e)(6) makes it clear that it is the RI/FS—not the listing itself—that triggers section 122(e)(6). Indeed, an RI/FS may be commenced prior to, as well as after, NPL listing.[11] This is especially true for Federal facility sites, as the President has delegated his authority to take CERCLA section 104 response actions (including RI/FSs) to the Federal agencies for most non-NPL sites (Executive Order 12580, at section 2(e)(1)).[12] Thus, when a Federal facility is placed on the NPL, an RI/FS will often have been commenced (or completed).

In order to invoke the authorization mechanism of CERCLA section 122(e)(6), EPA must make a threshold determination of whether or not an RI/FS "under this Act [CERCLA]" has been initiated; studies conducted by Federal facilities before a site has been placed on the NPL may or may not constitute an appropriate RI/FS in EPA's opinion.[13] As a matter of policy, the Agency will generally interpret CERCLA-quality RI/FSs to be those that are provided for, or adopted by reference, in an IAG. The Agency believes that such a policy is consistent with CERCLA section 120(e)(1), which directs Federal facilities, "in consultation with EPA," to commence an RI/FS within six months of the facility's listing on the NPL. In addition, the policy will promote consistency in RI/FS's, and will help to ensure that all appropriate information has been collected during the RI/FS, so that EPA may properly evaluate remedial alternatives at Federal facility sites as required under CERCLA section 120(e)(4). Further, by encouraging the development of IAGs at the early RI/FS stage, this policy may help to promote coordination among the parties, and avoid inconsistent actions.

Thus, the IAG will generally commit the Federal facility to complete both an RI/FS and any subsequent remedial action determined by EPA to be necessary.

Once an RI/FS has been commenced under (or incorporated into) an IAG, EPA must decide whether or not to authorize PRPs to continue with any non-CERCLA remedial actions (both voluntary and State-ordered) at the site. This decision will be made on a case-by-case basis, taking into account the status of CERCLA activities at the site, and the potential for disruption of or conflict with that work if the PRP action were authorized.

## IV. Response to Public Comments

On May 13, 1987 (52 FR 17991), EPA solicited public comment on the Agency's intention to adopt a policy for including eligible Federal facility sites on the NPL, even if they are also subject to RCRA corrective action authorities; the Agency received six comments on the policy. EPA considered the comments raised, and responds to them as follows.

Two of the six commenters concur with the policy to include eligible Federal facility sites on the NPL and have no suggested revisions or additional comments.

One commenter "generally supports" the policy, but believes that the criteria used to list Federal facility sites are unclear. The commenter states that "as written, the proposed policy could be interpreted to mean that Federal hazardous facilities would be placed on the NPL regardless of their status under [RCRA] or their degree of actual hazard."

In response, the commenter is correct in concluding that under the policy, Federal facility sites would be placed on the NPL regardless of the facility's status under RCRA. As discussed above, this is consistent with Congressional intent that Federal facility sites should be on the NPL, and that listing criteria should not be applied to Federal sites in a manner that is more exclusionary than for private sites. However, the commenter is incorrect in suggesting that Federal facility sites will be listed regardless of the degree of hazard they present. The Agency intends to use the HRS, the same method used for non-Federal sites, to determine whether a Federal facility site poses an actual or potential threat to health or the environment and, therefore, qualifies for the NPL. (Currently, a site is generally eligible for the NPL if the HRS score is 28.50 or greater.) The application of the HRS to Federal facility sites is consistent with CERCLA section 120(d), which requires EPA to use the HRS in evaluating for the NPL the facilities on the Federal Agency Hazardous Waste Compliance Docket.

One commenter did not comment on the policy, but rather is concerned that no Superfund monies be spent at Federal facilities. The commenter believes that neither pre-remedial work (preliminary assessments and site inspections) nor remedial work should be financed by the Trust Fund.

In response, Executive Order 12580 (52 FR 2923, January 29, 1987), at section 2(e), delegates the responsibility for conducting most pre-remedial work to the Federal agencies. Therefore, the Federal agencies, rather than the Trust Fund, finance these activities, with EPA providing oversight. In addition, section 111(e)(3) of CERCLA, as amended by SARA, strictly limits the use of the Fund for remedial actions at Federally-owned facilities. Although the Administrator does have the discretion to use funds from the Hazardous Substances Superfund to pay for emergency removal actions for releases or threatened releases from Federal facilities, the concerned Executive Agency or department must reimburse the Fund for such costs. Executive Order 12580, section 9(i). The Department of Defense and the Department of Energy also have response authority for emergency removals (Executive Order, section 2(d)).

Another commenter opposes the policy of placing RCRA-regulated Federal facilities on the NPL, arguing that public notification is adequately addressed by other provisions of CERCLA (sections 120 (b), (c), and (d)), and that the policy is inconsistent with section 120(a), which requires that

[10] Section 120(a)(4) states as follows: State laws concerning removal and remedial action, including State laws regarding enforcement, shall apply to removal and remedial action at facilities owned or operated by a department, agency, or instrumentality of the United States when such facilities are not included on the National Priorities List. [Emphasis added.]

Nothing in this section prevents Federal facilities from arguing that the doctrines of laches, estoppel or implied preemption limit the effect of section 120(a)(4).

[11] *See SCA Services of Indiana, Inc. v. Thomas*, 684 F.Supp. 1388, 1391 (W.D. Ind. 1988) ("CERCLA clearly makes the conduct of an RI/FS a removal, not remedial, action, so that the restriction that remedial actions be taken only when the site is on the NPL is simply irrelevant to a RI/FS"); 52 FR 27622 (July 22, 1987) ("an RI/FS can be performed at proposed [NPL] sites pursuant to the Agency's removal authority under CERCLA").

[12] Section 104 authorities were delegated to the Departments of Defense and Energy more generally, although such functions must still be exercised consistent with the requirements of section 120 of CERCLA. Executive Order 12580, section 3(d).

[13] "RI/FS" is a term of art under CERCLA, and applies to a special site study and evaluation pursuant to section 300.68(d) of the NCP. EPA, as the agency entrusted with the development and implementation of the NCP, is the recognized expert on what constitutes an acceptable RI/FS under CERCLA.

Federal facilities comply with CERCLA in the same manner as any nongovernmental entity. The commenter believes that the adoption of the proposed policy is inconsistent with EPA's policy regarding non-Federal facilities.

In response, CERCLA sections 120 (b), (c), and (d) refer to the establishment of the Federal Agency Hazardous Waste Compliance Docket and to the evaluation of facilities on the docket for the NPL.[14] The Agency agrees that this docket will provide the public with some information regarding hazardous waste activities at Federal facilities, as well as information concerning contamination of contiguous or adjacent property. The Agency believes, however, that evaluating sites using the HRS, and placing on the NPL those sites that pose the most serious problems, will serve to inform the public of the relative hazard of these sites. The listing process also affords the public the opportunity to examine HRS documents and references for a particular site, and to comment on a proposed listing. In addition, the NPL provides response categories and cleanup status codes for sites, and deletes sites when no further response is required, adding to the informational benefits of using the NPL. Therefore, EPA believes that listing Federal facility sites will advise the public of the status of Federal government cleanup efforts, as well as help Federal agencies set priorities and focus cleanup efforts on those sites that present the most serious problems, consistent with the NCP (50 FR 47931, November 20, 1985).

As to the comment concerning CERCLA section 120(a), EPA agrees that the section provides that Federally-owned facilities are subject to and must comply with CERCLA to the same extent as any nongovernmental entity. Further, sections 120(a)(2) and 120(d) provide that EPA should use the same rules and criteria to evaluate Federal sites for the NPL as are applied to private sites. However, today's policy is not inconsistent with those sections. As a threshold matter, it is uncontroverted that an HRS score of 28.50 or greater is an eligibility requirement for both Federal and private sites. The question is, should NPL-eligible Federal sites be deferred from listing as a matter of policy. As explained above, the Agency does not believe that CERCLA section 120(a)(2) can be read to require identical treatment of Federal and private sites in all circumstances; the fact that Congress legislated a number of requirements in addition to, or instead of, those applicable to private facilities (e.g., sections 120 (c), (e)(2), (h)), demonstrates the legislators' recognition of the need to address certain unique aspects of Federal facilities differently than for private sites. Rather, EPA interprets CERCLA section 120(a) to mean that the criteria to list Federal facility sites should not be more exclusionary than the criteria to list non-Federal sites. In this case, it is clear that if EPA were to apply the non-Federal RCRA deferred listing policy to Federal facilities, very few Federal sites would be considered for the NPL, counter to the spirit and intent of section 120 (c) and (d) of CERCLA and the statute's legislative history. Moreover, one of the key factors in EPA's decision to adopt a RCRA deferral policy for private sites—the need to manage and conserve Fund resources—does not apply to Federal facilities because the remedies are not Fund-financed. EPA believes that it is appropriate, and consistent with Congressional intent, to take these differences into account, as long as the result is not to treat Federal agencies in a more exclusionary manner than private facilities.

Two commenters expressed concern that listing Federal facility sites might interfere with enforcement activities under RCRA. One commenter stated that the policy is inconsistent with CERCLA section 120(i), which requires that Federal facilities comply with all RCRA requirements.

In response, the Agency's view is that today's policy will facilitate enforcement activities at Federal facility sites, not interfere with them. In effect, by encouraging the drafting of comprehensive IAGs for Federal facilities, this policy will advance the goal of site remediation. In addition, the IAG process allows EPA to take steps to avoid duplication and conflict; the IAG may define areas of a Federal facility that may efficiently be addressed under RCRA (e.g., units that are distinct from, and do not disrupt, CERCLA activities). In addition, States will be encouraged to become signatory parties to IAGs, reducing the likelihood of intergovernmental conflict over jurisdiction and the selection of remedy.

In any event, it is not the act of placing a site on the NPL that creates a potential conflict between CERCLA and RCRA; rather, the corrective action authorities of the two statutes overlap, pursuant to statutory design. Indeed, the alleged interference with RCRA corrective actions by CERCLA cleanups can occur at any point in the process, depending upon the specific facts of the case. In those cases where the relevant statutes do overlap, EPA believes that one of the statutes must sometimes be chosen for practical reasons, and Congress has set out a procedure for resolving such conflicts in CERCLA section 122(e)(6).[15] However, the goal of today's policy is to minimize any such conflicts through the IAG process.

The Agency acknowledges that in the case of Federal facilities, listing does have a significance not present for private sites. For instance, CERCLA section 120(e)(2) provides that for Federal facility sites *on the NPL*, EPA will play a role in selecting remedies, while CERCLA section 120(a)(4) provides that State laws concerning removal and remedial actions shall apply to Federal facilities when such facilities are not on the NPL (the section does not discuss how State laws apply at Federal sites that are on the NPL). However, any difference in EPA or State roles at NPL versus non-NPL Federal facility sites results from the statutory scheme reflected in CERCLA sections 120(a)(4) and 121(d), and not from the act of listing itself. CERCLA directs EPA to list Federal sites on the NPL and then specifies certain statutory consequences.

Further, merely alleging that there may be some effect on State enforcement actions as a result of a policy of including Federal facilities on the NPL is not grounds for rejecting today's policy. The Agency has reviewed both sides of the question, and has determined that it is in the best interest of the public and environmental protection to place Federal facility sites on the NPL and thus to make CERCLA authorities available to achieve comprehensive remedies for contamination at such sites (when appropriate). In addition, the IAG process, as discussed in this policy, will serve to minimize duplication and inconsistency with potential State orders.

[14] Pursuant to section 120(c) of CERCLA, EPA published the Federal Agency Hazardous Waste Compliance Docket on February 12, 1988 (53 FR 4280). The docket was established based on information submitted by Federal agencies to EPA under sections 3005, 3010, and 3016 of RCRA and under section 103 of CERCLA. The docket serves to identify Federal facilities that must be evaluated in accordance with CERCLA section 120(d) to determine if they pose a risk to public health and the environment. Section 120(d) requires EPA to evaluate facilities on the docket using the HRS for possible inclusion on the NPL.

[15] It is important to note that the section 122(e)(6) authorization requirement at Federal facilities is not triggered automatically by NPL listing, but rather takes effect where an RI/FS has been initiated at a listed Federal site; as a matter of policy, this start-up point for the RI/FS will not be recognized in most cases until an enforceable IAG has been signed, which may be well after a site is listed.

EPA also disagrees with the commenter's suggestion that today's policy is inconsistent with CERCLA section 120(i), which provides that "nothing in this section [120] shall affect or impair the obligation of any department, agency, or instrumentality of the United States to comply with any requirement of the Solid Waste Disposal Act [RCRA] (including corrective action requirements)." EPA interprets that section simply to mean that section 120 does not impair otherwise applicable RCRA requirements; this mandate is met even if an action is conducted under CERCLA, as CERCLA section 121(d)(2) specifically provides that ARARs of RCRA and State law must be achieved with regard to any on-site remedy. Even if a RCRA or State requirement that is an ARAR is waived by EPA (section 121(d)(4)), the State may obtain judicial review of such a waiver, and even if unsuccessful, may require that the remedial action conform to the requirement in question by paying the additional costs of meeting such standard (CERCLA section 121(f)(3)); thus, the intent of section 120(i) is satisfied.

This interpretation of section 120(i) follows directly from the language of the provision itself, which states that "nothing in this section"—as compared to "nothing in this Act"—shall affect RCRA obligations. This leaves in place limitations contained in *other* sections of the statute, such as the permit waiver provision (section 121(e)); the process for selecting and waiving ARARs (sections 121 (d)(2) and (d)(4)); and the ban on remedial actions not approved by the President (section 122(e)(6)).

For all these reasons, the Agency believes that today's Federal facilities listing policy is appropriate, that it reflects Congressional intent, and that it is consistent with CERCLA.

Pursuant to the policy described in this notice, the Agency will place eligible Federal facility sites on the NPL even if the site is also subject to the corrective action authorities of Subtitle C of RCRA.

Date: March 8, 1989.

Jonathan Z. Cannon,

*Acting Assistant Administrator, Office of Solid Waste and Emergency Response.*

**SECURITIES AND EXCHANGE COMMISSION**

**[Regulation 13D–G (File No. 270–137) et al.]**

**Forms Under Review of Office of Management and Budget**

*Agency Clearance Officer:* Kenneth A. Fogash (202) 272–2142.

*Upon Written Request Copy Available From:* Securities and Exchange Commission, Office of Consumer Affairs and Information Services, Washington, DC 20549.

**Revision**

In the matter of:

Regulation 13D–G (File No. 270–137)
Regulation 14D (File No. 270–144)
Regulation 14A (File No. 270–56)
Rule 13e–3 (File No. 270–1)

Notice is hereby give that pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission has submitted for OMB approval proposed revisions to Securities Exchange Act beneficial ownership rules and related amendments.

With respect to Regulation 13D–G approximately 6536 respondents are affected and an estimated 15 burden hours are required per response. Approximately 366 respondents are affected by the revisions to Regulation 14D and an estimated 354 burden hours are required per response. With respect to Schedule 13E–3 and Regulation 14A, respectively, 221 and 8733 respondents are affected with an estimated 140 and 105 burden hours required per response. The estimated average burden hours are made solely for purposes of the Paperwork Reduction Act and are not derived from a comprehensive or even a representative survey or study of the costs of SEC rules and forms.

Direct general comments to Gary Wasman at the address below. Direct any comments concerning the accuracy of the estimated average burden hours for compliance with SEC rules and forms to Kenneth A. Fogash, Deputy Executive Director, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549–6004, and Gary Waxman, Clearance Officer, Office of Management and Budget [Paperwork Reduction Project 3235–0145–Regulation 13D/G; 3235–0102–Regulations 14D and E; 3235–0059–Regulation 14A; and 3235–0007–Rule 13e–3], Room 3228, New Executive Office Building, Washington, DC 20503.

Jonathan G. Katz,

**INTERSTATE COMMERCE COMMISSION**

**49 CFR Parts 1312 and 1314**

**[Ex Parte No. 444]**

## Electronic Filing of Tariffs

**AGENCY:** Interstate Commerce Commission.

**ACTION:** Notice of Stay of final rules.

**SUMMARY:** By decision served February 10, 1989, and published in the **Federal Register** at 54 FR 6403 (February 10, 1989) the Commission adopted regulations allowing electronic tariff filing as an alternative to printed tariffs, and established, in lieu of the current detailed tariff regulations, simple tariff standards governing the construction, filing, and maintenance of tariffs. However, the Commission has also required that, during a 1-year transition period, carriers using electronic tariffs continue to file printed paper tariffs with the Commission. *Electronic Filing of Tariffs, 5* I.C.C.2d____, served February 10, 1989, p. 9. National Motor Freight Traffic Association, Inc., Central States Motor Freight Bureau, Inc., Central & Southern Motor Freight Tariff Association, Inc., Eastern Central Motor Carriers Association, Middle Atlantic Conference, Middlewest Motor Freight Bureau, New England Motor Rate Bureau, Inc., Niagara Frontier Tariff Bureau, Inc., Pacific Inland Tariff Bureau, Regular Common Carrier Conference, Rocky Mountain Motor Tariff Bureau, Inc., and Southern Motor Carriers Rate Conference, jointly, have filed a petition to reopen the proceeding[1] and a motion for stay of the effective date. A reply in support of the motion has been filed by the National Small Shipments Traffic Conference, Inc., and Health and Personal Care Drug Conference, Inc. The rules were to become effective March 13, 1989. In the prior decision, we specifically recognized that it is possible that some provisions, that carriers and/or shippers find useful or essential, have been deleted, and that we would consider such matters in connection with future petitions or complaints. The petition to reopen raises such issues. Accordingly, we will stay the effective date of these rules as requested, pending our consideration of the petition to reopen.

**EFFECTIVE DATE:** This stay is effective as of March 10, 1989.

[1] This decision addresses only the motion for stay. The merits of the petition to reopen will be addressed at a later date.

**FOR FURTHER INFORMATION CONTACT:**

Charles E. Langyher, (202) 275–7739 or Lawrence C. Herzig, (202) 275–7356. [TDD for hearing impaired: (202) 275–1721].

**SUPPLEMENTARY INFORMATION:** This action will not significantly affect either the quality of the human environment or the conservation of energy resources.

**List of Subjects in 49 CFR Parts 1312 and 1314**

Freight forwarders, Maritime carriers, Motor carriers, Pipelines, Railroads, Tariffs.

*It is ordered:*

1. The effective date of these rules is stayed pending consideration of the petition to reopen.

Decided: March 9, 1989. By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Andre, Lamboley and Phillips. Chairman Gradison dissented in part with a separate expression.

**Noreta R. McGee,**

*Secretary.*

## LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's List of Public Laws.

Last List February 10, 1989

VOL 54 ISS 47 MR 13 1989 UMI

## CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

New units issued during the week are announced on the back cover of the daily Federal Register as they become available.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $620.00 domestic, $155.00 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, DC 20402. Charge orders (VISA, MasterCard, or GPO Deposit Account) may be telephoned to the GPO order desk at (202) 783-3238 from 8:00 a.m. to 4:00 p.m. eastern time, Monday—Friday (except holidays).

| Title | Price | Revision Date |
|---|---|---|

[1] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2] No amendments to this volume were promulgated during the period Jan.1, 1988 to Dec.31, 1988. The CFR volume issued January 1, 1988, should be retained.

[3] No amendments to this volume were promulgated during the period Jan. 1, 1987 to Dec. 31, 1988. The CFR volume issued January 1, 1987, should be retained.

[4] No amendments to this volume were promulgated during the period Apr. 1, 1988 to March 31, 1988. The CFR volume issued as of Apr. 1, 1988, should be retained.

[5] The July 1, 1985 edition of 32 CFR Parts 1–189 contains a note only for Parts 1–39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1–39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

[6] No amendments to this volume were promulgated during the period July 1, 1986 to June 30, 1988. The CFR volume issued as of July 1, 1986, should be retained.

[7] The July 1, 1985 edition of 41 CFR Chapters 1–100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

**Briefings on How To Use the Federal Register—**
For information on briefings in Washington, DC, Philadelphia, PA, and Salt Lake City, UT, see announcement on the inside cover of this issue.

BEST COPY AVAILABLE

VOL 54 ISS 48 MR 14 1989

**FEDERAL REGISTER** Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

**How To Cite This Publication:** Use the volume number and the page number. Example: 54 FR 12345.

THE FEDERAL REGISTER

WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

PHILADELPHIA, PA

WHEN: March 30, at 1:00 p.m.
WHERE: 841 Chesnut Street, Room 706, Philadelphia, Pa
RESERVATIONS: Call the Philadelphia Federal Information Center
Philadelphia: 215–597–7786
New Jersey: 800–366–4488

WASHINGTON, DC

WHEN: April 11, at 9:00 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC
RESERVATIONS: 202–523–5240

SALT LAKE CITY, UT

WHEN: April 12, at 9:00 a.m.
WHERE: State Office Building Auditorium, Capitol Hill, Salt Lake City, UT
RESERVATIONS: Call the Utah Department of Administrative Services, 801–538–3010

# Rules and Regulations

Federal Register
Vol. 54, No. 48
Tuesday, March 14, 1989

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

**DEPARTMENT OF AGRICULTURE**

**Agricultural Marketing Service**

**7 CFR Part 907**

**[Navel Orange Regulation 690, Amdt 1]**

## Navel Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Final rule.

**SUMMARY:** Regulation 690, Amendment 1, increases the quantity of California-Arizona navel oranges that may be shipped to market during the period March 3 through March 9, 1989. Such action is needed to balance the supply of fresh navel oranges with the demand for such oranges during the period specified due to the marketing situation confronting the orange industry.

**DATES:** Regulation 690, Amendment 1, (§ 907.990) is effective for the period March 3 through March 9, 1989.

**FOR FURTHER INFORMATION CONTACT:** Jacquelyn R. Schlatter, Marketing Specialist, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2528-S, P.O. Box 96456, Washington, DC 20090-6456. Telephone: (202) 447-5120.

**SUPPLEMENTARY INFORMATION:** This amendment is issued under Marketing Order 907 (7 CFR Part 907), as amended, regulating the handling of navel oranges grown in Arizona and designated part of California. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended, hereinafter referred to as the Act.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of the use of volume regulations on small entities as well as larger ones.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 125 handlers of California-Arizona navel oranges subject to regulation under the navel orange marketing order, and approximately 4,065 producers in California and Arizona. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers of California-Arizona navel oranges may be classified as small entities.

This action is consistent with the marketing policy for 1988-89 adopted by the Navel Orange Administrative Committee (Committee). The Committee conducted a telephone vote on March 8, 1989, to consider the current and prospective conditions of supply and demand and unanimously recommended an increase in the quantity of navel oranges deemed advisable to be handled in District 1 during the specified week. The Committee reports that due to an inadvertent mathematical error by Committee staff, District 1 did not have the correct number of cartons of oranges allotted to it in regulation 690. This amendment corrects that error.

Based on consideration of supply and market conditions, and the evaluation of alternatives to the implementation of prorate regulations, the Administrator of the AMS has determined that this final rule will not have a significant economic impact on a substantial number of small entities.

Pursuant to 5 U.S.C. 553, it is further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the Act. To effectuate the declared purposes of the Act, it is necessary to make this regulatory provision effective as specified, and handlers have been apprised of such provision and the effective time.

**List of Subjects in 7 CFR Part 907**

Arizona, California, Marketing agreements and orders, Navel, Oranges.

For the reasons set forth in the preamble, 7 CFR Part 907 is amended as follows:

**PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA**

1. The authority citation for 7 CFR Part 907 continues to read as follows:

**Authority:** Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.

2. Section 907.987 is revised to read as follows:

**Note:** This section will not appear in the Code of Federal Regulations.

**§ 907.987 Navel Orange Regulation 690, Amendment 1.**

The quantity of navel oranges grown in California and Arizona which may be handled during the period March 3, 1989, through March 9, 1989, is established as follows: (a) District 1: 1,276,000 cartons; (b) District 2: 234,000 cartons; (c) District 3: unlimited cartons; (d) District 4: unlimited cartons.

Dated: March 9, 1989.

**Eric M. Forman,**

*Acting Director, Fruit and Vegetable Division.*

VOL 54 ISS 48 MR 14 1989 UMI

## DEPARTMENT OF THE TREASURY

### Customs Service

### 19 CFR Part 113

### Customs Regulations Amendments Concerning Access to Customs Security Areas at Airports

**AGENCY:** Customs Service, Department of the Treasury.

**ACTION:** Final rule, correction.

**SUMMARY:** A document was published in the **Federal Register** (53 FR 29228) on August 3, 1988, setting forth amendments to Customs Regulations that provide that employers of persons requiring access to Customs security areas at airports post a bond. Under such bond the employer agrees that both it and its covered employees will comply with the regulations applicable to those areas and that the employer will pay liquidated damages for failure to do so. This document corrects an error that appeared in that document.

**EFFECTIVE DATE:** March 14, 1989.

**FOR FURTHER INFORMATION CONTACT:** Arnold L. Sarasky, Regulations and Disclosure Law Branch, (202) 566-8237.

**SUPPLEMENTARY INFORMATION:**

**Background**

A document was published in the **Federal Register** (53 FR 29228) on August 3, 1988, setting forth amendments to the Customs Regulations regarding employers of persons requiring access to Customs security areas at airports to file a bond assuring compliance with the Customs regulations applicable thereto. For employers already having a bond on file with Customs on Customs Form 301 containing the bond conditions set forth on § 113.62, 113.63 or § 113.64, Customs Regulations (19 CFR 113.62, 113.63, 113.64) relating to importers, brokers, custodians of bonded merchandise, or international carriers, a new bond was not required. For other employers, an Airport Customs Security Area Bond, as set forth in a new Appendix A to Part 113, Customs Regulations (19 CFR Part 113, Appendix A) was required. Due to a typographical error therein, the signature portion of such bond format, which provides for two groups of signatories, identifies each group of signatories as a principal rather than identifying one group as a principal and the other as a surety. This document corrects that error.

**Correction**

As corrected, Appendix A of Part 113, Customs Regulations (19 CFR Part 113, Appendix A), is revised to read as follows:

**Appendix A to Part 113—Airport Customs Security Area Bond**

**Airport Customs Security Area Bond**

(name of principal)

of _____

and _____

(name of surety)

of _____

are held and firmly bound unto the United States of America in the sum of _____ dollars ($____), for the payment of which we bind ourselves, our heirs, executors, administrators, successors, and assigns, jointly and severally, firmly by these presents.

WITNESS our hands and seals this _____ day of _____, 19____.

WHEREAS, the principal (including the principal's employees, agents, and contractors) desires access to Customs airports security areas located at _____ Airport during the period of one year beginning on the _____ day of _____, 19_____, and ending on the _____ day of _____, 19_____, both dates inclusive;

*Now, Therefore, the Condition of this Obligation is Such That—*

The principal agrees to comply with the Customs Regulations application to Customs security areas at airports.

If the principal defaults on the condition of this obligation, the principal and surety jointly and severally, agree to pay liquidated damages of $1,000 for each default or such other amount as may be authorized by law or regulation.

BILLING CODE 4820-02-M

## DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

### Office of the Assistant Secretary for Housing—Federal Housing Commissioner

### 24 CFR Part 201

**[Docket No. R-89-1439; FR-2621]**

### Technical Amendments to Title I Property Improvement and Manufactured Home Loans Regulations

**AGENCY:** Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

**ACTION:** Technical amendments.

**SUMMARY:** The purpose of this document is to amend typographical and other errors in the Title I regulations as published in Part 201 of Title 24 of the Code of Federal Regulations.

**EFFECTIVE DATE:** March 14, 1989.

**FOR FURTHER INFORMATION CONTACT:** Robert J. Coyle, Director, Title I Insurance Division, Department of Housing and Urban Development, Room 9160, 451 Seventh Street, SW., Washington, DC 20410, telephone (202) 755-6880. (This is not a toll-free number.)

**SUPPLEMENTARY INFORMATION:** A number of typographical and other errors have been discovered in the Title I regulations (24 CFR Part 201), as published in the Code of Federal Regulations. Many (but not all) of these errors occurred when the Title I regulations were published in the **Federal Register** on October 25, 1985 (50 FR 43516). Because these errors were not detected at the time, they were carried over into the 1986 and later editions of the Code of Federal Regulations.

Also, on September 3, 1987 (53 FR 33404), the Department published in the **Federal Register**, an amendment to the Title I regulations. Because of an error in that publication, § 201.11(c) (1), (2), and (3) were omitted from the April 1, 1988 edition of the Code of Federal Regulations. This rule will reinstate those paragraphs, as well as correct the typographical errors found in the CFR.

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969. The Finding of No Significant Impact is available for public inspection during regular business hours at the Office of the Rules Docket Clerk, Department of Housing and Urban Development, Room 10276, 451 Seventh Street, SW., Washington, DC 20410.

Under 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the Undersigned hereby certifies that this rule will not have a significant economic impact on a substantial number of small entities. The number of small entities impacted by the rule is not expected to be substantial. This rule only contains technical changes to the Title I regulations by correcting typographical errors found in the Code of Federal Regulations and reinstating § 201.11(c) (1), (2), and (3) that were omitted from the CFR.

This rule was not listed in the Department's Semiannual Agenda of Regulations published on October 24, 1988 (53 FR 41974) under Executive Order 12291 and the Regulatory Flexibility Act.

**List of Subjects in 24 CFR Part 201**

Health facilities, Historic preservation, Home improvement, Manufactured homes, Manufactured homes and lots, Reporting and recordkeeping requirements.

Accordingly, the Department amends 24 CFR Part 201 as follows:

**PART 201—[AMENDED]**

1. The authority citation for 24 CFR Part 201 continues to read as set forth below:

**Authority:** Sec. 2, National Housing Act (12 U.S.C. 1703); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

2. In the Table of Contents for Part 201, change the title of § 201.18 to read, "Modification agreement or repayment plan."

3. In the Table of Contents, capitalize the "A" in "Administration' in the title of Subpart E.

**§ 201.3 [Amended]**

4. In § 201.3(a), capitalize the "P" in "Provisions" and insert a comma immediately thereafter.

5. In § 201.3(b), remove the hyphen between "Note" and "Provisions".

6. In § 201.3(c), replace "and" the first time it appears with "of", so that it reads "Subpart D, Insurance of Loans, * * *".

**§ 201.10 [Amended]**

7. In § 201.10(a)(2), replace "uppaid" with "unpaid".

8. In § 201.10(b)(3)(i), hyphenate "HUD-approved".

9. In § 201.10(g), insert "*Minimum loan amount.*" as the paragraph heading.

**§ 201.11 [Amended]**

10. In § 201.11(b), begin paragraph (b)(2) on a new line and capitalize "The" the first time "the" appears.

11. In § 201.11(c), add paragraphs (c) (1), (2) and (3) after the introductory sentence:

* * * * *

(c) * * *

(1) The term of a loan made to refinance a borrower's existing insured property improvement loan or existing insured manufactured home loan shall not exceed the maximum term permitted under paragraph (a) or (b) of this section for the particular type of loan, so long as the final maturity from the date of the original loan does not exceed the following time limits:

(i) 22 years for a manufactured home improvement loan;

(ii) 20 years for a manufactured home lot loan;

(iii) 30 years for a multi-module manufactured home and lot in combination; and

(iv) 25 years for all other property improvement and manufactured home loans.

(2) The term of a loan made to refinance a borrower's existing uninsured manufactured home purchase loan or existing uninsured combination loan shall be based upon the appraisal required under § 201.10(f)(3), but in any case shall not exceed the maximum term permitted under paragraph (b) of this section for the particular type of loan.

(3) Where a borrower's existing uninsured manufactured home lot loan is being refinanced in connection with the purchase of a manufactured home, the term of the combination loan shall not exceed the maximum term permitted under paragraph (b) of this section for that particular type of loan.

**§ 201.12 [Amended]**

12. In the last sentence of § 201.12, replace "of" the second time it appears with "or", so that it reads "partnership or trust".

**§ 201.13 [Amended]**

13. In the third sentence of § 201.13, replace "of" the second time it appears with "for", so that it reads "for the benefit".

**§ 201.18 [Amended]**

14. In § 201.18, change the title to read "Modification agreement or repayment plan.".

**§ 201.22 [Amended]**

15. In § 201.22(a)(5), replace "manufacturer" with "manufactured".

**§ 201.23 [Amended]**

16. In § 201.23(b)(3), hyphenate "traded-in" the first time it appears.

**§ 201.26 [Amended]**

17. In § 201.26(b)(3)(vi), insert a comma after "loan" the first time it appears.

**§ 201.28 [Amended]**

18. In § 201.28(a), insert a comma after "hazards" the first time it appears, and replace "regulation" with "regulations".

**§ 201.32 [Amended]**

19. In the second sentence of § 201.32(a), replace "of" the fourth time it appears with "on", so that it reads "losses on such loans", and insert a comma after "section".

20. In § 201.32(d)(3), insert a comma after "record".

**§ 201.51 [Amended]**

21. In § 201.51(a)(2)(i), insert a comma after "loan".

22. In § 201.51(a)(2)(ii), insert a comma after "property".

23. In § 201.51(a)(2)(iv), replace "§ 201.55(b)" with "§ 201.55(a)".

**§ 201.55 [Amended]**

24. In the second sentence of § 201.55(b)(2), insert commas after "loan" and "default".

Dated: March 9, 1989.

**James E. Schoenberger,**

*General Deputy Assistant Secretary for Housing—Deputy Federal Housing Commissioner.*

BILLING CODE 4210-27-M

## DEPARTMENT OF THE TREASURY

### Internal Revenue Service

### 26 CFR Parts 1 and 602

**[T.D. 8244]**

### Consent Dividends

**AGENCY:** Internal Revenue Service, Treasury.

**ACTION:** Final regulations.

**SUMMARY:** This document contains final Income Tax Regulations relating to the consent dividend provisions of section

VOL 54 ISS 48 MR 14 1989 UMI

565 of the Internal Revenue Code of 1986. A review of the legislative history of section 565 has prompted certain amendments to the regulations under section 565. These amendments will provide the public with additional guidance to comply with the provisions of section 565.

**EFFECTIVE DATE:** These regulations are effective for tax years ending after December 15, 1987.

**FOR FURTHER INFORMATION CONTACT:** David Bergkuist of the Office of the Associate Chief Counsel (International), within the Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Ave., NW., Washington, DC 20224 (Attention: CC:CORP:T:R (INTL–313–87)) (202–566–6457, not a toll-free call).

**SUPPLEMENTARY INFORMATION:**

**Paperwork Reduction Act**

The collection of information contained in this final regulation has been reviewed and approved by the Office of Management and Budget in accordance with the requirements of the Paperwork Reduction Act (44 U.S.C. 3504(h)) under control number 1545–0043. The estimated annual burden associated with the collection of information in this final rule is 45 minutes per respondent.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents may require greater or less time, depending on their particular circumstances.

Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be directed to the Internal Revenue Service, Attn: IRS Reports Clearance Officer TR:FP, Washington, DC 20224, and to the Office of Management and Budget, Paperwork Reduction Project, Washington, DC 20503.

**Background**

On December 15, 1987, the **Federal Register** published proposed amendments (52 FR 47554) to the Income Tax Regulations (26 CFR Part 1) under section 565 of the Internal Revenue Code of 1986. These amendments to the prior regulations under section 565 shall be applicable for tax years ending after December 15, 1987. Written comments to the notice were received. No public hearing was held. After consideration of all comments regarding the proposed amendments, those amendments are adopted by this Treasury Decision with revisions in response to those comments. The significant comments and revisions are discussed below.

**Explanation of Provisions**

In response to comments, the language of § 1.565–1(a)(2) has been expanded to make it clear that a corporation, 50 percent or more of whose adjusted ordinary gross income is adjusted income from rents, continues to be able to utilize the consent dividend under section 565, as described in section 542(a)(2)(B)(iii), for purposes of avoiding personal holding company status. In addition, certain stylistic and organizational changes were made that were not intended to have substantive effect.

**Special Analyses**

It has been determined that these rules are not major rules as defined in Executive Order 12291. Therefore a Regulatory Impact Analysis is not required. Although this Treasury Decision was preceded by a notice of proposed rulemaking that solicited public comments, it has been determined that the notice was not required by 5 U.S.C. 553 since the regulations proposed in that notice and adopted by this Treasury Decision will not have a significant impact on a substantial number of small entities. Therefore, a final Regulatory Flexibility Analysis is not required by the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

**Drafting Information**

The principal authors of these regulations are David Bergkuist of the Office of the Associate Chief Counsel (International), within the Office of Chief Counsel, and Susan Thompson Baker of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, other personnel from offices of the Internal Revenue Service and Treasury Department participated in developing the regulations.

**List of Subjects**

*26 CFR Part 1*

Income taxes, Corporations, Tax avoidance, Holding companies.

*26 CFR Part 602*

Reporting and recordkeeping requirements.

**Adoption of Amendments to the Regulations**

Accordingly, 26 CFR Parts 1 and 602 are amended as follows:

**PART 1—[AMENDED]**

**Paragraph 1.** The authority for Part 1 continues to read in part:

**Authority:** Sec. 7805, 68A Stat. 917; 26 U.S.C. 7805, unless otherwise noted. * * *

**§§ 1.565-1T through 1.565-6T [Removed]**

**Par. 2.** Sections 1.565–1T through 1.565–6T are removed.

**Par. 3.** New §§ 1.565–1 through 1.565–3, § 1.565–5, and § 1.565–6 are added at the appropriate place to read as follows:

**§ 1.565–1 General rule.**

(a) *Consent dividends.* The dividends paid deduction, as defined in section 561, includes the consent dividends for the taxable year. A consent dividend is a hypothetical distribution (as distinguished from an actual distribution) made by:

(1) A corporation that has a reasonable basis to believe that it is subject to the accumulated earnings tax imposed in part I of subchapter G, chapter 1 of the Code, or

(2) A corporation described in part II (personal holding companies or a corporation with adjusted income from rents described in section 543(a)(2)(A) which utilizes the consent dividends described in section 543(a)(2)(B)(iii) to avoid personal holding company status) or part III (foreign personal holding companies) of subchapter G or in part I (regulated investment companies) or part II (real estate investment trusts) of subchapter M, chapter 1 of the Code.

A consent dividend may be made by a corporation described in this paragraph to any person who owns consent stock on the last day of the taxable year of such corporation and who agrees to treat the hypothetical distribution as an actual dividend, subject to the limitations in section 565, § 1.565–2, and paragraph (c)(2) of this section, by filing a consent at the time and in the manner specified in paragraph (b) of this section.

(b) *Making and filing of consents.* (1) A consent shall be made on Form 972 in accordance with this section and the instructions on the form issued therewith. It may be made only by or on behalf of a person who was the actual owner on the last day of the corporation's taxable year of any class of consent stock, that is, the person who would have been required to include in gross income any dividends on such stock actually distributed on the last day of such year. Form 972 shall contain or be verified by a written declaration that it is made under the penalties of perjury. In the consent such person must agree to include in gross income for his

taxable year in which or with which the taxable year of the corporation ends a specific amount as a taxable dividend.

(2) See paragraph (c) of this section and § 1.565–2 for the rules as to when all or a portion of the amount so specified will be disregarded for tax purposes.

(3) A consent may be filed at any time not later than the due date of the corporation's income tax return for the taxable year for which the dividends paid deduction is claimed. With such return, and not later than the due date thereof, the corporation must file Forms 972 duly executed by each consenting shareholder, and a return on Form 973 showing by classes the stock outstanding on the first and last days of the taxable year, the dividend rights of such stock, distributions made during the taxable year to shareholders, and giving all the other information required by the form. Form 973 shall contain or be verified by a written declaration that is made under the penalties of perjury.

(c) *Taxability of amounts specified in consents.* (1) The filing of a consent is irrevocable, and except as otherwise provided in section 565(b), § 1.565–2, and paragraph (c)(2) of this section, the full amount specified in a consent filed by a shareholder of a corporation described in paragraph (a) of this section shall be included in the gross income of the shareholder as a taxable dividend. Where the shareholder is taxable on a dividend only if received from sources within the United States, the amount specified in the consent of the shareholder shall be treated as a dividend from sources within the United States in the same manner as if the dividend has been paid in money to the shareholder on the last day of the corporation's taxable year. See paragraph (b) of this section relating to the making and filing of consents, and section 565(e) and § 1.565–5, with respect to the payment requirement in the case of nonresident aliens and foreign corporations.

(2) To the extent that the Commissioner determines that the corporation making a consent dividend is not a corporation described in paragraph (a) of this section, the amount specified in the consent is not a consent dividend and the amount specified in the consent will not be included in the gross income of the shareholder. In addition, where a corporation is described in paragraph (a)(1) but not paragraph (a)(2) of this section, to the extent that the Commissioner determines that the amount specified in a consent is larger than the amount of earnings subject to the accumulated earnings tax imposed by part I of subchapter G, such excess is not a consent dividend under paragraph (a) of this section and will not be included in the gross income of the shareholder.

(3) Except as provided in section 565(b), § 1.565–2 and paragraph (c)(2) of this section, once a shareholder's consent is filed, the full amount specified in such consent must be included in the shareholder's gross income as a taxable dividend, and the ground upon which a deduction for consent dividends is denied the corporation does not affect the taxability of a shareholder whose consent has been filed for the amount specified in the consent. For example, although described in part I, II, or III of subchapter G, or part I or II of subchapter M, chapter 1 of the Code, the corporation's taxable income (as adjusted under section 535(b), 545(b), 556(b), 852(b)(2), or 857(b)(2), as appropriate) may be less than the total of the consent dividends.

(4) A shareholder who is a nonresident alien or a foreign corporation is taxable on the full amount of the consent dividend that otherwise qualifies under this section even though that payment has not been made as required by section 565(e) and § 1.565–5.

(5) Income of a foreign corporation is not subject to the tax on accumulated earnings under part I of subchapter G, chapter 1 of the Code except to the extent of U.S. source income, adjusted as permitted under section 535. See section 535 (b) and (d) and § 1.535–1(b). Therefore, foreign source earnings (other than those distributions subject to resourcing under section 535(d)) of a foreign corporation that is not described in paragraph (a)(2) of this section cannot qualify for consent dividend treatment. Accordingly, a consent dividend made by a foreign corporation described in paragraph (a)(1) of this section shall not be effective with respect to all of the corporation's earnings, but shall relate solely to earnings which would have been, in the absence of the consent dividend, subject to the accumulated earnings tax.

**§ 1.565–2 Limitations.**

(a) *General rule.* Amounts specified in consents filed by shareholders or other beneficial owners of a corporation described in § 1.565–1(a) are not treated as consent dividends to the extent that—

(1) They would constitute a preferential dividend or

(2) They would not constitute a dividend (as defined in section 316), if distributed in money to shareholders on the last day of the taxable year of the corporation. If any portion of any amount specified in a consent filed by a shareholder of a corporation described in the preceding sentence is not treated as a consent dividend under section 565(b) and this section, it is disregarded for all tax purposes. For example, it is not taxable to the consenting shareholder, and paragraph (c) of § 1.565–1 is not applicable to this portion of the amount specified in the consent.

(b) *Preferential Distribution.* (1) A preferential distribution is an actual distribution, or a consent distribution, or a combination of the two, which involves a preference to one or more shares of stock as compared with other shares of the same class or to one class of stock as compared with any other class of stock. See section 562(c) and § 1.562–2.

(2) The application of section 565 (b)(1) and § 1.565–2 (b) may be illustrated by the following examples:

*Example (1).* The X Corporation, a personal holding company, which makes its income tax returns on the calendar year basis, has 200 shares of stock outstanding, owned by A and B in equal amounts. On December 15, 1987, the corporation distributes $800 to B and $100 to A. As a part of the same distribution, A executes a consent to include $500 in his gross income as a taxable dividend although such amount is not distributed to him. The X Corporation, assuming the other requirements of section 565 have been complied with, is entitled to a consent dividends deduction of $500. Although the consent dividend is deemed to have been paid on December 31, 1987, the last day of the taxable year of the corporation, the total amount of all distributions constitutes a single nonpreferential distribution of $1200.

*Example (2).* The Y corporation, a personal holding company, which makes its income tax returns on the calendar year basis, has one class of consent stock outstanding, owned in equal amounts by A, B, and C. If A and B each receive a distribution in cash of $5,000 and C consents to include $3,000 in gross income as a taxable dividend, the combined actual and consent distribution of $13,000 is preferential. See section 562 (c) and § 1.562–2 (a). Similarly, if no one receives a distribution in cash, but A and B each consents to include $5,000 as a taxable dividend in gross income and C agrees to include only $3,000, the entire consent distribution is preferential.

*Example (3).* The Z Corporation, which makes its income tax returns on the calendar year basis and is subject, for the taxable year in question, to the accumulated earnings tax, has only two classes of stock outstanding, each class being consent stock and consisting of 500 shares. Class A, with a par value of $40 per share, is entitled to two-thirds of any distribution of earnings and profits. Class B, with a par value of $20 per share, is entitled to one-third of any distribution of earnings and profits. On December 15, 1987, there is distributed on the class B stock $2 per share,

VOL 54 ISS 48 MR 14 1989 UMI

or $1,000, and shareholders of the class A stock consent to include in gross income amounts equal to $2 per share, or $1,000. The entire distribution of $2,000 is preferential, inasmuch as the class B stock has received more than its pro rata share of the combined amounts of the actual distributions and the consent distributions.

(c) *Section 316 Limitation.* (1) An additional limitation under section 565 (b) is that the amounts specified in consents which may be treated as consent dividends cannot exceed the amounts which would constitute a dividend (as defined in section 316) if the corporation had distributed the total specified amounts in money to shareholders on the last day of the taxable year of the corporation. If only a portion of such total would constitute a dividend, then only a corresponding portion of each specified amount is treated as a consent dividend.

(2) The application of section 565 (b) (2) and § 1.565–2 (c) may be illustrated by the following example:

*Example.* The X Corporation, a corporation described in § 1.565–(a) (1) or (2), which makes its income tax returns on the calendar year basis, has only one class of stock outstanding, owned in equal amounts by A and B. It makes no distributions during the taxable year 1987. Its earnings and profits for the calendar year 1987 amount to $6,000, there being at the beginning of such year no accumulated earnings or profits. A and B execute proper consents to include $6,000 each in their gross income as a dividend received by them on December 31, 1987. The sum of the amounts specified in the consents executed by A and B is $10,000, but if $10,000 had actually been distributed by the X corporation on December 31, 1987, only $6,000 would have constituted a dividend under section 316 (a). The amount which could be considered as consent dividends in computing the dividends paid deduction for purposes of the accumulated earnings tax is limited to $6,000, or $4,000 of the $6,000 specified in each consent. The remaining $1,000 in each consent is disregarded for all tax purposes. (In the case of a personal holding company, see also the example in § 1.565–3(b).)

**§ 1.565–3 Effect of consent.**

(a) *General Rule.* The amount of the consent dividend that is described in paragraph (a) of § 1.565–1 shall be considered, for all purposes of the Code, as if it were distributed in money by the corporation to the shareholder on the last day of the taxable year of the corporation, received by the shareholder on such day, and immediately contributed by the shareholder as paid-in capital to the corporation on such day. Thus, the amount of the consent dividend will be treated by the shareholder as a dividend. The shareholder will be entitled to the dividends received deduction under section 243 or 245 with respect to such consent dividend. The basis of the shareholder's consent stock in a corporation will be increased by the amount thus treated in his hands as a dividend which he is considered as having contributed to the corporation as paid-in capital. The amount of the current dividend will also be treated as a dividend received from sources within the United States in the same manner as if the dividend had been paid in money to the shareholders. Among other effects of the consent dividend, the earnings and profits of the corporation will be decreased by the amount of the consent dividends. Moreover, if the shareholder is a corporation, its accumulated earnings and profits will be increased by the amount of the consent dividend with respect to which it makes a consent.

(b) *Example.* The application of section 565 (c) may be illustrated by the following example:

*Example.* Corporation A, a personal holding company and a calendar year taxpayer, has one shareholder, individual B, whose consent to include $10,000 in his gross income for the calendar year 1987 has been timely filed. A has $8,000 of earnings and profits at the beginning of 1987. A has $10,000 of undistributed personal holding company income (determined without regard to distributions under section 316(b)(2)) for 1987. B must include $10,000 in his gross income as a taxable income and is treated as having immediately contributed $10,000 to A as paid-in capital. See section 316(b)(2).

**§ 1.565–6 Nonresident aliens and foreign corporations.**

(a) *Withholding.* In the event that a corporation makes a consent dividend, as described in § 1.565–1 (a), to a shareholder that is subject to a withholding tax under section 1441 or 1442 on a distribution of cash or other property, the corporation must remit an amount of tax equal to the withholding tax that would be imposed under section 1441 or 1442 if an actual cash distribution equal to the consent dividend had been paid to the shareholder on the last day of the corporation's taxable year. Such payment must be in one of the following forms:

(1) Cash,

(2) United States postal money order,

(3) Certified check drawn on a domestic bank, provided that the law of the place where the bank is located does not permit the certification to be rescinded prior to presentation,

(4) A cashier's check of a domestic bank, or

(5) A draft on a domestic bank or a foreign bank maintaining a United States agency or branch and payable in United States funds.

The amount of such payment shall be credited against the tax imposed on the shareholder.

**§ 1.565–6 Definitions.**

(a) *Consent stock.* (1) The term "consent stock" includes what is generally known as common stock. It also includes participating preferred stock, the participation rights of which are unlimited.

(2) The definition of consent stock may be illustrated by the following example:

*Example.* If in the case of the X Corporation, a personal holding company, there is only one class of stock outstanding, it would all be consent stock. If, on the other hand, there were two classes of stock, class A and class B, and class A was entitled to 6 percent before any distribution could be made on class B, but class B was entitled to everything distributed after class A had received its 6 percent, only class B stock would be consent stock. Similarly, if class A, after receiving its 6 percent, was to participate equally or in some fixed proportion with class B until it had received a second 6 percent, after which class B alone was entitled to any further distributions, only class B stock would be consent stock. The same result would follow if the order of preferences were class A 6 percent, then class B 6 percent, then class A a second 6 percent, either alone or in conjunction with class B, then class B the remainder. If, however, class A stock is entitled to ultimate participation without limit as to amount, then it, too, may be consent stock. For example, if class A is to receive 3 percent and then share equally or in some fixed proportion with class B in the remainder of the earnings or profits distributed, both class A stock and class B stock are consent stock.

(b) *Preferred dividends.* (1) The term "preferred dividends" includes all fixed amounts (whether determined by percentage of par value, a stated return expressed in a certain number of dollars per share, or otherwise) the distribution of which on any class of stock is a condition precedent to a further distribution of earnings or profits (not including a distribution in partial or complete liquidation). A distribution, though expressed in terms of a fixed amount, is not a preferred dividend, however, unless it is preferred over a subsequent distribution within the taxable year upon some class or classes of stock other than one on which it is payable.

(2) The definition of preferred dividends may be illustrated by the following example:

*Example.* If, in the case of the X Corporation, there are only two classes of stock outstanding, class A and class B, and class A is entitled to a distribution of 6 percent of par, after which the balance of the earnings and profits are distributable on class B exclusively, class A's 6 percent is a preferred dividend. If the order of preferences is class A $6 per share, class B $6 per share, then class A and class B in fixed proportions until class A receives $3 more per share, then class B the remainder, all of class A's $9 per share and $6 per share of the amount distributable on class B are preferred dividends. The amount which class B is entitled to receive in conjunction with the payment to class A of its last $3 per share is not a preferred dividend, because the payment of such amount is preferred over no subsequent distribution except one made on class B itself. Finally, if a distribution must be $6 on class A, $6 on class B, then on class A and class B share and share alike, the distribution on class A of $6 and the distribution on class B of $6 are both preferred dividends.

## PART 602—[AMENDED]

Par. 12. The authority for Part 602 continues to read as follows:

**Authority:** 26 U.S.C. 7805.

**§ 602.101 [Amended]**

Par. 13. Section 602.101(c) is amended by inserting in the appropriate place in the table:

| | |
|---|---|
| § 1.565–1 | 1545–0043. |
| § 1.565–2 | 1545–0043. |
| § 1.565–3 | 1545–0043. |
| § 1.565–5 | 1545–0043. |
| § 1.565–6 | 1545–0043. |

Lawrence B. Gibbs,
*Commissioner of Internal Revenue.*
Approved:
O. Donaldson Chapoton,
*Assistant Secretary of the Treasury.*

## DEPARTMENT OF DEFENSE

### Department of the Army

### 32 CFR Part 518

[Army Reg. 340–17]

### Release of Information and Records From Army Files; Special Designation of Initial Denial Authority

**AGENCY:** Department of the Army.
**ACTION:** Final rule.

**SUMMARY:** The Department of the Army is designating special Initial Denial Authority for records pertaining to Army Base Closure and Realignment.

**EFFECTIVE DATE:** March 14, 1989.
**FOR FURTHER INFORMATION CONTACT:** Ms. Angela R. Petrarca, Policy and Strategy Directorate, Office of the Director of Information Systems for Command, Control, Communications and Computers, Office of the Secretary of the Army, Washington, DC 20310–0107.

**SUPPLEMENTARY INFORMATION:** This amendment designates special initial denial authority as follows: Director of Management, Office of the Chief of Staff, Army, for Army records pertaining to Closure and Realignment of Military Installations under Title II (section 201) of the Defense Authorization Amendments and Base Closure and Military Realignment Act of 1988.

**Lists of Subjects in 32 CFR Part 518**

Information, Archives and records, Privacy, Freedom of information.

Accordingly, 32 CFR Part 518 is amended as follows:

## PART 518—[AMENDED]

1. The authority citation for Part 518 continues to read as follows:

**Authority:** 5 U.S.C. 552.

2. Section 518.15 is amended by adding paragraph (a)(4)(xviii) to read as follows:

**§ 518.15 Initial determinations.**

* * * * *

(a) * * *

(4) * * *

(viii) The Director of Management, Office of the Chief of Staff, is designated to act on requests for records relating to closure and realignment of military installations under Title II (section 201) of the Defense Authorization Amendments and Base Closure and Military Realignment Act of 1988.

BILLING CODE 3710–08–M

## DEPARTMENT OF TRANSPORTATION

### Coast Guard

### 33 CFR Part 117

[CGD7–88–36]

### Drawbridge Operation Regulations; Clearwater Pass, FL

**AGENCY:** Coast Guard, DOT.
**ACTION:** Final rule.

**SUMMARY:** At the request of the City of Clearwater, the Coast Guard is changing the regulations governing the Clearwater Pass (SR 699) drawbridge between Sand Key and Clearwater Beach, Florida by adding one hour to the existing regulated period. This change is being made because of a significant increase in highway traffic on weekends and holidays with slight shift in peak traffic periods. This action will accommodate the current needs of vehicular traffic and still provide for the reasonable needs of navigation.

**EFFECTIVE DATE:** These regulations become effective on April 13, 1989.

**FOR FURTHER INFORMATION CONTACT:** Mr. Ian Mac Cartney, telephone (305) 536–4103.

**SUPPLEMENTARY INFORMATION:** On December 20, 1988, the Coast Guard published proposed rules (53 FR 51125) concerning this amendment. The Commander, Seventh Coast Guard District, also published the proposal as a Public Notice dated January 3, 1989. In each notice, interested persons were given until February 3, 1989, to submit comments.

**Drafting Information**

The drafters of these regulations are Mr. Ian Mac Cartney, project officer, and Lieutenant Commander S.T. Fuger, Jr., project attorney.

**Discussion of Comments**

Four comments were received. One commenter supported the proposal. Two commenters supported the original request for 20 minute openings and the extra hour of regulation. One commenter opposed the extra hour of regulation citing a concern for navigational safety. The Coast Guard has carefully considered these comments, however, no additional information was presented to justify modifying the existing regulation with the exception of adding an extra hour to the regulated period. The final rule remains unchanged from the proposed rule published on December 20, 1988.

**Economic Assessment and Certification**

These regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under the Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979).

The economic impact has been found to be so minimal that a full regulatory evaluation is unnecessary. We conclude this because the regulations exempt tugs with tows. Since the economic impact of these regulations is expected to be minimal, the Coast Guard certifies that they will not have a significant

VOL 54 ISS 48 MR 14 1989 UMI

economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 117

Bridges.

Regulations

In consideration of the foregoing, Part 117 of Title 33, Code of Federal Regulations, is amended as follows:

## PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46 and 33 CFR 1.05–1(g).

2. Section 117.277(b) is revised to read as follows:

**§ 117.277 Clearwater pass.**

* * * * *

(b) From 11 a.m. to 6 p.m. on Saturdays, Sundays, and federal holidays the draw need open only on the hour, quarter hour, half hour, and three quarter hour. Public vessels of the United States, tugs with tows, and vessels in distress shall be passed at any time.

* * * * *

Dated: February 27, 1989.

Martin H. Daniell,

*Rear Admiral, U.S. Coast Guard, Commander, Seventh Coast Guard District.*

BILLING CODE 4910-14-M

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 180

[PP 8E3589/R1019; FRL 3637-1]

### Pesticide Tolerance for Imazethapyr

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule established a tolerance for residues of the herbicide imazethapyr (2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1*H*-imidazol-2-yl]-5-ethyl-3-pyridine-carboxylic acid, as its ammonium salt) in or on soybeans at 0.1 part per million (ppm). The regulation was requested by American Cyanamid Co. and establishes the maximum permissible level for residues of the herbicide in or on soybeans.

EFFECTIVE DATE: March 14, 1989.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A–110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: By mail: Robert J. Taylor, Product Manager (PM) 25, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 245, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)–557–1800.

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the Federal Register on February 3, 1988 (53 FR 3075), which announced that the American Cyanamid Co., P.O. Box 400, Princeton, NJ 08540, has submitted pesticide petition (PP) 8F3589 to EPA proposing to amend 40 CFR Part 180 by establishing a tolerance for residues of the herbicide imazethapyr (2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1*H*-imidazol-2-yl]-5-ethyl-3-pyridine-carboxylic acid, as its ammonium salt) in or on the raw agricultural commodity soybeans at 0.1 ppm.

There were no comments received in response to the notice of filing.

The data submitted in the petition and other relevant material have been evaluated. The data considered in the petition include: an 18-month feeding/oncogenic study with mice fed dosages of 0, 150, 750, and 1,500 milligrams/kilogram/day (mg/kg/day) with no oncogenic effects observed under the conditions of the study at dose levels up to and including 1,500 mg/kg/day (highest dose tested (HDT)) and a systemic no-observed-effect level (NOEL) of 750 mg/kg/day; a 2-year feeding/oncogenic study in rats fed dosages of 0, 50, 250, and 500 mg/kg/day with no oncogenic effects observed under the conditions of the study at dose levels up to and including 500 mg/kg/day (HDT) and a systemic NOEL of 500 mg/kg/day (HDT); a 1-year feeding study in dogs fed dosage levels of 0, 25, 125, and 250 mg/kg/day with a NOEL of 25 mg/kg/day; a teratology study in rats fed dosage levels of 0, 125, 375, and 1,125 mg/kg/day, with a maternal toxicity NOEL of 375 mg/kg/day and a developmental toxicity NOEL of 1125 mg/kg/day; a teratology study in rabbits fed dosage levels of 0, 100, 300 and 1,000 mg/kg/day with a maternal toxicity NOEL of 300 mg/kg/day and a developmental toxicity NOEL of 1,000 mg/kg/day; a two-generation reproduction study in rats fed dosage levels of 0, 50, 250, and 500 mg/kg/day with a NOEL for systemic and reproductive effects of 500 mg/kg/day; a mutagenic test with *Salmonella typhimurium* (negative); an *in vitro* chromosomal aberration test in Chinese hamster ovary cells (positive without metabolic activation but at dose levels that were toxic to the cells and negative with metabolic activation); an *in vivo* chromosomal aberration test in rat bone marrow cells (negative); an unscheduled DNA synthesis study in rat hepatocytes (negative); and a dominant-lethal study in rats (negative at doses up to and including 2,000 mg/kg).

The provisional acceptable daily intake (PADI) based on the 90-day dog feeding study (NOEL of 250 mg/kg/day) and an uncertainty factor of 1,000 is calculated to be 0.25 mg/kg/day. The theoretical maximum residue contribution (TMRC) for this tolerance is calculated to be 0.000034 mg/kg/day. The current action will occupy 0.014 percent of the ADI. There are no published tolerances for this chemical. The pesticide is useful for the purposes of this tolerance rule.

The rat chronic feeding/oncogenicity study is acceptable as a chronic study but is supplemental as an oncogenicity study. There were no toxic effects observed at the top dose level (500 mg/kg/day), an indication that the maximum tolerated dose (MTD) was not reached. A repeat of this study will not be required for the use of soybeans, however, because (1) 500 mg/kg/day is within 50 percent of the upper limit dose necessary for an adequately conducted oncogenicity study on a chemical of low toxicity; (2) imazethapyr is structurally related to two other pesticides which tested negatively in oncogenicity studies in rats and mice; and (3) there were no positive mutagenicity studies for any of the three herbicides except for imazethapyr which had a positive result in the *in vitro* chromosomal aberration test, but only at dose levels that were toxic to the cells.

The nature of the residue is adequately understood, and adequate analytical methods (gas chromatography with a thermionic nitrogen-phosphorus detector) are available for enforcement purposes.

There are currently no actions pending against the registration of this chemical. No secondary residues are expected to occur in meat, milk, poultry, or eggs from this use.

Based on the above information considered by the Agency, it is concluded that the tolerance established by amending 40 CFR Part 180 will protect the public health, and the tolerance is therefore established as set forth below.

Any person adversely affected by this regulation may, within 30 days after the date of publication in the Federal Register, file written objections with the Hearing Clerk, Environmental Protection Agency, at the address given above. Such objections should be submitted in quintuplicate and specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this regulation from section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

(Authority: Sec. 408(d)(2), 68 Stat. 512 (21 U.S.C. 346a(d)(2)).)

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

Dated: March 7, 1989.

Douglas D. Campt,

*Director, Office of Pesticide Programs.*

Therefore, 40 CFR Part 180 is amended as follows:

## PART 180—[AMENDED]

1. The authority citation for Part 180 continues to read as follows:

Authority: 21 U.S.C. 346a.

2. New § 180.447 is added, to read as follows:

**§ 180.447 Imazethapyr, ammonium salt; tolerance for residues.**

A tolerance is established for residues of the herbicide imazethapyr, 2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1*H*-imidazol-2-yl]-5-ethyl-3-pyridine-carboxylic acid, as its ammonium salt, in or on the following raw agricultural commodity:

| Commodity | Parts per million |
|---|---|
| Soybeans | 0.1 |

BILLING CODE 6560–50–M

## GENERAL SERVICES ADMINISTRATION

### 41 CFR Part 101–7

[FPMR Temp. Reg. A–32]

### First Duty Station Allowances for Relocated Presidential Transition Team Personnel Subsequently Appointed to Government Service

AGENCY: Federal Supply Service, GSA.

ACTION: Temporary regulation.

SUMMARY: This regulation implements authority to pay first duty station relocation allowances to eligible members of the Presidential Transition Team who relocate prior to selection for, or appointment to, certain Federal Government positions.

DATES: *Effective date:* This regulation is effective for travel and transportation performed on or after November 9, 1988.

*Expiration date:* This regulation expires November 9, 1989, unless sooner superseded or incorporated into the permanent regulations of GSA.

FOR FURTHER INFORMATION CONTACT: Larry Tucker, Travel and Transportation Regulations Staff (FBR), Washington, DC 20406, telephone FTS 557–1253 or commercial (703) 557–1253.

SUPPLEMENTARY INFORMATION: The General Services Administration (GSA) has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. GSA has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

List of Subjects in 41 CFR Part 101–7

Government employees, Travel, Travel allowances, Travel and transportation expenses.

Authority: Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Executive Order 11609, July 22, 1971; 5 U.S.C. 5707.

In 41 CFR Chapter 101, the following temporary regulation is added to the appendix at the end of Subchapter A to read as follows:

February 2, 1989.

**Federal Property Management Regulations Temporary Regulation A–32**

*To:* Heads of Federal agencies.

*Subject:* First duty station allowances for relocated Presidential Transition Team personnel subsequently appointed to Government service.

1. *Purpose.* This regulation implements authority to pay limited first duty station relocation allowances to eligible members of the Presidential Transition Team who relocate prior to selection for, or appointment to, certain Federal Government positions.

2. *Effective date.* This regulation is effective for travel and transportation performed on or after November 9, 1988.

3. *Expiration date.* This regulation expires November 9, 1989, unless sooner superseded or incorporated into the permanent regulations of GSA.

4. *Authority.* The provisions of this regulation are authorized by section 6 of the Presidential Transitions Effectiveness Act, Pub. L. 100–398, approved August 17, 1988, and by pertinent legislative history contained in House Report No. 100–532.

5. *Incorporation of pertinent Federal Travel Regulations provisions.* Paragraph 2–1.5f of the Federal Travel Regulations (FTR), insofar as it pertains to new appointees to shortage category positions and the Senior Executive Service, and to certain Presidential appointees, is hereby incorporated in this temporary regulation. The authority, procedures, and limitations contained in that paragraph apply to the individuals covered by this temporary regulation except as provided herein.

6. *Eligible individuals.* This regulation applies to new appointees who are appointed to positions described in 5 U.S.C. 5723 and in the incorporated FTR paragraph 2–1.5f who have performed transition activities under section 3 of the Presidential Transition Act of 1963 (3 U.S.C. 102 note), *Provided* That:

a. The appointment is made in the same fiscal year as the Presidential inauguration that immediately follows their transition activities; and

b. The appointee relocated on or after November 9, 1988 (to perform Presidential transitional activities), but before selection or appointment.

7. *Expenses covered.* An agency may authorize or approve reimbursement to new appointees covered by this regulation for the travel and transportation expenses listed below. However, payment shall be limited to expenses incurred from the appointee's actual place of residence from which he/she relocated on or after November 9, 1988, for the purpose of performing

VOL 54 ISS 48 MR 14 1989 UMI

Presidential transition activities to the assigned duty station of such appointee.

a. Travel expenses including per diem for the appointee as set forth in FTR paragraph 2–2.1;

b. Transportation expenses (but not per diem) for immediate family of the appointee as set forth in FTR paragraph 2–2.2a;

c. Mileage allowance, if privately owned vehicle is used in travel, as set forth in FTR paragraph 2–2.3;

d. Transportation and temporary storage of household goods as set forth in FTR part 2–8;

e. Nontemporary storage of household goods, if appointed to an isolated location, as set forth in FTR paragraph 2–9.1; and

f. Transportation of mobile homes as set forth in FTR part 2–7.

8. *Alternate origin or destination.* Travel and transportation authorized or approved under this regulation may be from or to any location, but reimbursement for such expenses shall be limited to the constructive cost of those expenses from and to the locations described in paragraph 7.

9. *Service agreement required.* Reimbursement for travel and transportation expenses authorized or approved under this regulation may not be made until the appointee has agreed in writing to remain in Government service for 12 months following the date of appointment.

10. *Effect on other regulations.* The FTR are currently being established as a separate system of regulations to be codified in Title 41 of the Code of Federal Regulations (CFR) (41 CFR 301–304). Prior to expiration, the provisions of this temporary regulation, unless sooner revised or superseded, will be incorporated, as appropriate, in the FTR. Until incorporation and codification of this temporary regulation takes place, the FTR provision cited in paragraph 5 and its corresponding CFR codified version will continue to be part of this temporary regulation by reference.

11. *Comments.* Comments concerning this regulation may be submitted to the General Services Administration, Federal Supply Service (FBR), Washington, DC 20406, not later than March 1, 1989, for consideration and possible incorporation in the permanent regulation.

**Richard G. Austin,**

*Acting Administrator of General Services.*

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### 45 CFR Part 233

### Application, Determination of Eligibility and Furnishing Assistance—Public Assistance Programs; Coverage and Conditions of Eligibility in Financial Assistance Programs; Alien Legalization; Correction

**AGENCY:** Family Support Administration, HHS.

**ACTION:** Final rule, correction.

**SUMMARY:** This document makes a correction to Alien Legalization final regulations that appeared in the **Federal Register** on August 12, 1988 (53 FR 30432–30433). In that publication, a revision to paragraph (c) of § 233.50 was omitted even though paragraph (c) was included in the interim final rule published on December 24, 1987 (52 FR 48689). This correction notice adds paragraph (c) to § 233.50.

**FOR FURTHER INFORMATION CONTACT:** Ms. Diann Dawson, Director, Division of Policy, Office of Family Assistance, Family Support Administration, Fifth Floor, 370 L'Enfant Promenade, SW., Washington, DC 20447, telephone (202) 252–5118.

**List of Subjects in 45 CFR Part 233**

Aliens, Grant Programs—social programs, public assistance programs, Reporting and recordkeeping requirements.

Approved: March 8, 1989.

**James E. Lawson,**

*Acting Deputy Assistant Secretary for Information and Resources Management.*

**PART 233—[AMENDED]**

1. The authority citation for Part 233 continues to read as follows:

**Authority:** Sections 1, 402, 406, 407, 1002, 1102, 1402, and 1602 of the Social Security Act (42 U.S.C. 301, 602, 606, 607, 1202, 1302, 1352, and 1382 note), and Section 6 of Pub. L. 96–114, 89 Stat. 579 and Part XXIII of Pub. L. 97–35, 95 Stat. 843, Pub. L. 97–248, 96 Stat. 324, and Pub. L. 99–603.

2. In § 233.50, paragraph (c) is revised to read as follows:

**§ 233.50 Citizenship and alienage.**

* * * * *

(c) An alien granted lawful temporary resident status pursuant to section 201, 302, or 303 of the Immigration Reform and Control Act of 1986 (Pub. L. 99–603) who must be either:

(1) A Cuban and Haitian entrant as defined in paragraph (1) or (2)(A) of section 501(e) of Pub. L. 96–422, as in effect on April 1, 1983, or

(2) An adult assistance applicant for OAA, AB, APTD, or AABD, or

(3) An applicant for AFDC who is not a Cuban and Haitian applicant under paragraph (c)(1) of this section who was adjusted to lawful temporary resident status more than five years prior to application.

All other aliens granted lawful temporary or permanent resident status, pursuant to sections 201, 302, or 303 of the Immigration Reform and Control Act of 1986, are disqualified for five years from the date lawful temporary resident status is granted.

BILLING CODE 4150–04–M

## DEPARTMENT OF THE INTERIOR

### Fish and Wildlife Service

### 50 CFR Part 33

### Refuge-specific Fishing Regulations

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Final rule.

**SUMMARY:** The Fish and Wildlife Service (Service) hereby amends certain regulations in 50 CFR Part 33 that pertain to fishing on individual national wildlife refuges (NWRs). Refuge fishing programs are reviewed annually to determine whether the regulations governing fishing on individual refuges should be modified. Changing environmental conditions, State and Federal regulations and other factors affecting fish populations and habitats may warrant such amendments. The modifications made ensure the continued compatibility of fishing with the purposes for which the individual refuges involved were established, and to the extent practical, make refuge fishing programs consistent with State regulations.

**EFFECTIVE DATE:** April 13, 1989.

**FOR FURTHER INFORMATION CONTACT:** Larry LaRochelle, Division of Refuges, Fish and Wildlife Service, 18th and C Streets NW., Washington, DC 20240; Telephone 202–343–4313.

**SUPPLEMENTARY INFORMATION:** 50 CFR Part 33 contians the provisions that govern fishing on NWRs. Fishing is regulated on refuges to (1) ensure compatibility with refuge purposes, (2) properly manage the fishery resource and (3) protect other refuge values. On many refuges, the Service policy of adopting State fishing regulations is an adequate way of meeting these objectives. On other refuges it is necessary to supplement State regulations with refuge-specific fishing regulations which will ensure that the Service meets its management responsibilities, as outlined under the section entitled "Conformance with Statutory and Regulatory Authorities" in the proposed rule of November 1, 1988, at 53 FR 44043. Refuge-specific fishing regulations are issued only after the final publication of the opening of a wildlife refuge to fishing. These regulations may list the seasons, methods of taking fish, descriptions of open areas and other provisions. The Service has previously issued refuge-specific fishing regulations in 50 CFR Part 33.

This rule amends and supplements certain refuge-specific regulations in 50 CFR Part 33, §§ 33.8 through 33.51, which pertain to fishing on individual refuges in their respective alphabetically listed State.

The policy of the Department of the Interior is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. On November 1, 1988, at 53 FR 44043, the Service published a proposed rulemaking to amend certain regulations in 50 CFR Part 33 and invited the public to comment. No comments were received. Therefore, the proposed refuge-specific fishing regulations are here published, with minor technical corrections, as a final rulemaking.

**Economic Effect**

Executive Order 12291 requires the preparation of regulatory impact analyses for major rules. A major rule is one likely to result in an annual effect on the economy of $100 million or more, a major increase in cost or prices for consumers, individual industries, government agencies or geographic regions, or significant adverse effects on the ability of United States-based enterprises to compete with foreign-based enterprises. The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) further requires the preparation of flexibility analyses for rules that will have a significant effect on a substantial number of small entities, which include small businesses, organizations or governmental jurisdictions.

These amendments to the codified refuge-specific fishing regulations make relatively minor adjustments to existing fishing programs. The regulations are not expected to have any gross economic effect and will not cause an increase in costs or prices for consumers, individual industries, Federal, State or local governments, agencies or geographic regions. The benefits accruing to the public are expected to exceed the costs of administering this rule. Accordingly, the Department has determined that this rule is not a "major rule" within the meaning of Executive Order 12291 and will not have a significant economic effect on a substantial number of small entities within the meaning of the Regulatory Flexibility Act.

**Paperwork Reduction Act**

The Service has received approval from the Office of Management and Budget (OMB) for the information collection requirements of these regulations pursuant to the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). These requirements are presently approved by OMB under #1018–0014 Economic and Public Use Permits. Public reporting burden for these forms is estimated to average .1038 hours or 6.2 minutes per response for a total burden for all forms used of 15,146 hours, including time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. Direct comments on the burden estimate or any other aspect of these forms to Information Collection Office, U.S. Fish and Wildlife Service, Washington, DC 20240; and the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

**Environmental Considerations**

Compliance with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4332(2)(C)) and the Endangered Species Act of 1973 (16 U.S.C. 1531–1543) is ensured when fishing plans are developed and the determinations required by these Acts are made prior to the addition of refuges to the list of areas open to sport fishing in 50 CFR Part 33. Refuge-specific fishing regulations are subject to a categorical exclusion from the NEPA process if they do not significantly alter the existing use of a particular refuge. The changes made in this rulemaking will not significantly alter the existing uses of the refuges involved.

Information regarding the conditions that apply to individual refuge fishing programs, any restrictions related to public use on the refuge and a map of the refuge are available at refuge headquarters. This information can also be obtained from the Regional Offices of the Service at the addresses listed below.

*Region 1*—California, Hawaii, Idaho, Nevada, Oregon and Washington: Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, Lloyd 500 Building, Suite 1692, 500 Multnomah Street, Portland, Oregon 97232; Telephone (503) 231–6214.

*Region 2*—Arizona, New Mexico, Oklahoma and Texas: Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, Box 1306, Albuquerque, New Mexico 87103; Telephone (505) 766–1829.

*Region 3*—Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Ohio and Wisconsin: Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111; Telephone (612) 725–3507.

*Region 4*—Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Puerto Rico, Tennessee and the Virgin Islands: Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, Richard B. Russell Federal Building, 75 Spring Street SW., Atlanta, Georgia 30303; Telephone (404) 331–3588.

*Region 5*—Connecticut, Delaware, District of Columbia, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia and West Virginia: Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Massachusetts 02158, Telephone (617) 965–9222.

*Region 6*—Colorado, Kansas, Montana, Nebraska, North Dakota, South Dakota, Utah and Wyoming: Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, Box 25486, Denver Federal Center, Denver, Colorado 80225; Telephone (303) 236–7920.

*Region 7*—Alaska: Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, 1011 E. Tudor Road, Anchorage, Alaska 99503; Telephone (907) 786–3538.

**Primary Author**

Larry LaRochelle, Division of Refuges, Fish and Wildlife Service, Washington, DC, is the primary author of this rulemaking document.

**List of Subjects in 50 CFR Part 33**

Fishing, National Wildlife Refuge System, Wildlife refuges.

**PART 33—[AMENDED]**

Accordingly, Part 33 of Chapter I of Title 50 of the *Code of Federal*

VOL 54 ISS 48 MR 14 1989 UMI

*Regulations* is amended as set forth below:

1. The authority citation for Part 33 continues to read as follows:

**Authority:** 5 U.S.C. 301; 16 U.S.C. 460k, 664, 668dd and 715i.

**Refuge-Specific Fishing**

2. Section 33.8 is amended by redesignating paragraphs (b) through (e) as paragraphs (c) through (f), adding new paragraph (b) and revising newly redesignated paragraph (d) to read as follows:

**§ 33.8 Arkansas.**

* * * * *

(b) *Cache River National Wildlife Refuge.* Fishing is permitted on designated areas of the refuge subject to the following conditions:

(1) Fishing or entry is not permitted in the waterfowl sanctuary areas from November 1 through February 28.

(2) The ends of trotlines must consist of a length of cotton line that extends from the points of attachment into the water.

* * * * *

(d) *Holla Bend National Wildlife Refuge.* Fishing, boating and frogging are permitted subject to the following conditions:

(1) Fishing and boating in all waters from March 1 through October 31 only from one-half hour before sunrise to one-half hour after sunset.

(2) Frogging from April 15 through October 31 only on that part of the old river channel that connects to the Arkansas River channel.

* * * * *

3. Section 33.9 is amended by revising paragraph (i) to read as follows:

**§ 33.9 California.**

* * * * *

(i) *Salton Sea National Wildlife Refuge.* Fishing is permitted only on designated areas of the refuge inundated by the Salton Sea subject to the following conditions:

(1) Fishing is permitted from April 1 through September 30.

(2) Only boat fishing is permitted.

* * * * *

4. Section 33.13 is amended by revising paragraph (g)(1), adding two new sentences to the end of paragraph (g)(2) and revising paragraph (m)(4) as follows:

**§ 33.13 Florida.**

* * * * *

(g) *Lower Suwanee National Wildlife Refuge* * * *

(1) Fishing is permitted in interior creeks, sloughs and ponds from March 1 through October 31 only from sunrise to sunset except that fishing is not permitted in interior creeks, sloughs and ponds during quota big game hunts.

(2) * * * Boats are not permitted in refuge ponds. Boats may not be left on the refuge overnight.

* * * * *

(m) *St. Vincent National Wildlife Refuge* * * *

* * * * *

(4) Fishing seasons and largemouth bass length limits are as posted.

* * * * *

5. Section 33.17 is amended by revising paragraphs (a)(1) through (3), removing paragraph (a)(4); revising the last sentence of paragraph (b)(1), correcting the spelling of the word "Managers" in paragraph (b)(2), adding a last sentence to paragraph (b)(3), adding paragraphs (4) through (6); revising paragraph (c)(1), and removing paragraph (c)(6) as follows:

**§ 33.17 Illinois.**

(a) *Chautauqua National Wildlife Refuge.* * * *

(1) From December 15 through October 15 bank fishing is permitted and all refuge waters are open to fishing. From October 16 through December 14 fishing is permitted in the posted area that extends one-eighth of a mile around the Recreation Area, along Goofy Ridge Ditch, along the cross dike, and in all waters within the Public Hunting Area. Fishing is permitted during daylight hours only.

(2) The use of boats with motors greater than 25 horsepower is prohibited.

(3) Private boats must be removed from refuge waters overnight or moored at Boatyard No. 3.

(b) *Crab Orchard National Wildlife Refuge* * * *

(1) * * * All noncommercial fishing methods are permitted except underwater breathing apparatus is prohibited.

(2) * * * Managers * * *

(3) * * * It is unlawful to take largemouth bass between 12" to 15" in length from these lakes.

(4) Largemouth bass under 15" in length may not be taken from A–41, Bluegill, Blue Heron, Managers and Honkers Ponds.

(5) Largemouth bass under 21" in length may not be taken from Visitors Pond.

(6) It is unlawful to take catfish from their beds by submerging any object except hands under the water.

(c) *Mark Twain National Wildlife Refuge* * * *

(1) Fishing is permitted all year in the Big Timber and Gardner Divisions.

* * * * *

6. Section 33.18 is amended by adding paragraph (a)(6) as follows:

**§ 33.18 Indiana.**

(a) *Muscatatuck National Wildlife Refuge.* * * *

* * * * *

(6) Frogs and turtles may be taken by hook and line during daylight hours from areas open to fishing.

7. Section 33.22 is amended by revising paragraph (f) to read as follows:

**§ 33.22 Louisiana.**

* * * * *

(f) *Sabine National Wildlife Refuge.* Fishing, crabbing, crayfishing, and shrimp cast netting are permitted on designated areas of the refuge subject to the following conditions:

(1) Only fishing with rod and reel or pole and line is permitted. Shrimp may be taken only with a cast net. Crabs and crayfish may be taken only with ring nets up to 18 inches in diameter or hand lines. The use or possession of any other type of fishing, crabbing, crayfishing, and shrimping gear is prohibited except that persons using Hog Gulley, Headquarters, or West Cove Canals may only transport shrimp trawls, butterfly nets, or other nets from the boat ramps to Calcasieu Lake and return with their catch. Permits are required for sport jug fishing and gill netting.

(2) Fishing and public access is permitted from March 1 through October 15 on designated waterways and pools. Only bank fishing along Highway 27 is permitted year round.

(3) Fishing, crabbing, crayfishing, and shrimping is permitted from one hour before sunrise to one hour after sunset.

(4) Fishing in the East Cove unit is permitted year round except during the regular State duck hunting season. A 250-foot zone around Grand Bayou and Lambert Bayou water control structure is closed to public access and use except that boat access is permitted through the Grand Bayou water control structure.

(5) No person may take or possess more than 5 quarts of shrimp per vehicle per day except that the daily shrimp and possession limit is 5 gallons per vehicle during the State open inshore water season. Daily crab and crayfish limit is 100 pounds each per vehicle.

(6) Boats may not be dragged across levees. Outboard motors up to 25 horsepower are permitted in refuge pools. Outboard motors may be operated in designated refuge canals, waterways, and pools. The operation of any type of boat motor in the refuge marshes is prohibited.

* * * * *

8. Section 33.37 is amended by amending paragraph (c)(2) by adding new words to the end of the sentence, revising paragraph (c)(5), adding paragraph (c)(6) and revising paragraph (d)(3) as follows:

**§ 33.37 North Carolina.**

* * * * *

(c) *Mattamuskeet National Wildlife Refuge* * * *

* * * * *

(2) * * * from one-half hour before sunrise to one-half hour after sunset except that the Highway 94 causeway is open to fishing and crabbing 24 hours per day.

* * * * *

(5) Airboats and sailboats are not permitted.

(6) Bank fishing is prohibited along the entrance road from Highway 94 to the Refuge Headquarters.

(d) *Pee Dee National Wildlife Refuge*

* * *

* * * * *

(3) Only nonmotorized boats and boats with electric motors are permitted on Arrowhead Lake, Andrews Pond and Beaver ponds.

* * * * *

9. Section 33.40 is amended by redesignating paragraphs (a) through (e) as paragraphs (b) through (f) and adding new paragraph (a) to read as follows:

**§ 33.40 Oklahoma.**

(a) *Little River National Wildlife Refuge.* Fishing and frogging are permitted on designated areas of the refuge subject to the following conditions:

(1) Fishing is permitted in the area designated on the refuge fishing map brochure.

(2) Access to refuge fishing is limited to designated roads and trails.

* * * * *

10. Section 33.41 is amended by revising paragraph (g)(2), and adding paragraphs (3) through (5) as follows:

**§ 33.41 Oregon.**

* * * * *

(g) *Umatilla National Wildlife Refuge*

* * *

* * * * *

(2) Only non-motorized boats are permitted on refuge impoundments and ponds.

(3) Fishing is permitted only from 5:00 a.m. to 10:00 p.m.

(4) Impoundments and ponds in the Boardman Unit are closed to fishing.

(5) Bowfishing is prohibited.

* * * * *

11. Section 33.46 is amended by revising the second sentence and adding a third sentence to paragraph (e)(7), revising paragraph (e)(1), removing paragraph (e)(3) and adding paragraph (f) as follows:

**§ 33.46 Tennessee.**

(a) *Cross Creeks National Wildlife Refuge.* * * *

* * * * *

(7) * * * Largemouth bass from 12 inches to 15 inches must be immediately released unharmed. Possession of largemouth bass between 12 and 15 inches is prohibited.

* * * * *

(e) *Reelfoot Lake National Wildlife Refuge* * * *

(1) Fishing is permitted on the Long Point Unit (north of Upper Blue Basin) from March 15 through October 15 and on the Grassy Island Unit (south of the Upper Blue Basin) from February 1 through November 15.

* * * * *

(f) *Tennessee National Wildlife Refuge.* Fishing is permitted on designated portions of the refuge subject to the following conditions:

(1) The Duck River Bottoms and Busseltown Unit are closed to boat fishing from November 1 through March 15.

(2) Swamp Creek, Button Ford and Bennett's Creek embayments are closed to fishing from November 1 through March 15.

(3) Boats are restricted to "slow speed/minimum wake" on all refuge impoundments open to fishing.

* * * * *

12. Section 33.47 is amended by adding paragraphs (b) (4) and (5) and revising paragraph (d) as follows:

**§ 33.47 Texas.**

* * * * *

(b) *Arkansas National Wildlife Refuge.* * * *

(4) Fishermen must be off the refuge by dark.

(5) Fishermen must satisfy the Entrance Fee requirement authorized by the Emergency Wetlands Resources Act.

* * * * *

(d) *Hagerman National Wildlife Refuge.* Fishing is permitted on designated areas of the refuge subject to the following conditions:

(1) All refuge waters are open to fishing from April 1 through September 30.

(2) Fishing is restricted to the shoreline of Lake Texoma and Big Mineral Creek from October through March 31. Lines may not be attached to rubber bands, sticks, poles, trees or other fixed objects and are not permitted in refuge ponds or impoundments.

(3) Trotlines may be strung between anchored floats only. Lines may not be attached to rubber bands, sticks, poles, trees or other fixed objects and are not permitted in refuge ponds or impoundments.

(4) Fishing is not permitted from bridges or roadways.

13. Section 33.51 is amended by revising paragraphs (b)(1) through (2) and adding paragraphs (b)(4) through (5) to read as follows:

**§ 33.51 Washington.**

(b) *McNary National Wildlife Refuge.*

* * *

(1) Fishing is permitted on the Hanford Islands and Strawberry Island Divisions from July 1 through September 30.

(2) Fishing is permitted on the McNary Division from February 1 through September 30.

* * * * *

(4) Fishing is permitted only from sunrise to sunset.

(5) Bowfishing is prohibited.

* * * * *

Dated: February 13, 1989.

**Becky Norton Dunlop,**

*Assistant Secretary for Fish and Wildlife and Parks.*

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

### 50 CFR Part 260

**[Docket No. 90131–9031]**

### Inspection and Certification; Fees and Charges

**AGENCY:** National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of 1989 inspection fees.

**SUMMARY:** NOAA announces a change in the established rates for voluntary Department of Commerce fishery product grading and certification services consistent with its intent to provide inspection services at the lowest appropriate cost. The change results from a pay raise of 4.1 percent for Federal employees effective January 1, 1989, and increases in other operating costs such as rent, communications, and

VOL 54 ISS 48 MR 14 1989 UMI

utilities. The change represents an increase of 4.9 percent in the basic hourly rates.

**EFFECTIVE DATE:** January 1, 1989.

**FOR FURTHER INFORMATION CONTACT:** Richard V. Cano, Division Chief, Inspection Services Division, National Marine Fisheries Service, Silver Spring, MD 20910, Phone 301–427–2355.

**SUPPLEMENTARY INFORMATION:** Regulations at 50 CFR 260.70 authorize the Secretary of Commerce to review and revise annually the rates for voluntary fishery product inspection, grading, and certification services by publishing a notice of fee changes in the **Federal Register**. The revised hourly rates reflect a 4.1 percent salary raise for Federal employees and increases in other operating costs such as rent, communications, and utilities. The basic hourly rates are increased by 4.9 percent. Below is the schedule of fees effective January 1, 1989. The procedure to calculate the Type II hourly fee has been changed by adding 40 percent, rather than 50 percent, to the Type I fee. This change will be reflected in an amendment to the regulations. The fees outlined for the State of Alaska are for services provided by cross-licensed State of Alaska inspectors. Charges for services provided in Alaska by NMFS inspectors will be at the rates as specified, plus cost of living allowances.

(a) Type I—Official establishment and product inspection—contract basis:

| | Per hour |
|---|---|
| Regular (except Alaska) | $28.75 |
| Overtime (except Alaska) | 43.15 |
| Sunday and legal holidays (2 hrs. minimum) (except Alaska) | 57.50 |

(1) The contracting party will be charged at an hourly rate of $28.75 per hour for regular time; (2) $43.15 per hour for overtime in excess of 8 hours per shift per day; and (3) $57.50 per hour for Sunday and national legal holidays for services performed by inspectors at official establishment(s) operating under Federal inspection. In addition to any hourly service charge, a night differential fee equal to 10 percent of the employee's hourly salary will be charged for each hour of service provided after 6:00 p.m. and before 6:00 a.m. The contracting party will be billed monthly for services rendered in accordance with contractual provisions at the rates prescribed in this section. Products designated in a contract will be inspected during processing at the hourly rate for regular time, plus overtime, when appropriate.

(b) Type II—Lot inspection—Official and unofficially drawn samples:

| | Per hour |
|---|---|
| Regular (except Alaska) | $40.25 |
| Overtime (except Alaska) | 60.40 |
| Sunday and legal holidays (2 hrs. minimum) (except Alaska) | 80.50 |
| Minimum fee (except Alaska) | 30.20 |

(1) For lot inspection services performed between the hours of 7:00 a.m. and 5:00 p.m., Monday through Friday—$40.25 per hour.

(2) For lot inspection services performed at times Monday through Friday other than 7:00 a.m. to 5:00 p.m., and on Saturdays (2 hrs. minimum)—$60.40 per hour.

(3) Sunday and national legal holidays (2 hrs. minimum)—$80.50 per hour.

(4) The minimum service fee to be charged and collected for inspection of any lot or lots of products requiring less than 1 hour will be $30.20.

(c) Type III—Miscellaneous inspection and consultative service.

When any inspection or related service such as, but not limited to, initial and final establishment surveys, appeal inspections, sanitation evaluation, Sanitary Inspected Fish Establishment (SIFE) inspections, sampling, product evaluation, and label and product specification review, requires charges to which the foregoing sections are clearly inapplicable, charges will be based on the rates set forth below:

| | Per hour |
|---|---|
| Regular (except Alaska) | $35.95 |
| Overtime (except Alaska) | 53.95 |
| Sunday and legal holidays (2 hrs. minimum) (except Alaska) | 71.90 |
| Minimum fee (except Alaska) | 27.00 |

(1) For miscellaneous inspection and consultative services performed between the hours of 7:00 a.m. and 5:00 p.m., Monday through Friday—$35.95 per hour.

(2) For miscellaneous inspection and consultative services performed Monday through Friday other than 7:00 a.m. to 5:00 p.m., and on Saturdays (2 hrs. minimum)—$53.95 per hour.

(3) For miscellaneous inspection and consultative services performed on Sunday and national legal holidays (2 hrs. minimum)—$71.90 per hour.

(4) The minimum service fee to be charged and collected for miscellaneous inspection and consultative services requiring less than 1 hour will be $27.00.

(d) The hourly rates for the State of Alaska as performed by cross-licensed State of Alaska inspectors are as follows.

Charges for services provided in Alaska by NMFS inspectors will be at the rates stated previously, plus cost of living allowances. For Type I inspection, in addition to any hourly service charge, a night differential fee equal to 10 percent of the employee's hourly salary will be charged for each hour of service provided after 6:00 p.m. and before 6:00 a.m.

STATE OF ALASKA

| | Area | | |
|---|---|---|---|
| | Aleutian chain | South East and South Central; Anchorage, Kenai, Juneau, Ketchikan | Remainder of Alaska; Kodiak, Bristol Bay, Dillingham |
| Type I | (per hour) | (per hour) | (per hour) |
| Regular time | $36.45 | $30.05 | $32.20 |
| Overtime | 50.30 | 41.50 | 44.45 |
| Sunday and legal holidays | 62.70 | 51.70 | 55.40 |
| Type II | | | |
| Regular time | 46.30 | 38.60 | 40.90 |
| Overtime | 63.90 | 55.10 | 58.10 |
| Sunday and legal holidays | 83.80 | 71.00 | 75.25 |
| Minimum | 38.00 | 31.85 | 33.55 |
| Type III | | | |
| Regular time | 40.45 | 33.65 | 35.75 |
| Overtime | 53.80 | 45.10 | 48.30 |
| Sunday and legal holidays | 69.20 | 57.90 | 62.60 |
| Minimum fee | 36.00 | 29.95 | 32.20 |

(e) Analytical services: Applicants requesting specific analyses to be performed in a National Marine Fisheries Service laboratory will be charged at the prevailing rate. Analyses performed in a private laboratory will be charged at the current rate of that laboratory. Charges based on these fees will be in addition to any hourly rates charged for lot, miscellaneous, and consultative inspection service as well as to any hourly rates charged for inspection services provided under a contract at official establishments. A surcharge of 20 percent of the total charges for analytical services will be charged for administrative purposes.

**Classification**

This action is taken under the authority of 50 CFR 260.70 and complies with Executive Order 12291. It is not subject to the requirements of the

Regulatory Flexibility Act. It does not contain any information request as defined in the Paperwork Reduction Act. (16 U.S.C. 742e and U.S.C. 1622, 1624.).

Dated: January 4, 1989.

BILLING CODE 3510–22–M

## 50 CFR Part 655

**[Docket No. 81020–9009–2]**

## Atlantic Mackerel, Squid, and Butterfish Fisheries

**AGENCY:** National Marine Fisheries Service (NMFS), NOAA, Commerce.

**ACTION:** Notice of Atlantic mackerel specification increase.

**SUMMARY:** NOAA issues this notice to increase the initial optimum yield (IOY) specification for Atlantic mackerel as required by the regulations governing this fishery. This increase is assigned to the total allowable level of foreign fishing (TALFF) specification. Regulations governing the Atlantic mackerel fishery require publication in the **Federal Register** of any adjustments, accompanied by reasons for such adjustments. This action is intended to foster the goal of the Fishery Management Plan for the Atlantic Mackerel, Squid, and Butterfish Fisheries (FMP) by creating benefits for the U.S. fishing industry.

**DATES:** Effective March 9, 1989. Comments are invited until March 24, 1989.

**FOR FURTHER INFORMATION CONTACT:** Kathi L. Rodrigues, 508–281–3600, ext. 324.

**SUPPLEMENTARY INFORMATION:** The regulations at § 655.21(b)(2)(v) provide that initial annual specifications may be adjusted by the Regional Director, NMFS Northeast Region, after consulting with the Mid-Atlantic Fishery Management Council (Council). The Regional Director may adjust the IOY at any time during the fishing year if new information indicates that the IOY should be increased to produce maximum net benefits to the United States. The determination that maximum benefits will accrue is based upon consideration of factors outlined in the FMP.

Under 50 CFR 655.22, final initial specifications for Atlantic mackerel were published on January 19, 1989, (54 FR 2134) for the fishing year January 1 through December 31, 1989. The IOY for Atlantic mackerel resulted in a TALFF set at 30,000 metric tons (mt) and joint venture processing (JVP) set at 10,000 mt. The domestic mackerel industry, still considered in the stages of development, derives benefits from the purchase requirements associated with TALFF allocations. Specifically, foreign nations are required to purchase 3 mt of JVP and 1 mt of U.S processed product for every 9 mt of TALFF allocated.

To ensure that purchase requirements are met, initial allocations of TALFF were made in increments of 25 percent and JVP in 50 percent increments. Additional allocations were to be released when evidence was provided that these conditions were met.

In February, the Regional Director determined that four foreign nations had successfully met purchase requirements that warranted increases in IOY, domestic annual harvesting (DAH), JVP and TALFF (54 FR 7777, February 23, 1989). Additional purchase conditions have been successfully met by two foreign nations and the Regional Director, after consultation with the Council, has determined that an increase of 10,000 mt to the Atlantic mackerel IOY would benefit the domestic industry by continuing the viability of joint venture operations.

In accordance with § 655.22(f), notice is hereby given that the IOY for Atlantic mackerel of 91,000 mt is increased by 10,000 mt to a total of 101,000 mt. TALFF is increased by 10,000 mt from 41,000 mt to 51,000 mt.

**Classification**

This action is authorized by 50 CFR Part 655 and complies with Executive Order 12291.

Pursuant to 5 U.S.C. 551(d), in view of the need to avoid disruption of the foreign fishery and to maximize benefits to the domestic industry, NOAA has determined for good cause to waive the delay in the effective date of this notice.

# Proposed Rules

Federal Register
Vol. 54, No. 48
Tuesday, March 14, 1989

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## NUCLEAR REGULATORY COMMISSION

### 10 CFR Part 31

[Docket No. PRM-31-4]

### GENE-TRAK Systems; Withdrawal of Petition For Rulemaking

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Petition for rulemaking; withdrawal.

**SUMMARY:** The Nuclear Regulatory Commission (NRC) is withdrawing, at the petitioner's request, a petition for rulemaking filed by GENE-TRAK System (PRM-31-4). The petition for rulemaking requested that the NRC established that 100 microcuries of phosphorus-32 used in GENE-TRAK Salmonella and Lisateria assays by a food laboratory is an exempt quantity under a general license according to 10 CFR 31.11. The petitioner is withdrawing the petition because of the introduction of new products and resulting changes in marketing strategy.

**ADDRESSES:** A copy of the petitioner's letter requesting withdrawal of the petition is available for public inspection or copying for a fee in the NRC Public Document Room, 2120 L Street, NW., lower level of the Gelman Building, Washington, DC 20555. A single copy of the petitioner's leter requesting the withdrawal of the petition may be obtained by writing the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

**FOR FURTHER INFORMATION CONTACT:** Michael T. Lesar, Acting Chief, Rules Review Section, Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone: 301-492-7758 or Toll Free: 800-368-5642.

Dated at Rockville, Maryland, this 9th day of March 1989.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

*Secretary of the Commission.*

## DEPARTMENT OF COMMERCE

### 15 CFR Part 1150

[Docket No. 80348-8048]

### Marking of Toy, Look-Alike and Imitation Firearms

**AGENCY:** Technology Administration, Commerce.

**ACTION:** Proposed rule.

**SUMMARY:** The Technology Administration of the United States Department of Commerce is today proposing rules to implement section 4 of the Federal Energy Management Improvement Act of 1988 ("Act") (Pub. L. No. 100-615) which prohibits the manufacturing, entering into commerce, shipping, transporting, or receipt of any toy, look-alike, or imitation firearm ("device") unless such device contains, or has affixed to it, a marking approved by the Secretary of Commerce. The proposed rule sets forth the method of marking established by section 4(b)(1) of the Act, an alternative method of marking when a device is not capable of being marked by the method established by section 4(b)(1), and three alternative methods of marking which may be used in all instances. In addition, the rule would waive marking requirements for any toy, look-alike, or imitation firearm that will be used only in the theatrical, movie, or television industries. Comments from the public are invited.

**DATE:** Comments on this proposed rule are invited and will be considered if received in writing no later than April 13, 1989.

**ADDRESSES:** Comments on the proposed rule should be submitted in writing to: The Under Secretary for Technology, Room 4203, Herbert Hoover Building, United States Department of Commerce, Washington, DC 20230. The public record for this rulemaking which will include all comments received is available for inspection and copying in the Department of Commerce's Central Reference and Records Inspection Facility, 14th Street between E Street and Constitution Avenue, NW., Washington, DC.

**FOR FURTHER INFORMATION CONTACT:** Dr. Stanley I. Warshaw, Associate Director for Industry and Standards, National Institute of Standards and Technology, (301) 975-4000, FAX (301) 926-0647.

**SUPPLEMENTARY INFORMATION:** Section 4(a) of the Federal Energy Management Improvement Act of 1988 provides that "[i]t shall be unlawful for any person to manufacture, enter into commerce, ship, transport, or receive any toy, look-alike, or imitation firearm unless such firearm contains, or has affixed to, a marking approved by the Secretary of Commerce * * *." 15 U.S.C. 5001(a)]. Section 4(b)(1) of the Act establishes as an initial acceptable marking a permanently affixed, blaze orange plug inserted in the barrel of the toy, look-alike, or imitation firearm, recessed no more than 6 millimeters from the muzzle end of the barrel, and made an integral part of the device. 15 U.S.C. 5001(b)(1). Section 4(b)(2) authorizes the Secretary to approve an alternative marking for any toy, look-alike, or imitation firearm not capable of being marked with the requisite blaze orange plug and to waive the marking requirements for any device that will be used only in the theatrical, movie, or television industries. 15 U.S.C. 5001(b)(2). Section 4(b)(3) authorizes the Secretary to adjust or change the marking system established pursuant to sections 4(b) (1) & (2), after consulting with interested persons. 15 U.S.C. 5001(b)(3).

The Technology Administration held a public workshop at the National Institute of Standards and Technology, Gaithersburg, Maryland, on February 9, 1989, on the marking requirements of the Act. (See 53 FR 50987, Dec. 19, 1988). The workshop was attended by forty representatives of trade associations, manufacturers, importers, distributors and Federal agencies. Many attendees brought samples of toy, look-alike, and imitation firearms. Although not requested, written comments were submitted in advance and subsequent to the workshop. All written comments received will be placed in the record of this rulemaking and will be available for public inspection.

Based on the comments received and consultations at the workshop and elsewhere with trade associations, manufacturers, importers, distributors, collectors, retailers, police chiefs, and Federal agencies, this proposed rule would maintian the blaze orange plug marking established by section 4(b)(1) and establish an alternative system of marking for water guns, air-soft guns, light emitting guns or other ejecting toy, look-alike or imitation firearms which, as such, can not be marked with a plug in the muzzle end of the barrel because it would restrict the opening necessary to discharge such things as water, non-metallic projectiles, and light. In such an instance, the required marking would be a blaze orange marking permanently affixed to the exterior surface of the barrel and covering the circumference of the barrel and extending from the muzzle end for a depth of at least 6 millimeters. The proposed rule also would adjust the statutory marking system by permitting three other methods of marking for use in the alternative irrespective of whether the device could be marked with the blaze orange plug or blaze orange muzzle marking. The three alternatives would be to mark the device at manufacture by: (1) Constructing it entirely of transparent or translucent materials which permit unmistakable observation of the device's complete contents; (2) permanently coloring the entire exterior surface of the device bright red, bright orange, bright yellow, bright green, or bright blue, either singly or as the predominant color in combination with other colors in any pattern; or (3) permanently coloring the entire exterior surface of the device predominantly in white in combination with one or more of the colors bright red, bright orange, bright yellow, bright green, or bright blue in any pattern. These alternatives were selected because they represent standard industry practice for most toy, look-alike, and imitation firearms and, in the opinion of those consulted, are sufficient to identify the device as a toy, look-alike, or imitation firearm rather than as a real firearm. Finally, the proposed rule would waive marking requirements for any toy, look-alike, or imitation firearm that only will be used in the theatrical, movie, or television industries.

Section 4(c) of the Act specifically excludes from the Act's marking requirements or any marking requirements established thereunder look-alike, non-firing, collector replicas of antique firearms designed, manufactured, and produced prior to 1898, and traditional B-B, paint-ball, or pellet-firing air guns that expel a projectile through the force of air pressure. 15 U.S.C. 5001(c). However, it is clear from the legislative history of section 4 that it was the intent of the Congress to also exclude from marking requirements traditional B-B, paint-ball, and pellet-firing air guns that expel a projectile through the force of compressed gas or mechanical spring action, or combination thereof. Accordingly, the proposed rule would exclude from marking requirements look-alike, non-firing, collector replicas of antique firearms designed, manufactured, and produced prior to 1898, and traditional B-B, paint-ball, or pellet-firing air guns that expel a projectile through the force of compressed air, compressed gas or mechanical spring action, or any combination thereof.

**Additional Information:**

*Executive Order 12291*

The Under Secretary for Technology has determined that this proposed rule is not a major rule within the meaning of section 1(b) of Executive Order 12291 because it will not result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, state or local government agencies or geographic regions; or,

(3) Significant adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Therefore, preparation of a Regulatory Impact Analysis is not required under Executive Order 12291.

*Executive Order 12612*

This proposed rule does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under Executive Order 12612.

*Executive Order 12372*

This proposed rule does not involve Federal financial assistance, direct Federal development, or the payment of any matching funds from a state or local government. Accordingly, the requirements of Executive Order 12372 are not applicable to this proposed rule.

*Executive Order 12662*

The Under Secretary for technology has determined that a 75-day comment period otherwise required under Executive Order 12662 would frustrate the achievement of ligitimate domestic objectives within the meaning of section (1)(b)(1) of Executive Order 12662. A 30-day comment period is being allowed.

*Executive Order 12630*

This proposed rule, if adopted, would not pose significant takings implications within the meaning of Executive Order 12630.

*Regulatory Flexibility Act*

The General Counsel of the Department of Commerce has certified to the Chief Counsel for Advocacy of the Small Business Administration that this proposed rule, if adopted, will not have a significant economic impact on a substantial number of small entities because the alternative markings conform to existing industry practices for most toy, look-alike, and imitation firearms, thus reducing the rule's impact to only where such practices are not followed. Thus, As a result, a Regulatory Flexibility Analysis is not required to be prepared under the Regulatory Flexibility Act.

*Paperwork Reduction Act*

This proposed rule does not contain a collection of information requirement subject to the requirements of the Paperwork Reduction Act.

*National Environmental Policy Act*

This proposed rule, if adopted, will not significantly affect the quality of the human environment. Therefore, an environmental assessment or Environmental Impact Statement is not required to be prepared under the National Environmental Policy Act of 1969.

**List of Subjects in 15 CFR Part 1150**

Commerce, Business and industry, Labeling, Hobbies, Imports, Exports, Shipping, Toys, Transportation, Freight.

Date: March 7, 1989.

**Ernest Ambler,**

*Acting Under Secretary for Technology.*

For the reasons set forth in the preamble, it is proposed that Title 15, Subtitle B of the Code of Federal Regulations be amended by adding a Chapter XI, consisting of Part 1150, to read as follows:

**CHAPTER XI—TECHNOLOGY ADMINISTRATION, DEPARTMENT OF COMMERCE**

**PART 1150—MARKING OF TOY, LOOK-ALIKE AND IMITATION FIREARMS**

Sec.

1150.1 Applicability.
1150.2 Prohibitions.
1150.3 Approved markings.

VOL 54 ISS 48 MR 14 1989 UMI

Sec.
1150.4 Waiver.
1150.5 Preemption.
Authority: 15 U.S.C. 5001.

**§ 1150.1 Applicability.**

This part applies to toy, look-alike, and imitation firearms ("devices") having the general appearance, shape, and/or configuration of a firearm and produced or manufactured and entered into commerce on or after May 5, 1989 other than look-alike, non-firing, collector replicas of antique firearms modelled on a firearm designed, manufactured, and produced prior to 1898, and traditional B–B, paint-ball, or pellet-firing air guns that expel a projectile through the force of compressed air, compressed gas or mechanical spring action, or any combination thereof, as described in ASTM Standard F 589–85.

**§ 1150.2 Prohibitions.**

No person shall manufacture, enter into commerce, ship, transport, or receive any toy, look-alike, or imitation firearm ("device") covered by this part as set forth in § 1150.1 unless such device contains, or has affixed to it, one of the markings set forth in § 1150.3, or unless this prohibition has been waived by § 1150.4.

**§ 1150.3 Approved markings.**

The following markings are approved by the Secretary of Commerce:

(a) A blaze orange (*Federal Standard 595–A, Jan. 1984, color no. 12197*) solid plug permanently affixed to the muzzle end of the barrel as an integral part of the entire device and recessed no more than 6 millimeters from the muzzle end of the barrel.

(b) For any water gun, air-soft gun, light-emitting gun or other ejecting toy, look-alike, or imitation firearm having a opening in the muzzle end of the barrel to discharge such things as water, non-metallic projectiles, and light, a blaze orange (*Federal Standard 595–A, Jan. 1984, color no. 12197*) marking permanently affixed to the exterior surface of the barrel, covering the circumference of the barrel from the muzzel end for a depth of at least 6 millimeters.

(c) Construction of the device entirely of transparent or translucent materials which permit unmistakable observation of the device's complete contents.

(d) Coloration of the entire exterior surface of the device in bright red, bright orange, bright yellow, bright green, or bright blue, either singly or as the predominant color in combination with other colors in any pattern.

(e) Coloration of the entire exterior surface of the device predominantly in white in combination with one or more of the colors bright red, bright orange, bright yellow, bright green, or bright blue in any pattern.

**§ 1150.4 Waiver.**

The prohibitions set forth in § 1150.2 are waived for any device that only will be used in the theatrical, movie, or television industries.

**§ 1150.5 Preemption.**

In accordance with section 4(g) of the Federal Energy Management Improvement Act of 1988 (15 U.S.C. 5001(g)), the provisions of that Act and of this part supersede any provisions of State or local laws or ordinances which provide for markings or identification inconsistent with the provisions of section 4 of that Act or of this part.

## SECURITIES AND EXCHANGE COMMISSION

**17 CFR Part 240**

**[Release No. 34–26590; File No. S7–8–89]**

## Reporting of Beneficial Ownership in Publicly-Held Companies

**AGENCY:** Securities and Exchange Commission.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** The Securities and Exchange Commission ("Commission") today is publishing for comment proposals to amend the rules relating to the reporting of beneficial ownership in publicly-held companies. The proposals are intended to improve the effectiveness of the beneficial ownership disclosure scheme, while at the same time reducing the reporting obligations of passive investors.

**DATE:** Comments should be received on or before May 15, 1989.

**ADDRESS:** Comments should be submitted in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Comment letters should refer to File No. S7–8–89. All comments received will be available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC 20549.

**FOR FURTHER INFORMATION CONTACT:** David A. Sirignano or Richard E. Baltz at (202) 272–3097, Office of Tender Offers, Division of Corporation Finance.

**SUPPLEMENTARY INFORMATION:** The Commission is proposing for comment amendments to Rules 13d–1,[1] 13d–2,[2] and 13d–7,[3] and Schedules 13D [4] and 13G.[5]

### I. Executive Summary

The beneficial ownership reporting requirements embodied in sections 13(d) [6] and 13(g) [7] of the Securities Exchange Act of 1934 ("Exchange Act") [8] and the regulations adopted thereunder [9] are intended to provide to investors and to the subject issuer information about accumulations of securities that may have the ability to change or influence control of the issuer. The statutory and regulatory framework also establishes a comprehensive reporting system for gathering and disseminating information about the ownership of equity securities.

These provisions require, subject to exceptions, that any person who acquires more than five percent of a class of equity securities registered under section 12 of the Exchange Act [10] and other specified equity securities (collectively, "subject securities") [11] report such acquisition on Schedule 13D within 10 days. Persons holding more than five percent of a class of subject securities at the end of the calendar year, but not required to report on Schedule 13D, must file a short-form Schedule 13G within 45 days after December 31. These Schedule 13G filers include persons exempt from the

[8] 15 U.S.C. 78a *et seq.*
[9] Regulation 13D–G, Rule 13d–1 *et seq.* [17 CFR 240.13d–1 *et seq.*]
[10] 15 U.S.C. 78*l*.
[11] Acquisitions of equity securities that would have been registered under Section 12 except for the insurance company exemption in section 12(g)(2)(G) [15 U.S.C. 78*l*(g)(2)(G)], or that are issued by a closed-end investment company registered under the Investment Company Act of 1940 [15 U.S.C. 80a–1 to 80a–52], also are subject to the beneficial ownership reporting requirements. In addition, if a person has the right to acquire beneficial ownership of a subject security within 60 days (A) through the exercise of any warrant, option, or right, (B) through the conversion of a security, (C) pursuant to the power to revoke a trust, discretionary account or similar arrangement, or (D) pursuant to the automatic termination of a trust, discretionary account, or similar arrangement, such person shall be deemed to be the beneficial owner of the subject securities which may be acquired through the exercise or conversion of such security or power. If a security or power specified by (A), (B), (C), or (D) is acquired with the purpose or effect of changing or influencing control or as a participant in a transaction having such a purpose or effect, the person is deemed a beneficial owner of the subject security immediately upon acquisition. Rule 13d–3(d)(1)(i) [17 CFR 240.13d–3(d)(1)(i)].

requirement of Section 13(d) [12] as well as specified institutional investors holding securities in the ordinary course of business and not with a control purpose.[13]

Based upon its experience in administering the beneficial ownership rules, the Commission is proposing changes to improve the meaningfulness to investors of filings on Schedule 13D, while at the same time reducing the reporting obligations of passive non-institutional investors, who would become entitled to use the short-form Schedule 13G instead of the Schedule 13D.[14] The Commission preliminarily believes that Schedule 13G provides adequate information when the filing person has a passive investment purpose—that is, when the acquisition is not for the purpose, and does not have the effect, of changing or influencing the control of the issuer, and the person is not participating in a transaction having such a purpose or effect.

The proposed amendments would alter the present beneficial ownership reporting scheme in a number of ways. In addition to the two current categories of Schedule 13G filers (institutional investors and persons reporting exempt acquisitions), a third category (passive non-institutional investors) would be created, significantly expanding the classes of persons eligible to file on the short-form. An institutional investor would continue to be able to file a short-form report on Schedule 13G 45 days after the year's end, provided that the requirements of current Rule 13d–1(b)(1) are satisfied and the institutional investor's beneficial ownership does not equal or exceed 20 percent of the class at any time. Any other person who acquires or holds, with a passive investment purpose, more than five percent (but not 20 percent or more) of a class of subject securities also would be permitted to file a short-form report on Schedule 13G, rather than the long-form report on Schedule 13D currently required for most investors, within 10 days after the acquisiton. Exempt acquisitions also would be reported on Schedule 13G within a 10-day period but would not be subject to the 20 percent or more limitation.

Both institutional and non-institutional Schedule 13G filers that determined that they could no longer make the passive investment purpose certification would be required to file a Schedule 13D within 10 days of a change in purpose. A non-exempt acquisition causing any person, including an institutional investor, to own beneficially 20 percent or more of a class of subject securities also would disqualify that person from filing on Schedule 13G and trigger a requirement for a Schedule 13D filing within 10 days. An investor required to file a Schedule 13D because it either had changed its investment purpose or acquired 20 percent or more of a class of subject securities would be subject to a waiting period ("cooling-off period") during which such person could not vote or direct the voting of the subject securities, or acquire an additional beneficial ownership interest in any securities either of the issuer or of any person controlling the issuer. An investor required to file a Schedule 13D because it acquired 20 percent or more of a class of subject securities would be subject to a cooling-off period only until the filing of a Schedule 13D. However, an investor that must file a Schedule 13D because of a change in investment purpose would be subject to a cooling-off period from the time of the change in investment intent until the expiration of the tenth day from the date of the filing of a Schedule 13D. The current cooling-off period applicable only to institutional investors [15] would not be retained.

As is required currently, amendments to disclose any other changes in the information reported on Schedule 13G would be required only on an annual basis,[16] so long as beneficial ownership does not exceed 10 percent of the class of subject securities, calculated at the end of the month when that ownership level is reached.[17]

A chart summarizing the current reporting obligations and the effects of the proposed rule amendments appears below in Part III.F.

Finally, the Commission is proposing technical amendments to the beneficial ownership rules. First, the proposed amendments would require that a copy of a Schedule 13D or 13G, or amendments thereto, filed with respect to holdings of a class of securities quoted on the National Association of Securities Dealers Automated Quotation System ("NASDAQ") be provided to the National Association of Securities Dealers, Inc. ("NASD") to parallel the requirements for exchange-traded securities. Second, proposed amendments to Rule 13d–1(c) would delete as no longer necessary the grandfather provisions adopted in 1978. Additional related and clarifying amendments also are proposed.

### II. Background

As part of the Williams Act Amendments of 1968,[18] Congress added section 13(d) to the Exchange Act to require any person (or group of persons) who, as a result of an acquisiton, becomes the beneficial owner of more than five percent of a class of equity securities registered under section 12 of the Exchange Act or other subject securities [19] to send to the issuer of the security and to each exchange on which the security is traded and to file with the Commission a report disclosing the acquistion and other information about the acquiror and its plans or proposals within 10 days after the acquisition. Section 13(d) was intended to provide information to the public and the subject company about accumulations of its equity securities in the hands of persons who then would have the potential to change or influence control of the issuer.[20]

Certain types of acquisitions unrelated to a potential change or influence of control are exempt from

[12] This category consists of persons filing on Schedule 13G because their acquisitions are statutorily or administratively exempt (collectively, "exempt acquisitions") from reporting on Schedule 13D. *See* Part II for a summary of the exempt acquisitions.
[13] Such persons include a broker or dealer registered under section 15(b) of the Exchange Act [15 U.S.C. 78o(b)], a bank as defined in section 3(a)(6) of the Exchange Act [15 U.S.C. 78c(a)(6)], an insurance company as defined in Section 3(a)(9) of the Exchange Act [15 U.S.C. 78c(a)(9)], an investment company registered under Section 8 of the Investment Company Act of 1940 [15 U.S.C. 80a–8], an investment adviser registered under section 203 of the Investment Advisers Act of 1940 [15 U.S.C. 80b–1 *et seq.*], an employee benefit plan or pension fund that is subject to the provisions of Employee Retirement Income Security Act [codified principally in 29 U.S.C. 1001–1461], and related holding companies and groups (collectively, "institutional investors"). Rule 13d–1(b)(1)(ii) [17 CFR 240.13d–1(b)(ii)].
[14] The Commission also has recommended to Congress that the period for filing an initial beneficial ownership report be reduced from ten days to five business days and that the filing person be prohibited from acquiring additional securities until the filing is made with the Commission. In addition, the Commission has endorsed the imposition of civil penalties for violations of section 13(d). *See* Statement of David S. Ruder, Chairman of the Securities and Exchange Commission, Before the House Subcommittee on Telecommunications and Finance, September 17, 1987, and Statement of Charles C. Cox, Acting Chairman of the Securities and Exchange Commission, Before the Senate Committee on Banking, Housing and Urban Affairs, June 23, 1987.
[15] Rule 13d–1(b)(3)(ii) [17 CFR 240.13d–1(b)(3)(ii)].
[16] Rule 13d–2(b) [17 CFR 240.13d–2(b)].
[17] Rule 13d–1(b)(2) [17 CFR 240.13d–1(b)(2)]. Under the proposal, this provision would apply to both institutional and non-institutional investors, but not to persons reporting exempt acquisitions.
[18] Pub. L. 90–439, 82 Stat. 454, 15 U.S.C. 78m(d), 78m(e), 78n(d), 78n(e) and 78n(f).

VOL 54 ISS 48 MR 14 1989 UMI

reporting by statute, regulation and Commission interpretation. Thus, persons who acquire not more than two percent of a class of subject sercurities within a 12-month period are exempted by Section 13(d)(6)(B).[31] Section 13(d)(6)(C) [32] exempts from reporting acquisitions by the issuer of its own securities. Section 13(d)(6)(A) [33] exempts from reporting acquisitions of subject securities acquired in a stock-for-stock exchange which is registered under the Securities Act of 1933,[34] because Congress believed at that time that shareholders of the issuer would, through the receipt of a prospectus, receive all material information necessary to make an informed decision whether to hold stock or exchange it for the stock of the company making the exchange offer.[35] Section 13(d)(6)(D) [36] empowers the Commission to exempt other acquisitions or proposed acquisitions not entered into with a purpose or effect of changing or influencing control of the issuer. The Commission has used this authority to permit institutional investors acquiring securities in the ordinary course of business to file a short-form Schedule 13G.[37]

The beneficial ownership reporting provisions apply only to acquisitions of voting securities.[38] Because of the reduction in the reporting threshold, persons who acquire more than five percent, but less than 10 percent, or a subject security before January 1, 1970, also are not required to file a Schedule 13D.[39] In addition, the Commission has expressed the view that section 13(d) does not apply to acquisitions occurring before the securities are registered pursuant to section 12 of the Exchange Act.[40]

[38] Rule 13d-1(d) [17 CFR 240.13d-1(d)].

[39] As originally enacted, the Williams Act required reporting by any person or group acquiring more than 10 percent of an equity security. The threshold was reduced to more than five percent in 1970. *See* Pub. L. No. 91–567, §§ 1, 2, 84 Stat. 1497.

[40] Release No. 34–13346 (November 20, 1976) [43 FR 55731, 55742]. Securities acquired before the effective date of the registration statement, however, are included in the calculation of the 2 percent exemption under section 13(d)(6)(B).

In addition, the staff has expressed the view that holdings by non-control persons of more than five percent resulting from a decrease in the outstanding number of shares also are not reportable. Because the person has not taken any action to increase its beneficial ownership, no acquisition has occurred for the purposes of Rule 13d-1(a). Acquisitons of additional securities are subject to the exemption in section 13(d)(6)(B). *See Harold Martin* (available October 4, 1979).

The exemptions created gaps in the beneficial ownership reporting scheme permitting persons to own more than five percent of a class of subject securities without reporting such ownership. In 1977, Congress enacted section 13(g) of the Exchange Act [41] to provide for a comprehensive system of disclosure of ownership interests.[42] Section 13(g) requires any person who is directly or indirectly the beneficial owner or more than five percent of a class of subject securities at the end of the calendar year, except for the issuer of the securities, to send to the issuer and file with the Commission a statement of Schedule 13G. Section 13(g) was intended to improve disclosure to issuers and the marketplace and to "supplement [section 13(d)] by providing legislative authority for certain additional disclosure requirements that in some cases could not be imposed administratively." [43] On the face, section 13(g) woudld require a filing regardless of whether a person was required to report ownership under other sections of the Exchange Act; however, the Commission was directed "to take such steps as are necessary and appropriate in the public interest to achieve centralized reporting of the information, to avoid unnecessary duplicative reporting, and to minimize the compliance burden on persons required to report." [44]

Pursuant to its rulemaking authority under sections 13(d) and 13(g), the Commission adopted a comprehensive system of beneficial ownership reporting. Unless otherwise exempt, all persons acquiring more than five percent of a class of voting subject securities must file a Schedule 13D with the Commission within 10 days of the acquisition disclosing in detail information concerning the purchaser, the purpose of the acquisition and any plans or proposals of the purchaser for the issuer.[45] The Schedule 13D must be amended promptly to disclose any material changes in the information reported.[46]

Pursuant to section 13(g), the Commission adopted a short-term beneficial ownership report. This report must be filed by holders of mroe than five percent of a class of equity securities who are exempt from filing a Schedule 13D.[47] Schedule 13G requires disclosure of such person's identity, residence, citizenship, and the number and description of the shares in which such person has an interest, including the nature of such interest. The Schedule 13G must be filed within 45 days after the close of the calendar year and amended on an annual basis if the percentage of the class of subject securities beneficially owned as of December 31 remains more than five percent.[48]

In addition to persons reporting exempt acquisitions, institutional investors that can represent that the securities were acquired in the ordinary course of business and not with the purpose or effect of changing or influencing control of the issuer also may file a Schedule 13G rather than a Schedule 13D.[49] An institutional investor is permitted to amend on an annual basis, unless its beneficial ownership exceeds 10 percent of the outstanding securities, in which case an amendment must be filed within 10 days after the close of the first month in which the interest exceeds 10 percent, and thereafter within 10 days after the end of the month if a five percent change occurs, computed as of the last day of the month.[50] If such an institutional investor can no longer make the passive investment representation, if must file a Schedule 13D within 10 days and refrain from voting its securities or acquiring additional securities of the same class for 10 days following the filing of the Schedule 13D.[51]

[46] The term "promptly" is not defined in Regulation 13D–G. In *In re Cooper Laboratories, Inc.*, Release 34–22171 (June 30, 1985) (Administrative Proceeding File No. 3–6536), the Commission expressed the view that "the promptness of an amendment to a Schedule 13D must be judged in light of all the facts and circumstances of a particular situation and [any] delay beyond the time of the amendment reasonably could have been filed may not be deemed to be prompt under the circumstances presented." The Commission determined that the amendment in that case should have been filed on the day following the change requiring an amendment. The respondent was required to comply with an undertaking to maintain in trust the profits received from the sale of the subject security to satisfy any claims by investors who sold prior to the filing of the amendment.

## III. Discussion of Proposals

The beneficial ownership reporting scheme is intended to inform the marketplace of acquisitions of a company's securities that could affect control. Under the legislative framework, both the occurrence of the acquisition and the purpose for which the acquiror is accumulating securities are deemed material disclosures. However, the current scheme requires most persons to file detailed disclosure reports regardless of investment purpose. As a result, the scheme may place an unnecessary reporting obligation on persons whose acquistions do not involve the concerns of the Williams Act.

The Commission is proposing amendments to Regulations 13D–G to make beneficial ownership disclosure more useful to investors, the marketplace and the Commission and to reduce significantly the requirements that the current reporting scheme imposes on persons with a passive investment purpose. These changes would enhance the comprehensive framework of disclosure contemplated by Congress. Since all non-institutional investors with a passive investment purpose could be the short-form Schedule 13G within 10 days of the triggering event, the mere filing of a Schedule 13D would serve to notify the marketplace of an acquisition by a person with a possible control intent. The reduced number of Schedule 13D filings would allow the marketplace, as well as the staff of the Commission, to focus more quickly on acquisitions involving a potential change in control.[52]

### *A. Expanding the Class of Persons Using Schedule 13G*

The purposes underlying section 13(d) do not require the extensive disclosure currently elicited by Schedule 13D for investors whose acquisitions have a passive investment purpose. However, the vast majority of persons filing on Schedule 13D have such a passive intent, but are not eligible to use the abbreviated disclosure document, Schedule 13G. Data provided by the Commission's Office of Economic Analysis indicate that 74 percent of the Schedule 13D studied reported no intention to change control of the issuer at the time of the initial filing.[53] Further, only 10 percent of these persons amended their original intent disclosure from "investment" to "change in control" over a two-year period following the date of the original filing.

The Commission is proposing that this significant pool of investors having solely a pasive investment purpose with respect to their ownership of more than five percent of a class of subject securities be permitted to file on Schedule 13G instead of Schedule 13D. Under the proposed amendments, Rules 13d–1(a) and 13d–2(a) would continue to require that persons who acquire beneficial ownership of more than five percent of the securities of the issuer file a Schedule 13D within 10 days after crossing the threshold and thereafter promptly amend that statement to disclose changes in ownership levels. Rule 13d–1(b)(1) would continue to permit an institutional investor acquiring subject securities in the ordinary course of its business to file a Schedule 13G within 45 days after the calendar year's end, provided that the conditions of the rule are satisfied. Proposed Rule 13d–(b)(2) also would permit any other investor, institutional or non-institutional, that acquires or holds more than five percent of a class of subject securities with a passive investment purpose to use a Schedule 13G in lieu of a Schedule 13D.[54]

A person with a passive investment purpose filing on Schedule 13G would have to disclose general information about its identity, residence and citizenship, and a description of the nature of the interest in the subject securities. Unlike the Schedule 13D, the Schedule 13G does not require disclosure of the source and amount of funds used or to be used for the acquisition; the purpose for which the acquisition was made; all transactions in the subject securities for the past 60 day; or contracts or arrangements with respect to the subject securities. With the extension of Schedule 13G to non-professional investors, the passive investment purpose certification would be revised to make the "ordinary course of business" requirement inapplicable to such persons.

Persons that cannot certify solely a passive investment purpose because of the current possibility that they may seek to exercise or influence control as an alternative investment purpose would be required to file on a Schedule 13D and would not be eligible to use a Schedule 13G. In essence, the proposed reporting system would divide persons with beneficial ownership of more than five and less than 20 percent of subject securities into two groups—those persons with a passive investment purpose permitted to file on Schedule 13G, and all other persons required to file on Schedule 13D.[55]

The current requirement that an institutional investor must certify that the subject securities were acquired in the ordinary course of business, as well as with a passive investment purpose, would be retained. The Commission requests comment, however, on whether the current form of the certification, requiring that the securities be acquired in the ordinary course of business,[56] as a prerequisite to filing 45 days after the calendar year's end, should be retained, if the institutional investor acquires the subject securities with a passive investment purpose. The proposed amendments would eliminate the requirement that an institutional investor that ceases to satisfy the conditions of current Rule 13d–1(b)(1)(ii) file a Schedule 13D. Like any person with a passive investment purpose, such a person would be permitted to file an initial or amended Schedule 13G within 10 days.

[51] In fiscal year 1988, 2,850 original Schedules 13D and 6,927 amendments were filed with the Commission.

[52] The results of this sample of 100 Schedules 13D filed in calendar year 1985 were comparable to those derived from an earlier study of 200 filings of Schedule 13D from fiscal year 1981.

[53] Individuals controlling eligible institutions are the indirect beneficial owners of securities held by the institutions and thus have an obligation under section 13(d) and Rule 13d–1 to report those holdings. *See in re The Gabelli Group, Inc.*, Release No. 34–26005 (August 17, 1988). The staff has permitted individuals to file Schedules 13G jointly under Rule 13d–1(f) with an institution within their control where the individual owns directly, or indirectly through an ineligible entity, less than one percent of the company's stock and does not intend to change or influence contol of the company. *See Warren E. Buffet and Berkshire Hathaway, Inc.* (available December 5, 1986). To meet this obligation, the individual signs a separate Schedule 13G cover sheet and signs the Schedule in his individual capacity. *See* Schedule 13G, Instruction (1) and Notes for Cover Page and Item 10; 17 CFR 240.13d–102.

While the proposed amendments would remove any obstacle to the individual reporting beneficial ownership on a Schedule 13G with respect to passive investments, because of the timing difference in the filing of the Schedule by individuals and eligible institutions, the staff will continue its no-action position to allow the control person to report indirect beneficial ownership through the controlled entity 45 days after the end of the calendar year, rather than 10 days after the person's indirect beneficial ownership exceeds five percent.

[54] The only exception would be Schedules 13G filed with respect to exempt acquisitions pursuant to current Rule 13d–1(c) (proposed to be retained with some modifications as discussed below). Such schedules would not include a certification of the filer's passive investment purpose.

[55] Item 10, Schedule 13G.

UMI

The Commission requests public comment on whether the use of Schedule 13G for passive investors should be mandatory, rather than voluntary as in the current rule proposal. Specifically, comment is solicited on whether the purposes of the proposed rules adequately would separate persons with a passive investment purpose from those with a possible control intent or whether a sufficient number of persons with a passive intent would choose to forego the lesser burdens of a Schedule 13G filing and file a Schedule 13D. Passive investors may choose to file on Schedule 13D because of the cooling-off period that accompanies the use of Schedule 13G. Use of Schedule 13D by passive investors could undermine the effectiveness of the schedules as a means to delineate between filers with a passive investment purpose and those with the intent to change or influence control. Comment also is requested on whether the currently permissive filing of Schedules 13G under Rule 13d–1(b)(1) by institutional investors acquiring or holding subject securities in the ordinary course of business should be made mandatory.

*B. Ten Day Initial Filing Obligation for Non-institutional Beneficial Owners of More Than Five Percent; Timing for Amendments*

Under the current reporting system, a Schedule 13D must be filed within 10 days after acquiring more than five percent of a subject security. In contrast, a Schedule 13G need not be filed until 45 days after the end of the calendar year in which the filing obligation arose, if beneficial ownership is more than five percent at the year's end. Except for an institutional investor acquiring the subject securities in the ordinary course of its business, the proposed amendments would require that any person filing a Schedule 13G, including a filing reflecting an exempt acquisition, file within 10 days of the triggering event.[47] Thus, the market and shareholders would receive more timely notice of the creation and existence of voting blocks that have the potential of affecting control of the issuer. Obtaining the short-form information more promptly is important even when the investment purpose is passive, because the existence of a large block of securities has control implications, regardless of the intentions of the current holder of the block.

As is currently required for an institutional investor, a non-institutional investor would file a Schedule 13G or amendment thereto within 10 days after the end of the first month in which such person's direct or indirect beneficial ownership exceed 10 percent of the class of subject securities, and thereafter within 10 days after the end of the month in which such person's beneficial ownership increases or decreases by more than five percent since the previous filing. Amendments to disclose any other changes would continue to be required only on an annual basis.

Institutional investors acquiring subject securities in the ordinary course of business would continue to file the Schedule 13G 45 days after the end of the calendar year to report holdings of more than five percent as of December 31. This distinction has been maintained due to the substantial number of positions reported by institutional investors on Schedule 13G.[48] Changes in the beneficial ownership reporting requirements for institutional investors could impose a substantial financial and operational burden.

Although the Commission does not propose to accelerate the filing date of the Schedule 13G for institutional investors, the experience of recent years has made clear that control is affected not only by a beneficial owner's own intentions of directly affecting control of an issuer, but also the use to which the acquiror may lend its voting power, or the intent of a person to whom it may sell the block. The concentration of voting power in a single block and its transferability are material information to the market. Furthermore, recent enforcement actions have provided examples of the use of illegal parking of securities involving market professionals to avoid, among other legal requirements, Schedule 13D disclosures and obligations under the Hart-Scott-Rodino Act.[49]

To obtain disclosure about institutional holdings that could play a role in a control contest, the Commission could require that institutional investors file Schedule 13G on a 10-day, monthly or quarterly basis, and/or require the reporting of all five percent positions, not just those in existence at the end of the relevant period. The Commission requests specific comment on the effect requiring institutional investors to file on a more timely basis would have on block positioning and marketmaking for a particular security. The Commission is concerned about the potential disruptive effect of an accelerated reporting obligation on the legitimate, day-to-day business operations of institutional investors—particularly with respect to market makers—as well as their ability, on a cost-effective basis, to comply with increased reporting requirements. Data are requested on the frequency with which broker-dealers or other market professionals hold more than five percent positions that are not required to be reported at the calendar year's end. The Commission also requests information as to the nature of additional procedures that would be necessary to monitor for these positions and the associated costs of such procedures.

*C. Filing of Schedule 13D and Cooling-Off Period for Changes in Investment Intent*

Under the current rules, institutional investors who have filed a Schedule 13G but who can no longer make ordinary course of business and passive investment representations must file a Schedule 13D "promptly," but no later than 10 days after a change in their investment purpose.[50] After filing the Schedule 13D, the institutional investor is prohibited from acquiring additional securites of the subject class or of a person controlling the issuer of the class, or voting the securities already owned for a period of 10 days.[51]

The proposed rule would extend the concept of a cooling-off period to any passive investor filing on Schedule 13G (except for those with only exempt acquisitions) that determines that it no longer holds the subject securities with a passive investment purpose. As proposed, the cooling-off period for a change in investment purpose would begin to run from the time of the determination of the change in investment intent until the expiration of the tenth day from the date of the filing of a Schedule 13D. A Schedule 13D would be required no later than 10 days after a change in investment purpose. The proposed rule would delete the reference to "promptly" [52] and require the filing of a Schedule 13D within 10 days to parallel the original Schedule 13D filing obligation.

The proposed cooling-off period is necessary and appropriate when the beneficial owner determines that it no longer holds the securities with a passive investment purpose and may seek to influence control The proposed approach would encourage the prompt filing of a Schedule 13D and prevent further acquisitions or the voting of the subject securities until the market and investors have been given time to react to the information in the Schedule 13D filing. The extension of a cooling-off period until ten days from the date of the required filing on Schedule 13D also would serve as a deterrent to the improper use of the Schedule 13G by persons seeking to influence control.

Comment is requested on whether the ten day period is necessary at all, or whether the period should be changed to a shorter period, such as three or five business days, or a longer period, such as fifteen days. Further, the Commission requests comment on whether such a provision would adequately discourage the improper use of a Schedule 13G by persons that may seek to influence control.

*D. Limit on Ownership Interest Reportable on Schedule 13G and Cooling-off Period*

Proposed Rule 13d–1(b)(1) would include a provision restricting the use of Schedule 13G (except for exempt acquisitions) by limiting the aggregate amount of securities that could be reported on that Schedule. The Commission is proposing to use a 20 percent threshold to balance the increased reporting burden and the need to provide detailed information about acquisitions that have significant control implications because of the size of the holdings.[53] As with the case of a change in passive investment purpose, acquisitions causing a person beneficially to own 20 percent or more of the class would require the holder to file a Schedule 13D within 10 days after the acquisition and subject the filer to a cooling-off period. Unlike the comparable cooling-off period for changes in investment intent, the cooling-off period only would run from the time the threshold is reached until the filing of the Schedule 13D.

The Commission requests comment on whether a 20 percent threshold level of stock ownership is the appropriate threshold at which to require persons with a purported passive investment purpose to report on Schedule 13D. At some level, a block of securities has inherent control implications because of its size and its potential for movement. The market and investors should receive notice of the block's existence and the information elicited by Schedule 13D, as well as prompt amendment to that information, including changes in the block's size. Commentators should address whether a 10 percent threshold, paralleling current requirements for amendment of a Schedule 13G and the 10 percent threshold for reporting under section 16,[54] is more appropriate, or whether a higher threshold should be adopted. Finally, the Commission requests comment on the appropriateness and length of the 10 day filing and cooling-off periods in this context. As discussed in Part III.C. above, the Commission also requests comment on when the cooling-off period should begin to run.

*E. Related and Clarifying Amendments*

The Commission also is proposing related amendments to the beneficial ownership reporting requirements. Amendments are proposed to current Rules 13d–1(b), 13d–2, 13d–7 and Schedules 13D and 13G.[55]

Current Regulation 13D–G requires the sending of the Schedule 13D and amendments to each exchange on which the security is traded. Schedules 13G and amendments, on the other hand, are only required to be sent to the principal exchange on which the securities is traded, if any. Since Schedule 13G would become the primary reporting document in many cases, the Commission proposes to require that a copy of each Schedule 13G and amendment be provided to each exchange on which the security is traded. Schedules 13G for exempt acquisitions, however, would continue to be sent only to the issuer at its principal executive offices and filed with the Commission, as provided by current Rule 13d–1(c). Amendments to Schedules 13G relating to exempt acquisitions would be treated similarly and no longer be required to be sent to an exchange, as is currently required by Rule 13d–2(b).

As a related matter, the Commission also proposes to require that a copy of a Schedule 13D, Schedule 13G or amendment filed to report ownership of a class of securities quoted on NASDAQ (except for those reflecting exempt acquisitions), and any amendments, be provided to the NASD.

Proposed amendments to Rule 13d–1(c) would delete as no longer necessary the grandfather provisions adopted in 1978 to facilitate the transition to reporting on Schedule 13G for persons whose holdings previously were not subject to any disclosure requirements. Persons with exempt acquisitions would continue to report beneficial ownership on Schedule 13G pursuant to revised Rule 13d–1(c).

The Commission also is proposing technical and clarifying amendments to Regulation 13D–G. Amendments to Rules 13d–1 and 13d–2 would make clear that a total of six copies (one signed original plus five copies) must be filed with the Commission under the current rules. Rule 13d–7 also would be revised to clarify that a Schedule 13D filed with respect to holdings reported until then on Schedule 13G, and vice versa, do not require an additional fee, if beneficial ownership had not fallen below five percent. In accordance with current staff interpretations, when a reporting person ceases to be eligible for Schedule 13G and must file a Schedule 13D, no new fee will be imposed. Similarly, if a 13D filer subsequently meets the criteria for use of Schedule 13G, no new fee will be imposed.

Technical amendments also are proposed to Schedules 13D and 13G to conform the schedules to the revised rules and amend the filing deadlines and the number of copies in the instructions.

---

[47] Proposed Rules 13d–1 (b)(2) and (c).

[48] Approximately 3,700 initial Schedules 13G and 5,900 amendments were filed in fiscal year 1987. Data from Schedules 13G with a reporting date of December 31, 1987 indicate that at least half of the filings were made by a broker or dealer, bank, insurance company, investment company, investment adviser or employee benefit plan.

[49] 15 U.S.C. 18a.

*See e.g., SEC* v. *First City Financial*, 668 F. Supp. 705 (D.D.C. 1988); *SEC* v. *Boyd L. Jefferies, et al.*, Lit. Rel. No. 11370 (March 19, 1987).

[50] Rule 13d–1(b)(3)(ii) [17 CFR 240.13d–1(b)(3)(ii)].

[51] Rule 13d–1(b)(3)(iii) [17 CFR 240.13d–1(b)(3)(iii)]

[52] The deletion of the word "promptly" from current Rule 13d–3 [17 CFR 240 13d–3] should eliminate any possible misperception that "promptly," in the context of a Regulation 13D–G filing, would be satisfied by a 10-day filing. *See* n. 30, *supra*.

[53] The amended rule is not intended to create a presumption that a person beneficially owning 20 percent or more of a class of subject securities has control or an actual control purpose.

## IV. Cost-Benefit Analysis

To evaluate the benefits and costs associated with the proposed amendments to Exchange Act Rules 13d–1, 13d–2, and 13d–7, Schedule 13D, and Schedule 13G, the Commission requests commentators to provide views and data as to the costs and benefits associated with amending the filing requirements for beneficial ownership statements. The ability to file a Schedule 13G instead of a Schedule 13D in specified circumstances should reduce costs for persons meeting the requirements. Persons currently eligible to use a Schedule 13G based on holdings of subject securities at the end of the calendar year may incur increased reporting and monitoring costs because acquisitions that cause a person to hold 20 percent or more of the subject securities would be reported on Schedule 13D.

## V. Initial Regulatory Flexibility Analysis

The Initial Regulatory Flexibility Analysis concerns the proposed amendments to the Commission's beneficial ownership rules and related Schedules 13D and 13G. The analysis has been prepared by the Commission in accordance with 5 U.S.C. 604.

The analysis notes that the principal effect of the revisions will be to reduce the filing obligations and associated costs to a majority of persons required to report beneficial ownership under sections 13(d) and 13(g) of the Exchange Act. Although specified categories of investors may incur an increased reporting or monitoring obligation, the Commission does not believe that there will be a significant economic impact on a substantial number of small entities.

A copy of the Initial Regulatory Flexibility Analysis may be obtained by contacting Richard E. Baltz in the Office of Tender Offers, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549.

## VI. Request for Comments

Any interested persons wishing to submit written comments on the proposals, to suggest additional changes, or to submit comments on other matters that might have an impact on the proposals, are requested to do so. In addition to the specific inquiries made throughout this release, the Commission solicits comments on the usefulness of the proposed revisions to the Schedule 13D–G reporting scheme to reporting persons, registrants, and the marketplace at large.

The Commission also requests comment on whether the proposed rule, if adopted, would have an adverse effect on competition or would impose a burden on competition that is neither necessary nor appropriate in furthering the purposes of the Exchange Act. Comments on this inquiry will be considered by the Commission in complying with its responsibilities under section 23(a)(2) of the Exchange Act.[56]

The Commission also encourages the submission of written comments with respect to any aspect of the initial regulatory flexibility analysis. Such written comments will be considered in the preparation of the final regulatory flexibility analysis if the proposed rules are adopted.

Persons wishing to submit written comments should file three copies thereof with Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Comment letters should refer to File No. S7–8–89. All comments received will be available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street NW., Washington, DC 20549.

[56] 15 U.S.C. 78w(a)(2).

## VII. Statutory Basis and Text of Amendments

The amendments to Rules 13d–1, 13d–2 and 13d–7 and Schedules 13D and 13G are being proposed pursuant to the authority set forth in sections 3(b), 13 and 23 of the Securities Exchange Act of 1934.

### List of Subjects in 17 CFR Part 240

Reporting and Recordkeeping requirements, Securities.

## VIII. Text of Proposals

In accordance with the foregoing, Title 17, Chapter II of the Code of Federal Regulations is proposed to be amended as follows:

### PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

1. The authority citation for Part 240 continues to read, in part, as follows:

**Authority:** Sec. 23, 48 Stat. 901, as amended (15 U.S.C. 78w) * * *

2. By amending § 240.13d–1 by revising paragraphs (a) and (b)(1) introductory text, redesignating paragraphs (b)(2), (b)(3), and (b)(4) as (b)(3), (b)(4), and (b)(5), adding a new paragraph (b)(2), revising newly redesignated (b)(3, (b)(4), and (b)(5) and paragraph (c) as follows:

**§ 240.13d–1 Filing of Schedules 13D and 13G.**

(a) Any person who, after acquiring directly or indirectly the beneficial ownership of any equity security of a class which is specified in paragraph (d) of this section, is directly or indirectly the beneficial owner of more than five percent of such class shall, within 10 days after such acquisition, send to the issuer of the security at its principal executive office, by registered or certified mail, and to each exchange or automated inter-dealer quotation system where the security is traded or

VOL

UMI

authorized to be quoted, and file with the Commission, a statement containing the information required by Schedule 13D (§ 240.13d–101). A signed original plus five copies of the statement, including all exhibits, shall be filed with the Commission.

(b)(1) A person who would otherwise be obligated under paragraph (a) of this section to file a statement on Schedule 13D and is not directly or indirectly the beneficial owner of 20 percent or more of such class may, in lieu thereof, file with the Commission, within 45 days after the end of the calendar year in which such person became so obligated, a signed original plus five copies, including all exhibits, of a short form statement on Schedule 13G (§ 240.13d–102) and send one copy each of such schedule to the issuer of the security at its principal executive office, by registered or certified mail, and to each national securities exchange or automated inter-dealer quotation system where the security is traded or authorized to be quoted: *Provided*, That it shall not be necessary to file a Schedule 13G unless the percentage of the class of equity security specified in paragraph ( ) of this section beneficially owned as of the end of the calendar year is more than five percent: *And provided further*, That:

* * * * *

(b)(2) A person who would otherwise be obligated under paragraph (a) of this section to file a statement on Schedule 13D, but (i) has not acquired such securities with any purpose, or with the effect of, changing or influencing the control of the issuer, or in connection with or as a participant in any transaction having such purpose or effect, including any transaction subject to Rule 13d–3(b) (§ 240.13d–3(b)); (ii) is not a person specified in paragraph (b)(1) of this section; and (iii) is not directly or indirectly the beneficial owner of 20 percent or more of such class, may, in lieu thereof, file with the Commission, within 10 days after an acquisition described in paragraph (a) of this section, a signed original plus five copies, including all exhibits, of a short form statement on Schedule 13G (§ 240.13d–102) and send one copy each of such schedule to the issuer of the security at its principal executive office, by registered or certified mail, and to each national securities exchange or automated inter-dealer quotation system where the security is traded or authorized to be quoted.

(3) Any person relying on Rules 13d–1(b)(1), 13d–1(b)(2), or 13d–2(b) shall, in addition to filing any statements required thereunder, file a statement on Schedule 13G, or amendment thereto, within 10 days after the end of the first month in which such person's direct or indirect beneficial ownership exceeds 10 percent of a class of equity securities specified in paragraph (d) of this section, computed as of the last day of the month, and thereafter within 10 days after the end of any month in which such person's beneficial ownership of securities of such class, computed as of the last day of the month, increases or decreases by more than five percent of such class of equity securities. A signed original plus five copies of such statement, including all exhibits, shall be filed with the Commission and one copy each sent, by registered or certified mail, to the issuer of the security at its principal executive office and to each national securities exchange or automated inter-dealer quotation system where the security is traded or authorized to be quoted. Once an amendment has been filed reflecting beneficial ownership of five percent or less of the class of securities, no additional filings are required by this paragraph (b)(3) unless the person thereafter becomes the beneficial owner of more than 10 percent of the class.

(4) Notwithstanding paragraphs (b)(1), (b)(2) and (b)(3) of this section and Rule 13d–2(b) (§ 240.13d–2(b)), a person that has reported that it is the beneficial owner of more than five percent of a class of equity securities in a statement on Schedule 13G pursuant to paragraph (b) (1), (2), or (3) of this section or is required to report such acquisition but has not yet filed the schedule, shall immediately become subject to Rules 13d–1(a) and 13d–2(a) and shall file a statement on Schedule 13D within 10 days if:

(i) Such person's beneficial ownership equals or exceeds 20 percent of a class of equity securities specified in Rule 13d–1(d). Form the time such person's beneficial ownership equals or exceeds 20 percent of a class of equity securities specified in Rule 13d–1(d) until the filing of a statement on Schedule 13D pursuant to this paragraph, such person shall not: (1) Vote or direct the voting of the securities described therein; or (2) acquire an additional beneficial ownership interest in any equity securities of the issuer of such securities, nor of any person controlling such issuer; or

(ii) such person (1) determines that it has acquired or hold such securities with a purpose or effect of changing or influencing control of the issuer, or in connection with or as a participant in any transaction having such purpose or effect, including any transaction subject to Rule 13d–3(b) (§ 240.13d–3(b)); and (2) is at that time the beneficial owner of more than five percent of a class of equity securities described in Rule 13d–1(d). From the time such person determines that it has acquired or holds such securities with a purpose or effect of changing or influencing control of the issuer, or in connection with or as a participant in any transaction having such purpose or effect until the expiration of the tenth day from the date of the filing of a Schedule 13D pursuant to this section, such person shall not: (A) Vote or direct the voting of the securities described therein; or (B) acquire an additional beneficial ownership interest in any equity securities of the issuer of such securities, nor for any person controlling such issuer.

(5) Any person who has reported an acquisition of securities in a statement on Schedule 13G pursuant to paragraph (b)(1) or (b)(3) of this section and thereafter ceases to be a person specified in paragraph (b)(1)(ii) of this section shall immediately become subject to Rules 13d–(1) or (b)(2) (if such person satisfies the requirements specified in paragraph (b)(2)) and 13d–2 (a) or (b) and shall file, within 10 days thereafter, a statement on Schedule 13D or amendment to Schedule 13G, as specified, in the event such person is a beneficial owner at that time of more than five percent of the class of equity securities.

(c) Any person who is or becomes directly or indirectly the beneficial owner or more than five percent of any equity security of a class specified in paragraph (d) of this section and who is not required to file a statement under paragraph (a) of this section by virtue of the exemption provided by section 13(d)(6) (A) or (B) of the Act, or because such person otherwise (except for the examption provided by section 13(d)(6)(C) of the Act) is not required to file such a statement, shall within 10 days after becoming the beneficial owner, send to the issuer of the security at its principal executive office, by registered or certified mail, and file with the Commission a statement containing the information required by Schedule 13G (§ 240.13d–102). A signed original plus five copies of the statement, including all exhibits shall be filed with the Commission.

3. By amending § 240.13d–2 by revising paragraph (a), the second sentence of paragraph (b) and the note following paragraph (b) as follows:

**§ 240.13d–2 Filing of amendments to Schedules 13D or 13G.**

(a) Schedule 13D–If any material change occurs in the facts set forth in the statement required by Rule 13d–1(a) (§ 240.13d–1(a)), including, but not limited to, any material increase or decrease in the percentage of the class beneficially owned, the person or persons who were required to file such statement shall promptly file or cause to be filed with the Commission and send or cause to be sent to the issuer at its principal executive office, by registered or certified mail, and to each exchange or inter-dealer quotation system on which the security is traded or authorized to be quoted an amendment disclosing such change. An acquisition or disposition of beneficial ownership of securities in an amount equal to one percent or more of the class of securities shall be deemed "material" for purposes of this rule; acquisitions or dispositions of less than such amounts may be material, depending upon the facts and circumstances. A signed original plus five copies of each such amendment shall be filed with the Commission

(b) * * * A signed original plus five copies of such amendment, including all exhibits, shall be filed with the Commission and one each sent, by registered or certified mail, to the issuer of the security at its principal executive office and (except with respect to persons filing pursuant to 13d–1(c)) to each national securities exchange or inter-dealer quotation system where the security is traded or authorized to be quoted. * * *

Note.—For persons filing a short-form statement pursuant to Rule 13d–1(b) (1) or (2), see also rules 13d–1(b) (3), (4), and (5).

4. By amending § 240.13d–7 by revising the second sentence as follows:

**§ 240.13d–7 Fees for Filing Schedules 13D or 13G**

* * * No fees shall be required with respect to the filing of any amended Schedule 13D or 13G, and no fees shall be required with respect to an inital Schedule 13D or Schedule 13G if the filing person previously has filed a statement reporting beneficial ownership of more than five percent of such class of equity securities and has not subsequently filed an amendment reporting beneficial ownership of five percent or less of such class; *Provided, however*, That once an amendment has been filed reflecting beneficial ownership of five percent or less of such class, an additional fee of $100 shall be paid with the next filing of that person that reflects ownership of more than five percent.

5. By amending § 240.13d–101 by revising the language preceding the first box on the cover page, and revising the note on the cover page as follows:

**§ 240.13d–101 Schedule 13D—Information to be included in statements filed pursuant to § 240.13d–1(a) and amendments thereto filed pursuant to § 240.13d–2(a).**

If the filing has previously filed a statement on Schedule 13G to report the acquisition that is the subject of this Schedule 13D, and is filing this schedule because of Rule 13d–1(b)(4)(i) (A) or (B), check the following box.

* * * * *

Note.—An original plus five copies of this statement, including all exhibits, should be filed with the Commission. See Rule 13d–1(a) for other parties to whom copies are to be sent.

* * * * *

6. By amending § 240.13d–102 by adding a line for the date of the reportable event following "(CUSIP Number)", revising Instruction A, revising Items 3, 4, and 10, and revising the note at the end of the schedule, as follows:

**§ 240.13d–102 Schedule 13G—Information to be included in statements filed pursuant to § 240.13d–1(b) and (c) and amendments thereto filed pursuant to § 240.13d–1(b)(3) or § 240.13d–2(b).**

* * * * *

(Date of Event Which Requires Filing of this Statement)

* * * * *

Instructions. A. Statements filed pursuant to Rule 13d–1(b)(1) containing the information required by this schedule shall be filed not later than February 14 following the calendar year in which the person became obligated to report or within the time specified in Rule 13d–1(b)(3), if applicable. Statements filed pursuant to Rule 13d–1(b) or 13d–1(c) shall be filed not later than 10 days after the event requiring the filing.

* * * * *

*Item 3.* If this statement is filed pursuant to Rule 13d–1(b)(1) or 13d–2(b), check whether the person filing is a:

(a) [ ] Broker or dealer registered under section 15 of the Act.

(b) [ ] Bank as defined in section 3(a)(6) of the Act.

(c) [ ] Insurance company as defined in section 3(a)(19) of the Act.

(d) [ ] Investment company registered under section 8 of the Investment Company Act.

(e) [ ] Investment adviser registered under section 203 of the Investment Advisers Act of 1940.

(f) [ ] Employee benefit plan, pension fund which is subject to the provisions of the Employee Retirement Income Security Act of 1974 or endowment fund; see § 240.13d–1(b)(1)(ii)(F).

(g) [ ] Parent holding company, in accordance with § 240.13d–1(b)(ii)(G).

In this statement is filed pursuant to Rule 13d–1(b)(2), check this box. _____

*Item 4.* Ownership.

Provide the following information regarding the aggregate number and percentage of the class of securities of the issuer identified in Item 1.

(a) Amount beneficially owned: _____.

(b) Percent of class: _____.

(c) Number of shares as to which such person has: _____.

(i) Sole power to vote or to direct the vote _____.

(ii) Shared person to vote or to direct the vote _____.

(iii) Sole power to dispose or to direct the disposition of _____.

(iv) Shared power to dispose or to direct the disposition of _____.

*Instruction.* For computations regarding securities which represent a right to acquire an underlying security *see* Rule 13d–3(d)(1).

* * * * *

*Item 10.* Certification.

(a) The following certification shall be included if the statement is filed pursuant to Rule 13d–1(b)(1): By signing below I certify that, to the best of my knowledge and belief, the securities referred to above were acquired in the ordinary course of business and were not acquired for the purpose of and do not have the effect of changing or influencing the control of the issuer of such securities and were not acquired in connection with or as a participant in any transaction having such purpose or effect.

(b) The following certification shall be included if the statement is filed pursuant to Rule 13d–1(b)(2):

By signing below I certify that, to the best of my knowledge and belief, the securities referred to above were not acquired for the purpose of and do not have the effect of changing or influencing the control of the issuer of such securities and were not acquired in connection with or as a participant in any transaction having such purpose or effect.

* * * * *

Note.—A signed original plus five copies of this statement, including all exhibits, should be filed with the Commission.

* * * * *

By the Commission.

## DEPARTMENT OF THE INTERIOR

### Office of Surface Mining Reclamation and Enforcement

### 30 CFR Part 931

### New Mexico Permanent Regulatory Program; Public Comment Period and Opportunity for Public Hearing

**AGENCY:** Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

**ACTION:** Proposed rule.

**SUMMARY:** OSMRE is announcing the receipt of a proposed amendment to the New Mexico permanent regulatory programs (hereinafter, the "New Mexico program") under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendment is intended to revise the State program to provide additional safeguards for protection of the hydrologic balance.

This notice sets forth the times and locations that the New Mexico program and proposed amendment to that program are available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendment, and the procedures that will will be followed regarding the public hearing, if one is requested.

**DATES:** Written comments must be received by 4:00 p.m., m.s.t. on April 13, 1989. If requested, a public hearing on the proposed amendment will be held on April 10, 1989. Requests to present oral testimony at the hearing must be received by 4:00 p.m., m.s.t. on March 29, 1989.

**ADDRESSES:** Written comments should be mailed or hand delivered to Mr. Robert H. Hagen at the address listed below.

Copies of the New Mexico program, the proposed amendment, and all written comments received in response to this notice will be available for public review at the addresses listed below during normal business hours, Monday through Friday, excluding holidays. Each requester may receive one free copy of the proposed amendment by contacting OSMRE's Albuquerque Field Office.

Mr. Robert H. Hagen, Director, Albuquerque Field Office, Office of Surface Mining Reclamation and Enforcement, 625 Silver Avenue, SW., Suite 310, Albuquerque, NM 87102, Telephone: (505) 766–1486.

Office of Surface Mining Reclamation and Enforcement, Administrative Record Office, Room 5131, 1100 "L" Street, NW., Washington, DC 20240, Telephone: (202) 343–5492.

New Mexico Energy & Minerals Department, Mining & Minerals Division, 525 Camino de los Marquez, Santa Fe, NM 87501, Telephone: (505) 827–5970.

**FOR FURTHER INFORMATION CONTACT:** Mr. Robert H. Hagen, Director, Albuquerque Field Office, at the address or telephone number listed in "ADDRESSES."

**SUPPLEMENTARY INFORMATION:**

#### I. Background on the New Mexico Program

On December 31, 1980, the Secretary of the Interior conditionally approved the New Mexico program. General background information on the New Mexico program, including the Secretary's findings, the disposition of comments, and the conditions of approval of the New Mexico program can be found in the December 31, 1980, **Federal Register** (45 FR 86489). Subsequent actions concerning New Mexico's program and program amendments can be found at 30 CFR 931.12, 931.13, 931.15, 931.16, and 931.30.

#### II. Proposed Amendment

By letter dated February 21, 1989, (Administrative Record No. NM–474), New Mexico submitted a proposed amendment to its program pursuant to SMCRA. New Mexico submitted the proposed amendment at its own initiative. New Mexico proposes to amend CSMC Rule 80–1–20–41(d)(1) that concerns the use of the best technology currently available to minimize impacts to the hydrologic balance.

#### III. Public Comment Procedures

In accordance with the provisions of 30 CFR 732.17(h), OSMRE is seeking comments on whether the proposed amendment satisfies the applicable program approval criteria of 30 CFR 732.15. If the amendment is deemed adequate, it will become part of the New Mexico program.

#### Written Comments

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under "DATES" or at locations other than the Albuquerque Field Office may not be considered in the final rulemaking or included in the Administrative Record.

#### Public Hearing

Persons wishing to testify at the public hearing should contact the person listed under "FOR FURTHER INFORMATION CONTACT" by 4:00 p.m., m.s.t. on March 29, 1989. The location and time of the hearing will be arranged with those persons requesting the hearing. If no one requests an opportunity to testify at the public hearing, the hearing will not be held.

Filing of a written statement at the time of the hearing is requested as it will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSMRE officials to prepare adequate responses and appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to testify have been heard. Persons in the audience who have not been scheduled to testify, and who wish to do so, will be heard following those who have been scheduled. The hearing will end after all persons scheduled to testify and persons present in the audience who wish to testify have been heard.

#### Public Meeting

If only one person requests an opportunity to testify at a hearing, a public meeting, rather than a public hearing, may be held. Persons wishing to meet with OSMRE representatives to discuss the proposed amendment may request a meeting by contacting the person listed under "FOR FURTHER INFORMATION CONTACT." All such meetings will be open to the public and, if possible, notices of meetings will be posted at the locations listed under "ADDRESSES." A written summary of each meeting will be made a part of the Administrative Record.

## DEPARTMENT OF TRANSPORTATION

### Coast Guard

### 33 CFR Part 117

**[CGD7–88–49]**

### Drawbridge Operation Regulations: Kissimmee River, FL

**AGENCY:** Coast Guard, DOT.

**ACTION:** Proposed rule.

**SUMMARY:** At the request of the Florida Department of Transportation, the Coast Guard is considering a revocation of the regulations governing the State Road 78, 70 and 98 removable span bridges on the Kissimmee River at miles 0.5, 19.5 and 39.0 respectively to provide that the draws need not open. The proposal is being made because no requests have been made to open the draws since 1973. This action should relieve the bridge owner of the burden of responding to the existing requirements and having a person available to open the draws, while still providing for the reasonable needs of navigation.

**DATE:** Comments must be received on or before April 28, 1989.

**ADDRESSES:** Comments should be mailed to Commander (oan), Seventh Coast Guard District, Brickell Plaza Federal Building, 909 SE. 1st Avenue, Miami, Florida 33131–3050. The comments and other materials referenced in this notice will be available for inspection and copying on the 4th Floor of the Brickell Plaza Federal Building, 909 SE. 1st Ave, Miami, Florida. Normal office hours are between 7:30 a.m. and 4 p.m., Monday through Friday, except holidays. Comments also may be hand-delivered to this address.

**FOR FURTHER INFORMATION CONTACT:** Mr. Walt Paskowsky (305) 536–4103.

**SUPPLEMENTARY INFORMATION:** Interested persons are invited to participate in this rulemaking by submitting written views, comments, data, or arguments. Persons submitting comments should include their names and addresses, identify the bridge, and give reasons for concurrence with or any recommended change in the proposal. Persons desiring acknowledgement that their comments have been received should enclose a stamped, self-addressed postcard or envelope.

The Commander, Seventh Coast Guard District, will evaluate all communications received and determine a course of final action on this proposal. The proposed regulations may be changed in light of comments received.

#### Drafting Information

The drafters of this notice are Mr. Walt Paskowsky, Bridge Administration Specialist, project officer, and Lieutenant Commander S.T. Fuger, Jr., project attorney.

#### Discussion of Proposed Regulations

There are 3 removable span highway bridges over the Kissimmee River in Okeechobee and Highlands County. The existing rule requires the bridge at Fort Bassinger, mile 39 to be opened upon 96 hours advance notice, while the bridges at Okeechobee at mile 0.5 and 19.5 require a 72 hour advance notification. These rules were enacted in the 1950's to allow for access by dredging equipment when the Kissimmee River was an active federal navigation project. Records do not reveal any reason for the difference in the notification requirements. The river is no longer an active federal navigation project, and none of the bridges have opened in the last 15 years due to lack of demand. Should traffic on the waterway change in the future, the District Commander may consider reinstituting specific opening requirements.

#### Economic Assessment and Certification

These proposed regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under the Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979).

The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. We conclude this because of the lack of demand for openings. Since the economic impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

#### List of Subjects in 33 CFR Part 117

Bridges.

#### Proposed Regulations

In consideration of the foregoing, the Coast Guard proposes to amend Part 117 of Title 33, Code of Federal Regulations, as follows:

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05–1(g).

**§ 117.295 [Amended]**

2. Section 117.295 is amended by removing paragraphs (a) and (c) and redesignating paragraph (b) to (a).

Dated: March 1, 1989.

**Martin H. Daniell,**

*Rear Admiral, U.S. Coast Guard, Commander, Seventh Coast Guard District.*

BILLING CODE 4910–14–M

## POSTAL SERVICE

### 39 CFR Part 111

### Acceptance of Mailpieces Bearing an Incorrect Date in the Meter or Mailer's Precancel Postmark

**AGENCY:** Postal Service.

**ACTION:** Proposed rule.

**SUMMARY:** This proposal would change existing procedures concerning the acceptance of mailings bearing an incorrect date in the meter or mailer's precancel postmark. At present, certain postal regulations imply that mailings with an incorrect meter or precancel postmark date may be accepted only once, and that no additional incorrectly-dated mailings are to be accepted. Other more general postal regulations purport to give the entry post office discretion to accept repeated mailings of incorrectly-dated material. This proposal would provide, in general, that the first time incorrectly-dated mailings are found at the accepting post office the mailer would be notified, a record of the irregularity would be kept, but the mailing may be accepted. Any further incorrectly-dated mailings would be refused and the mailer would have to correct the error before they could be accepted.

Since the dated postmark is used both by the Postal Service and its customers to measure the length of time taken by the Postal Service to deliver a piece of mail, allowing customers to use an incorrect postmark date on their metered or precanceled mail leads to a distorted picture of postal performance. This proposal would, for the most part, remove incorrectly-dated meter or precanceled mail from the mailstream and thus make possible a more accurate representation of postal performance.

In addition, the date of mailing, as evidenced by a correct postmark date, is often used to determine whether a mailer has filed a legal paper or document, such as an income tax return, within the statutory period. A correct postmark date is also very important in other areas, such as in determining priority and eligibility in bidding on contracts, and in making payments within contractual deadlines.

**DATES:** Comments must be received on or before April 14, 1989.

**ADDRESS:** Address all comments to the Director, Office of Classification and Rates Administration, U.S. Postal Service, 475 L'Enfant Plaza West, SW., Washington, DC 20260–5360. Copies of all written comments will be available for inspection between 9 a.m. and 4 p.m.,

VOL 54 ISS 48 MR 14 1989 UMI

Monday through Friday, in Room 8430, at the above address.

**FOR FURTHER INFORMATION CONTACT:** Leo F. Raymond, (202) 268-5199.

**SUPPLEMENTARY INFORMATION:** Existing postal regulations for First-Class Mail (other than that entered at the full single-piece rate) specify that, under limited circumstances, mailings may be accepted with an incorrect date in the meter or mailer's precancel postmark. By implication, those regulations prohibit acceptance of such mailings thereafter. (See section 374.22, Domestic Mail Manual.)

At the same time, other regulations, which address metered mailings in general, do not impose such a specific limitation. Rather, they direct postmasters to examine metered mailings for proper preparation, advise mailers of errors, including incorrect dates in the meter postmark, accept the mailing, and postmark the mail to show the proper date. After "repeated irregularities" in the date on metered mailpieces, postmasters are told they "may refuse to accept" such mailings, but the direction is neither specific nor mandatory in describing what actions to take. (See sections 144.53 and 144.54, Domestic Mail Manual.)

Mailers authorized to use a postage meter or precancel postmark must comply with the regulations for their use. This includes imprinting the correct date of mailing. Recipients of mail regularly base their opinions of both the sender and the Postal Service on what is represented by the date in the postmark. The acceptance of metered or precanceled mailpieces with incorrect dates removes any incentive for mailers to correct faulty dating practices which mislead the public regarding the actual date of mailing and the timeliness of delivery. Service measurements, both internally by postal personnel and externally by private interests, often rely on the postmark as the indicator of both when the mailpiece entered postal custody and when the clock began to run on meeting established service standards. Clearly, an erroneous date in the postmark skews service measurement and impedes a clear perception of postal performance. An erroneous postmark date may also lead to other adverse statutory or contractual consequences, as spelled out in greater detail in the summary.

In order to limit the circumstances in which incorrectly dated metered or mailer's precancel postmark pieces will be accepted, and do so uniformly for all such mail, the Postal Service proposes revisions to sections 144.53, 144.54 and 374.22, Domestic Mail Manual. The Post Service is also amending 144.471 to cross-reference the proposed new procedure in 144.54 and 374.22, and to remove an erroneous inference that postage on second-class mail may be paid by postage meter. See 462. Also, a new 144.476 is added, which picks up the last sentence of existing 144.471, and specifies where the $.00 meter impression must be placed.

Although exempt from the notice and comment provisions of the Administrative Procedure Act (5 U.S.C. 553 (b), (c) regarding proposed rulemaking by 39 U.S.C. 410(a), the Postal Service invites public comments on the following proposed amendments to the Domestic Mail Manual, which is incorporated by reference in the Code of Federal Regulations. See 39 CFR Part 111.

**List of Subjects in 39 CFR Part 111**

Postal Service.

**PART 111—[AMENDED]**

1. The authority citation for Part 111 continues to read as follows:

**Authority:** 5 U.S.C. 552(a); 39 U.S.C. 101, 401, 403, 404, 3001-3011, 3201-3219, 3403-3406, 3621, 5001.

2. In Part 144, sections 144.471, 144.534, 144.541, 144.542 and 144.543 are revised, and section 144.476 is added.

PART 140—POSTAGE

• • • • •

PART 144—POSTAGE METERS AND METER STAMPS

• • • • •

**144.4 Meter Stamps**

• • • • •

144.47 Date of Mailing

144.471 The date shown in a meter postmark must be the actual date of deposit, except when the mailpiece is deposited after the last scheduled collection of the day; or as provided by 144.54 or 374.22. When deposit is made after the last scheduled collection of the day, mailers are encouraged but not required to use the date of the next scheduled collection.

• • • • •

144.476 A ".00" postage meter impression used to correct the date of metered mail must be placed on the nonaddress side of envelopes in the upper right hand corner, or adjacent to the postage meter stamp on flats or parcels. The date of the ".00" impression must be the actual date of deposit.

**144.5 Mailings**

• • • • •

144.53 Handling

• • • • •

144.534 Examination. a. Presorted Mail. Examine metered mail that is paid at a bulk or presorted rate according to the procedures in Handbook DM-102, *Bulk Mail Acceptance*. Whether detected during acceptance or after clearance for distribution, handle metered bulk or presort rate mail bearing an incorrect date in the postmark as provided by 144.54 or 374.22, as applicable.

b. Nonpresorted Mail. Examine nonpresorted metered mail to determine that it is properly prepared and bears a correct date in the meter postmark. This examination may be made by a selective check of pieces either awaiting or during distribution. Handle nonpresorted metered mail that is improperly prepared or does not bear a correct date in the meter postmark as provided by 144.54.

144.54. Mailing Irregularities

144.541 Presorted Mail with Presort Errors. Handle as directed by Handbook DM-102, *Bulk Mail Acceptance*, and 374.22, as applicable.

144.542 Incorrectly Dated Presorted Mail without Presort Errors. a. First Occurrence. On the first occurrence, the postmaster of the licensing office will use Form 3749, *Irregularities in the Preparation of Mail Matter*, to provide notice to the mailer whose metered mailing bears an incorrect date in the meter postmark. The postmaster may then accept the mailing (if other preparation requirements are met), but a permanent record of the irregularity must be maintained. The postmaster must postmark the mailpieces to apply the correct mailing date.

b. Subsequent Occurrences. If future mailings are improperly prepared or bear an incorrect date in the meter postmark (except as provided by 374.22), the mailing must not be accepted. The mailer must either reenvelope the mailpieces or apply a ".00" meter impression with the correct date before resubmitting the mail.

144.543 Nonpresorted Mail. a. First Occurrence. On the first occurrence, the postmaster of the licensing office will use Form 3749, *Irregularities in the Preparation of Mail Matter*, to provide notice to the mailer whose metered mailing is improperly prepared or bears an incorrect date in the meter postmark. The postmaster may then accept the mailing if other preparation requirements are met, but a permanent record of the irregularity must be maintained. Cancel the incorrectly-dated pieces to show the correct date.

b. Subsequent Occurrences. If future mailings are improperly prepared or bear an incorrect date in the meter postmark (except as provided by 374.22), the mailing must not be accepted. The mailer must either reenvelope the mailpieces or apply a ".00" meter impression with the correct date before resubmitting the mail.

3. In Part 374, sections 374.221, 374.222 and 374.223 are revised.

• • • • •

PART 370—MAILING

• • • • •

PART 373—PRESORT VERIFICATION

• • • • •

**374.2 When a Carrier Route First-Class, Presorted First-Class, Nonpresorted ZIP + 4, ZIP + 4 Presort, or ZIP + 4 Barcoded Rate Mailing is Disqualified**

• • • • •

374.22 Correction of Dates on Resubmitted Metered and Mailer's Precancel Postmark Mailpieces.

374.221 General. If a mailer elects to correct the presort or preparation problems in a mailing which had resulted in its disqualification when originally presented for acceptance, but is unable to resubmit that mailing on the same day, the date shown in the meter or mailer's precancel postmark must be corrected by reenveloping or applying a ".00" meter impression which includes the correct date of mailing.

374.222 Limited Exception to Correction of Date of Mailing. Subject to the following conditions, the postmaster of the office of mailing may waive the requirements of 374.221 *on a one-time-only basis.*

a. The presorted mailing with an incorrect date in the meter or mailer's precancel postmark is resubmitted on the day immediately following its initial presentation and disqualification; and

b. The mailing meets all other applicable requirements; and

c. (1) The initial presort or other preparation deficiencies resulted from mailing equipment problems beyond the mailer's control; or

(2) It represents the customer's first mailing at the carrier route First-Class, Presorted First-Class, nonpresorted ZIP + 4, ZIP + 4 Presort, or ZIP + 4 Barcoded rate, and the improper presort or preparation resulted from misinformation or misunderstanding of the applicable presort or preparation requirements.

**Note:** Nonpresorted mailings, full-rate mailings, and presorted mailings not being resubmitted after correction of presort or other preparation deficiencies, must be handled as provided by DMM 144.54 if they are improperly prepared or bear the incorrect date in the meter or mailer's precancel postmark.

374.223 Record of Waiver. If the postmaster accepts the mailing under the provisions of 374.222, a permanent record of the waiver must be maintained. Future mailings submitted with an incorrect date in the meter or mailer's precancel postmark cannot be accepted unless the mailer corrects the date by reenveloping or applying a ".00" meter impression which includes the correct date of mailing.

An appropriate amendment to 39 CFR 111.3 will be published if the proposal is adopted.

**Fred Eggleston,**

*Assistant General Counsel, Legislative Division.*

BILLING CODE 7710-12-M

## ENVIRONMENTAL PROTECTION AGENCY

**40 CFR Part 52**

**[FRL-3535-6]**

**Approval and Promulgation of Implementation Plans; Illinois**

**AGENCY:** U.S. Environmental Protection Agency (USEPA).

**ACTION:** Proposed rulemaking.

**SUMMARY:** USEPA announces proposed disapproval of several revisions to the Illinois State Implementation Plan (SIP) for Ozone. These proposed SIP revisions would, if approved, provide extended compliance schedules for Getty Synthetic Fuels Incorporated (Getty), All Steel Incorporation (All Steel), St. Charles Manufacturing (St. Charles), National Can Corporation Clearing facility (National Can), American Can Englewood facility (American Can), and United States Can Company (U.S. Can). Getty, National Can, American Can, and U.S. Can are located in Cook County, Illinois. All Steel, and St. Charles are located in Kane County. These Counties are part of the Chicago ozone demonstration area. USEPA is today proposing to disapprove these revisions because the requested compliance date extension is inconsistent with relevant portions of the Clear Air Act and USEPA policy.

**DATE:** Comments on this revision and on the proposed USEPA action must be received by April 13, 1989.

**ADDRESSES:** Copies of the SIP revision are available at the following addresses for review: (It is recommended that you telephone Uylaine E. McMahan, at (312) 886-6031, before visiting the Region V office.)

U.S. Environmental Protection Agency, Region V, Air and Radiation Branch (5AR-26), 230 South Dearborn Street, Chicago, Illinois 60604.

Illinois Environmental Protection Agency, Division of Air Pollution Control, 2200 Churchill Road, Springfield, Illinois 62706.

Comments on this proposed rule should be addressed to: (Please submit an original and three copies, if possible.)

Gary Gulezian, Chief, Regulatory Analysis Section, Air and Radiation Branch (5AR-26).

U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

**FOR FURTHER INFORMATION CONTACT:** Uylaine E. McMahan, Air and Radiation Branch (5AR-26), U.S. Environmental Protection Agency, Region V, Chicago, Illinois 60604, (312) 886-6031.

**SUPPLEMENTARY INFORMATION:**

Getty

On March 14, 1983, the Illinois Environmental Protection Agency (IEPA) submitted a proposed revision to its Ozone SIP for Getty's methane recovery unit at the C.I.D. landfill in Calumet City, which is located in the Chicago ozone demonstration area. This proposed revision is in the form of a February 10, 1983, Opinion and Order of the Illinois Pollution Control Board (IPCB) 81-171. It grants a variance from the existing SIP requirements until October 1, 1983, and provides a legally enforceable compliance schedule. Under the existing federally approved SIP, this methane recovery unit is subject to the control requirements contained in Rule 205 of Chapter 2 (Air Pollution) of the IPCB Rules and Regulations.[1] Compliance with IPCB Rule 205(f) was required by December 31, 1973, for existing sources and, therefore, compliance was required by Getty upon its start-up in 1981.

**All Steel**

On March 17, 1983, IEPA submitted a proposed revision to its Ozone SIP for

[1] The State has subsequently recodified its environmental regulations into the Illinois Administrative Code (IAC). However, because the IAC rules were never incorporated into the SIP, USEPA is rulemaking on these variances as though they were based on the underlying (i.e., before recodification) VOC regulations which are a part of the SIP.

VOL 54 ISS 48 MR 14 1989 UMI

several coating lines (1001–1006 and 1009) located in All Steel's Kane County, Illinois facility, which is in the Chicago ozone demonstration area. This proposed revision is in the form of a February 10, 1983, Opinion and Order of the IPCB, Number 82–110. It grants a variance from the existing SIP requirements until December 31, 1983, and provides a legally enforceable compliance schedule.

Under the existing federally approved SIP, each surface coating line is subject to the emission control requirements contained in Rule 205. IPCB 205(n)(1)(G) limits volatile organic compounds (VOC) emission to 3.0 pounds of VOC per gallon of coating, excluding water. Rule 205(j) stipulates that final compliance with Rule 205(n)(1)(G) is required by December 31, 1982.

**St. Charles**

On August 15, 1983, IEPA submitted a proposed revision to its ozone SIP for St. Charles' three spray paint booths and two bake ovens which are located in the Chicago ozone demonstration area. This proposed revision is in the form of a June 16, 1983, Opinion and Order of the IPCB, Number 82–156. It grants a variance from the existing SIP requirement until October 31, 1983.

Under the existing federally approved SIP, each metal coating operation at St. Charles is subject to the emission control requirements contained in Rule 205. IPCB Rule 205(n)(1)(G) limits VOC emissions from metal furniture coating operations to 3.0 pounds per gallon of coating (excluding water). Rule 205(j) stipulates that final compliance is required by December 31, 1982.

**Getty, All Steel, and St. Charles History**

In a March 20, 1984, **Federal Register** notice (49 FR 10277), USEPA proposed to disapprove the Getty, All Steel, and St. Charles proposed SIP revisions because the Illinois ozone SIP lacked an approvable attainment demonstration for the Chicago nonattainment area. The attainment demonstration contained in the State's 1982 ozone SIP was initially proposed for disapproval in the February 3, 1983, **Federal Register** notice (48 FR 5110). Subsequently, on August 15, 1984 (49 FR 5110), USEPA proposed to approve the State's revised 1982 SIP attainment demonstration and on July 14, 1987 (52 FR 26404) proposed to disapprove it again.

In an October 10, 1984, **Federal Register** notice (49 FR 39696), All-Steel was reproposed for approval; in a September 17, 1984, **Federal Register** notice (49 FR 36408), Getty was reproposed for approval; and in a September 17, 1984, **Federal Register** notice (49 FR 36407), St. Charles was reproposed for approval. During these 30-day public comment periods, USEPA received no comments. USEPA is today withdrawing the October 10, 1984, and the two September 17, 1984, proposals as they apply to the All-Steel, Getty, and St. Charles facilities and is reproposing to disapprove these SIP revisions as discussed in the Compliance Date Policy section of this notice.

**National Can**

On November 21, 1983, the IEPA submitted a proposed revision to its ozone SIP for National Can located in the Chicago ozone demonstration area. This proposed revision is in the form of an April 1, 1982, Opinion and Order of the IPCB, Number PCB 81–192. It grants a variance from the existing SIP requirements until December 31, 1983, and provides a legally enforceable compliance schedule.

Under the existing federally approved SIP, each can coating operation at National Can is subject to the emission control requirements contained in IPCB Rule 205(n)(1)(B). IPCB Rule 205(n)(1)(B) requires final compliance with established specific emission limitations for each of the can coating operations by November 31, 1982.

**National Can History**

In a July 5, 1984, **Federal Register** notice (49 FR 27583), USEPA proposed to approve the National Can proposed SIP revision. During the 30-day public comment period, USEPA received no comments. USEPA is today withdrawing the July 5, 1984, proposal as it applies to the National Can Clearing facility and is reproposing to disapprove this SIP revision as discussed in the policy section below.

**American Can**

On November 21, 1983, the IEPA submitted a proposed revision to its ozone SIP for American Can's Englewood facility located in Chicago, Cook County, Illinois. This proposed revision is in the form of a December 4, 1980,

Opinion and Order of the IPCB, Number PCB 80–169. It grants a variance from the existing SIP requirements until December 31, 1984, and provides a legally enforceable compliance schedule.

Under the existing federally approved SIP, each can coating operation at American Can Company is subject to the emission control requirements contained in IPCB Rule 205(n)(1)(B). IPCB Rule 205(n)(1)(B) requires compliance with established specific emission limitations for each of the can coating operations. Final compliance is required by December 31, 1982.

**American Can History**

In a June 15, 1984, **Federal Register** notice (49 FR 10277), USEPA proposed to approve American Can's proposed SIP revision. In this **Federal Register** notice USEPA stated that "USEPA will not take final action on this SIP revision until final rulemaking is completed on the ozone SIP for the Chicago area." During the 30-day public comment period, USEPA received no comments. USEPA is today withdrawing the June 15, 1984, proposal as it applies to the American Can Englewood facility and is reproposing to disapprove this SIP revision as discussed in the policy below.

**U.S. Can**

On January 24, 1985, the IEPA submitted a proposed revision to its ozone SIP for U.S. Can's manufacturing facility located in Elgin, Illinois. This SIP revision is in the form of a September 20, 1984, Opinion and Order of the IPCB, PCB 84–23. It grants U.S. Can a variance from the existing SIP requirements from December 31, 1982, until December 31, 1985, and provides a legally enforceable compliance program.

Under the existing federally approved SIP, each of U.S. Can's interior and exterior sheet coating operations and over varnish operations is subject to the 2.8 pounds of VOC per gallon emission limitation contained in IPCB Rule 205(n)(1)(B)(i) and (ii). Final compliance with this emission limitation is required by December 31, 1982.

The SIP revision for U.S. Can would allow additional time for the source to reformulate its coatings used in manufacturing cans for the general can market. USEPA is proposing to disapprove this revision as discussed below.

**Compliance Date Extension Policy**

USEPA may approve compliance date extensions if the State demonstrates that the compliance date meets the requirements of USEPA's policy on such extensions.

Under this policy any extension which goes beyond 3 years past adoption of the applicable rule should be closely scrutinized for expeditiousness. This should include an examination of the compliance status of other sources nationally in the same VOC category.

On March 10, 1982, USEPA issued guidance on extensions for can-coating operations. USEPA, thus, has provided the national survey for can-coating variances. Based on industry experience, USEPA concluded that expeditiousness may be longer than three years for can coating operations. Expeditiousness is based upon the following guidance in the March 10, 1982, **Federal Register** notice (47 FR 10293). The policy states that USEPA will approve compliance date extensions for control of VOC emissions from can-coating operations in those cases where the extension will facilitate the expeditious conversion to low solvent technology. These extensions may be granted for a period up to December 31, 1985, where an expeditious, legally enforceable compliance program has been developed. The above can-coating extensions meet this requirement.

However, in addition, an approvable compliance date extension must be consistent with the reasonable further progress (RFP) requirements of the Clean Air Act and must not prevent the area from attaining the ozone national ambient air quality standard (NAAQS) by the area's attainment date. Illinois does not have an approved 1982 ozone plan for the Chicago attainment demonstration area. [1] Without an approvable demonstration USEPA cannot determine whether the individual compliance date extensions being proposed today will interfere with timely attainment and maintenance of the ozone standard, or with RFP. USEPA is, therefore, proposing to disapprove the above revisions. A more detailed discussion of the rationale for proposing disapproval of the State submission and of the Clean Air Act and USEPA policy related to compliance date extensions appears in Appendix A of USEPA's proposed rulemaking of November 8, 1988, at 53 FR 45103.

**Summary**

USEPA is reproposing to disapprove Getty, All Steel, St. Charles, National Can, American Can, and proposing to disapprove U.S. Can because (1) the State has failed to demonstrate that this revision will not interfere with attainment and maintenance of the ozone standard and, where relevant, RFP towards timely attainment with these revisions, and, therefore, the proposed revisions do not meet the requirements in the Clean Air Act and USEPA's policy on compliance date extensions and (2) these sources are all located in an area which lacks an approved ozone attainment demonstration.

USEPA is providing a 30-day comment period on this notice of proposed rulemaking. Public comments received on or before April 13, 1989 will be considered in USEPA's final rulemaking. All comments will be available for inspection during normal business hours at the Region V office listed at the front of this notice.

Any comments that were received during the March 20, 1984, public comment period must be resubmitted during the 30-day comment period of today's notice if the commentor still wishes USEPA to consider them. Otherwise, USEPA will not consider comments from the March 20, 1984, proposed rulemaking in its final rulemaking.

Under 5 U.S.C. 605(b), I certify that this SIP disapprovals will not have a significant economic impact on a substantial number of small entities because it only applies to six sources; Getty, All Steel, St. Charles, National Can, American Can and U.S. Can.

**List of Subjects in 40 CFR Part 52**

Air pollution control, Carbon monoxide, Hydrocarbon, Intergovernmental relations, Ozone.

Under Executive Order 12291, this action is not "Major". It has been submitted to the Office of Management and Budget (OMB) for review.

**Editorial note:** This document was received at the Office of the Federal Register March 9, 1989.

[FR Doc. 89–5869 Filed 3–13–89; 8:45 pm]

BILLING CODE 6560-50-M

[1] In fact, on July 15, 1987 (52 FR 264.24), USEPA reproposed to disapprove Illinois 1982 ozone SIP for the Chicago attainment demonstration area because, *inter alia*, of the multiple and significant continuing violations of the ozone NAAQS monitored there. On October 17, 1988 (53 FR 40615), USEPA gave final disapproval of the Chicago portion of the SIP. It should also be noted that on May 26, 1988, USEPA notified the Governor of Illinois that the SIP for Chicago area is substantially inadequate to attain and maintain the ozone standard in the Chicago-Gary-Lake County Consolidated Metropolitan Statistical Area (CMSA), and called for a revision of the plan.

## 40 CFR Part 52

**[FRL–3535–8; KY–037]**

## Approval and Promulgation of Implementation Plans Kentucky: Stack Height Review

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** EPA is proposing to approve a declaration by Kentucky that recent revisions to EPA's stock height regulations do not necessitate source-specific revisions to the State Implementation Plan (SIP) in this State. The State was required to review its SIP for consistency within nine months of final promulgation of the stack height regulations. The intended effect of this action is to formally document that Kentucky has satisfied their obligations under Section 406 of Pub. L. 95–95 to review their SIP with respect to EPA's revised stack height regulations. No emission limitations were affected by stack height credit above GEP or any other dispersion technique with the possible exception of the Ashland Oil, Inc., oil refinery in Catlettsburg. The analysis for this source will be done in a subsequent notice.

**DATES:** Comments must be received on or before April 13, 1989.

**ADDRESSES:** Comments may be mailed to Beverly T. Hudson of EPA Region IV's Air Programs Branch. (See EPA Region IV address below.) Copies of the submission and EPA's evaluation are available for public inspection during normal business hours at the following locations:

Air Programs Branch, Region IV, Environmental Protection Agency, 345 Courtland Street NE., Atlanta, Georgia 30365

Kentucky Department for National Resources and Environmental Protection, 18 Reilly Road, Frankfort Office Park, Frankfort, Kentucky 40601

**FOR FURTHER INFORMATION CONTACT:** Beverly T. Hudson, EPA Region IV Air Programs Branch, at the above listed address, telephone (404) 347–2864 or FTS 257–2864.

**SUPPLEMENTARY INFORMATION:** On February 8, 1982 (47 FR 5864), EPA promulgated final regulations limiting stack height credits and other dispersion techniques as required by section 123 of the Clean Air Act (the Act). These regulations were challenged in the U.S. Court of Appeals for the DC Circuit by the Sierra Club Legal Defense Fund, Inc., the Natural Resources Defense Council, Inc., and the Commonwealth of Pennsylvania in *Sierra Club v. EPA*, 719 F. 2d 436. On October 11, 1983, the court issued its decision ordering EPA to reconsider portions of the stack height regulations, reversing certain portions and upholding other portions.

On February 28, 1984, the electric power industry filed a petition for a writ of certiorari with the U.S. Supreme Court. On July 2, 1984, the Supreme Court denied the petition (104 s. CT. 3571), and on July 18, 1984, the Court of Appeals formally issued a mandate

VOL
54
ISS
48
MR
14
1989
UMI

implementing its decision and requiring EPA to promulgate revisions to the stack height regulations within six months. The promulgation deadline was ultimately extended to June 27, 1985.

Revisions to the stack height regulations were proposed on November 9, 1984 (49 FR 44878), and finalized on July 8, 1985 (50 FR 27892). The revisions redefine a number of specific terms, including "excessive concentration," "dispersion techniques," "nearby," and other important concepts, and modify some of the bases for determining good engineering practice (GEP) stack height.

Pursuant to section 406(d)(2) of Pub. L. 95–95, all states were required to (1) review and revise, as necessary, their state implementation plans (SIP's) to include provisions that limit stack height credit and dispersion techniques in accordance with the revised regulations and (2) review all existing emission limitations to determine whether any of these limitations have been affected by stack height credit above GEP or any other dispersion techniques. For any limitations so affected, states were to prepare revised limitations consistent with their revised SIP's. All SIP revisions and revised emission limits were to be submitted to EPA within nine months of promulgation, as required by statute.

Subsequently, EPA issued detailed guidance on carrying out the necessary reviews. For the review of emission limitations, state were to prepare inventories of stacks greater than 65 meters (m) in height and sources with emissions of sulfur dioxide ($SO_2$) in excess of 5,000 tons per year. These limits correspond to the *de minimis* GEP stack height and the *de minimis* $SO_2$ emission exemption from prohibited dispersion techniques. Sources were exempted from further review if they fell under the grandfathering clause (in existence before December 31, 1970), or if their actual height was less than the calculated (GEP) stack height. The remaining sources were then to be subjected to detailed review for conformance with the revised regulations. State submissions were to contain an evaluation of each stack and source in the inventory. Kentucky has indicated that the documentation is available for review at the State office (listed above).

A summary of the State's findings is provided below.

**Stack Height**

Kentucky identified fifty-seven (57) stacks examined in the stack height review analysis. Of those stacks, forty-three (43) were greater than 65 meters and fifteen (15) stacks were less than 65 meters. Twenty-two (22) of the forty-three (43) stacks greater than 65 meters were grandfathered. Eleven stacks were reviewed for GEP formula height. The number of actual stacks which exceed GEP is four. Two of these stacks had to be remodeled at GEP. The other two stacks were previously modeled at GEP, and found to have acceptable emissions limits. The modeling techniques used in the demonstration supporting this revision are, for the most part, based on modeling guidance in place at the time that the analysis was performed, i.e., the EPA "Guideline on Air Quality Models" (1978). Since that time, revisions to modeling guidance have been promulgated by EPA (51 FR 32176, September 9, 1986 and 53 FR 392, January 6, 1988). Because the modeling analysis was under way prior to publication of the revised guidance, EPA accepts the analysis. The Ashland Oil Inc., oil refinery in Catlettsburg has eight stacks which have not been completely evaluated. The analysis for this source will be dealt with in a subsequent notice.

**Dispersion Techniques**

Six (6) sources were reviewed for other prohibited dispersion techniques. No sources were found that used a prohibited dispersion technique.

On January 22, 1988, the U.S. Court of appeals for the District of Columbia issued its decision in *NRDC* v. *Thomas*, 838 F.2d 1224 (DC Dir. 1988), regarding the Environmental Protection Agency's (EPA's) stack height regulations (50 FR 27892, July 8, 1985); the court upheld most of the rules, but certain provisions were remanded to the EPA for further consideration. Accordingly, EPA is not acting on two other Kentucky sources (identified in the TSD) because they currently receive credit under one of the remanded provisions. Kentucky and EPA will review these sources for compliance with any revised requirements when EPA completes rulemaking to respond to the NRDC remand.

The modeling review presents the results of Good Engineering Practice (GEP) Modeling for the determination of sulfur dioxide and total suspended particulate emissions from East Kentucky Power Cooperative (EKPC) Spurlock Units 1 and 2. Spurlock Units 1 and 2 were the sources that had to be modelled. This air quality impact assessment study was prepared using GEP stack heights for Units 1 and 2.

The results of this review indicate the modeled (ISCST) $SO_2$ and TSP emissions from Spurlock Units 1 and 2 at GEP stack heights comply with the NAAQS. This is based upon modeling the seven major sources within the 50 kilometer radius utilized in this study. Despite strong impacts influenced by emissions from Stuart Units 1–4, the modelling of the seven combined major sources indicates that $SO_2$ and TSP ambient concentrations comply with National Ambient Air Quality Standards.

Sources located within 50 km of the Spurlock facility and constructed after January 6, 1975, were considered in the Prevention of Significant Deterioration analysis (Spurlock Unit 2 and Killen Power Plant Unit 2 (Wrightsville, Ohio)).

**EPA Review**

EPA has reviewed Kentucky's submittal and concurs with the conclusion that no SIP revisions are necessary as a result of EPA's revised stack height regulations. Kentucky has therefore met its obligations under section 406 of Pub. L. 95–95, with the possible exception of Ashland Oil, Inc. The analysis for this source will be dealt with in a subsequent notice.

Today's action does not certify that Kentucky has complied with obligations under section 406 Pub. L. 95–95, for new sources, as required in 40 CFR 51.164 and 51.118. Those federal provisions contain the stack height requirements for all sources that were or are constructed, reconstructed or modified subsequent to December 31, 1970. EPA is acting on Kentucky's submittals to comply with these requirements in a separate **Federal Register** notice.

EPA's detailed review and approval of the technical support submitted by the State is contained in a Technical Support Document. This document is available for public inspection at the EPA Regional Office listed in the **ADDRESSES** section of this notice. By publishing this proposed approval of the review and soliciting public comment, EPA is ensuring the opportunity for public participation in this process.

**Proposed Action**

EPA approves Kentucky's determination that no emission limitations have to be revised at this time, with the possible exception of Ashland Oil, Inc. Concerning Ashland Oil, Inc., which is not currently subject to the negative declaration and for which a review pursuant to section 406(d)(2) is still required, EPA is providing Kentucky with the following alternative methods to insure compliance with EPA's stack height regulations:

(1) Submittal, within the public comment period associated with this notice, of modeling analyses and other technical support demonstrating compliance within the stack height regulations for the remaining sources; or

(2) Submittal, within the public comment period associated with this notice, of revised emission limitations as necessary to comply with the stack height regulations along with modelling analyses and other technical support; or

(3) Submittal, within the public comment period associated with this notice, of a schedule for final submittal of either (1) or (2) above.

Under 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

BILLING CODE 6560-50-M

## LEGAL SERVICES CORPORATION

**45 CFR Part 1632**

**Redistricting**

**AGENCY:** Legal Services Corporation.

**ACTION:** Proposed rule.

**SUMMARY:** The Legal Services Corporation ("LSC" or "Corporation") has as its principal national goal the provision of basic day-to-day legal services to eligible poor individuals. As part of the implementation of this goal, LSC proposes to prohibit any recipient involvement in redistricting activities, as defined in the rule, because redistricting activities are not related to the delivery of basic day-to-day legal services to the poor and are intertwined with impermissible political activity. The proposed rule is intended to ensure that recipients refrain from becoming involved in any redistricting activity, since such activity is not consistent with the Corporation's principal national goal for the provision of legal assistance.

**DATE:** Comments must be submitted on or before April 13, 1989.

**ADDRESS:** Send comments to Timothy B. Shea, General Counsel, Legal Services Corporation, 400 Virginia Avenue SW., Washington, DC 20024–2751.

**FOR FURTHER INFORMATION CONTACT:** Timothy B. Shea, (202) 863–1839.

**SUPPLEMENTARY INFORMATION:** Section 1007(a)(2)(C) of the LSC Act requires the Corporation to establish goals for the provision of legal assistance. 42 U.S.C. 2996f(a)(2)(C). This section mandates that the Corporation ensure that recipients, "consistent with goals established by the Corporation," adopt procedures and implement local priorities for the provision of legal assistance, taking into account the relative needs of the eligible clients in the relevant service area. For the reasons set out here, redistricting activities are not consistent with the Corporation's goal that scarce resources be focused on meeting the basic day-to-day legal needs of eligible poor individuals.

Section 1007(a)(2)(C) of the Act requires that the Corporation ensure that its recipients, consistent with goals established by the Corporation, establish priorities for the provision of legal assistance. In setting such goals, the Congress specifically noted that the Corporation's establishment of national goals was "not intended to detract from the appropriate role of local programs" to consult local client communities. *See* H. Rep. No. 310, 95th Cong., 1st Sess. 11 (1977); *see also* S. Rep. No. 172, 95th Cong., 1st Sess. 13 (1977).

In the past, the Corporation has asserted this authority to establish national goals. *See, e.g.*, LSC Final Decision to Terminate Funding to San Juan Legal Services, Inc. (Apr. 26, 1979) at 3 (citing Recommended Decision of Hearing Examiner, wherein the basis for the termination of funding was in part due to a failure to undertake litigation having a significant impact on eligible clients, in contravention of LSC's then established goals). The purpose of national goals is to provide perimeters to individual recipients, who in turn can set local priorities within those perimeters. Historically, recipients have been accorded substantial discretion in determining the areas to which they will devote resources. *See* 45 CFR Part 1620.

For the following reasons, the Corporation has determined that redistricting activities are not in accord with the Corporation's goal of focusing scarce resources on the basic day-to-day legal needs of eligible poor individuals. First, redistricting cases are not peculiar to the interests of the poor, since the relief sought would affect entire communities, which are composed of poor and non-poor individuals. Second, redistricting cases have not been identified as a priority by LSC recipients. Third, recipient funds can be better used elsewhere, since alternative organizations are available to handle redistricting matters. Fourth, recipients would likely be competing with members of the private bar who handle matters such as these, since redistricting cases usually generate attorneys' fees. Finally, involvement in an activity that risks entanglement with political activities should be assiduously avoided by LSC recipients. The prohibition in this part is similar to that contained in section 6 of S. 2409 (1986), a bill introduced by Senators Hatch and Rudman to reauthorize the Legal Services Corporation. *See* 132 Cong. Rec. S5418 (1986).

*Allocation of Resources.* Redistricting is not peculiar to the interests of the poor because redistricting disputes usually involve entire communities, which include both poor and non-poor citizens. As the legislative history of the Act points out, the Corporation, in the establishment of national goals, is to ensure that the provision of legal assistance is made in the most effective manner and so as to have the greatest effect on the problems of the poor. Since the poor represent a minority, approximately 10 to 15 percent of the United States population, the group of eligible poor in most communities is relatively small. Since most redistricting cases are class actions, the putative plaintiff class often may consist of a majority of non-eligible individuals. Similarly, the relief sought in redistricting cases often would go to the non-poor. Even in redistricting cases involving discrimination issues, the relief sought would not always go primarily to eligible poor individuals, as only part of the protected minority may be eligible. Consequently, the expenditure of recipients' funds on redistricting activities would result in an allocation of resources for the benefit of non-eligible persons.

This rule is consistent with current priorities and practice requirements, since redistricting has not been identified as a priority by any LSC recipient. A compilation of the types of cases handled by LSC recipients in 1987 reveals that approximately 27 percent of the cases involved family matters, 21 percent involved housing matters, 18 percent involved income maintenance issues, and 12 percent were consumer related cases. *See* Legal Services Corporation 1987/1988 Fact Book at 46. However, the need for this rule is supported by the fact that, at other times, LSC recipients have committed substantial resources to redistricting

BEST COPY AVAILABLE

VOL 54 ISS 48 MR 14 1989 UMI

issues. As noted below, the Corporation estimates that more than 28,000 hours were devoted to handling redistricting cases from 1978 to 1984, years surrounding the 1980 census.

*Alternative Resources.* Redistricting activities are undertaken by numerous organizations, including the Mexican American Legal Defense Fund, the Southwest Voters Registration Project, Common Cause, the American Civil Liberties Union, the Native American Rights Fund, the NAACP, the Lawyers Committee for Civil Rights, the League of Women Voters, the Democratic National Committee, and the Republican National Committee. Consequently, there are other entities available to help aggrieved parties, poor and non-poor alike, who want to seek redress of any perceived malapportionment. Redistricting cases usually offer incentives to members of the private bar, since under the Voting Rights Act, 42 U.S.C. 1973, and the Civil Rights Attorneys' Fees Award Act of 1976, 42 U.S.C. 1981 and 1988, the right to recover attorneys' fees is specifically provided to prevailing parties.

*Subject to Abuse.* In the past, involvement in redistricting activities by legal services recipients has been subject to abuse because legal services recipients have linked redistricting activities to obtaining favorable Congressional support for their objectives. One LSC recipient's grant proposal addressed the need to become involved in State and local redistricting matters in order to develop powerful allies for their clients in what the recipient viewed as a battle over the direction of legal services programs. Influencing redistricting in State and local legislative bodies clearly affects the political character of those legislative bodies.

In response to the requests made on April 11 and May 10, 1984, by the Senate Committee on Labor and Human Resources, LSC conducted a study of its grantees to determine their involvement in legislative redistricting activities arising out of the 1980 census. As a result of two separate monitorings and 34 responses to an LSC questionnaire that was mailed to all LSC programs, LSC estimates that at least 28,182 hours were spent handling legislative redistricting cases. Specifically, the LSC study found that LSC recipients, in spite of one recipient's assertion that clients rarely come to the office contending they have been "malapportioned", had sought resources for specialized computer equipment and a computer specialist to draw new election district boundaries to the recipients' satisfaction. In addition, recipients hired lobbyists to work on reapportionment issues, yet had no documented request from an eligible client or elected official to undertake this activity. Further, recipients also orchestrated a State-wide effort of legal services programs to ensure elections of specific persons, who would in turn be used as powerful allies in anticipated battles over funding for legal services programs.

The LSC study also revealed that certain LSC recipients requested and received Federal funds from the Corporation to establish a Voting Rights Project center in connection with the 1980 census for the purpose of strengthening Mexican-American political power, yet had no request from an eligible client to do so. In addition, these recipients prepared a voting rights litigation manual that outlined how to select the "right" client for a redistricting battle and how to locate such a client. Since these redistricting activities were obviously conducted by legal services attorneys in pursuit of general policy goals (or even in their own self-interest), rather than in the vindication of individual clients' rights, it is clear that involvement in redistricting activity is subject to abuse and not consistent with the Corporation's principal national goal of providing basic day-to-day legal services to eligible poor individuals.

*Risk of Undue Political Entanglement.* The Legal Services Corporation Act declares that "to preserve its strength, the legal services program must be kept from the influence of or use by it of political pressures." 42 U.S.C. 2996. The LSC Act also specifically prohibits involvement in "any political activity." 42 U.S.C. 2996f(a)(6)(A). Involvement on the part of LSC recipients in redistricting activities is inherently political. The Supreme Court of the United States has held that "[p]olitics and political considerations are inseparable from redistricting and apportionment." *Gaffney* v. *Cummings*, 412 U.S. 735, 753 (1973).

In separate instances, LSC recipients were involved in reapportionment cases with counsel for the Democratic and Republican parties, respectively. *Upham* v. *Seamon*, 456 U.S. 37 (1982); *Thornburg* v. *Gingles*, 478 U.S. 30 (1986). The Corporation makes no finding as to whether LSC recipients have aligned themselves with a particular political party, but believes that any such alignment is impermissible under the Act, since it constitutes political activity.

*Competing Political Theories or Philosophies.* Redistricting activities seek political outcomes that are normally the product of the legislative process. Indeed, the Supreme Court has stated that courts "must defer to legislative judgments on reapportionment as much as possible." *Upham* v. *Seamon*, 456 U.S. 37, 39, *reh'g denied* 456 U.S. 938 (1982). LSC recipient involvement in such redistricting activities generally will cause program funds to be expended in support of one political philosophy, rather than another. In *Baker* v. *Carr*, 369 U.S. 186 (1962), Justice Frankfurter, in his dissent, stated "What is actually asked of the Court in this case is to choose among competing bases of representation—ultimately, really among competing theories of political philosophy—in order to establish an appropriate frame of government." *Id.* at 254.

Consequently, the Corporation finds that redistricting activities, as defined in this rule, are so unrelated to basic day-to-day needs of the eligible poor and so intertwined with impermissible political activity that the Corporation should not permit its recipients to be involved in such activities.

**List of Subjects in 45 CFR Part 1632**

Legal services.

For the reasons set out above, 45 CFR Chapter XVI is proposed to be amended by adding Part 1632 to read as follows:

## PART 1632—REDISTRICTING

Sec.
1632.1 Purpose.
1632.2 Definitions.
1632.3 Prohibition.

**Authority:** 42 U.S.C. 2996f(a)(2)(C); 42 U.S.C. 2996f(a)(3); 42 U.S.C. 2996g(e) of the Legal Services Corporation Act.

### § 1632.1 Purpose.

This part is intended to ensure that funds available to recipients will be utilized to the maximum extent for the delivery of basic day-to-day legal services to eligible poor individuals. Involvement in redistricting activities does not constitute the provision of basic day-to-day legal services and is prohibited by this part.

### § 1632.2 Definitions.

(a) As used in this Part, "redistricting" means any effort, directly or indirectly, to participate in the revision or reapportionment of a legislative, judicial, or elective district at any level of government, including influencing the timing or manner of the taking of a census.

(b) As used in this part, "advocating or opposing any plan" means any effort, whether by request or otherwise, even if

of a neutral nature, to revise a legislative, judicial, or elective district at any level of government.

(c) As used in this part, "recipient" means any grantee or contractor receiving funds made available by the Corporation under sections 1006(a)(1) or 1006(a)(3) of the act. The term "recipient" includes subrecipient and employees of recipients and subrecipients.

### § 1632.3 Prohibition.

Neither the Corporation nor any recipient shall be involved in or contribute or make available any funds, personnel, or equipment for use in advocating or opposing any plan, proposal, or litigation intended to or having the effect of altering any redistricting at any level of government.

Date: March 9, 1989.

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

## CHRISTOPHER COLUMBUS QUINCENTENARY JUBILEE COMMISSION

### Meeting

**AGENCY:** Christopher Columbus Quincentenary Jubilee Commission.

**ACTION:** Notice of meeting.

**SUMMARY:** This notice announces a forthcoming meeting of the Christopher Columbus Quincentenary Jubilee Commission, a presidential commission established in 1984 (Pub. L. 98-375). The meeting will be held in Dallas, Texas and will be chaired by Commission Chairman John N. Goudie.

**DATES:** Friday, April 7, 1989 from 2:30 to 5:30 p.m. (Open). Saturday, April 8, 1989 from 8:30 a.m. to 10:00 a.m. (Closed); 10:00 a.m. to 1:00 p.m. (Open).

**ADDRESSES:** On April 7, 1989 from 2:30 to 5:30 p.m. at the Hotel Plaza of the Americas, Ballroom, Dallas, Texas. On April 8, 1989 from 8:30 a.m. to 1:00 p.m. at the Hotel Plaza of the Americas, Ballroom, Dallas, Texas.

**FOR FURTHER INFORMATION CONTACT:** Francisco J. Martinez-Alvarez (202) 632-1992.

**SUPPLEMENTARY INFORMATION:** The Commission will review proposals for endorsement submitted by interested individuals and organizations, hear presentations by the Dallas Quincentenary Committee, Santa Fe Committee, California 1992 Committee, and Colorado Quincentenary Commission.

**Francisco J. Martinez-Alvarez,**
*Acting Director.*

## DEPARTMENT OF COMMERCE

### International Trade Administration

**[Docket No. 90254-9064]**

### Commercial Information Product User Fees

**AGENCY:** International Trade Administration, Commerce.

**ACTION:** Notice.

**SUMMARY:** The U.S. and Foreign Commercial Service (US&FCS), U.S. Department of Commerce, is establishing user fee rates for its expanded Comparison Shopping Service (CSS).

**EFFECTIVE DATE:** March 14, 1989.

**FOR FURTHER INFORMATION CONTACT:** Raymond S. Yaukey, Marketing Analysis Division, Office of Commercial Information Management, Export Promotion Services, U.S. and Foreign Commercial Service, International Trade Administration, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC 20230. Telephone (202) 377-8972.

**SUPPLEMENTARY INFORMATION:** The Comparison Shopping Service provides a custom market survey for a U.S. firm's specific product in a selected country market. A CSS survey covers a single product in a single country market and answers basic questions relating to the marketability of the product, key competitors, comparative prices, customary distribution and promotion practices, trade barriers and other factors. The expanded Comparison Shopping Service is to take effect as of date of publication in **Federal Register** and the following new user fee schedule will take effect on this date.

**User Fee Schedule For The Expanded Comparative Shopping Service:**

**[A] $1,350**

| | |
|---|---|
| Canada | Switzerland |
| Germany | Taiwan |
| Korea | United Kingdom |
| Mexico | |

**[B] $1,650**

| | |

## National Oceanic and Atmospheric Administration

### Coastal Zone Management: Federal Consistency Appeals by Korea Drilling Company, Ltd. (California) and John Bianchi (New York)

**AGENCY:** National Oceanic and Atmospheric Administration, Commerce.

**ACTION:** Announcement of decisions.

On January 19, 1989, the Secretary of Commerce issued a decision in the consistency appeal by Korea Drilling Company, Ltd. (KDC). KDC had applied to the U.S. Environmental Protection Agency (EPA) for a National Pollutant Discharge Elimination System (NPDES) permit for the discharge of drilling muds and associated waste materials from its exploratory drilling vessel, the *Doo Sung*, on certain outer Continental Shelf tracts offshore California. Pursuant to section 307(c)(3)(A) of the Coastal Zone Management Act, as amended (CZMA), 16 U.S.C. 1451 *et seq.*, the California Coastal Commission objected, barring issuance of the permit.

On appeal, the Secretary found that KDC's proposed activity met the regulatory criteria for an override of the Commission's objection on the ground that the activity was consistent with the objectives of the CSMA. EPA may therefore make its NPDES permit for KDC effective. Permit in hand, KDC may then bid for drilling contracts with companies possessing oil and gas leases for the enumerated tracts.

On January 25, 1989, the Acting Secretary of Commerce issued a decision in the consistency appeal by John Bianchi. Mr. Bianchi had applied to the U.S. Army Corps of Engineers for a permit for construction of a pier consisting of a rectangular open-pile deck, a ramp and a float behind his restaurant on the Reynolds Channel in Hempstead, New York. The pier was to serve as both a temporary dock for the boasts of restaurant patrons and an "alternate" waiting area for the patrons. Pursuant to section 307(c)(3)(A) of the CZMA, the New York Department of State (State) objected, barring issuance of the permit. As an alternative consistent with its coastal zone management program, the State recommended a much smaller open-pile dock in a "T"- or "L"-shape.

Mr. Bianchi appealed for an override of the State's objection on the ground that his activity was consistent with the objectives of the CZMA. On appeal, the Acting Secretary found that the proposed alternative was reasonable and available. Under the implementing regulations to the CZMA, such a finding precludes an override of the State's objection.

**FOR ADDITIONAL INFORMATION CONTACT:** Stephanie S. Campbell, Attoney/Adviser, Office of the Assistant General Counsel for Ocean Services, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 1825 Connecticut Avenue, NW., Suite 603, Washington, DC 20235, (202) 673-5200.

Date: March 7, 1989.

### Coastal Zone Management: Federal Consistency Appeal by Claire Pappas from an Objection by the New York Department of State

**AGENCY:** National Oceanic and Atmospheric Administration, Commerce.

**ACTION:** Notice of appeal.

On February 6, 1989, En-Consultants, Inc., on behalf of Claire Pappas (Appellant), filed with the Secretary of Commerce a notice of appeal under section 307(c)(3)(A) of the Coastal Zone Management Act of 1972, 16 U.S.C. 1456(c)(3)(A), and the Department of Commerce's (Department) implementing regulations, 15 CFR Part 930, Subpart H. The appeal arises from an objection by the New York Department of State (State) to the Appellant's consistency certification for a U.S. Army Corps of Engineers (Corps) permit to construct a deck for dining purposes at a seafood restaurant in Freeport, New York. The State's objection precludes the Corps from issuing the permit pending the outcome of the Appellant's appeal.

If the Appellant perfects the appeal by filing the supporting data and information required by the Department's implementing regulations, public comments will be solicited by a notice in the **Federal Register** and a local newspaper.

**FOR ADDITIONAL INFORMATION CONTACT:** Sydney Anne Minnerly, Attorney-Adviser, Office of the Assistant General Counsel for Ocean Services, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 1825 Connecticut Avenue, NW., Suite 603, Washington, DC 20235, (202) 673-5200.

Date: March 7, 1989.

### Intent To Evaluate Performance of the Delaware Coastal Management Program

**AGENCY:** National Oceanic and Atmospheric Administration, National Ocean Service, Office of Ocean and Coastal Resource Management.

**ACTION:** Notice of intent to evaluate.

**SUMMARY:** The National Oceanic and Atmospheric Administration, National Ocean Service, Office of Ocean and Coastal Resources Management (OCRM), announces its intent to evaluate the performance of the Delaware Coastal Management Program (CMP); Florida CMP; Rhode Island CMP; and American Samoa CMP; and New York (Hudson) National Estuarine Research Reserve through June 1989. Evaluation of coastal management programs will be conducted pursuant to section 312 of the Coastal Zone Management Act of 1972, as amended, (CZMA), which requires a continuing review of the performance of coastal states with respect to coastal management, including detailed findings concerning the extent to which the state has implemented and enforced the program approved by the Secretary of Commerce, addressed the coastal management needs identified in section 303(2)(A) through (I) of the CZMA, and adhered to the terms of any grant, loan or cooperative agreement funded under the CZMA. Evaluation of the National Estuarine Research Reserve will be conducted pursuant to section 315(f) of the CZMA, which requires the periodic review of the performance of each reserve with respect to its operation and management. The reviews involve consideration of written submissions, a site visit to the state, and consultation with interested Federal, state and local agencies and members of the public. Public meetings will be held as part of the site visits. The state will issue notice of these meetings. Copies of each state's most recent performance report, as well as the OCRMs notification letter and supplemental information request letter to the state are available upon request from the OCRM. Written comments from all interested parties on each of these programs to the contact listed below are encouraged at this time. OCRM will place subsequent notice in the **Federal Register** announcing the availability of the Final Findings based on each evaluation once these are completed.

**FOR FURTHER INFORMATION CONTACT:** John H. McLeod, Evaluation Officer, Policy Coordination Division, Office of Ocean and Coastal Resource Management, National Ocean Service, NOAA, 1825 Connecticut Avenue, NW, Washington DC 20235 (telephone 202/673-51044

### National Technical Information Service

#### Intent to Grant Exclusive Patent License; Absorbent Industries, Inc.

The National Technical Information Service (NTIS), U.S. Department of Commerce, intends to grant to Absorbent Industries, Inc., having a place of business in Portland, Oregon, an exclusive license in the United States to practice the invention entitled "Modified Starches as Extenders for Absorbent Polymers" U.S. Patent 4,483,950. The patent rights to this invention have been assigned to the United States of America, as represented by the Secretary of Commerce.

The intended exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The intended license may be granted unless, within sixty days from the date of this published Notice, NTIS receives written evidence and argument which establishes that the grant of the intended license would not serve the public interest.

Inquiries, comments, and other materials relating to the proposed license must be submitted to Douglas J. Campion, Office of Federal Patent Licensing , NTIS, Box 1423, Springfield, VA 22151.

A copy of the instant patent application may be purchased from the NTIS Sales Desk by telephoning (703) 487–4650 or by writing to the Order Department, NTIS, 5285 Port Royal Road, Springfield, VA 22161.

BILLING CODE 3510-04-M

#### Intent To Grant Exclusive Patent License

The National Technical Information Service (NTIS), U.S. Department of Commerce, intends to grant to Nuclear Associates, a Division of Victoreen, Inc., having a place of business in Carle Place, NY 11514-1593, an exclusive license in the United States and certain foreign countries to practice the invention entitled "Anthropomorphic Cardiac Ultrasound Phantom," U.S. Patent Application Serial Number 7–257,174. The invention consists of (1) an apparatus which simulates part of the human cardiac anatomy and (2) a method which assesses the performance of ultrasound imaging, Doppler ultrasound or color/flow Doppler imaging devices. Another object of the invention is to provide a novel phantom apparatus to simulate human blood circulation for low reverberation ultrasound viewing. Prior to the grant of any license by NTIS, the patent rights in this invention will be assigned to the United States of America, as represented by the Secretary of Commerce.

The intended exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The intended license may be granted unless within sixty days from the date of this published Notice, NTIS receives written evidence and argument which establishes that the grant of the intended license would not serve the public interest.

Inquiries, comments, and other materials relating to the proposed license must be submitted to Neil L. Mark, Office of Federal Patent Licensing, NTIS, Box 1423, Springfield, VA 22151.

A copy the instant patent application may be purchased from the NTIS Sales Desk by telephoning (703) 487–4650 or by writing to the Order Department, NTIS, 5285 Part Royal Road, Springfield, VA 22161

## DEPARTMENT OF DEFENSE

### Department of the Army

#### Army Science Board; Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Committee Meeting:

*Name of the Committee:* Army Science Board (ASB).

*Dates of Meeting:* 29–30 March 1989.

*Time:* 0800–1700 hours, daily.

*Place:* Fort Gordon, Georgia.

*Agenda:* The 1989 Army Science Board Summer Study on Maintaining State of the Art in the Army Command and Control System will meet. Topics for the meeting include the CBRS and its application, and fielding and acquisition processes. This meeting will be open to the public. Any interested person may attend, appear before, or file statements with the committee at the time and in the manner permitted by the committee. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (202) 695–3039/7046.

**Richard E. Entlich,**

*Colonel, GS, Executive Secretary.*

## DEPARTMENT OF EDUCATION

### Proposed Information Collection Requests

**AGENCY:** Department of Education.

**ACTION:** Notice of proposed information collection requests.

**SUMMARY:** The Director, Office of Information Resources Management, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1980.

**DATES:** Interested persons are invited to submit comments on or before April 13, 1989.

**ADDRESSES:** Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Jim Houser, Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place, NW., Room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection requests should be addressed to Margaret B. Webster, Department of Education, 400 Maryland Avenue, SW., Room 5624, Regional Office Building 3, Washington, DC 20202.

**FOR FURTHER INFORMATION CONTACT:** Margaret B. Webster, (202) 732–3915.

**SUPPLEMENTARY INFORMATION:** Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations.

The Director, Office of Information Resources Management, publishes this notice containing proposed information collection requests prior to submission to these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) title; (3) frequency of collection; (4) the affected public; (5) reporting burden; and/or (6) recordkeeping burden; and (7) abstract. OMB invites public comments at the address specified above. Copies of the requests are available from Margaret Webster at the address specified above.

Dated: March 9, 1989.

**George Sotos,**

*Acting Director, for Office of Information, Resources Management.*

Office of Management

*Type of Review:* Extension.

*Title:* Family Education Rights and Privacy Information Collection.

*Frequency:* On occasion.

*Affected Public:* State or Local Government.

*Reporting Burden: Responses:* 28,075 *Burden Hours:* 7,018.75.

*Recordkeeping Burden: Recordkeepers:* 0 *Burden Hours:* 0.

*Abstract:* Regulations require school districts and postsecondary institutions to provide disclosure or notification to parents and students of their rights and to keep a record of parties who have access to the student's records.

BILLING CODE 4000-01-M

### National Advisory Council on Indian Education, Closed Meeting

**AGENCY:** National Advisory Council on Indian Education.

**ACTION:** Notice of closed meeting.

**SUMMARY:** This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the Proposal Review Committee of the National Advisory Council on Indian Education. This notice also describes the functions of the Council. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act.

**DATES:** March 27–28, 1989, 8:30 a.m. until conclusion of business each day.

**ADDRESS:** U.S. Department of Education, 400 Maryland Avenue, SW., Room 2177, Washington, DC (202) 732–1887.

**FOR FURTHER INFORMATION CONTACT:** Jo Jo Hunt, Executive Director, National Advisory Council on Indian Education, 330 C Street, SW., Room 4072, Switzer Building, Washington, DC 20202–7556 (202) 732–1353).

**SUPPLEMENTARY INFORMATION:** The National Advisory Council on Indian Education is established under section 5342 of the Indian Education Act of 1988 (25 U.S.C. 2642). The Council is established to, among other things, assist the Secretary of Education in carrying out responsibilities under the Indian Education Act of 1988 (Part C of Title V of Pub. L. 100–297) and to advise Congress and the Secretary of Education with regard to federal education programs benefiting Indian children and adults.

The Proposal Review Committee of the Council will meet in closed session starting at approximately 8:30 a.m. and will end at the conclusion of business each day at approximately 5:00 p.m. The agenda includes reviewing grant applications for assistance under programs authorized by subparts 1, 2, and 3 of the Indian Education Act, including applications for (1) Discretionary Grants to Indian-Controlled Schools; (2) Planning, Pilot, and Demonstration Projects; (3) Educational Personnel Development Projects; (4) Educational Services Projects; (5) Indian Fellowships; and (6) Educational Services for Indian Adults. Under section 5342(b)(2) of subpart 4 of the Indian Education Act, the Council is authorized to review applications for assistance submitted under the Indian Education Act and to make recommendations to the Secretary of Education with respect to their approval.

The reviewing of applicants must be held in the highest confidence until the announcement is released by proper authorities as to which project will be funded. The premature disclosure of information discussed during the review process is likely to significantly frustrate implementation of proposed agency action. Financial information obtained from a person which is privileged or confidential contained in and related to these applications will be discussed at the review session. In addition, discussion will touch upon matters that would disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy if conducted in open session. Such matters are protected by exemptions (9), (4), and (6) of section 552b(c) of the Government in the Sunshine Act (Pub. L. 94–409; 5 U.S.C. 552b(c)).

The public is being given less than 15 days notice of this meeting because of scheduling requirements to meet the funding target dates of the Office of Indian Education.

A summary of the activities of the closed meeting and related matters which are informative to the public consistent with the policy of Title 5 U.S.C. 552b will be available to the public within 14 days of the meeting.

Dated: March 7, 1989. Signed at Washington, DC.

**Jo Jo Hunt,**

*Executive Director, National Advisory Council on Indian Education.*

BILLING CODE 4000-01-M

## DEPARTMENT OF ENERGY

### Economic Regulatory Administration

#### Final Consent Order with Thomas P. Reidy, Inc.

**AGENCY:** Economic Regulatory Administration, Department of Energy

**ACTION:** Final action of proposed consent order.

**SUMMARY:** The Department of Energy (DOE) hereby gives the notice required by 10 CFR 205.199J that it has adopted as final the Consent Order with Thomas P. Reidy, Inc. (predecessor to Ramada Oil and Gas Corporation) (Reidy), executed on January 13, 1989, and published for comment in 54 FR 5265 on February 2, 1989.

As required by 10 CFR 205.199J, DOE provided a period of thirty (30) days following publication of the Notice of Proposed Consent Order for the submission of comments. The ERA received no comments in response to this Notice. Accordingly, ERA has determined that the Consent Order should be made final without modification. The Consent Order becomes effective as a Final Order of the DOE on the date of publication of this Notice.

**FOR FURTHER INFORMATION CONTACT:** Dorothy Hamid, Office of Enforcement Litigation, Economic Regulatory Administration, U.S. Department of Energy, Room 3H–017, RG–32, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–1699.

Copies of the Consent Order may be obtained free of charge by written request to "Reidy Consent Order Request" at the above address or by calling Dorothy Hamid at the above telephone number. Copies may also be obtained in person at the same address or at the Freedom of Information Reading Room, Room 1E–90, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585.

**SUPPLEMENTAL INFORMATION:** On February 2, 1989, DOE published notice in the **Federal Register**, Vol. 54 at page 5265, announcing the execution of a Proposed Consent Order between Reidy and DOE. In compliance with the DOE regulations, that Notice, and a Press

VOL 54 ISS 48 MR 14 1989 UMI

Release, issued on February 3, 1989, summarized the proposed Consent Order and the relevant facts.

The Consent Order resolves all civil and administrative claims or causes of action regarding Reidy's compliance with the obligations under the Federal petroleum price and allocation regulations. The Consent Order requires Reidy to pay to DOE $5.2 million within thirty (30) days of the effective date of the Consent Order, to assign refunds of approximately $170,000, including accrued interest, which were awarded to Reidy in refund proceedings in *Gulf Oil Corp./Thos. P. Reidy, Inc.* and to waive all other claims for refunds in Subpart V proceedings. ERA will direct that all amounts paid by Reidy pursuant to the Consent Order be deposited into an interest-bearing escrow account for ultimate distribution pursuant to Special Refund Procedures under 10 CFR Part 205, Subpart V, and DOE's Modified Statement of Restitutionary Policy at 51 FR 27899 (August 4, 1986).

As noted, no comments were received in response to the Notice of the Proposed Consent Order. Accordingly, ERA has determined to adopt the Proposed Consent Order without modification as a final Order of the DOE, pursuant to 10 CFR 205.199J. The Consent Order becomes effective upon publication of this Notice.

Issued in Washington, DC, on March 6, 1989.

**Milton C. Lorenz,**

*Chief Counsel for Enforcement Litigation, Economic Regulatory Administration.*

## Federal Energy Regulatory Commission

**[Docket No. RP89-86-000]**

### ANR Pipeline Co.; Proposed Changes in FERC Gas Tariff

March 8, 1989.

Take notice that ANR Pipeline Company ("ANR") on March 1, 1989 tendered for filing as a part of its FERC Gas Tariff Original Volume No. 1-A, six copies each of First Revised Sheet No. 136B and Original Sheet No. 136C. These sheets set forth a new tariff provision governing the voluntary reallocation of firm capacity for OCS transportation services and is filed in compliance with § 284.305(e) of the Federal Energy Regulatory Commission's (Commission) Regulations. ANR also has notified the Commission that it elects to continue to use its currently effective rates for transportation services on the OCS performed pursuant to individually issued certificates.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene on or before March 15, 1989. Copies of this filing are on file with the Commission and are available for public inspection.

**Lois D. Cashell,**

*Secretary.*

BILLING CODE 6717-01-M

**[Docket No. RP89-75-000]**

### Black Marlin Pipeline Co; Filing

March 8, 1989.

Take notice that on March 1, 1989, Black Marlin Pipeline Company (Black Marlin) tendered for filing to become a part of Black Marlin's FERC Gas Tariff, Original Volume No. 1, the following tariff sheets:

4th Revised Sheet No. 117
4th Revised Sheet No. 118
4th Revised Sheet No. 119
4th Revised Sheet No. 120
4th Revised Sheet No. 121
4th Revised Sheet No. 122
4th Revised Sheet No. 123
4th Revised Sheet No. 124
4th Revised Sheet No. 125
4th Revised Sheet No. 126-199
2nd Revised Sheet No. 215
1st Revised Sheet No. 215A
2nd Revised Sheet No. 300
3rd Revised Sheet No. 301
2nd Revised Sheet No. 302
3rd Revised Sheet No. 303
1st Revised Sheet No. 304

In compliance with Order No. 509 and 18 CFR 284.305(b), Black Marlin states that the above-noted tariff sheets establish the new rate schedules and the rates it will utilize in providing transportation through its OCS facilities. Black Marlin proposes to establish Rate Schedules FTS/OCS and ITS/OCS under which it will provide "open access" transportation on a firm and interruptible basis respectively in accordance with Order No. 509.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with the Commission's Rules of Practice & Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene.

Copies of this filing are on file with the Commission and are available for public inspection.

**Lois D. Cashell,**

### Chandeleur Pipe Line Co.; Tariff Filing

March 8, 1989.

Take notice that on March 1, 1989, Chandeleur Pipe Line Company (Chandeleur) tendered for filing proposed revised tariff sheets designed to implement changes to its FERC Gas Tariff in compliance with § 284.301 et seq. of the Commission Regulations along with a statement explaining the continued use of Chandeleur's existing rates.

The proposed effective date for the revised tariff sheets is April 1, 1989.

While Chandeleur believes it has complied with all the applicable sections of § 284.301 of the Commission's Regulations, it nevertheless, respectfully requests that waiver be granted of all applicable rules and regulations of the Commission as may be necessary to implement these revised tariff sheets subject to this notice to become effective April 1, 1989.

Chandeleur states that a copy of this filing has been mailed to each of Chandeleur's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC, 20426, in accordance with §§ 385.214 and 385.211. All such motions or protests should be filed on or before March 15, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies

of this filing are on file with the Commission and are available for public inspection.

### CNG Transmission Corp.; Proposed Changes in FERC Gas Tariff

March 8, 1989.

On March 1, 1989, CNG Transmission Corporation ("CNG") submitted for filing, as part of its FERC Gas Tariff Original Volume No. 1, the following tariff sheet: Original Sheet No. 127-A.

CNG has requested that the Commission permit this filing to become effective as of April 1, 1989. This tariff sheet is being filed in compliance with Commission Order Nos. 509 and 509-A.

CNG states that copies of the filing were served upon all of its Volume No. 1 customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests shall be filed on or before March 15, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

**[Docket No. RP89-77-000]**

### Florida Gas Transmission Co.; Filing

March 6, 1989.

Take notice that on March 1, 1989, Florida Gas Transmission Company (FGT) tendered for filing to become a part of FGT's FERC Gas Tariff, First Revised Volume No. 3, the Tariff Sheets listed on Appendix A.

FGT states the listed tariff sheets are filed in compliance with Order No. 509 and 18 CFR 284.305(b) to establish the new rate schedules, Rate Schedules FTS-OCS and ITS-OCS, FGT will utilize in providing firm and interruptible transportation through its facilities located in the Outer Continental Shelf (OCS). FGT proposes an effective date of April 1, 1989 for the above noted tariff sheets. FGT proposes that Rate Schedules FTS-OCS and ITS-OCS would remain in effect only until FGT accepts a blanket transportation certificate pursuant to § 284.221 of the commission Regulation's and Order No. 436 and 500, *et. seq.* FGT has pending at Docket No. CP89-555-000, an application for a blanket transportation certificate which application also seeks to establish generally applicable firm and interruptible Rate Schedules FTS-1 and ITS-1, respectively. Upon the date of FGT's acceptance of such blanket certificate, Rate Schedules FTS-OCS and ITS-OCS would be superseded by Rate Schedules FTS-1 and ITS-1, respectively, and FGT would provide service on its OCS facilities under such generally applicable rate schedules.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with the Commission's Rules of Practice & Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene.

Copies of this filing are on file with the Commission and are available for public inspection.

### Freeport Interstate Pipeline Co.; Filing

March 7, 1989.

Take notice that on March 1, 1989, Freeport Interstate Pipeline Company (Freeport) filed First Revised Sheet No. 49 to its FERC Gas Tariff, Original Volume No. 1, to be effective April 1, 1989. Freeport states that this filing is in compliance with Commission Order Nos. 509 and 509-A.

Freeport states that its existing transportation service is performed under the authority of section 311(a)(1) of the Natural Gas Policy Act and implementation of Order Nos. 509 and 509-A will not disrupt or discriminate for or against any transportation service performed under section 7(c) of the Natural Gas Act. Freeport states further that it has only one existing shipper and only one known potential shipper, its affiliate, Freeport-McMoRan LP. For this reason, Freeport indicates that its tariff revisions are concise, since it is inconceivable under present circumstances that the reallocation of firm capacity provided in Order Nos. 509 and 509-A would have more than relatively limited import for its operations.

VOL 54 ISS 48 MR 14 1989 UMI

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure [18 CFR 385.214, 385.211 (1988)]. All such motions or protests should be filed on or before March 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RP89-82-000]

**High Island Offshore System; Proposed Changes in FERC Gas Tariff**

March 8, 1989.

Take notice that on March 1, 1989, High Island Offshore System ("HIOS") tendered for filing its FERC Gas Tariff, First Revised Volume No. 1.

According to HIOS, an entirely new Volume No. 1 (First Revised Volume No. 1) is being submitted because so many changes in its presently effective Original Volume No. 1 are required in order to comply with the Commission's Order Nos. 509 and 509-A.

HIOS proposes to continue to charge its presently effective rates, which are being collected, subject to refund, in Docket No. RP87-37-000. The principal changes relate to changes being made to comply with Order Nos. 509 and 509-A. In this connection, a new Rate Schedule FT is included which relates to the procedures to be followed in allocating available firm capacity on the HIOS system.

HIOS proposes that the rates contained in the Schedule of Rates (Original Sheet No. 8) become effective on April 1, 1989, subject to refund in Docket No. RP89-37-000. HIOS also proposes that the rest of First Revised Volume No. 1 become effective on April 1, 1989, without suspension.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 or Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 285.214). All such motions or protests should be filed on or before March 15, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to the proceeding must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. RP87-86-004]

**K N Energy, Inc.; Proposed Changes in FERC Gas Tariff**

March 8, 1989.

Take notice that K N Energy, Inc. ("K N") on March 3, 1989 tendered for filing revised tariff sheets reflecting changes in base rates in compliance with the Commission's February 17, 1989 Order approving offer of settlement subject to modifications. The proposed effective date for these tariff sheets is February 14, 1989.

KN states that tariff sheets have also been filed with restated base rates replacing those submitted with KN's regularly scheduled quarterly PGA filing (submitted) January 27, 1989). The proposed effective date for the PGA is March 1, 1989.

Copies of the filing were served upon K N's jurisdictional customers, and interested public bodies.

Any person desiring to be heard or to make any protest with reference to this filing should, on or before March 15, 1989, file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. RP89-87-000]

**Mitco Pipeline Co.; Tariff Filing**

March 8, 1989.

Take notice that on March 1, 1989, Mitco Pipeline Company (Mitco), tendered for filing with the Commission, to be effective April 1, 1989, the following sheets to Mitco's effective FERC Gas Tariff, Original Volume No. 1:

First Revised Sheet No. 2 (Table of Contents)
Original Sheet Nos. 8 through 19 (Sheets reserved for future use)
Original Sheet Nos. 20 through 46, Rate Schedule FT (Firm Transportation)
Original Sheet Nos. 47 through 73, Rate Schedule IT (Interruptible Transportation)

Mitco states that it elects to continue to use its current rate under Rate Schedule T-1 for transportation service provided for Transcontinental Gas Pipe Line Corporation (Transco) after April 1, 1989, pursuant to its existing certificate on file with the Commission, with explanation for such continued use as set forth in the filing. Mitco operates a small 8.5 mile pipeline delivering natural gas from one block on the Outer Continental Shelf to a single interconnection with an intrastate pipeline. Mitco does not anticipate providing any additional services to any other shipper beyond the existing service to its only customer, Transco. Mitco states that it is filing Rate Schedules FT and IT solely to comply with Order Nos. 509 and 509-A, which rate schedule provide, *inter alia*, for an open season for firm and interruptible transportation capacity. The rates proposed for these rate schedules continue to reflect the existing rate upon which the Commission relied when the facilities were certificated.

Mitco requests the Commission grant whatever waivers may be necessary for the Commission to accept the proposed tariff sheets, and for the tariff sheets to become effective on April 1, 1989.

Any persons desiring to be heard or to make any protest with reference to said filing should, on or before March 14, 1989, file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any conference or hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Lois D. Cashell,

*Secretary.*

BILLING CODE 6717-01-M

[Docket No. RP89-68-000]

**Natural Gas Pipeline Co., of America Proposed Changes in FERC Gas Tariff**

March 6, 1989.

Take notice that on March 1, 1989 in compliance with Order No. 509, as amended by Order No. 509-A, Docket No. RM88-15-000, National Gas Pipeline Company of America (Natural) tendered for filing as part of its FERC Gas Tariff, First Revised Volume No. 1A,

Second Revised Sheet No. 23
Second Revised Sheet No. 24 and
First Revised Sheet No. 25

Natural states these sheets are proposed to be effective April 1, 1989. These sheets contain a revision to section 3(b)(ii) to conform to the requirements of 18 CFR 284.305(e) of the Commission's Regulations.

A copy of this filing was made to each of Natural's jurisdictional and transportation customers and to interested state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.211 and 385.214. All such motions or protests must be filed on or before March 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Project No. 2320 New York]

**Niagara Mohawk Power Corp.; Intent To File an Application for a New License**

March 7, 1989.

Take notice that on December 29, 1988, Niagara Mohawk Power Corporation, the existing licensee for the Middle Raquette River Hydroelectric Project No. 2320, filed a notice of intent to file an application for a new license, pursuant to section 15(b)(1) of the Federal Power Act (Act), 16 U.S.C. 808, as amended by section 4 of the Electric Consumers Protection Act of 1986, Public Law 99-495. The original license for Project No. 2320 was issued effective November 1, 1949, and expires December 31, 1993.

The project is located on the Raquette River in St. Lawrence County, New York. The principal works of the Middle Rawuette River Project include the following developments, each with concrete gravity dams: Higley, with a reservoir of 700 acres and a 4,480-kW capacity powerhouse; Colton, with a reservoir of 152 acres and a 29,520-kW capacity powerhouse; Hannawa, with a reservoir of 168 acres and a 7,200-kW capacity powerhouse; and Sugar Island, with a reservoir of 29 acres and a 4,800-kW capacity powerhouse. All developments have transmission line connections and appurtenant facilities.

Pursuant to section 15(b)(2) of the Act, the licensee is required to make available certain information described in Docket No. RM87-7-000, Order No. 496 (Final Rule issued April 28, 1988). A copy of this Docket can be obtained from the Commission's Public Reference Branch, Room 1000, 825 North Capitol Street, NE., Washington, DC 20426. The above information as described in the rule is now available from the licensee at 300 Erie Boulevard West, Building A-1, Syracuse, NY 13202, Attn: Barbara J. Raymond, C.R.M., telephone (315) 428-6353.

Pursuant to section 15(c)(1) of the Act, each application for a new license and any competing license applications must be filed with the Commission at least 24 months prior to the expiration of the existing license. All applications for license for this project must be filed by December 31, 1991.

Lois D. Cashell,

*Secretary.*

BILLING CODE 6717-01-M

[Project No. 2539; New York]

**Niagara Mohawk Power Corp.; Intent To File an Application for a New License**

March 7, 1989.

Take notice that on December 29, 1988, Niagara Mohawk Power Corporation, the existing licensee for the School Street Hydro-electric Project No. 2539, filed a notice of intent to file an application for a new license, pursuant to section 15(b)(1) of the Federal Power Act (Act), 16 U.S.C. 808, as amended by section 4 of the Electric Consumers Protection Act of 1986, Pub. L. 99-495. The original license for Project No. 2539 was issued effective April 1, 1962, and expires December 31, 1993.

The project is located on the Mohawk River in Albany and Saratoga Counties, New York. The principal works of the School Street Project include a gravity dam of masonry construction with a concrete cap; a reservoir of 100 acres; and intake into a power canal, a forebay, and penstocks controlled at a gatehouse; a powerhouse with an installed capacity of 38,800 kW; transmission line connections; and appurtenant facilities.

Pursuant to section 15(b)(2) of the Act, the licensee is required to make available certain information described in Docket No. RM87-7-000, Order No. 496 (Final Rule issued April 28, 1988). A copy of this Docket can be obtained from the Commission's Public Reference Branch, Room 1000, 825 North Capitol Street, NE., Washington, DC 20426. The above information as described in the rule is now available from the licensee at 300 Erie Boulevard West, Building A-1, Syracuse, NY 13202, Atten: Barbara J. Raymond, C.R.M., telephone (315) 428-6353.

Pursuant to section 15(c)(1) of the Act, each application for a new license and any competing license applications must be filed with the Commission at lease 24 months prior to the expiration of the existing license. All applications for license for this project must be filed by December 31, 1991.

**Nothern Natural Gas Co.; Filing**

March 6, 1989.

Take notice that on March 1, 1989, Northern Natural Gas Company's Division of Enron Corp., tendered for

VOL 54 ISS 48 MR 14 1989 UMI

filing to become a part of Northern's FERC Gas Tariff, Third Revised Volume No. 1, the following tariff sheet:

Second Revised Sheet No. 52f.3

Northern states that this tariff sheet is filed in compliance with Order No. 509 to set forth that Norther will reallocate firm transportation capacity, voluntarily relinquished pursuant to § 284.304(c) of the Commission's Regulations, on a first-come, first-served basis.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with the Commission's Rules of Practice & Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene.

Copies of this filing are on file with the Commission and are available for public inspection.

**Northern Natural Gas Co.; Division of Enron Corp.; Compliance With Order Nos. 483 and 483-A**

March 8, 1989.

Take notice that on February 28, 1989, Northern Natural Gas Company, Division of Enron Corp. (Northern), tendered for filing, as part of Northern's FERC Gas Tariff, Third Revised Volume No. 1 (Volume 1 Tariff) and Original Volume No. 2 (Volume 2 Tariff), the following tariff sheets to become effective January 1, 1989:

*Third Revised Volume No. 1*
Seventh Revised Sheet No. 65
Substitute Fifth Revised Sheet No. 66
Substitute Seventh Revised Sheet No. 67
Substitute Sixth Revised Sheet No. 68
Substitute Ninth Revised Sheet No. 69
Second Substitute First Revised Sheet No. 69a
Substitute Eighth Revised Sheet No. 70
Substitute Fourth Revised Sheet No. 70a
Third Revised Sheet No. 70b
Substitute Fifth Revised Sheet No. 70c
*Original Volume No. 2*
Substitute Fifth Revised Sheet No. 1d
Substitute Fifth Revised Sheet No. 1e
Substitute Sixth Revised Sheet No. 1f
Substitute Eighth Revised Sheet No. 1g
Second Substitute Sixth Revised Sheet No. 1h
Substitute Sixth Revised Sheet No. 1i
Substitute Second Revised Sheet No. 1i.1
Fifth Revised Sheet No. 1i.2
First Substitute Original Sheet No. 1i.2a

Northern states that these tariff sheets are in compliance with the Letter Orders dated September 29, 1988, and November 18, 1988, respectively, in order that Northern's tariff will be in conformance with Order Nos. 483 and 483-A.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 15, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

**Panhandle Eastern Pipe Line Co.; Tariff Filing**

March 6, 1989.

Take notice that on February 27, 1989 Panhandle Eastern Pipe Line Company (Panhandle) tendered for filing the following revised tariff sheet to its FERC Gas Tariff, Original Volume No. 1:

First Revised Sheet No. 32-BU.1

The proposed effective date of this revised tariff sheet is March 1, 1989.

Panhandle states that this revised tariff sheet is being refiled in accordance with Ordering Paragraph (B) of the Commission's Order Granting Rehearing issued January 31, 1989.

Copies of this letter and enclosure are being served on all jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.211). All such motions or protests must be filed on or before March 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

**Northern Natural Gas Co., Division of Enron Corp.; Proposed Changes in FERC Gas Tariff**

March 6, 1989.

Take notice that Northern Natural Gas Company, Division of Enron Corp., (Northern) on February 27, 1989, tendered for filing revised changes in its FERC Gas Tariff in compliance with the Commission's Order dated January 31, 1989 in this proceeding. Northern states that the filing reflects a further decrease in rates below the reduced rates originally filed by Northern in this proceeding. Northern has requested that the proposed filing is made effective October 27, 1988.

The Company states that copies of the filing have been mailed to each of its customers purchasing gas and receiving transportation and gathering services under its FERC Gas Tariff and to interested State Commissions. Any person desiring to be heard or to protest

said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests must be filed on or before March 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

**[Docket No. RP88-262-002]**

**Panhandle Eastern Pipe Line Co.; Compliance Filing**

March 6, 1989.

Take notice that on February 28, 1989 Panhandle Eastern Pipe Line Company (Panhandle) tendered for filing the revised tariff sheets as listed on Appendices A and B, attached to the filing.

Panhandle states these tariff sheets to be effective April 1, 1989 reflect (1) compliance with Ordering Paragraphs (B), (C), (D), and (E) of the Commission's Order dated October 31, 1988; (2) the application of Ordering Paragraph (B) of the Commission's Order dated September 28, 1988 in Docket No. RP88-241-000; and (3) the regularly scheduled Annual PGA filing to be effective March 1, 1989.

Panhandle states that subsequent to its filing of Sept. 30, 1988, it determined that the fuel percentage for Rate Schedule PT should also reflect the seasonal basis of rates herein to reflect the distribution of these costs among the transportation customers who use the system at flow rates which are not constant from season to season. Accordingly, Panhandle has included seasonally adjusted fuel percentages herein and respectfully requests wavier of the Commission's Regulations to permit an effective date of April 1, 1989. No change in revenues results from this modification. If this request is not granted in total, Panhandle has also included hererin alternate tariff sheets, listed in Appendix C hereto, which do not reflect the seasonally adjusted fuel percentages.

Panhandle states that the filing of these revised tariff sheets which satisfies the requirements of the Commission's Order dated October 31, 1988 in this proceeding is without prejudice to Panhandle's rights on rehearing or in any judicial review proceeding or its position in this proceeding and the Docket No. RP88-241-000 proceeding.

Copies of this letter and enclosures are being served on all jurisdictional customer, interested state commissions and all parties to this proceeding.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before March 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

**Pelican Interstate Gas System; Proposed Changes in FERC Gas Tariff**

March 6, 1989.

Take notice that on March 1, 1989, in compliance with Order No. 509, as amended by Order No. 509-A, Docket No. RM88-15-000, Pelican Interstate Gas System (Pelican) tendered for filing as part of its FERC Gas Tariff, Original Volume No. 1, Sixth Revised Sheet No. 1, Original Sheets Nos. 1A, 1B, 2B and 35 through 98. Pelican states these proposed sheets are intended to conform to 18 CFR 284.7 and 284.8(d) or 284.9(d), as applicable, to provide nondiscriminatory open access transportation effective April 1, 1989. Pelican further states that the tariff sheets are intended to set in place Rate Schedules FTS and ITS and the General Terms and Conditions under which Pelican would perform firm and interruptible transportation.

Copies of this filing have been served upon Pelican's jurisdictional customers, entities inquiring about service, the Louisiana Public Service Commission and the Department of Natural Resources Office of Conservation of the State of Louisiana.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests must be filed on or before March 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

**[Project No. 2370; Maryland]**

**Pennsylvania Electric Co.; Intent To File an Application for a New License**

March 6, 1989.

Take notice that on December 30, 1988, Pennsylvania Electric Company, the existing licensee for the Deep Creek Hydroelectric Project No. 2370, filed a notice of intent to file an application for a new license, pursuant to section 15(b)(1) of the Federal Power Act (Act), 16 U.S.C. 808, as amended by section 4 of the Electric Consumers Protection Act of 1986, Pub. L. 99-495. The original license for Project No. 2370 was issued effective May 1, 1965, and will expire December 31, 1993.

The proejct is located on the Deep Creek, a tributary of the Youghiogheny River, in Garrett County, Maryland. The principal works of the Deep Creek Project include an 86-foot-high, 1,300-foot-long earth and rockfill dam with a concrete side channel spillway; a reservoir; a 9-foot-diameter, 7,100-foot-long concrete and steel lined power tunnel leading to a surge tank and two 6-foot-diameter steel penstocks; a powerhouse with an installed capacity of 19,200 kW; a switchyard with transmission line connections; and appurtenant facilities.

Pursuant to section 15(b)(2) of the Act, the licensee is required to make available certain information described in Docket No. RM87-7-000, Order No. 496 (Final Rule issued April 28, 1988). A copy of this Docket can be obtained from the Commission's Public Reference Branch, Room 1000, 825 North Capitol Street, NE., Washington, DC 20426. The above information as described in the rule is now available from the licensee at 1001 Broad Street, Johnstown, PA 15907.

Pursuant to section 15(c)(1) of the Act, each application for a new license and any competing license appications must be filed with the Commission at least 24 months prior to the expiration of the existing license. All applications for

VOL 54 ISS 48 MR 14 1989 UMI

license for this project must be filed by December 31, 1991.

BILLING CODE 6717-01-M

[Docket No. RP89-74-000]

**Southern Natural Gas Co.; Compliance Filing**

March 7, 1989.

Take notice that on March 1, 1989, Southern Natural Gas Company (Southern) filed Second Revised Sheet No. 30AA and Original Sheet No. 30AA.1 to its FERC Gas Tariff, Sixth Revised Volume No. 1, to be effective April 1, 1989. Southern states that this filing is made in compliance with Commission Order Nos. 509 and 509-A.

Southern states that on Sheet Nos. 30AA and 30AA.1—New section 6(i) has been added to Rate Schedule FT to provide that if Southern does not have capacity available to serve all or part of a request for service through Outer Continental Shelf (OCS) facilities, it will tender names of existing firm shippers using such capacity within 10 days of receiving the request. Southern further states that if a shipper desires to relinquish capacity on OCS facilities, such capacity shall be reallocated on a first-come, first-served basis to the extent capacity is requested. Southern points out that shippers receiving reallocated capacity from section 7 certificated services must agree to accept the original term of the service unless Southern agrees otherwise. Section 6(h) has been revised to reference new section 6(i).

Southern states that copies of this filing are being mailed to all of its jurisdictional purchasers, shippers, and interested state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.214, 385.211 (1988). All such motions or protests should be filed on or before March 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. RP89-81-000]

**Tarpon Transmission Co.; Tariff Filing**

March 8, 1989.

Take notice that on March 1, 1989, Tarpon Transmission Company (Tarpon), an interstate natural gas pipeline operating on the Outer Continental Shelf (OCS), tendered for filing with the Commission as part of its FERC Gas Tariff, Original Volume No. 1, the following tariff sheets, to be effective April 1, 1989: First Revised Sheet No. 45, Original Sheet No. 45-A, and First Revised Sheet No. 46. Tarpon states that these tariff sheets set forth the method Tarpon will use to reallocate firm transportation capacity in the future, in accordance with Commission Order Nos. 509 and 509-A.

Tarpon further states that it is currently providing "open access" transportation services, and that rates for such services conforming to the requirements of Part 284 of the Commission's Regulations have been effective since December 1, 1987. Tarpon also notifed the Commission, pursuant to revised § 284.305(d)(2), that it will continue using its current rate for non-Part 284 transportation service to Trunkline Gas Company after April 1, 1989, subject to the outcome of the remand proceeding presently pending before the Commission in Docket Nos. RP84-62, *et al.* Tarpon states that the rate charged Trunkline is the same rate as that charged for Part 284 transportation services pursuant to its Rate Schedules ITS and FTS.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Such motions or protests should be filed on or before March 15, 1989. Such motions or protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person desiring to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

**Transcontinental Gas Pipe Line Corp.; Proposed Tariff Sheets**

March 6, 1989.

Take notice that Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing on March 1, 1989 the following tariff sheets to its FERC Gas Tariff, Second Revised Volume No. 1. Such sheets are proposed to be effective April 1, 1989.

Original Volume No. 1

Second Revised Sheet No. 32
First Revised Sheet No. 32A
First Revised Sheet No. 32B
First Revised Sheet No. 32C

Copies of this filing were served on SOPCO customers.

Any persons desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

*Secretary.*

BILLING CODE 6717-01-M

[Docket No. RP89-83-000]

**Superior Offshore Co.; Tariff Filing**

March 6, 1989.

Take notice that on March 1, 1989, Superior Offshore Pipeline Company ("SOPCO"), 12450 Greenspoint Drive, Houston, Texas 77060-1991, filed, pursuant to § 284.304 of the Commission's Regulations promulgated by Order Nos. 509 and 509A, setting forth the method by which SOPCO will allocate available firm and interruptible transportation capacity in the following tariff sheets:

First Revised Sheet No. 196-E
Original Sheet No.196-F

Transco states that it is submitting a tariff sheet which is required by § 284.305(3) of the Commission's Regulations. Section 284.305(e) states: "By March 1, 1989, to be effective no later than April 1, 1989, all OCS pipelines must file tariff provisions setting forth the method by which firm transportation capacity will be reallocated under § 284.304(c) in the event two or more shippers seek to obtain the firm capacity that one or more shippers offer to relinquish." Accordingly, Transco is submitting First Revised Sheet No. 196-E and Original Sheet No.196-F to be included in its FERC Gas Tariff, Second Revised Volume No. 1. Such tariff sheets will be included in Transco's Rate Schedule FT.

Transco states that copies of the instant filing are being mailed to its jurisdictional customers and interested State Commissions. In accordance with the provisions of § 154.16 of the Commission's Regulations, copies of this filing are available for public inspection during regular business hours, in a convenient form and place at Transco's main offices at 2800 Post Oak Boulevard in Houston, Texas.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before March 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

*Secretary.*

BILLING CODE 6717-01-M

[Docket No. RP89-89-000]

**United Gas Pipe Line Co.; Proposed Changes in FERC Gas Tariff**

March 6, 1989.

Take notice that on March 1, 1989, United Pipe Line Company (United), Post Office Box 1478, Houston, Texas 77251-1478, filed pursuant to § 284.305(e) of the Federal Energy Regulatory Commission's (Commission) Regulations, tariff sheets to First Revised Volume No. 1 of its FERC Gas Tariff. The tariff sheets filed by United are:

*To Be Effective April 1, 1989*

Third Revised Sheet No. 48-A
Original Sheet No. 48-A1
Original Sheet No. 48-A2

United states that these tariff sheets are filed, as required by Order No. 509 issued December 9, 1988, as amended by Order No. 509-A issued February 21, 1989, to establish the manner in which firm capacity will be reallocated under § 284.304(c) of the Commission's Regulations in the event that more than one Shipper seeks to obtain the firm capacity relinquished.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, on or before March 15, 1989, and in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214).

Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person desiring to become a party must petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

*Secretary.*

[Project No. 2442 New York]

**City of Watertown, New York; Intent To File an Application for a New License**

March 6, 1989.

Take notice that on December 30, 1988, the City of Watertown, New York, the existing licensee for the Watertown Hydroelectric Project No. 2442, filed a notice of intent to file an application for a new license, pursuant to section 15(b)(1) of the Federal Power Act (Act), 16 U.S.C. 808, as amended by section 4 of the Electric Consumers Protection Act of 1986, Pub. L. 99-495. The original license for Project No. 2442 was issued effective April 1, 1962, and expires December 31, 1993.

The project is located on the Black River in Jefferson County, New York. The principal works of the Watertown Project include a main concrete diversion dam, 13.5 feet high and 650 feet long, and a second similar diversion dam, 200 long; about 225 acres of reservoir; a concrete headgate structure with 25 wood gates and a canal, 20 feet deep, 55 feet wide and 950 feet long; a powerhouse with an installed capacity of 5,400 kW; a transmission line connection; and appurtenant facilities.

Pursuant to section 15(b)(2) of the Act, the licensee is required to make available certain information described in Docket No. RM87-7-000, Order No. 496 (Final Rule issued April 28, 1988). A copy of this Docket can be obtained from the Commission's Public Reference Branch, Room 1000, 825 North Capitol Street, NE, Washington, DC 20426. The above information as described in the rule is now available from the licensee at Room 302, Watertown Municipal Building, 245 Washington Street, Watertown, NY 13601-3380.

Pursuant to section 15(c)(1) of the Act, each applicant for a new license and any competing license applications must be filed with the Commission at least 24 months prior to the expiration of the existing license. All applications for license for this project must be filed by December 31, 1991.

Lois D. Cashell,

*Secretary.*

BILLING CODE 6717-01-M

## ENVIRONMENTAL PROTECTION AGENCY

[FRL-3533-7]

**Workshop on Qualitative and Quantitative Comparability of Human and Animal Developmental Neurotoxicity**

**AGENCY:** Environmental Protection Agency.

**ACTION:** Notice of meeting.

**SUMMARY:** This notice announces a scientific workshop, sponsored by the Environmental Protection Agency's Office of Toxic Substances and Office of Research and Development and the National Institute for Drug Abuse, to critically evaluate the effects of known human developmental neurotoxicants and to compare them with the effects seen in animal studies. The meeting will be held at the Williamsburg Hilton Hotel in Williamsburg, Virginia.

**DATES:** The workshop will be held on April 11, 12, and 13, 1989, beginning on Tuesday, April 11, at 8:30 a.m. and ending Thursday, April 13, at approximately 12:00 noon. There are

VOL 54 ISS 48 MR 14 1989 UMI

limited spaces available for members of the public to attend either as participants or observers.

**FOR FURTHER INFORMATION CONTACT:** Dr. Cooper Rees, U.S. Environmental Protection Agency, (TS-796), 401 M Street SW., Washington, DC, 20460, Tel. (202) 382-3505 (FTS: 382-3505), for information about the workshop itself and for application as a participant or an observer. Space is limited. Apply by March 13, 1989.

**SUPPLEMENTARY INFORMATION:** Several agents have been identified as developmental neurotoxicants in humans: ethanol, methylmercury, PCBs, lead, x-irradiation, diphenylhydantoin, and several substances of abuse. These agents have been evaluated in a number of animal studies and qualitative comparisons between the human and animal data have been made for some. In the past, several symposia have been held where data have been presented on these chemicals, but there has been no rigorous review of the data, especially a comparison of effects based on dose. This information would be extremely valuable for building an information base for the purposes of risk assessment (e.g., reducing uncertainties regarding interpretation of results) and for use in establishing criteria for selecting agents. An Agency-wide workgroup is developing test guidelines in this area.

The outline of the program includes: (1) On April 11, a full day of presentations by experts summarizing human and animal data on given chemicals or classes of chemicals; (2) on April 12, a full day of small work group discussions to address specific issues (Qualitative Comparisons: Neurobiology, Study Design, Quantitative Comparisons, and Triggers for Testing) and prepare a report; and (3) on April 13, a half-day of summarizing the reports of the workgroups' conclusions. Participants will include speakers and attendees who are being invited because of their specific expertise and a limited number of additional members of the public who express an interest in attending. The proceedings and results of this workshop will be submitted for publication.

Dated: March 1, 1989.

**Erich Bretthauer,**

*Acting Assistant Administrator for Research and Development.*

## FEDERAL RESERVE SYSTEM

### Agency Forms under Review

March 8, 1989.

**Background**

Notice is hereby given of final approval of proposed information collection(s) by the Board of Governors of the Federal Reserve System (Board) under OMB delegated authority, as per 5 CFR 1320.9 (OMB Regulation on Controlling Paperwork Burdens on the Public).

**FOR FURTHER INFORMATION CONTACT:**

*Federal Reserve Board Clearance Officer*—Frederick J. Schroeder—Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, DC 20551 (202-452-3822).

*OMB Desk Officer*—Gary Waxman—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, DC 20503 (202-395-7340).

**Final approval under OMB delegated authority of the extension, without revision, of the following report**

*Report title:* Notification of Foreign Branch Status.

*Agency form number:* FR 2058.

*OMB Docket number:* 7100-0089.

*Frequency:* Event-generated.

*Reporters:* State member banks, Edge and Agreement Corporations, and bank holding companies.

*Annual reporting hours:* 29.

*Estimated number of respondents:* 118.

*Estimated average hours per response:* 0.25.

Small businesses are affected.

*General description of reports:*

This information collection is mandatory [12 U.S.C. 321, 601, 602, 615, and 1844(c)] and is not given confidential treatment.

This report notifies the Federal Reserve of the opening, closing, or relocation of a foreign branch of state member banks, Edge and Agreement corporations, or bank holding companies. This information enables the Federal Reserve to ensure the safety and soundness of the U.S. banking system.

Board of Governors of the Federal Reserve System, March 8, 1989.

### Bancmidwest Corp.; Application To Engage de Novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than March 31, 1989.

**A. Federal Reserve Bank of Minneapolis** (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

*1. BancMidwest Corporation*, St. Paul, Minnesota; to engage *de novo* in providing data processing services that are financial, banking, or economic in nature pursuant to § 225.25(b)(7) of the Board's Regulation Y. These activities will be conducted in Minnesota and Wisconsin.

Board of Governors of the Federal Reserve System, March 8, 1989.

**Jennifer J. Johnson,**

*Associate Secretary of the Board.*

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Alcohol, Drug Abuse and Mental Health Administration

**Substance Abuse Prevention Technical Assistance Workshops**

**AGENCY:** Office of Substance Abuse Prevention (OSAP).

**ACTION:** Notice of technical assistance workshops.

**SUMMARY:** This notice sets forth the schedule and proposed agenda of the forthcoming six (6) regional technical assistance workshops to assist prospective applicants in responding to the Office for Substance Abuse Prevention's three grant announcements: Drug and Alcohol Abuse Prevention—High Risk Youth Demonstration Grants; Model Projects for Pregnant and Postpartum Women and their Infants; and the Community Youth Activity Program.

*Name:* Office for Substance Abuse Prevention Technical Assistance Workshops.

**Region/Date/Location**

*Western Region*

March 15–16, 1989

Phoenix Hyatt, 122 North Second Street, Phoenix, AZ, (602) 252–1234.

*Southeast Region*

March 28–29, 1989

Sheraton Hotel, 170 Lockwood Dr., Charleston, SC. (803) 723–3000.

*Southwest Region*

March 30–31, 1989

Menger Hotel, 204 Alamo Plaza, San Antonio, TX. 1–800–345–9285.

*Central Region*

April 3–4 1989

Radisson North Hotel, 4900 Sinclair Road, Columbus, OH 43229, 1–800–333–3333.

*Northeast Region*

April 5–6, 1989

Quality Inn Downtown Boston, 275 Tremont Street, Boston, Massachusetts 02116, (617) 426–1400.

*Northwest Region*

April 12, 13, 1989

Red Lion Inn, Jantzen Beach, Portland, OR, (503) 283–4466.

*Time:* Each workshop will begin on Day 1 at 1:00 p.m. and will end on Day 2 at 1:00 p.m.

Agenda Highlights include:

Day 1—Overview of the three Grant Announcements. Grant Submission Review/Award Process. General Principles of Prevention/Early Intervention. Lessons learned on High Risk Youth and Resiliency Factors.

Day 2—Technical/Practical Aspects of Grant Application Process including: completing forms, program narrative, budget justification, approach, method, management, and evaluation.

Status of Workshops: They are open to prospective OSAP grant applicants.

To receive a workshop registration form contact:

National Clearinghouse for Alcohol and Drug Information (NCADI) P.O. Box 2345, Rockville, MD 20852, Telephone: (301) 468–2600.

For more information about the technical assistance workshops contact: OSAP, Division of Demonstrations and Evaluation, Room 13 A 45, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857, (301) 443–4564.

Purpose: In collaboration with the State Alcohol and Drug Authorities, the Office for Substance Abuse Prevention, Division of Demonstration/Evaluation and the Division of Prevention Implementation want to provide general assistance to prospective applicants in responding to the OSAP grant announcements.

## Food and Drug Administration

[Docket No. 89D-0022]

**New Animal Drug Applications; Phased Data Submissions; Policy Guide; Availability**

**AGENCY:** Food and Drug Administration.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing the availability of a policy guide concerning the phased submission of specific data and information to be used to support approval of a new animal drug application (NADA). FDA's Center for Veterinary Medicine (CVM) has prepared a new section, Guide 1240.3040, to the CVM Policy and Procedures Manual (PPM), providing for the submission of data and information in advance of filing an NADA.

**ADDRESSES:** The new PPM section is available for public examination at the Dockets Management Branch (HFA–305), Food and Drug Administation, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday, except on legal holidays. Copies of PPM Guide 1240.3040 may be obtained from the Industry Information Branch (HFV–11), Center for Veterinary Medicine, Food and Drug Administration, Rm. 7–81, 5600 Fishers Lane, Rockville, MD 20857, by referring to the docket number found in brackets in the heading of this document.

**FOR FURTHER INFORMATION CONTACT:** Donald A. Gable, Center for Veterinary Medicine (HFV–130), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–1414.

**SUPPLEMENTARY INFORMATION:** CVM is instituting a policy to provide for the phased submission of specific data and information for review and evaluation by CVM prior to submission of an NADA for filing. This policy is intended to result in a more orderly and uniform system for review and evaluation of completed NADA components and subcomponents submitted to the notice of claimed exemption for an investigational new animal drug (INAD) during animal drug development. The data and information should be identified as a "PHASED DATA SUBMISSION" when submitted to the INAD exemption file. The new policy is detailed in PPM Guide 1240.3040. The program is voluntary.

Dated: March 6, 1989.

BILLING CODE 4160-01-M

[Docket No. 89F-0065]

**Purina Mills, Inc.; Filing of Food Additive Petition**

**AGENCY:** Food and Drug Administration.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing that Purina Mills, Inc., has filed a petition proposing that the food additive regulations be amended to provide for the safe use of formic acid as a preservative in animal feeds.

**DATE:** Written comments to be submitted by May 15, 1989.

**ADDRESS:** The environmental assessment prepared by the petitioner may be seen at, and written comments may be sent to, the Dockets Management Branch (HFA–305), Food and Drug Administration, Room 4–62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Woodrow M. Knight, Center for Veterinary Medicine (HFV–226), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3390.

**SUPPLEMENTARY INFORMATION:** Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 2211) has been filed by Purina Mills, Inc., P.O. Box 66812, St. Louis, MO 63166–6812, proposing that § 573.480 *Formic acid* (21 CFR 573.480) be amended to provide for the safe use of formic acid as a preservative in animal feeds. The petition would allow for the addition for formic acid to animal feed not in excess of 1.5 percent by weight of the complete animal feed as a preservative.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the rule in the **Federal Register** in accordance with 21 CFR 25.40(c).

Dated: March 8, 1989.

[Docket No. 87N-0034]

**Drug Export Amendments Act of 1986; Biological Product Export Applications**

**AGENCY:** Food and Drug Administration.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing a change of address to which persons should send applications to export an unlicensed human biological product under the Drug Export Amendments Act of 1986. The change of address is a

VOL 54 ISS 48 MR 14 1989 UMI

result of the reorganization of FDA's Center for Drugs and Biologics into two separate centers, namely, the Center for Biologics Evaluation and Research, and the Center for Drug Evaluation and Research.

**ADDRESS:** Applications (an original and two copies) for exporting human biological products may be mailed to Boyd Fogle, Jr., at the address below or may be delivered in person between 8 a.m. and 4:30 p.m. Monday through Friday, to Boyd Fogle, Jr., Center for Biologics Evaluation and Research, Rm. 217, 7520 Standish Pl., Rockville, MD 20855.

**FOR FURTHER INFORMATION CONTACT:** Boyd Fogle, Jr., Center for Biologics Evaluation and Research (HFB–120), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–295–8191.

**SUPPLEMENTARY INFORMATION:** On November 14, 1986, President Reagan signed into law the Drug Export Amendments Act of 1986 (Pub. L. 99–660). The new law amends both the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 301 *et seq.*) and the Public Health Service Act (42 U.S.C. 262), to authorize the export from the United States to other countries for commercial marketing of unapproved new human drugs, unlicensed human biologicals, and unapproved new animal drugs. Under previous law, the export of such products for marketing was confined to those that were approved or licensed by FDA for domestic use.

The Drug Export Amendments Act of 1986 establishes three separate tracks for the export of products. Under each track, an application must be submitted to FDA and FDA approval obtained before export is permitted. The tracks vary considerably in terms of drug eligibility criteria, application requirements, and procedures for review and approval of export applications. The first track applies to applications to export unapproved new human drugs, unlicensed human biologicals, and unapproved new animal drugs to any of 21 countries listed in the act. (See section 802(b) through (e) of the act (21 U.S.C. 382(b) through (e)).) The second track applies to applications to export such unapproved and unlicensed products for use in the prevention or treatment of tropical diseases. (See section 802(f) of the act (21 U.S.C. 382(f)).) The third track applies to applications to export partially processed biological products for human use. (See section 351(h)(1)(A) of the Public Health Service Act (42 U.S.C. 262(h)(1)(A)).) A notice was published in the **Federal Register** of April 2, 1987 (52 FR 10633), listing mailing addresses for export applications.

Subsequently, FDA's Center for Drugs and Biologics was reorganized into two separate centers: the Center for Biologics Evaluation and Research (CBER), and the Center for Drug Evaluation and Research (CDER). This notice addresses the application process for exporting unlicensed human biological products under the Drug Export Amendments Act of 1986.

Applications to export unlicensed human biological products (including partially processed biological products) should be mailed to Boyd Fogle, Jr. (address above), or delivered in person between 8 a.m. and 4:30 p.m., Monday through Friday, to Boyd Fogle, Jr., Center for Biologics Evaluation and Research, Rm. 217, 7520 Standish Pl., Rockville, MD 20855.

FDA is considering developing a comprehensive written guidance on the procedures to be followed in submitting export applications and on the content and format of such applications. Pending issuance of this guidance, questions about the content and format of export applications for biological products should be directed to Boyd Fogle, Jr.

This notice supplants the notice published in the **Federal Register** of April 2, 1987 (52 FR 10633), insofar as it applied to unlicensed human biological products. The April 2, 1987, notice remains applicable for mailing addresses for persons who wish to submit export applications for human or veterinary drugs.

Dated: March 6, 1989.

BILLING CODE 4160–01–M

**[Docket No. 89N–0081]**

## Drug Export; Hypaque® Meglumine 30% and 60%

**AGENCY:** Food and Drug Administration.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing that Sterling Drug Inc., has filed an application requesting approval for the export of the human drug Hypaque® Meglumine 30% and 60% to Canada.

**ADDRESS:** Relevant information on this application may be directed to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, and to the contact person identified below. Any future inquiries concerning the export of human drugs under the Drug Export Amendments Act of 1986 should also be directed to the contact person.

**FOR FURTHER INFORMATION CONTACT:** Rudolf Apodaca, Division of Drug Labeling Compliance (HFD–310), Center for Drug Evaluation and Research, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–295–8063.

**SUPPLEMENTARY INFORMATION:** The Drug Export Amendments Act of 1986 (Pub. L. 99–660) (section 802 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 382)) provides that FDA may approve applications for the export of drugs that are not currently approved in the United States. The approval process is governed by section 802(b) of the act. Section 802(b)(3)(B) of the act sets forth the requirements that must be met in an application for approval. Section 802(b)(3)(C) of the act requires that the agency review the application within 30 days of its filing to determine whether the requirements of section 802(b)(3)(B) have been satisfied. Section 802(b)(3)(A) of the act requires that the agency publish a notice in the **Federal Register** within 10 days of the filing of an application for export to facilitate public participation in its review of the application. To meet this requirement, the agency is providing notice that Sterling Drug Inc., 90 Park Ave., New York, NY 10016, has filed an application requesting approval for the export of the drug Hypaque® Meglumine 30% and 60%, to Canada. This product is used as a radiopaque contrast medium. The application was received and filed in the Center for Drug Evaluation and Research on February 24, 1989, which shall be considered the filing date for purposes of the act.

Interested persons may submit relevant information on the application to the Dockets Management Branch (address above) in two copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. These submissions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

The agency encourages any person who submits relevant information on the application to do so by March 24, and to provide an additional copy of the submission directly to the contact person identified above, to facilitate consideration of the information during the 30-day review period.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (Sec. 802, Pub. L. 99–660 (21 U.S.C. 382)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Center for Drug Evaluation and Research (21 CFR 5.44).

Dated: March 8, 1989.

**Sammie R. Young,**

*Deputy Director, Office of Compliance, Center for Drug Evaluation and Research.*

BILLING CODE 4160–01–M

**[Docket No. 89E–0012]**

## Determination of Regulatory Review Period For Purposes of Patent Extension; Cytotec®

**AGENCY:** Food and Drug Administration.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) has determined the regulatory review period for Cytotec® and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of an application to the Commissioner of Patents and Trademarks, Department of Commerce, for the extension of a patent which claims that human drug product.

**ADDRESS:** Written comments and petitions should be directed to the Dockets Management Branch (HFA–305), Food and Drug Administration, Room. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Philip L. Chao, Office of Health Affairs (HFY–20), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–1382.

**SUPPLEMENTARY INFORMATION:** The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98–417) and the Generic Animal Drug and Patent Term Restoration Act (Pub. L. 100–670) generally provide that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, animal drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the time was marketed. Under these acts, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: a testing phase and an approval phase. For human drug products, the testing phase begins when the exemption to permit the clinical investigations of the drug becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human drug product and continues until FDA grants permission to market the drug product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Commissioner of Patents and Trademarks may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human drug product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA recently approved for marketing the human drug product Cytotec (misoprostol) which is indicated for the prevention of NSAID-(nonsteroidal anti-inflammatory drugs, including aspirin) induced gastric ulcers in patients at high risk of complications from a gastric ulcer; e.g., the elderly and patients with concomitant debilitating disease, as well as patients at high risk of developing gastric ulceration, such as patients with a history of ulcer. Subsequent to this approval, the Patent and Trademark Office received a patent term restoration application for Cytotec® (U.S. Patent No. 3,965,143) from G. D. Searle & Co. and requested FDA's assistance in determining the patent's eligibility for patent term restoration. FDA, in a letter dated January 30, 1989, advised the Patent and Trademark Office that the human drug product had undergone a regulatory review period and that the active ingredient, misoprostol, represented the first permitted commercial marketing or use either alone or in combination with other active ingredients. Shortly thereafter, the Patent and Trademark Office requested that FDA determine the product's regulatory review period.

FDA has determined that the applicable regulatory review period for Cytotec® is 3,729 days. Of this time, 2,015 days occurred during the testing phase of the regulatory review period, while 1,714 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act became effective:* October 14, 1978. FDA has verified the applicant's claim that the investigational new drug application (IND) for Cytotec® became effective on October 14, 1978.

2. *The date the application was initially submitted with respect to the human drug product under section 505(b) of the Federal Food, Drug, and Cosmetic Act:* April 19, 1984. The applicant claims that the new drug application (NDA) for Cytotec® (NDA 19–268) was initially submitted on April 12, 1984. However, FDA records indicate that the application was not received until April 19, 1984.

3. *The date the application was approved:* December 27, 1988. FDA has verified the applicant's claim that NDA 19–268 was approved on December 27, 1988.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the U.S. Patent and Trademark Office applies several statutory limitations in its calculations of the actual period for patent extension. In its application for patent extension, this applicant seeks 730 days of patent term extension.

Anyone with knowledge that any of the dates as published is incorrect may, on or before May 15, 1989, submit to the Dockets Management Branch (address above) written comments and ask for a redetermination. Furthermore, any interested person may petition FDA, on or before September 11, 1989, for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must contain sufficient facts to merit an FDA investigation. (See H. Rept. 857, Part 1, 98th Cong., 2d Sess., pp. 41–42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Comments and petitions should be submitted to the Dockets Management Branch (address above) in three copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. Comments and petitions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: March 6, 1989.

**Stuart L. Nightingale,**

*Associate Commissioner for Health Affairs.*

## Determination of Regulatory Review Period For Purposes of Patent Extension; Sandostatin®

**AGENCY:** Food and Drug Administration.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) has determined

BEST COPY AVAILABLE

VOL
54
ISS
48
MR
14
1989
UMI

the regulatory review period for Sandostatin® and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of an application to the Commissioner of Patents and Trademarks, Department of Commerce, for the extension of a patent which claims that human drug product.

**ADDRESS:** Written comments and petitions should be directed to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Philip L. Chao, Office of Health Affairs (HFY–20), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–1382.

**SUPPLEMENTARY INFORMATION:** The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98–417) and the Generic Animal Drug and Patent Term Restoration Act (Pub. L. 100–670) generally provide that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, animal drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under these acts, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: a testing phase and an approval phase. For human drug products, the testing phase begins when the exemption to permit the clinical investigations of the drug becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human drug products and continues until FDA grants permission to market the drug product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Commissioner of Patents and Trademarks may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human drug product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA recently approved for marketing the human drug product Sandostatin® (octreotide acetate) which is indicated for: control of symptoms in patients with metastatic carcinoid and vasoactive intestinal peptide-secreting tumors (VIPomas); symptomatic treatment of patients with metastatic carcinoid tumors where it suppresses or inhabits the severe diarrhea and flushing episodes associated with the disease; and treatment of the profuse watery diarrhea associated with VIP-secreting tumors. Subsequent to this approval, the Patent and Trademark Office received a patent term restoration application for Sandostatin® (U.S. Patent No. 4,395,403) from Sandoz, Ltd., and requested FDA's assistance in determining the patent's eligibility for patent term restoration. FDA, in a letter dated January 31, 1989, advised the Patent and Trademark Office that the human drug product had undergone a regulatory review period and that the active ingredient, octreotide acetate, represented the first permitted commercial marketing or use either alone or in combination with other active ingredients. Shortly thereafter, the Patent and Trademark Office requested that FDA determine the product's regulatory review period.

FDA has determined that the applicable regulatory review period for Sandostatin® is 1,653 days. Of this time, 1,032 days occurred during the testing phase of the regulatory review period, while 621 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act became effective:* April 14, 1984. The applicant claims that the investigational new drug application (IND) for Sandostatin® became effective on March 15, 1984. However, FDA records indicate that the IND became effective on April 14, 1984, 30 days after FDA received the IND application.

2. *The date the application was initially submitted with respect to the human drug product under section 505(b) of the Federal Food, Drug, and Cosmetic Act:* February 9, 1987. The applicant claims that the new drug application (NDA) for Sandostatin® (NDA 19–667) was initially submitted February 6, 1987. However, FDA records indicates that FDA did not receive the application until February 9, 1987.

3. *The date the application was approved:* October 21, 1988. FDA has verified the applicant's claim that NDA 19–667 was approved on October 21, 1988.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the U.S. Patent and Trademark Offices applies several statutory limitations in its calculations of the actual period for patent extension. In its application for patent extension, this applicant seeks 730 days of patent term extension.

Anyone with knowledge that any of the dates as published is incorrect may, on or before May 15, 1989, submit to the Dockets Management Branch (address above) written comments and ask for a redetermination. Furthermore, any interested person may petition FDA, on or before September 11, 1989, for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must contain sufficient facts to merit an FDA investigation. (See H. Rept. 857, Part 1, 98th Cong., 2d Sess., pp. 41–42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Comments and petitions should be submitted to the Dockets Management Branch (address above) in three copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. Comments and petitions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: March 6, 1989

## Office of Human Development Services

### Federal Council on the Aging; Meeting

*Agency Holding the Meeting:* Federal Council on the Aging

*Time and Date:* Meeting begins at 9:00 A.M. and ends at 5:00 P.M. on Monday, March 20, 1989 and beings at 9:00 A.M. and ends at 5:00 P.M. on Tuesday, March 21, 1988.

*Place:* On Monday, March 20, Boardroom 108, The Capitol Hill Hotel, 200 C Street, SE., from 9:00 a.m. to 5 p.m., and Tuesday, March 21, The Boardroom 108, The Capitol Hill Hotel, from 9:00 a.m..12:00 Noon, and from 2 p.m.–5 p.m., the Grand Hyatt Hotel, Washington, DC

*Status:* Meeting is open to the public.

*Contact Persons:* Pete Conroy, Room 4545, Wilbur Cohen Federal Building, 245–2451.

The Federal Council on the Aging was established by the 1973 Amendments to the Older Americans Act of 1965 (Pub. L. 93–29, 42 U.S.C. 3015) for the purpose of advising the President, the Secretary of Health and Human Services, the Commissioner on Aging and the Congress on matters relating to the special needs of older Americans.

Notice is hereby given pursuant to the Federal Advisory Committee Act (Pub. L. 92–453, 5 U.S.C. App. 1, Sec. 10, 1976) that the Council will hold its March quarterly meeting on March 20 & 21 from 9:00 a.m.–5:00 p.m. and from 9:00 a.m.–5:00 p.m. respectively. On March 20, the morning session will be an Executive Session, and the regular open meeting in the afternoon in the Boardroom 108 of The Capitol Hill Hotel, 200 C Street, SE., Washington, DC 20003. On March 21, the Council will hold its regular meeting and then proceed to meet with the Secretary of Health and Human Services. From 2 p.m.–5 p.m. the Council will particpate in the American Society on Aging Forum on the 1991 White House Conference on Aging at the Grand Hyatt Hotel, Washington, DC.

The agenda for March 20 will include: Introduction of new members; discussion of Current Projects, Committee Reports, Agenda Projects and Budget for 1989–90, the 1988 Annual Report to the President and Recommendations included therein—location of 1989 meetings; Carol Fraser Fisk, Commissioner, Administration on Aging. On March 21 at 2 p.m., is as follows: Discussion of 1991 White House Conference on Aging at the Grand Hyatt Hotel in conjunction with the American Society on Aging Forum.

Dated: March 8, 1989.

## National Institutes of Health

### National Cancer Institute; Meeting (Cancer Center Support Review Committee)

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Cancer Center Support Review Committee, National Cancer Institute, National Institute of Health, March 30–31, 1989, Holiday Inn Crowne Plaza, 1750 Rockville Pike, Rockville, Maryland 20852.

This meeting will be open to the public on March 30, from 8:30 a.m. to 9:30 a.m. to review administrative details. Attendance by the public will be limited to space available.

In accordance with provisions set forth in secs. 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. and sec. 10(d) of Pub. L. 92–463, the meeting will be closed to the public on March 30, from approximately 9:30 a.m. to 6:00 p.m. and March 31, from 8:30 a.m. until adjournment for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Winifred Lumsden, the Committee Management Officer, National Cancer Institute, Building 31, Room 10A06, National Institutes of Health, Bethesda, Maryland 20892 (301–496–5708) will provide summaries of the meeting and rosters of committee members, upon request.

Dr. John Abrell, Executive Secretary, Cancer Center Support Review Committee, National Cancer Institute, Westwood Building, Room 834, National Institutes of Health, Bethesda, Maryland 20892 (301–496–9767) will furnish substantive program information.

Dated: March 3, 1989.

### National Heart, Lung, and Blood Institute; Meeting of the Clinical Trials Review Committee

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Clinical Trials Review Committee, National Heart, Lung, and Blood Institute, April 2–4, 1989, at the Raphael Hotel, 386 Geary Street, San Francisco, California 94102.

The Meeting will be open to the public on April 2 from 6:00 p.m. to approximately 7:30 p.m. to discuss administrative details and to hear a report concerning the current status of the National Heart, Lung, and Blood Institute. Attendance by the public is limited to space available.

In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S.C., and section 10(d), of Pub. L. 92–463, the meeting will be closed to the public from approximately 7:30 p.m. on April 2 to adjournment on April 4 for the review, discussion, and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable materials, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. Terry Bellicha, Chief, Communications and Public Information Branch, National Heart, Lung, and Blood Institute, Building 31, Room 4A–21, National Institutes of Health, Bethesda, Maryland 20892, (301) 496–4236, will provide a summary of the meeting and a roster of the Committee members.

Dr. David M. Monsees, Jr., Contracts, Clinical Trials and Training Review Section, Division of Extramural Affairs, National Heart, Lung, and Blood Institute, Westwood Building, Room 550B, Bethesda, Maryland 20892, (301) 496–7361, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program Nos. 13.837, Heart and Vascular Diseases Research; 13.838, Lung Diseases Research; 13.839, Blood Diseases and Resources Research, National Institutes of Health)

Dated: March 3, 1989.

BILLING CODE 4140–01–M

### National Institute of Allergy and Infectious Diseases; Meeting of Board of Scientific Counselors

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Institute of Allergy and Infectious Diseases, on May 22, 23 and 24, 1989 at the Rocky Mountain Laboratories, Building 6, Conference Room 349, Hamilton, Montana 59840.

The meeting will be open to the public on May 22 from 9 a.m. until 12:30 p.m. and on May 23 from 8 a.m. to 9:30 a.m. During this open session, the permanent staff of the Laboratory of Pathobiology, the Laboratory of Microbial Structure, and the Laboratory of Persistent Viral Diseases will present and discuss their immediate past and present research activities.

In accordance with the provisions set forth in sec. 552b(c)(6), Title 5, U.S.C. and sec. 10(d) of Pub. L. 92–463, the meeting of the Board will be closed to the public on May 22 from 8:30 a.m. to 9 a.m., and from 12:30 p.m. until recess, on May 23 from 9:30 a.m. until recess and on May 24 from 8:30 a.m. until adjournment for review, discussion, and evaluation of individual intramural programs and projects conducted by the Rocky Mountain Laboratories, including consideration of personal qualifications and performance, the competence of individual investigators, and similar items, the disclosure of which would

VOL 54 ISS 48 MR 14 1989 UMI

constitute a clearly unwarranted invasion of personal privacy.

Ms. Patricia Randall, Office of Research Reporting and Public Response, National Institute of Allergy and Infectious Diseases, Building 31, Room 7A32, National Institutes of Health, Bethesda, Maryland 20892, telephone (301-496-5717), will provide a summary of the meeting and a roster of the committee members upon request.

Dr. John I. Gallin, Executive Secretary, Board of Scientific Counselors, NIAID, National Institutes of Health, Building 10, Room 11C103, telephone (301-496-3006), will provide substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13-301, National Institutes of Health)

Dated: March 3, 1989.

**Betty J. Beveridge,**

## National Library of Medicine; Meeting of the Board of Scientific Counselors

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Library of Medicine, on May 1 and 2, 1989, in the Board Room of the National Library of Medicine, Building 38, 8600 Rockville Pike, Bethesda, Maryland.

The meeting will be open to the public from 8:30 a.m. to 4 p.m. on May 1 and from 8:30 a.m. to approximately 12 noon on May 2 for the review of research and development programs of the Lister Hill National Center for Biomedical Communications. Attendance by the public will be limited to space available.

In accordance with provisions set forth in sec. 552b(c)(6), Title 5, U.S.C., and sec. 10(d) of Pub. L. 92-463, the meeting will be closed to the public on May 1, from approximately 4 to 5 p.m. for the consideration of personnel qualifications and performance of individual investigators and similar items, the disclosure of which would constitute an unwarranted invasion of personal privacy.

The Executive Secretary, Dr. Daniel R. Masys, Director, Lister Hill National Center for Biomedical Communications, National Library of Medicine, 8600 Rockville Pike, Bethesda Maryland 20894, telephone (301) 496-4441, will furnish summaries of the meeting, rosters of committee members, and substantive program information.

Date: March 3, 1989.

**Betty J. Beveridge,**

*NIH Committee Management Officer, NIH.*

## Public Health Service

## Availability of Grants for Minority Community Health Coalition Demonstration Projects

**AGENCY:** Office of Minority Health/Office of the Assistant Secretary for Health, PHS, DHHS.

**ACTION:** Notice of availability of funds and request for applications under the Office of Minority Health's Program of Grants for Minority Community Health Coalition Demonstration Projects.

**SUMMARY:** The Office of Minority Health announces the availability of grants to provide support, for a period which will not exceed two years, for projects which demonstrate methods of developing community health coalitions which can effectively promote disease risk factor reduction within minority populations.

**FOR FURTHER INFORMATION CONTACT:** See the names and addresses at item 8 at the end of this notice.

**SUPPLEMENTARY INFORMATION:**

### Background

The Report of the Secretary's Task Force on Black and Minority Health identified six health problems that account for 80 percent of the excess deaths among minorities. Excess deaths are the difference between actual minority deaths and the number of deaths which would been expected if the minority population had the same age- and sex-specific death rates as the white population. Every minority group does not suffer from excess deaths in each category. However, the six health problems became priority issue areas for Task Force study. Listed in alphabetical order, they are:

- Cancer
- Cardiovascular disease and stroke
- Chemical Dependency
- Diabetes
- Homicide, Suicide, and Accidents (unintentional injuries)
- Infant mortality

### HIV Infection

In recognition of the severity of the problem of HIV infection and Acquired Immunodeficiency Syndrome (AIDS) among the minority populations, Congress appropriated funds beginning in Fiscal Year 1988 for the Office of Minority Health to use in ways specifically targeted at HIV infection in minority populations. One mechanism by which the Office of Minority Health targeted this problem was to add HIV infection as a seventh health problem to the above list of topic areas for this demonstration grant program in Fiscal Year 1988. HIV infection continues to be one of the topic areas for this program in Fiscal Year 1989. For applicant organizations that plan to submit HIV infection demonstration applications, it is important to describe existing efforts in HIV infection education and prevention in their local community (e.g., by the local or State health department or community-based organization), and how the applicants' proposed interventions to prevent AIDS or HIV infection would complement those existing efforts. Applicants are encouraged to communicate with their State Departments of Health and Education, as appropriate.

Please note that these Minority Community Health Coalition Demonstration Projects are but one mechanism by which the Office of Minority Health intends to utilize its Fiscal Year 1989 appropriation for HIV infection. For more information on the Office of Minority Health's HIV infection initiative, please call Jacqueline Bowles, M.D., at (202) 245-0020.

The risk factors for these seven priority areas involve behavior or preventable conditions which are potentially modifiable but are in some cases resistant to change. In order to effect health behavior change, an individual must be motivated beyond that typically achieved as the result of health information or media campaigns alone. In addition, conventional health promotion activities are frequently not effective in reaching minority populations. It appears that change can be achieved by community-based information dissemination, awareness, support, and exhortation, particularly if such a community health campaign is carried out using familiar, as well as influential institutions such as churches and schools, and organized by recognized community leaders.

Moreover, in many cases it may be insufficient to simply pressure individuals to change behavior without offering positive alternatives. For example, if teens are being encouraged to avoid use and abuse of drugs and alcohol, it may also be important to organize and offer constructive alternatives such as career-oriented activities in non-traditional settings.

The following is a list of the major health problems with their associated modifiable risk factors, some of which

are implicated in more than one health problem:

*Cancer:* Tobacco, Diet, Alcohol, Environment.

*Cardiovascular Disease and Stroke:* Hypertension, Diet, Tobacco, Sedentary Life Style, Obesity.

*Chemical Dependency:* Direct Behavioral Outcome of Alcohol, and other Drugs of, Abuse.

*Diabetes:* Obesity, Diet.

*Infant Mortality:* Smoking, Alcohol, Drugs, Late or No Prenatal Care, Teen Pregnancy, Nutrition.

*Homicide:* Alcohol, Drugs, Poor Conflict Resolution Skills.

*Suicide:* Alcohol, Drugs, Depression.

*Unintentional Injuries:* Alcohol, Drugs, Environmental Hazards.

*HIV Infection:* Intravenous Drug Use, and High Risk Sexual Practices, (e.g., Unprotected Intercourse, with Multiple Partners).

Many of the above noted risk factors are of interest to, and within the purview of, a number of organizations within communities. In addition, community organizations have different and varying levels of influence over the behavior of individuals.

This announcement is the fourth annual notice for this grant program. In the past Fiscal Year 1988, the Office of Minority Health received 91 applications of which 39 were approved and seven (7) grants awarded for a total of $1.4 million. Fifty-two applications were disapproved because of various deficiencies. Several applications may have been in the approval range with some technical assistance. Others would have required much more work in the pre-application stage. Given the time and resources typically involved in researching, developing, and writing an application, potential applicants should seriously consider whether or not they should apply at this time or wait until they establish stronger linkages with other community organizations and/or develop greater expertise in planning and writing their proposal.

Applicants wishing to improve their chances for approval should pay particular attention to both the Supplemental and General Instructions provided with the grant application to ensure that their applications are responsive to each of the following concerns under the following headings:

*Project Objectives*

1. Clearly describe the goals and objectives of the proposed project, using measurable terms;

2. Identify, describe, and document health problems areas and related risk factors in the target population;

3. Include realistic timetables for accomplishing the objectives;

*Target Population*

4. Define the target population(s) and identify which interventions are proposed for which minority groups;

*Coalition*

5. Provide evidence that a valid community-based coalition exists or that organizations, which have worked together in the past, are now proposing to focus their energies on these disease risk reduction activities, and describe any coordinative or collaborative efforts with other organizations serving the target population;

6. Describe in detail the organization of the coalition and the respective roles of coalition members and other participants;

*Intervention*

7. Describe plans for implementing the intervention(s), presenting in step-by-step fashion the specific efforts to be undertaken by each key component of the coalition, and how these various efforts will address the problems identified;

8. Provide a detailed description of intervention strategies that address the board concept of the application rather than just an analysis of medical records of minority individuals, as in a limited clinical trail;

*Project Management and Staffing*

9. Provide detailed management plans that clearly delineate each coalition member's area of responsibility and how specified key staff of member organizations will be accountable for carrying out their responsibility;

10. Describe the duties and requisite qualifications of current staff, and of any staff and consultant positions to be filled after the grant award; and

11. Identify and provide supporting documentation (e.g., curriculum vitae) for each individual proposed for key staff positions to show appropriate experience and qualifications. Particularly suitable will be experience in community-based programs and/or health promotion programs, as well as related treatment and research experience.

*Evaluation*

12. In the evaluation section, specify the overall evaluation plans and the particular process and outcome objectives, indicating how each of these will be measured, including the results of the interventions.

### Authority

This program is authorized under section 301 of the Public Health Service Act, as amended.

### Program Objectives

The objectives of the program are to fund projects which:

(1) Provide epidemiological evidence of the health problem(s) and risk factor(s) of the minority population(s) which are the targets of the applicant's proposal.

(2) Provide detailed and specific methods for (a) risk factor reduction through the use of a community coalition targeted to a specific minority population and to identified risk factors and (b) measuring the results of the intervention.

(3) Demonstrate a sound organizational scheme for the coalition which assures adequate involvement and representation of both coalition members and community leaders.

(4) Evaluate the process of establishing and operating the coalition and how its activities will impact on the risk factors and health problem areas identified in the target population through the community coalition.

(5) Demonstrate experience of the applicant and some coalition members with community-based projects, either focused on health or other community concerns.

(6) Provide evidence of potential sources of community and other support for the project at the end of the grant period.

### Definitions

For the purpose of this grant program, the following definitions are provided:

(1) *Health problem areas*—one of the seven priority issue areas identified in the Secretary's Task Force report or by the Office of Minority Health. They are: (a) Cancer; (b) cardiovascular disease and stroke; (c) chemical dependency; (d) diabetes; (e) homicide, suicide and unintentional injuries; (f) infant mortality; and (g) HIV infection.

(2) *Risk factors*—The environmental and behavioral influences capable of causing ill health with or without previous predisposition. The term "risk factor" is also used to denote an aspect of personal lifestyles and behavior known, on the basis of epidemiological evidence, to be associated with one or more diseases or health conditions considered important to prevent.

These include use of tobacco, poor dietary habits, obesity, severe emotional stress, depression, poor conflict resolution skills, abuse of alcohol and drugs, intravenous drug use, late or no

VOL 54 ISS 48 MR 14 1989 UMI

prenatal care, teen pregnancy, high risk sexual practices, (e.g., unprotected intercourse, with multiple partners), environmental hazards, and others.

(3) *Community*—A defined geographical area in which persons live, work, and recreate and is characterized by: a) formal and informal communication channels; b) formal and informal leadership structures for the purpose of maintaining order and improving their conditions; and c) its capacity to serve as a focal point for addressing societal needs including health needs.

(4) *Community coalition*—The coming together of individuals from and representatives of organizations and institutions in a community for the purpose of collaborating on specific community concerns, and seeking resolution of those concerns. For purposes of this grant program, community coalitions are characterized by the six elements listed below.

*A community coalition*

- Assumes a variety of interests converging on an agreed upon mission.
- Requires resource participation. Each coalition member organization brings a certain resource to the coalition to enable the coalition to accomplish its mission.
- Requires that each member organization has a specific role within the coalition. This rule, defined by the individual member, is distinctive among the other members. Use of resources may be one way of defining each role.
- Requires that each member organization establish both a relationship with the coalition as an entity (vertical relationship) and with other members of the coalition (horizontal relationship). Members must be able and willing to work with one another. Formalizing these relationships to make explicit the specified roles may be achieved through development of memoranda of understanding/agreement between each member organization and the coalition, and between members as necessary.
- Requires a long term commitment on the part of each member organization since the problem to be addressed is not usually amenable to short term solutions.
- Must document its activities to ensure a written history of and, thus, a continuity to its work that is not dependent upon the active participation of any single person. Such documentation can include the memoranda of understanding/agreement mentioned above.

(5) *Minority populations*—As defined by the Report of the Secretary's Task Force on Black and Minority Health, they include: Asian/Pacific Islanders, Blacks, Hispanics, and Native Americans/Alaska Natives (which include Native Hawaiians).

**Availability of Funds**

The Office of Minority Health intends to make available approximately $1.4 million under this announcement to be expended by grantees over a two-year project period. The specific amount funded will depend on the overall availability of funds. It is anticipated that seven individual grants of up to $200,000 (total costs including indirect costs) each for the two-year project period will be awarded from these funds. OMH hopes to award at least one of the seven grants in the area of HIV infection, with priority given to applications that target the Black or the Hispanic population. Such award, however, like all award decisions will be based on the types and quality of the applications received.

**Applicant Eligibility**

Eligible applicants are public and private nonprofit organizations and for-profit organizations *except for all current grantees under this program*, since these grantees are considered not eligible. The applicant organization is the lead agency for the coalition and is responsible for management of the Project and will serve as the fiscal agent for the Federal funds awarded.

Federal domonstration grant support is not expected to result in more than one award in any Standard Metropolitan Statistical Area (SMSA) unless an additional project in an SMSA was to be targeted to another of the four major minority groups—Asian/Pacific Islanders, Blacks, Hispanics, and Native Americans/Alaska Natives. Efforts will be made to achieve geographic and ethnic distribution of awards as well as cover the various health problems identified above. There is no lower limit for the size of the population targeted by the applicant, but there must be a reasonable relationship between the level of effort involved in the coalition and the size of the target population and the health problem(s) to be addressed. Similarly, the geographic distribution of the target population must be such that effecting risk factor reduction is feasible.

The target risk factor(s) must be epidemiologically justified on the basis of health problem patterns in the population. It is suggested that applicants limit the number of disease or health problem areas to a primary one with one secondary problem area (with their associated risk factors) on which a coalition plans to focus, as opposed to being all-inclusive, in order to maximally utilize resources to achieve the greatest reduction in the selected risk factor(s).

**Applications**

*1. Copies*

The forms used for applying for grants under this program are either Form PHS 5161–1 for State and local governments or Form PHS 398 for all others. Copies of the application kit may be obtained from the OMH-Coalition Grant Office, 8201 Greensboro Drive, Suite 600, McLean, VA 22102.

*2. Deadlines*

The deadline for receipt of applications is 5:30 p.m. (EST) on May 31, 1989. Applications will be considered as meeting the deadline if they are either:

(1) Received at the above address on or before the deadline date, or

(2) Sent to the above address on or before the deadline date and received in time for orderly processing.

(Applicants should request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier or the U.S. Postal Service. Private metered postmarks will not be accepted as proof of timely mailing.)

*3. Late Applications*

Applications which do not meet the criterion in paragraph 2 immediately above will be considered late applications and will be returned to the applicant.

*4. Reviews*

Applications are subject to review as governed by Executive Order 12372, Intergovernmental Review of Federal Programs. Applications for funding will be subject to State review. All comments from a State office must be received by 60 days after the due date by the program grants management office. Applicants should contact State Single Points of Contact (SPOC) early in the application preparation process. A list of addresses of the SPOCs is enclosed with the application material.

*5. Project Budget*

Funds may be used to cover the cost of personnel to coordinate the coalition's activities, for consultants, support services and materials. Funds may not be used for building construction costs or building alterations and renovations. Also, funds may not be used to purchase equipment except as may be acceptably justified in relation to conducting the project.

*6. Cost Participation*

It is expected that a portion of the program's costs will be borne by coalition members or by other non-federal sources such as business, labor, local government, or community funds. Cost participation for those grants awarded in FY 1988 ranged between $40,000 and $289,000, and was either in-kind or direct funds contributions.

*7. Review Criteria*

Applications will be reviewed and evaluated in terms of the evidence presented in the application regarding the ability of the applicant to meet program objectives. Of specific importance will be the following criteria under the listed headings. (An indication of the quantitative weight appears in parentheses after each heading.):

*Project Objectives (50%)*

- The scientific and technical merit of the described proposed project, and the consistency of the project's goals and objectives with those of the Demonstration Grant Program and the Office of Minority Health.
- The justification for the choice of disease(s) and risk factor(s) to be targeted, and their direct relationship to the epidemiologic characterization(s) of the target minority population(s).
- The degree to which the composition of coalition members is a logical choice based on target population, target risk factor(s) and intervention(s) to be demonstrated.
- The degree of commitment of each coalition member to the coalition and to the proposed implementation plan, including the amount or extent of support indicated by coalition members to cover a portion of project needs.
- Coherence, feasibility, and realistic approach of the intervention strategy and of the implementation methods described. The specificity of the methods to address the target risk factor(s) in the target population(s) will be given significant weight in the review of the application.

*Project Management and Staffing (25%)*

Adequacy of qualifications and time allocations of proposed regular staff, both paid and voluntary, and of the proposed program and technical management of the project. Appropriateness of relevant experience and qualifications of the managers of the applicant organization to provide administrative and fiscal management of the grant.

*Evaluation (25%)*

Appropriateness of the process and outcome objectives, and adequacy of the evaluation plan to measure the development of the coalition as well as indicators and trends of outcome changes based on the goals and objectives of the application. Likelihood that the project will demonstrate whether or not community health coalitions can effectively promote risk factor reduction among minority populations. Likelihood that the project will continue beyond the two year funded project period.

*8. Information and Technical Assistance Contacts*

Information on application procedures and copies of application forms may be obtained from the OMH-Coalition Grants Office, 8201 Greensboro Drive, Suite 600, McLean, VA 22102 (phone 703/821–2487).

Technical assistance on the programmatic content of the application may be obtained from Betty Lee Hawks, Office of Minority Health, Room 118–F, HHH Bldg., Washington, DC 20201 (telephone 1–800–444–6472 or 202/245–0020). For additional information on the OMH AIDS Program, please contact Jacqueline Bowles, M.D., at the same address and telephone number.

The Catalog of Federal Domestic Assistance Number for the program is 13.137.

Dated: February 20, 1989.

## INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 31406]

### Carolina Coastal Railway, Inc., Lease and Operation and Acquisition Exemption; Southern Railway Co.

Carolina Coastal Railway, Inc. (CCR) has filed a notice of exemption to lease (with option to purchase) [1] and operate a line of railroad owned by Southern Railway Company. The line extends between Pinetown (milepost BH-0.00) and Belhaven (milepost BH-17.00), in Beaufort County, NC, a distance of 17 miles. The transaction was expected to be consummated February 14, 1989.

CCR must preserve intact all sites and structures more than 50 years old until compliance with the requirements of Section 106 of the National Historic Preservation Act, 16 U.S.C. 470 is achieved. *See Class Exemption—Acq. & Oper. of R. Lines Under 49 U.S.C. 10901,* 4 I.C.C.2d 305 (1988).

Any comments must be filed with the Commission and served on: Kelvin J. Dowd, Slover & Loftus, 1224 Seventeenth Street, NW., Washington, DC 20036.

The notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void *ab initio.* Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: March 8, 1989.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

*Secretary.*

[FR Doc. 89-5616 Filed 3-13-89; 8:45 am]

BILLING CODE 7035-01-M

[1] CCR has the option to purchase the line anytime after the end of the second lease year. This notice of exemption extends to the prospective purchase of this line by CCR, thus obviating the need for CCR to file a separate notice of exemption in the future covering that transaction, should CCR exercise its option to purchase.

[Docket No. AB-290 (Sub-No. 56X)]

### Norfolk and Western Railway Co.—Abandonment Exemption—Between Solon and Chagrin Falls, OH

Applicant has filed a notice of exemption under 49 CFR 1152 Subpart F—*Exempt Abandonments* to abandon its 6.25-mile line of railroad between milepost CH-1.90 at Solon, OH, and milepost CH-8.15 at Chagrin Falls, OH.

Applicant has certified that: (1) No local traffic has moved over the line for at least 2 years; (2) any overhead traffic on the line can be rerouted over other lines; and (3) no formal complaint filed by a user of rail service on the line (or a State or local government entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or with any U.S. District Court or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

As a condition to use this exemption, any employee affected by the abandonment shall be protected under *Oregon Short Line R. Co.—Abandonment—Goshen,* 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10505(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective on April 13, 1989 (unless stayed pending reconsideration). Petitions to stay that do not involve environmental issues,[1] formal expressions of intent to file an offer of financial assistance under 49 CFR 1152.27(c)(2),[2] and trail use/rail banking statements under 49 CFR 1152.29 must be filed by March 24, 1989.[3]

Petitions for reconsideration and request for public use conditions under 49 CFR 1152.28 must be filed by April 3, 1989, with:

Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicant's representative:

Roger A. Petersen, Norfolk Southern Corporation, Three Commercial Place, Norfolk, VA 23510.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio.*

Applicant has filed an environmental report which addresses environmental or energy impacts, if any, from this abandonment.

The Section of Energy and Environment (SEE) will prepare an environmental assessment (EA). SEE will issue the EA by March 17, 1989. Interested persons may obtain a copy of the EA from SEE by writing to it (Room 3115, Interstate Commerce Commission, Washington, DC 20423) or by calling Carl Bausch, Chief, SEE at (202) 275-7316. Comments on environmental and energy concerns must be filed within 15 days after the EA becomes available to the public.

Environmental, public use, or trail use/rail banking conditions will be imposed, where appropriate, in a subsequent decision.

Decided: February 28, 1989.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

*Secretary.*

[FR Doc. 89-5691 Filed 3-13-89; 8:45 am]

BILLING CODE 7035-01-M

[1] A stay will be routinely issued by the Commission in these proceedings where an informed decision on environmental issues (whether raised by a party or by the Section of Energy and Environment in its independent investigation) cannot be made prior to the effective date of the notice of exemption. *See Exemption of Out-of-Service Rail Lines,* 4 I.C.C.2d 400 (1988). Any entity seeking a stay involving environmental concerns is encouraged to file its request as soon as possible in order to permit this Commission to review and act on the request before the effective date of this exemption.

[2] *See Exempt. of Rail Abandonment—Offers of Finan. Assist.,* 4 I.C.C.2d 164 (1987), and final rules published in the Federal Register on December 22, 1987 (52 FR 48440-48446).

[3] The Commission will accept a late-filed trail use statement so long as it retains jurisdiction to do so.

## DEPARTMENT OF JUSTICE

### Drug Enforcement Administration

### Importation of Controlled Substances; Application; McNeilab Inc.

Pursuant to Section 1008 of the Controlled Substances Import and Export Act (21 U.S.C. 958(h)), the Attorney General shall, prior to issuing a registration under this Section to a bulk manufacturer of a controlled substance in Schedule I or II and prior to issuing a regulation under Section 1002(a) authorizing the importation of such a substance, provide manufacturers holding registrations for the bulk manufacture of the substance an opportunity for a hearing.

Therefore, in accordance with § 1311.42 of Title 21, Code of Federal Regulations (CFR), notice is hereby given that on January 24, 1989, McNeilab Inc., DBA First State Chemical Company, Inc., 803 East Fourth Street, Wilmington, Delaware 19801, made application to the Drug Enforcement Administration to be registered as an importer of the basic classes of controlled substances listed below:

| Drug | Schedule |
|---|---|
| Raw opium (9600) | II |
| Concentrate of poppy straw (9670) | II |

Any manufacturer holding, or applying for, registration as a bulk manufacturer of this basic class of controlled substance may file written comments on or objections to the application described above and may, at the same time, file a written request for a hearing on such application in accordance with 21 CFR 1301.54 in such forms as prescribed by 21 CFR 1316.47.

Any such comments, objections or requests for a hearing may be addressed to the Deputy Assistant Administrator, Drug Enforcement Administration, United States Department of Justice, 1405 I Street, NW., Washington, DC 20537, Attention: DEA Federal Register Representative (Room 1112), and must be filed no later than April 13, 1989.

This procedure is to be conducted simultaneously with and independent of the procedures described in 21 CFR 1311.42(b), (c), (d), (e) and (f). As noted in a previous notice at 40 FR 43745-46 (September 23, 1975), all applicants for registration to import a basic class of any controlled substance in Schedule I or II are and will continue to be required to demonstrate to the Deputy Assistant Administrator of the Drug Enforcement Administration that the requirements for such registration pursuant to 21 U.S.C. 958(a), 21 U.S.C. 823(a), and 21 CFR 1311.42 (a), (b), (c), (d), (e) and (f) are satisfied.

Gene R. Haislip,

*Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.*

Dated: March 3, 1989.

BILLING CODE 4410-09-M

### Manufacturer of Controlled Substances; Application; McNeilab Inc.

Pursuant to § 1301.43(a) of Title 21 of the Code of Federal Regulations (CFR), this is notice that on January 24, 1989, McLeilab Inc., DBA First State Chemical Comany Inc., 803 East Fourth Street, Wilmington, Delaware 19801, made application to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the basic classes of controlled substances listed below:

| Drug | Schedule |
|---|---|
| Codeine (9050) | II |
| Dihydrocodeine (9120) | II |
| Oxycodone (9143) | II |
| Hydrocodone (9193) | II |
| Morphine (9300) | II |
| Thebaine (9333) | II |

Any other such applicant and any person who is presently registered with DEA to manufacture such substances may file comments or objections to the issuance of the above application and may also file a written request for a hearing thereon in accordance with 21 CFR 1301.54 and in the form prescribed by 21 CFR 1316.47.

Any such comments, objections or requests for a hearing may be addressed to the Deputy Assistant Administrator, Drug Enforcement Administration, United States Department of Justice, 1405 I Street, NW., Washington, DC 20537, Attention: DEA Federal Register Representative (Room 1112), and must be filed no later than Apirl 13, 1989.

Gene R. Haislip,

*Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.*

Dated: March 3, 1989.

[FR Doc. 89-5773 Filed 3-13-89; 8:45 am]

BILLING CODE 4410-09-M

### Manufacturer of Controlled Substances; Ganes Chemical Inc.

Pursuant to § 1301.43(a) of Title 21 of the Code of Federal Regulations (CFR), this is notice that on January 5, 1989, Ganes Chemicals, Inc., Industrial Park Road, Pennsville, New Jersey 08070, made application to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the basic classes of controlled substances listed below:

| Drug | Schedule |
|---|---|
| Amobarbital (2125) | II |
| Pentobarbital (2270) | II |
| Secobarbital (2315) | II |
| Methadone (9250) | II |
| Methadone-Intermediate 4-cyano-2-dimethylamino-4, 4-diphenyl butane (9254) | II |
| Bulk dextropropoxyphene (non-dosage forms) (9273) | II |

Any other such applicant and any person who is presently registered with DEA to manufacture such substances may file comments or objections to the issuance of the above application and may also file a written request for a hearing thereon in accordance with 21 CFR 1301.54 and in the form prescribed by 21 CFR 1316.47.

Any such comments, objections or requests for a hearing may be addressed to the Deputy Assistant Administrator, Drug Enforcement Administration, United States Department of Justice, 1405 I Street, NW., Washington, DC 20537, Attention: DEA Federal Register Representative (Room 1112), and must be filed no later than April 13, 1989.

Gene R. Haislip,

*Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.*

BILLING CODE 4410-09-M

## NATIONAL COMMUNICATIONS SYSTEM

### Federal Telecommunications Standards; Inquiry

**AGENCY:** National Communications System, Office of Technology and Standards.

**ACTION:** Notice.

**SUMMARY:** The Federal Telecommunication Standards Committee's (FTSC) Land Mobile Radio (LMR) Subcommittee is currently working toward a new Federal standard (Fed Std 1044) for Government LMR trunked radio systems. The purpose of this notice is to invite interested organizations to propose candidate trunked radio system solutions that will enable the Government to draft a proposed standard providing needed features and capabilities.

**DATE:** Initial proposals should be received by May 15, 1989.

**ADDRESS:** Send comments to the National Communictions System, Attn: Office of Technology and Standards, Washington, DC 20305-2010.

**FOR FURTHER INFORMATION CONTACT:** Mr. Robert M. Fenichel, National Communications System, Telephone (202) 692-2124.

**SUPPLEMENTARY INFORMATION:**

1. While proposals may be proprietary, the text of a draft standard (containing all interoperability-related requirements) must be publically disclosed upon solicitation of industry comment on the draft standard. In addition, all patents needed to implement the requirements of the

VOL 54 ISS 48 MR 14 1989 UMI

standard must be offered for license on a non-exclusive basis at reasonable rates (as is required for American National Standards Institute (ANSI) and International Telegraph and Telephone Consultitive Committee (CCITT) standards).

2. There are presently two public-safety trunked radio system techniques being offered for sale to the Federal Government. Proposed techniques should be capable of sufficient flexibility to include most, if not all, of the features offered by these two systems. Both of the public-safety trunked radio system manufacturers have been unwilling to disclose their techniques and license patents as described above.

3. Some features and performance characteristics felt to be very desirable are:

a. Ability to assign channels to users employing 25 kHz channel analog voice, 12.5 kHz channel analog voice, 25 KHz channel digitized voice or data, 12.5 kHz channel digitized voice or data, and 6.25 kHz digitized voice or data.

b. Ability to support a 20-channel LMR trunked radio system with one 12.5 kHz or less trunked radio system control channel, while providing a range equal to that of 25 kHz channel analog voice.

c. Ability to support a 20-channel system channel-loading in the same range as the two presently offered public-safety trunked radio system techniques, with response time and other requirements specified in APCO Project 16 documents.

d. Ability to operate in a network mode, individual-to-individual mode, and a telephone interconnect mode.

4. While candidate trunked radio systems proposals are desired, other alternative suggestions (e.g. development under Government funding) will be considered.

**Dennis Bodson,**

*Assistant Manager, NCS Technology and Standards.*

BILLING CODE 3810-05-M

## NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

### National Endowment for the Arts; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that a meeting of the Museum Advisory Panel (Professional Development Section) to the National Council on the Arts will be held on April 6, 1989, from 9:00 a.m.—5:30 p.m. in room 730 of the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the Agency by grant applicants. In accordance with the determination of the Chairman published in the Federal Register of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Ms. Yvonne M. Sabine, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682-5433.

March 8, 1989.

**Yvonne M. Sabine,**

*Director, Council and Panel Operations National Endowment for the Arts.*

BILLING CODE 7537-01-M

## NUCLEAR REGULATORY COMMISSION

### Regional State Liaison Officers' Meeting

On April 11 and 12, 1989, the Nuclear Regulatory Commission (NRC) will sponsor a regional meeting with the Governor-appointed State Liaison Officers from Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island and Vermont and the representative from the District of Columbia. The subjects which will be discussed include State cooperation, power plant licensee performance, decommissioning, radioactive material safety issues, as well as other items of mutual regulatory interest.

The meeting will be conducted at the NRC Region I Office, 475 Allendale Road, King of Prussia, Pennsylvania. The meeting is open to the public for attendance and observation and will take place from 8:30 a.m. until 5:15 p.m. on Tuesday, April 11, and from 8:00 a.m. until 12:00 noon on Wednesday, April 12, 1989.

Questions regarding this meeting should be directed to Marie Miller, at (215) 337-5246.

Dated at King of Prussia, Pennsylvania, this March 8, 1989.

For the Nuclear Regulatory Commission.

**William T. Russell,**

*Regional Administrator.*

BILLING CODE 7590-01-M

## OFFICE OF MANAGEMENT AND BUDGET

### Small Business Competitiveness Demonstration Program; Policy Directive

**AGENCY:** Office of Federal Procurement Policy (OFPP) Small Business Administration (SBA).

**ACTION:** Interim policy directive amendment.

**SUMMARY:** In the Federal Register of December 29, 1988, (53 FR 52888) OFPP and SBA published an Interim Policy Directive and Test Plan implementing Title VII of the "Business Opportunity Development Reform Act of 1988", which establishes the Small Business Competitiveness Demonstration Program. Paragraph III.A.2.d of the directive stated that non-nuclear ship repair (one of the four industry groups covered by the demonstration program) currently was not individually segmented from the shipbuilding and ship repair industry, but that SBA would segment the industry and an appropriate Federal Procurement Data System (FPDS) service code would be provided for reporting purposes. SBA now has completed the segmentation of the shipbuilding and ship repair industry, and OFPP and SBA are amending the interim policy directive to include appropriate FPDS service codes for non-nuclear ship repair.

**FOR FURTHER INFORMATION CONTACT:** Karen Maris, Deputy Associate Administrator, (202) 395-3300.

1. Paragraph III.A.2.d., is amended to read as follows:

d. Non-nuclear ship repair—Ship repair (including overhauls and conversions) performed on non-nuclear propelled and nonpropelled ships under SIC code 3731, limited to FPDS service codes J998 (repair performed east of the 108th meridian) and J999 (repair performed west of the 108th meridian).

2. Paragraph IV.B.3., is amended to read as follows:

3. Non-nuclear Ship Repair

Non-nuclear ship repair is included within SIC 3731. Since this SIC includes all ship repair as well as shipbuilding, participating agencies shall use the following FPDS service codes to monitor goal attainment for non-nuclear ship repair: J998 (Ship Repair (Including Overhauls and Conversions) Performed on Non-nuclear Propelled and Nonpropelled Ships East of the 108th Meridian) or J999 (Ship Repair (including Overhauls and Conversions) Performed on Non-nuclear Propelled and Nonpropelled Ships West of the 108th Meridian).

3. Attachment B is amended by adding in "IV. Non-nuclear Ship Repair," under the heading "Designated Groups,":

SIC 3731:
PSC J998
PSC J999

**Allan V. Burman,**

*Deputy Administrator and Acting Administrator, Office of Federal Procurement Policy.*

**Monika Edwards Harrison,**

*Associate Administrator for Procurement Assistance, Small Business Administration.*

BILLING CODE 3110-01-M

## SECURITIES AND EXCHANGE COMMISSION

**[Release No. 34-26604; File No. SR-Amex-87-33]**

### Self-Regulatory Organizations; Proposed Rule Change by American Stock Exchange, Inc. Relating to Telephone Access to the Floor

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on November 16, 1988, the American Stock Exchange, Inc. ("Amex" or "Exchange") filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the Amex. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

**I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change**

This filing is Amendment No. 1 to SR-Amex-87-33, a proposed rule change originally filed by the Amex on December 30, 1987, that would allow members to establish direct telephone communications between the Floor and non-members located off the Floor, and to reflect more fully the Amex's existing telephone policy.[1] This amendment would modify Commentary .01 to Amex Rule 220 to provide that the Amex will not permit members to use a portable telephone on the Exchange floor.[2]

The text of the proposed rule change is available at the Office of the Secretary, Amex, and at the Commission.

**II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change**

In its filing with the Commission, the Amex included statements concerning the purpose of and basis for the proposed rule change and discussed comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Amex has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

*A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change*

(1) Purpose

As noted in the original notice of the proposed Amex rule change, the purpose of the proposal is to codify all current Exchange policies relating to communications with the Trading Floor of the Exchange. Amendment No. 1 reflects a modification to these policies. In the original notice of the proposed rule change published in the Federal Register [3] the Commission noted that, unlike the NYSE rule change,[4] the Amex proposal did not specifically address portable telephones. This amendment to the proposed rule change would add a prohibition against the use of portable telephones or other portable communication devices on the Floor which would permit direct voice communication between members and non-members.

Portable telephones would enable a non-member to communicate directly with a member in the trading crowd, thereby providing the non-member with "live" access to the very point of trade. In Amex's view, not only is such access an essential privilege of membership, but Exchange Rule 3(b) prohibits members from effecting transactions on the Exchange directly with non-members. A portable telephone in the crowd could afford a non-member the actual ability to trade in the crowd.

The use of portable telephones on the Trading Floor may also serve to perpetuate in the public mind doubts about the extent to which small investors are on an equal footing with larger, more active customers.

In addition, non-member telephone access to the booths is predicated on full compliance with recordkeeping and other applicable rules related to maintaining a customer business. These requirements would be difficult to comply with, and to surveil, when portable telephones are used.

*B. Self-Regulatory Organization's Statement on Burden on Competition*

The proposed rule change will impose no burden on competition.

*C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others*

No written comments were solicited or received with respect to the proposed rule change.

**III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action**

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if its finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Amex consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

**IV. Solicitation of Comments**

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed

[1] The Commission originally published notice of the proposed rule change in Securities Exchange Act Release No. 25267, January 22, 1988, 53 FR 2555.

[2] The Commission approved a similar proposed rule change by the New York Stock Exchange, Inc. ("NYSE") that permits members to have telephones installed in their booths on the NYSE floor to enable them to communicate with non-members located off-floor. The rule also prohibits member from using a portable telephone on the NYSE floor. *See* Securities Exchange Act Release No. 25842, June 23, 1988, 53 FR 24539). The Commission's approval of the NYSE's ban on portable telephones was recently upheld in a January 20, 1989, decision by the United States Court of Appeals for the Second Circuit. *See Higgins v. Securities and Exchange Commission*, Docket No. 88-4115.

[3] *See* note 1, *supra*.

[4] *See* note 2, *supra*.

VOL 54 ISS 48 MR 14 1989 UMI

rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, at the above address. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to File No. SR–Amex–87–33 and should be submitted by April 4, 1989.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: March 7, 1989.

Jonathan G. Katz,

*Secretary.*

[FR Doc. 89–5790 Filed 3–13–89; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-26616; File No. SR-CBOE-89-05]

**Self-Regulatory Organizations; Proposed Rule Change by the Chicago Board Options Exchange, Inc. Relating to Risk Analysis Procedures**

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1) ("Act"), notice is hereby given that on February 24, 1989, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

**I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change**

*Rule 15.7 Risk Analysis of Market Maker Accounts*

(a) Each member organization which clears on guarantees the transactions of options market makers pursuant to Exchange Rule 8.5, shall establish and maintain written procedures for assessing and monitoring the potential risks to the member organization's capital over a specified range of possible market movements of positions maintained in such options market maker accounts and such related accounts as the Exchange shall from time to time direct. Current procedures shall be filed and maintained with the Department of Financial Compliance. The procedures shall specify the computations to be made, the frequency of computations, the records to be reviewed and maintained and the positions(s) within the organization responsible for the risk function.

(b) Upon direction by the Department of Financial Compliance, each affected member organization shall provide to the Department such information as the Department may reasonably require with respect to the member organization's risk analysis for any or all of its options market maker accounts.

Interpretations and Policies . . .

.01. Each affected member organization shall at a minimum assess and monitor its own potential risk of loss from options market maker accounts each business day as of the close of business the prior day through use of an Exchange approved computerized risk analysis program. The program shall comply with at least the minimum standards specified below and such other standards as from time to time may be prescribed by the Exchange in written memoranda to all affected member organizations:

(i) The estimated loss to the clearing member organization for each market maker account (potential account deficit) shall be determined given the impact of broad market movements in reasonable intervals over a range from negative 15% to positive 15%.

(ii) The member organization shall calculate volatility using a method approved by the Exchange, with volatility updated at least weekly. The program must have the capability of expanding volatility when projecting losses throughout the range of broad market movements.

(iii) Options prices shall be estimated through use of recognized options pricing models such as, but not limited to, Black-Scholes and Cox-Reubenstein.

(iv) At a minimum, written reports shall be generated which describe for each market scenario: the projected loss per options class by account; the projected total loss per options class for all accounts; the projected deficits per account and in aggregate.

**II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change**

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below and is set forth in sections (A), (B), and (C) below.

*(A) Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change*

As the result of the October, 1987 market break, the Exchange established a task force to review procedures and practices of options market-maker clearing firms. One result of this review was a determination that minimum risk analysis standards should be established to enable all Exchange market maker clearing firms to project their potential losses for all accounts given specific market movements and/or changes in volatility.

This proposed rule would require all Exchange market maker clearing firms to file with the Exchange written procedures for assessing and monitoring the risk to the clearing firm of maintaining positions in its own market maker accounts and those of independent market makers for whom it performs clearance and guarantee functions. These procedures would include, but not be limited to, an Exchange approved computerized risk analysis program, which would, given certain parameters, enable the clearing firm to assess its potential exposure over a specified range of possible market movements.

The rule would require risk analysis to be conducted daily as of the close of business the prior day, and would provide for the submission to the Exchange of certain risk analysis documentation as requested by the Department of Financial Compliance ("Department") on a routine or "as needed" basis.

The Exchange is designated by the Commission as the examining authority for fifteen of the eighteen Exchange member organizations which clear and guarantee the accounts of options market makers. The Exchange believes that the majority of these firms, including those designated to other self-regulatory organizations, would currently be in a position to comply with the proposed rule. However, to allow for all affected members to adequately prepare, the Exchange recommends an effective date four months from the date of approval.

The Exchange believes that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder; in particular, the proposed rule change is consistent with section 6(b)(5) of the Act because it is designed to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with

respect to, and facilitating transactions in securities.

*(B) Self-Regulatory Organization's Statement on Burden on Competition*

This proposed rule change will not impose a burden on competition.

*(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others*

In June, 1988 all options market maker clearing organizations were advised of the decision to require minimum risk analysis procedures and that a pilot program including four (4) clearing firms had been instituted to assist in the development of minimum standards. The draft rule proposal resulting from the pilot program was distributed on November 17, 1988 for review and comment to all Exchange member organizations which clear options market maker accounts. In addition to the four firms which participated in the pilot, the Department reviewed the procedures of two additional clearing firms, which contacted the Department in response to the November circular. No negative comments have been received.

**III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action**

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and published its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(a) By order approve such proposed rule change, or

(b) Institute proceedings to determine whether the proposed rule change should be disapproved.

**IV. Solicitation of Comments**

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by April 4, 1989.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: March 8, 1989.

Jonathan G. Katz,

*Secretary.*

[FR Doc. 89–5891 Filed 3–13–89; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-26611; File No. SR-NASD-88-53]

**Self-Regulatory Organizations; National Association of Securities Dealers, Inc; Filing Vacancies on District Business Conduct Committees**

The National Association of Securities Dealers, Inc. ("NASD") submitted a proposed rule change on November 29, 1988, and an amendment thereto on February 14, 1989,[1] pursuant to section 19(b) of the Securities Exchange Act of 1934 [2] ("Act") and Rule 19b–4 [3] thereunder to amend Article VIII, section 5 of the NASD By-Laws to provide that vacancies created by the departure of a member of a District Business Conduct Committee ("DBCC") during his or her term [4] may be filled by the remaining DBCC members by the appointment of a new member to serve until the next regularly scheduled election.[5]

Notice of the proposed rule change together with the substance of the terms of the proposed rule change was given by the issuance of a Commission release (Securities Exchange Act Release No. 26407, December 29, 1988) and by publication in the **Federal Register** (54 FR 342, January 5, 1989). No comments were received regarding the proposed rule change.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the NASD and, in particular, with the requirements of Section 15A and the rules and regulations thereunder.

*It is therefore ordered,* pursuant to section 19(b)(2) of the Act, that the proposed rule change, SR–NASD–88–53, be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30–3(a)(12).

Jonathan G. Katz,

*Secretary.*

March 8, 1989.

BILLING CODE 8010-01-M

[1] On February 14, 1989, the Commission received a letter from the NASD (dated February 10, 1989) providing the results of membership vote pertaining to this rule filing (2,137 members approved, 147 disapproved and 10 members did not vote). This letter constitutes Amendment No. 1 and is available for inspection and copying in the Commission's public reference room.

[2] 15 U.S.C. 78s(b)(1) (1982).

[3] 17 CFR 240.19b–4 (1988).

[4] DBCC members normally serve 3 year terms.

[5] The NASD published the proposed amendment for comment in Notice to Members #88–48 (July 1988), and received three comment letters in response thereto. One commentator favored the proposed amendment because it would result in more efficient operation of the DBCC's. This commentator suggested that previous DBCC members should be considered first in selecting replacements.

Two commentators opposed the proposed amendment. One stated that elections are not too expensive and that the present system affords more members a chance to serve on a DBCC. The NASD's response to this comment was that any additional election is costly, both in terms of money and disruption of the DBCC's affairs. Furthermore, the proposed rule change would allow just as much opportunity, if not more, for different parties to serve on a DBCC. Since any appointment would be effective only until the next regularly scheduled election it is possible that two different persons could serve in the position—one by appointment and one by election.

Another negative comment was that vesting appointment power in sitting DBCC members would result in appointees who are obligated to their committees and not to their districts. The NASD, however, has not encountered this problem, in the past, interim appointees have maintained their independent judgment. The NASD states that the diverse composition of DBCCs makes it unlikely that a standard view will develop to which an appointee must adhere.

One commentator suggested that the Nominating Committee should select a candidate from the list of those originally considered for the position. The membership should then have a chance to file written objections and if many such objections are filed, an election should be held. The NASD, however, believes that this would be just as disruptive to DBCC business because additional elections would have to be held.

VOL 54 ISS 48 MR 14 1989 UMI

[Release No. 34-26819; File Nos. SR-NYSE-88-39 Amendments Nos. 1 and 2 and SR-NYSE-88-40 Amendment No. 1]

**Self-Regulatory Organizations; New York Stock Exchange, Inc.; Listing Standards for Constituent Securities of Common Stock and Meaning, Administration or Enforcement of Rule 19c-4 with Respect to Constituent Securities of Common Stock such as Unbundled Stock Units**

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on February 17, 1989 and March 7, 1989, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") amendments to the proposed rule changes as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the amendments to the proposed rule changes from interested persons.

**I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change**

On December 9, and December 20, 1988, the NYSE filed proposed rule changes with the Commission to establish listing criteria for new securities consisting of two or more constituent securities which, in the aggregate, are designed to replicate the economic characteristics of shares of a class of outstanding stock (NYSE-88-39) and to provide an exception from paragraph (c)(3) of Rule 19c-4 under the Act regarding the meaning, administration, or enforcement of Rule 19c-4 with respect to constituent securities of common stock, such as Unbundled Stock Units (NYSE-88-40). Amendment No. 1 to NYSE-88-39 revises the proposed listing standards set forth therein to include, among other things, a new minimum holder requirement for units and constituent securities in addition to new minimum total assets and net worth requirements for issuers seeking to list the securities on the NYSE. The amendment provides that in order for the units and their constituent securities to qualify for Exchange listing, there must be at least 250 holders of the units and the issuer must have total assets in excess of $100 million and a net worth that exceeds $18 million dollars.

The second amendment to the filing proposes a new rule, Rule 405A (Suitability Requirements for Transactions in Unbundled Stock Units), which will require NYSE members and member organizations to explain the characteristics of the units and the constituent securities to investors and to determine the suitability of any recommended transactions in the units and constituent securities. In particular, the proposed rule provides that when a NYSE member or member organization recommends a transaction in units or constituent securities to a customer, the member or member firm must make a determination as to the products suitability for such customer and must have a reasonable basis for believing that the customer has sufficient knowledge and experience in financial matters to be reasonably expected to be capable of evaluating the risks and the special characteristics of the recommended transaction and is financially able to bear the risks of any of the constituent securities.

Amendment No. 1 to NYSE-88-40 amends the text of the rule change set forth in the Original Filing, Item I *Text of the Proposed Rule Change.*[1]

In summary, the revised rule replaces the original third subparagraph with language that:

—Reduces the total amount of shares that may be subject to an exchange offer from 25% to 20%.

—Defines insider and control groups and provides further clarification on the determination of whether an exchange offer enhances the standing or voting control of such groups.

The revised rule also sets forth an additional consideration which addresses the collective action problems (discussed in the Release of the SEC that accompanied the adoption of the Rule) contained in the second paragraph of the Exchange's rule.

Finally, definitional language has either been modified or added to address the characteristics of the units and the terms used relating to "person," "officer," and "beneficial ownership" as defined in the Securities Exchange Act of 1934 and SEC rules.

The text of the amended rule with deletions shown in brackets and additions shown in italics is printed in full below:

(a) This proposed rule change consists of a stated policy or interpretation of Rule 19c-4 (the "Rule") under the Securities Exchange Act of 1934 (the "Act") and establishes or changes a standard or guideline with respect to the meaning, administration or enforcement of the Rule. This proposed rule change reads as follows:

Notwithstanding the provisions of Rule 19c-4(c)(3), the Exchange may determine that it will not proceed to delist the equity securities of a company because that company has issued or proposes to issue in an exchange offer for outstanding shares of its common stock units and their constituent securities which have no vote or a lesser vote than its outstanding common stock where the Exchange, after considering all the surrounding circumstances, including other action that may have been taken or is proposed to be taken by the company, determines that the exchange offer does not (or did not) give rise to the collective action problems discussed in the Release of the SEC that accompanied the adoption of Rule 19c-4, is not (or was not) coercive in nature and does not (or did not) have the effect of disenfranchising outstanding common stock holders.

For example, if the Exchange determines that the exchange offer,

- does not depend on a shareholder vote but is available for the individual choice of all outstanding common stock holders in fair and nondiscriminatory manner,
- is accompanied by a prospectus under the Securities Act of 1933 (or a comparable disclosure document) that describes the exchange offer and the securities being offered,
- is not an exchange offer which, either alone or in the aggregate with prior similar exchange offers, is for more than 20% of the outstanding common stock of the company as of the date of the filing of a registration statement (or the mailing of a comparable disclosure document) relating to the first such offer, and on the date immediately prior to the date the registration statement is filed (or the comparable disclosure document is mailed) relating to the exchange offer to be made:

(a) The company does not have knowledge, within the meaning of Item 403(a) of Regulation S-K of the SEC, that any person (except any person who is a bank as defined in Section 3(a)(6) of the Act, an investment adviser registered under Section 203 of the Investment Advisers Act of 1;940, [to the extent such bank or investment adviser holds such securities as a financial intermediary on behalf of customers and not for its own account] or an employee benefit plan, or pension fund which is subject to the provisions of the Employee Retirement Income Security Act of 1974), is the beneficial owner of more than five percent of any class of the company's voting equity securities, and (b) officers and directors of the company, and any employee benefit plan or pension fund of the company, as a group, do not beneficially own more than 10 percent of any class of the company's voting equity securities, unless, on the date shares of common stock are accepted for exchange in the exchange offer and after giving effect thereto, the percentage of the class of voting equity securities beneficiary owned (1) by any person included in clause (a) and (2) by the group included in clause (b), as the case may be, is not increased above the percentage beneficially owned by such person or group immediately prior to the filing of such registration statement (or the mailing of such disclosure statement), and

- does not adversely affect the voting rights of the holders of outstanding common stock that do not accept the exchange, then the exchange may conclude that the exchange offer is not inconsistent with Rule 19c-4.

In addition, the Exchange will also consider all relevant factors, including whether the proposed exchange offer is made in conjunction with, or as one of a series of, transactions the effect of which is to create or enhance the standing of an insider or control group.

The term 'units' as used herein shall mean unbundled stock units or securities with substantially similar characteristics issued by a corporation which consist of, and are separable into, two or more constituent securities, which, in the aggregate, [are designed to replicate the economic characteristics] *provide economic characteristics substantially similar to those* [2] typically associated with ownership of the corporation's common stock and have a term in excess of three years. The term 'constituent securities' as used herein shall mean the two or more constituent securities which together make up the unit.

For the purposes hereof, "person" shall have the meaning set forth in Section 3(a)(9) of the Act and shall include any group as that term is defined in Section 13(d)(3) of the Act; "officer" shall have the same meaning as that term is used in Items 201(b)(2)(iii) and 403(b) of Regulation S-K of the SEC; and "beneficial ownership" of voting equity securities of the company shall be determined in accordance with Rule 13d-3 and Item 403 of Regulation S-K of the SEC.

**II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Changes**

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule changes and discussed any comments it received on the proposed rule changes. The text of these statements may be examined at the place specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B) and (C) below, of the most significant aspects of such statements.

*(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Changes*

(1) Purpose

In recent months, some publicly traded corporations have announced plans to issue a new type of security consisting of two or more constituent securities which, in the aggregate, are designed to replicate the economic characteristics typically associated with ownership of shares of a class of outstanding stock of the corporation. Thus, a corporation might issue a unit consisting of, for example, several constituent securities, each of which is separable from the others and may trade by itself or in combination with one or all of the other constituent securities. This approach may permit investors to separate their securities holdings into distinct trading components representing discrete interests in the income and capital appreciation potential of the securities involved.

The securities may include, but are not limited to, any combination of the following:

- Common stock
- Preferred stock
- Warrants
- Debt securities

Proposed Rule 405A requires members and member organizations to afford an explanation of the unique characteristics of unbundled stock units to investors interested in trading the units and constituent securities. When recommending a transaction to a customer in the units or constituent securities, a member or member organization must make a determination as to its suitability, must have a reasonable basis for believing that the customer has the knowledge and experience in financial matters to be reasonably expected to be capable of evaluating the risks of the recommended transaction and must be financially able to bear the risks of the constituent securities.

In addition, the Exchange reviewed its proposed rule, as set forth in NYSE-88-40, within the context of the public commentary received by the Commission when such rule was published. There was concern expressed about what appeared to be the degree of discretion afforded the Exchange in determining what constituted an insider or control group as well as how it would be determined whether the standing of such insider or control group would be created or enhanced. As a result, the language of the proposed rule has been revised to specify percentage ownership levels that would determine insider and control groups impacted by the rule.

Further, it was felt that the language in the revised rule should eliminate any misunderstanding that, even though the company's proposed exchange offer met the rule's various provisions, the Exchange could still determine that such exchange offer was a violation of Rule 19c-4. This determination would be based upon whether the proposed offer is being made in conjunction with, or as one of a series of, transactions the effect of which is to create or enhance the standing of an insider or control group.

(2) Statutory Basis

The proposed rule change is consistent with section 6(b)(5) of the Act which, among other things, requires Exchange rules to be designed to promote just and equitable principles of trade, and to, in general, protect investors and the public interest.

*(B) Self-Regulatory Organization's Statement on Burden on Competiton*

The proposed rule change will not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Act.

*(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participant or Others*

The Exchange has neither solicited nor received written comments concerning its proposed rule change.

**III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action**

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

**IV. Solicitation of Comments**

Interested persons are invited to submit written data, views and arguments concerning the proposal. The commission notes that it has received approximately 100 comment letters in response to its previous solicitation of

[1] Minor technical language changes were made to Amendment No. 1 in a letter to Howard Kramer, Division of Market Regulation, SEC, from Vince W. Plaza, Listing & Compliance, NYSE, dated March 9, 1989.

[2] The NYSE also proposes to amend NYSE-88-39 to include identical language in both the proposed listing standard (Paragraph 703.16 of the NYSE Listed Company Manual) and new Rule 405A. *See* letter from James E. Buck, Senior Vice President and Secretary, NYSE, to Sharon Lawson, Branch Chief, Branch of Exchange Regulation, dated March 6, 1989.

VOL 54 ISS 48 MR 14 1989 UMI

comments on NYSE–88–40. The majority of these letters opposed the exchange of common stock for Unbundled Stock Units (USUs) on the basis that such exchange offer would violate Rule 19c–4 under the Act by disenfranchising existing shareholders, and argued that these exchanges should not be exempted from the prohibition in Rule 19c–4 on exchange offers of securities with unequal voting rights. Accordingly, the Commission is specifically soliciting comment on a variety of issues that the commentators have raised concerning the use of USUs as well as some other issues raised by the NYSE proposal.

First, the Commission solicits comment on whether the aforementioend amendments to NYSE–88–40 adequately address the Rule 19c–4 concerns by ensuring that an exchange offer of common stock for USUs without voting rights would have only a deminimus effect on the voting rights of existing shareholders. In particular, the Commission notes that the amendments would limit any exchange offer of common stock for units to 20% of the company's outstanding stock, rather than 25% as originally proposed, and limit the availability of such an exchange offer to those companies that do not have any person holding 5% or more, and that do not have officers, directors, and any employee benefit plan or pension fund, in the aggregate, holding 10% or more of the company's outstanding stock at the time of the filing of the registration statement of such exchange offer.[9] The commission requests comment on whether the 5% and 10% standards are appropriate to ensure that USUs can not be used to create an insider group or significantly enhance the standing of such group in a company. Commentators may also wish to address the administerability of the NYSE proposal.

Second, several commentators have thus far expressed concern that an exchange offer of USUs for common stock will have the same coercive effect on existing shareholders as the classic dual-class exchange offer of high vote stock for low vote stock with a dividend sweetener which presumptively violates Rule 19c–4.[4] Under this view, the "downside" protection provided by the bond component of the USU and the incremental dividend sweetener to coerce shareholders to exchange voting stock for no or low vote stock in an exchange offer.[5] Accordingly, the Commission solicits comment as to whether the offer to exchange voting common stock for nonvoting USUs would coerce shareholders into tendering their shares even when such action would be contrary to their collective interest. If so, do the amendments to NYSE–88–40 address the concern by increasing the likelihood that a shareholder who chooses not to tender will continue to have meaningful voting rights after the exchange.

The Commission also notes that several commentators have thus far suggested that the economic benefits provided by USUs can be achieved without depriving those shareholders who exchange common stock for USUs of the voting rights which attached to their common stock.[6] Accordingly, the Commission solicits comment on the feasibility and desirability of attaching voting rights in some form to a USU and/or its component parts and if so, what would be the appropriate allocation of votes to the component parts of the USU. In this connection, the Commission notes that attaching voting rights to the bond subunit of the USU may affect the expected tax consequences. Therefore, we solicit comments on whether any voting rights accompanying a USU should be limited to the Incremental Dividend Preferred ("IDP") share subunit, or the Equity Appreciation Certificate ("EAC") subunit and/or the combined Equity Subunit ("ESU"). In this regard, the Commission notes that the relative values of the IDP, EAC and debt portion of a USU may fluctuate substantially during their thirty year life. Commentators should specifically address, therefore, whether fixing voting rights of the IDP and EAC at the time of their issuance might, in effect, result in the creation of super voting shares at any time that the relative value of the IDP or the EAC decreases. To the extent commentators believe that a periodic recalculation of voting rights between the IDP and EAC would be preferable, those commentators are requested to address any burdens imposed on issuers resulting from the creation of shifting voting rights. Comment is also requested as to whether such a recalculation of voting rights in permissible under state corporate law or under the corporate charter provisions of NYSE issuers.[7]

Finally, the Commission is also soliciting specific comments on the amendments to NYSE–88–39, discussed above, that would add certain additional quantitative standards for listing USUs on the NYSE in addition to imposing specific suitability requirements for transactions in USUs. First, we solicit comment on whether the 250 holder requirement and the requirement that issuers of USU's have total assets in excess of $100 million and a net worth in excess of $18 million are adequate to ensure that USU's and the constituent securities traded on the NYSE are of sufficient size and distribution to sustain a fair and orderly market for the product. In particular, we solicit comment on any liquidity concerns raised or answered by these standards and whether a minimum of 250 holders will ensure that USUs and their constituent securities are adequately diversified and not held by too few investors or institutional groups. Second, we solicit comment on the suitability requirements being proposed in Amendment No. 2 for USUs and their constituent securities. In particular, we solicit comment on whether the proposed suitability standards in proposed Rule 405A adequately ensure that investors will be informed about the risks and uncertainties involving trading of USUs and their component parts and, if not, what other standards should be imposed.

Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by April 14, 1989.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Date: March 9, 1989.

**Jonathan G. Katz,**

*Secretary.*

[FR Doc. 89–5890 Filed 3–13–89; 8:45 am]

BILLING CODE 8010–01–M

[9] We note that, under the proposed amendments, a company with persons or groups exceeding either the 5% or 10% standard could still issue USUs, so long as the percentage of beneficial ownership for those persons and groups exceeding the standard remains the same before and after the issuance of USUs.

[4] *See* Securities Exchange Act Release No. 34–25891 (July 7, 1988), 53 FR 25878 (July 12, 1988) ("Adopting Release") at 25881.

[5] The bond subunits provide fixed interest payments and payment of a principal value in 30 years, and the preferred subunits provide a fixed liquidation value, so that each unit as a whole provides a minimum return regardless of the market value or dividend pay-out of the issuer over the 30 years from the time of the exchange offer.

[6] *See e.g.* Letters from Bernard S. Black, Associate Professor of Law, Columbia University, to Jonathan G. Katz, Secretary, SEC, dated February 2, 1989; California Public Employees Retirement to David S. Ruder, Chairman, SEC, dated February 3, 1989; and Robert A.G. Monks, President, Institutional Shareholder Services, Inc. to Jonathan G. Katz, Secretary, SEC, dated February 3, 1989.

[7] For example, Shearson Lehman Hutton in a comment letter on SR–NYSE–40 states that fluctuating voting rights for the IDP could create that fluctuating voting rights for the IDP could create significant problems for one of the four USU issuers due to restrictions in its corporate charter. *See*, letter from Ronald E. Gallatin, Managing Director, Shearson Lehman Hutton, to Securities and Exchange Commission, dated February 10, 1989.

**[Release No. 34–26805; File No. SR–NYSE–87–31]**

## Self-Regulatory Organizations; New York Stock Exchange, Inc.; Order Approving Proposed Rule Change Relating to Reports to Control Persons

### I. Introduction

On September 14, 1987, The New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Commission, pursuant to Section 19(b) of the Securities Exchange Act of 1934 ("Act") and Rule 19b–4 thereunder,[1] a proposed rule change that would require that a copy of a member organization's compliance report be furnished annually to the member firm's control persons or, if the member firm has no control persons, to the audit committee of its Board of Directors.[2] The compliance report is an annual report member firms are required to prepare that reviews its supervision and compliance efforts during the preceding year. The requirement that members produce a compliance report was part of a package of NYSE rule changes previously approved that are intended to supplement existing internal compliance procedures of members and member organizations by imposing additional trade review, inquiry and reporting requirements.[3]

### II. Description of Proposed Rule

NYSE Rule 342.30 requires that members and member organizations must prepare a report on supervisory and compliance efforts undertaken during the previous year and to submit the report to its chief executive officer or managing partner by April 1, of each year.[4] Proposed Rule 354(a) would require that by April 1 of each year, each member organization must submit a copy of the annual compliance report to its one or more control persons as defined under paragraph (b) of the proposed rule.[5] If the member or member organization has no such control persons, it is required to submit a copy of the report to the audit committee of its Board of Directors or its equivalent committee or group. Where the member organization's control person is an organization ("controlling organization") the proposed rule requires the member organization to submit the report to the general counsel of the controlling organization and to the audit committee of the controlling organization's Board of Directors or its equivalent committee or group.

Proposed Rule 354(b) states that for the purpose of paragraph (a), the term "control person" means a person who controls the member organization within the meaning of NYSE Rule 2[6] otherwise than solely by virtue of being a director, general partner or principal executive officer (or person occupying a similar status or performing similar functions) of the member organization.

### III. Comments on the Proposed Rule Change

The Commission received one comment letter on the proposal. The Securities Industry Association ("SIA") submitted a letter critical of the NYSE proposal and urged the Commission not to approve the proposed rule. The NYSE submitted a letter responding to the SIA's criticisms of its proposal.[7] These comments are summarized below.[8]

In its letter the SIA made five principle points in opposition to the NYSE proposal. First, the SIA argues that the proposed NYSE rule will not accomplish any proper purpose. In this regard the SIA states that the proposed rule would not contribute to the ability of either member organizations or the Exchange to prevent or detect securities law or Exchange rule violations.

Second, the SIA contends that the proposed rule constitutes an

[1] 15 U.S.C. 78s(b) and 17 CFR 240.19b–4 (1988).

[2] The proposed rule change was noticed in Securities Exchange Act Release No. 25402, February 28, 1988, 53 FR 7272. The Commission received one comment letter on the proposal and a response by the NYSE to that comment. *See* discussion at p. 3, *infra*.

[3] The proposed NYSE rule change (File No. SR–NYSE–87–10) was approved by the Commission in Securities Exchange Act Release No. 25763, May 27, 1988, 53 FR 20925.

[4] The report must include a tabulation of customer complaints and internal investigations, identification and analysis of significant compliance issues, and plans for future systems or procedures to prevent and detect future compliance concerns. Further, the report must include a discussion of the preceding year's compliance efforts in the areas of antifraud, investment banking, sales practices, books and records, finance, and operations and supervision. *Id.*

[5] The Commission notes that the NYSE definition of control person is applicable solely to the Exchange's rule and may differ from the concept of control person under the Act.

[6] NYSE Rule 2 defines the term "control" as meaning the power to direct or cause the direction of the management or policies of a person whether through ownership of securities, by contract, or otherwise. A person is presumed, under the definition in Rule 2, to control another person if such person, directly or indirectly: (i) has the right to vote 25% or more of the voting securities; (ii) is entitled to receive 25% or more of the net profits; (iii) or is a director, general partner or principal executive officer (or person occupying a similar status or performing similar functions) of the other person. NYSE Rule 2 provides that any person who does not own voting securities, participate in profits, or function as a director, general partner or principal executive officer of another person shall be presumed not to control such other person. Under NYSE Rule 2 any presumption may be rebutted by evidence, but shall continue until a determination to the contrary has been made by the Exchange. As noted in note 5 *supra*, the NYSE definition of control person is applicable solely to the Exchange's rule and may differ from the concept of control person under the Act.

[7] *See* letters from Dennis H. Greenwald, Chairman, Federal Regulation Committee, SIA, to Jonathan G. Katz, Secretary, Commission, dated May 25, 1988, and from Edward A. Kwalwasser, Senior Vice President, NYSE, to Brandon Becker, Associate Director, Division of Market Regulation, dated August 17, 1988 ("NYSE August 17 letter").

[8] Prior to filing the proposed rule with the Commission, the NYSE received two other comment letters, from Prudential-Bache Securities, Inc. ("Prudential-Bache") and Dean Witter Reynolds, Inc. ("Dean Witter"), that were critical of the proposal. These comments, and the Exchange's response to them, were discussed in the notice of the proposed rule change published in the **Federal Register**. *See* note 2, *supra*.

In brief, Prudential-Bache argued that the proposal would create two classes of member organizations (those with and those without control persons) and that the proposal is discriminatory to those member firms with control persons. (*See* discussion *infra*.) In addition, Prudential-Bache contended that the term "control person," as defined under the proposed rule, would include passive investors without regard to the size of their holdings. Therefore, they argued, submission of reports to control persons may create an obligation not heretofore in existence. Dean Witter stated that it fully agrees with Prudential-Bache's comments. In addition, Dean Witter stated that it was concerned that the proposed rule would negate a control persons' ability to use the good faith exemption from liability under section 20(a) of the Act. *See* discussion *infra*.) *See* letters from Loren Schechter, Senior Vice President, Prudential-Bache, to David Marcus, Executive Vice President, NYSE, dated May 26, 1987, and from Dennis H. Greenwald, Executive Vice President, Dean Witter, to David Marcus, Executive Vice President, NYSE, dated June 3, 1987.

The NYSE denied that the proposal discriminates against member firms with control persons and stated that it does not believe that receipt of the required compliance reports would negate a control person's ability to use the good faith defense under section 20(a) of the Act.

VOL 54 ISS 48 MR 14 1989 UMI

unwarranted extension of federal regulation to shareholders of a member firm, presumably by placing a supervisory burden on shareholders classified as control persons or a controlling organization, and thereby interferes with matters relating to corporate governance properly left to state law.

Third, the SIA argues that the proposed NYSE rule is unfair and discriminatory. The SIA states that the proposal creates, in effect, two classes of member organizations by requiring only those firms with large stockholders to submit their annual compliance report to persons outside their own organization.

Fourth, the SIA contends that the proposed requirement that member firms submit their annual compliance report to control persons may suggest that a control person assumes the burden to act to correct problems described in the report. The SIA states that such a suggestion makes a basic change in the role of control persons and argues that such obligations should not be created through adoption of a proposed rule change.

Fifth, the SIA believes the proposed rule would make control persons and controlling organizations of member firm broker-dealers more vulnerable to civil actions and deprive them of the protections of section 20(a) of the Act.[9] The SIA states that by tying a control person or a controlling organization into a member broker-dealer's supervisory process, the proposed NYSE rule would make control persons or controlling organizations more vulnerable to unwarranted lawsuits. Moreover, the SIA states that release of a member firm's annual compliance report to its controlling organization's audit committee would increase the possibility that the information in the report would lose its privilege and thus be subject to discovery in a civil action.

In its August 17 letter, the NYSE responded to the SIA's concerns and objections to the proposed rule change. First, the Exchange denies that the proposal would not accomplish a proper purpose. The NYSE states that the proposed rule would require control persons or a controlling organization to be notified of the member firm's supervision and compliance efforts and of any significant problems that may have developed and the steps planned to alleviate those problems. The NYSE believes that by providing the controlling organization with the member firm's annual compliance report, the probability that prompt attention will be given by the member firm to resolving its significant compliance problems will be enhanced.

Second, the Exchange disputes the SIA's contention that the proposed rule represents an unwarranted extension of federal regulation to shareholders of a member firm and interferes with matters relating to corporate governance under state law. The NYSE states that the proposed rule merely requires that certain information be made available to control persons. The Exchange argues that this information is relevant to the control person's investment and enables the control person, if it sees fit, to respond as it deems appropriate to the information provided in the report. The Exchange compares the requirement that the annual compliance report be submitted to control persons or a controlling organization to requirements that a subsidiary periodically report on its financial condition and operations to its parent company. The NYSE believes that the subsidiary's ability to operate in a fashion that permits it to comply with the rules of the Exchange should be of significant interest and importance to the parent.

Third, the NYSE disagrees with the SIA's contention that the proposed rule change creates two classes of member organizations and that it is unfair and discriminatory. The Exchange states that the intention of the proposed rule is to place the annual compliance report into the hands of persons who are in a position to exert influence on the member to take necessary corrective action to remedy problems discussed in the report. The NYSE argues that the report should be sent to these persons irrespective of whether such persons exist outside the member organization, and that there is nothing unfair or discriminatory in this requirement.

Fourth, the NYSE disputes the SIA's contention that the proposed rule places a burden on control persons to correct problems that may be described in the report. The Exchange states that the proposed rule simply assures that control persons will be supplied with the report. The control person remains free to take no steps whatsoever or any steps it may deem appropriate with respect to the contents of the report. The Exchange presumes, however, that the control persons will be as concerned with the member firm's compliance with NYSE rules as they will be about other aspects of the member's firm's operations.

Fifth, the NYSE asserts that the SIA's claim that the proposal will make control persons or controlling organizations more vulnerable to lawsuits is highly speculative. The Exchange also disagrees with the SIA's assertion that receipt of this report by control persons would deprive them of the good faith defense under section 20(a) of the Act of that release of the report to control persons would increase the chance that the report would lose any privilege it may have from being subject to discovery in the course of civil litigation.

The Exchange argues that the proposed rule creates no obligation or responsibility on the part of the control person, but simply provides them with information the NYSE believes they should receive. Moreover, the Exchange contends that the requirement might enable control persons to document that they acted in good faith upon receipt of the report, thus providing insulation from civil liability. For example, if a control person acted to increase their member firm's supervision and compliance areas after receipt of such a report, those actions could demonstrate a control person's good faith efforts. In this way, the NYSE asserts that the proposed rule change could enhance a control person's ability to use the good faith defense under section 20(a) of the Act.

With regard to the possible loss of privilege from discovery of the annual compliance report, the NYSE states that it is unclear that the report would be entitled to any privilege from discovery in civil litigation even if it remained within the member firm. Moreover, the Exchange notes that the report does not need to be prepared in a way that should increase the exposure of the control persons or the member firm to civil liability. The NYSE stated that identification and analysis of compliance problems required in the report only needs to be done in a generic manner and that specific identification of the incident or the parties involved is not necessary unless warranted by the facts.

[9] The concept of controlling persons for purposes of the Act is reflected in section 20(a). Section 20(a) of the Act provides in pertinent part:

Every person who, directly or indirectly, controls any person liable under any provision of this title or of any rule or regulation thereunder shall also be liable jointly and severally with and to the same extent as such controlled person to any person to whom such controlled person is liable, unless the controlling person acted in good faith and did not directly or indirectly induce the act or acts constituting the violation or cause of action.

With regard to civil penalties which the Commission can seek to impose on control persons under the Act, we note that the recently adopted "Insider Trading and Securities Fraud Enforcement Act of 1988" ("ITSFEA"), Pub. L. No. 100-704, 102 Stat. 4677 (1988) added section 21A to the Act which provides the Commission the authority to seek civil penalties from persons who have committed insider trading violations under the Act and their controlling persons (as that term has been applied under the Act). ITSFEA specifically states that section 20(a) does not apply to controlling person liability under section 21A(a). Instead, the section 20(a) "good faith" defenses are replaced by the standard in the new section 21A(b)(1) which provides that no control person shall be subject to a civil penalty under this section unless the Commission establishes that:

(A) Such controlling person knew or recklessly disregarded the fact that such controlled person was likely to engage in the act or acts constituting the violation and failed to take appropriate steps to prevent such act or acts before they occurred; or

(B) Such controlling person knowingly or recklessly failed to establish, maintain, or enforce any policy or procedure required under section 15(f) of [the Act] or section 204A of the Investment Advisers Act of 1940 and such failure substantially contributed to or permitted the occurrence of the act or acts constituting the violation.

## IV. Discussion

The Commission has reviewed closely the proposed NYSE rule change, the comments received by the Commission and the Exchange in opposition to the proposal, and the NYSE's response to those comments. On the basis of this review, the Commission has concluded that the proposed NYSE rule change is consistent with the requirements of the Act and, accordingly, should be approved.

In particular, the Commission believes that the proposed rule is consistent with sections 6(b)(1) and 19(g)(1)(A) of the Act, which require that national securities exchanges must ensure member and member organization compliance with the Act, its rules, and the rules of the exchange. The requirement that a copy of the member firm's annual compliance report be provided to control persons, its controlling organization, or to the audit committee on the member firm's Board of Governors is a proper means to promote the goals of the compliance procedures imposed by SR-NYSE-87-10. The Commission, when approving SR-NYSE-87-10, stated that the annual report requirement in NYSE Rule 342.30 will improve significantly the compliance efforts of member organizations by ensuring that the chief executive officer or managing partner of the member firm focuses sufficient attention on supervisory and compliance obligations. The Commission believes that the requirement that the annual compliance report be provided to a member's control persons or controlling organization is an additional method of providing these persons with the information necessary to evaluate the compliance procedures of the member. While the proposed rule does not, in and of itself, obligate control persons to take any action upon receipt of the report, it does ensure that they will be notified of the supervisory and compliance situation of their member firm.

The Commission recognizes that a control person's obligation to act upon the information contained in its member firm's annual compliance report must be viewed in light of provisions governing control person liability under the Act. As noted previously, control persons are subject to liability under section 20(a) unless they acted in good faith and did not directly or indirectly induce the act or acts constituting the violation or cause of action. In addition, under the new Section 21A the Commission can seek to impose civil penalties on control persons for insider trading violations committed by their controlled person or organization: (1) Where the control person knew or recklessly disregarded the fact that the controlled person was likely to engage in such acts and failed to take steps to prevent such actions; or (2) where the control person knowingly or recklessly failed to establish, maintain, or enforce any policy or procedure required under Section 19(f) of the Act or Section 204A of the Investment Advisers Act of 1940 and such failure substantially contributed to or permitted the occurrence of the act or acts constituting the violation.[10] In view of these standards for control person liability, the Commission believes it is likely that control persons will be and should be as concerned with the member firm's compliance with the requirements of the Act, its rules, and with NYSE rules, as they would be about other aspects of the member firm's operations and that, as a consequence, the probability that prompt attention will be given by the member firm to resolving significant compliance issues will be enhanced. For these reasons, the Commission also believes that the proposed rule change is consistent with section 6(b)(5) of the Act which requires that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and to protect investors and the public interest.

Concerning the specific objections to the proposed rule change raised in comment letters received by the Commission and the NYSE, for the reasons set forth below the Commission does not believe these objections warrant instituting proceedings to consider disapproving the proposed rule change. The Commission believes that the intent of the proposed rule, to increase the probability that prompt attention will be provided by member firms to resolving significant compliance issues by providing copies of the firm's annual compliance report to control persons, is plainly a proper purpose under sections 6(b)(1) and 19(g)(1)(A) of the Act.

The proposed rule also does not represent an unwarranted extension of federal regulation interfering with corporate governance areas under state law. Sections 6(b)(1) and 19(g)(1)(A) require that the rules of a national securities exchange must ensure member and member organization compliance with the Act, its rules, and the rules of the exchange. As stated above, the intention of the proposed rule is to increase the probability that NYSE member firms will monitor their compliance procedures. The rule change does not alter, restrict, or impose conditions on the corporate structure of member firms or their control persons. To comply with the rule change, an NYSE member would not have to make any changes to its corporate structure. In addition, the proposed rules does not impose any new obligation on control persons to respond to the report.[11]

Furthermore, the Commission disagrees that the proposed rule is unfair and discriminatory and that it creates two classes of member firms. The proposed rule merely requires that member firms submit copies of their annual compliance report to control persons or a controlling organization where such persons or organization exists. The Commission finds nothing unfair or discriminatory in that requirement. Moreover, the fact that a firm's control person might be a large, outside shareholder does not place any special requirement or burden on that firm. The NYSE believes it has set the share ownership level for control high enough—25%—to capture shareholders with such a substantial stake in the company that they would be in a position to exert influence or direction over the member's operations.[12]

The Commission also can find no basis to sustain commentators' claims that the proposed rule will deprive them of the good faith defense under section 20(a) of the Act or increase the potential that the report would be subject to discovery. A control person who receives a report pursuant to the rule may still assert the defense under section 20(a), where applicable, in a subsequent civil action and attempt to meet the burden of showing good faith

[10] *See* discussion *infra*.

[11] *See* discussion *infra*.

[12] NYSE Rule 2, which defines the term "control" provides that any presumption of control under the rule may be rebutted by evidence, but shall continue until a determination to the contrary has been made by the Exchange. *See* note 5, *supra*.

VOL 54 ISS 48 MR 14 1989 UMI

and non-inducement of the acts constituting the violation or cause of action. It should be recognized, in this regard, that section 20(a) of the Act does not, and was not intended to, provide a blanket exemption from control persons from civil liability. Rather, on its face, it extends joint and several liability to control persons for the violations of persons that they directly or indirectly control, except where the control person acted in good faith and did not directly or indirectly induce the violation. In the normal case, the mere receipt of a compliance document identifying minor compliance problems and the actions taken to address any compliance weaknesses would in no way eliminate the controlling person's good faith defense. In the extraordinary case, where the report indicates serious problems and an absence of any effective response by the firm, it would appear consistent with the purposes underlying the statute to expect the control person to respond.[15]

Similarly, under the newly adopted section 21A of the Act[16] the Commission may seek to impose civil penalties on control persons based on insider trading violations by their controlled person or organization where the control person knew or recklessly disregarded the fact that the controlled person was likely to engage in the act or acts constituting the violation and failed to take appropriate steps to prevent such acts, or where the control person knowingly or recklessly failed to establish, maintain, or enforce any policy or procedure required under section 15(f) of the Act, or section 204A of the Investment Advisors Act of 1940, and that failure substantially contributed to or permitted the violation.

The proposed NYSE rule change requiring submission of an annual compliance report to a control person (as defined by the NYSE) will not alter a control person's obligations under the Act. The Commission recognizes that the report could be a factor in determining a control person's civil liability under section 20(a), or the imposition of civil penalties by the Commission under section 21A, as a result of violations of the controlled person. In the Commission's view, however, any civil liability for control persons which arises under section 20(a) as a result of the determination that a control person's actions were not in good faith and that they directly or indirectly induced the acts constituting the violation is consistent with the purposes of the Act. Similarly, in any case where the Commission seeks to impose civil penalties on a control person under section 21A based on a determination that the control person knew or recklessly disregarded information that their controlled person was likely to take actions constituting a violation and failed to take steps to prevent them, or where the control person knowingly or recklessly failed to establish, maintain, or enforce procedures and such failure substantially contributed to or permitted the violation, based on the control person's knowledge of information contained in the report, such liability is appropriate and fully consistent with the objectives of ITSFEA to increase management and supervisory efforts to prevent insider trading.

Finally, the Commission believes that submission of the member firm's annual compliance report to control persons would have no impact on the question of whether a member firm's annual compliance report would be eligible for privilege from discovery. Although the SIA comment letter was not specific on this point, we presume that the SIA was referring to discovery conducted under Rule 26 of the Federal Rules of Civil Procedure and to the potential application of the attorney "work product" privilege from such discovery under the Rule. The work product privilege from discovery applies to material generated for use in litigation.[18] The work product privilege does not, however, apply to reports prepared in the regular course of business.[19] Under NYSE Rule 342.30 NYSE member firms are required to prepare an annual compliance report and provide it to their firm's chief executive officer. In addition, members firms are required, upon the Exchange's request, to make the report available to the NYSE.[17] In view of this, the Commission concurs with the NYSE that it is not at all clear that such a report would be eligible for work product privilege from discovery under any circumstances. The Commission does not believe that the additional requirement that the report also be distributed to a member firm's control persons will affect its eligibility for the work product privilege.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change be approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: March 7, 1989.

BILLING CODE 8010-01-M

[15] Vicarious liability may also be imposed on control persons under respondeat superior, to which the "good faith" defense of Section 20(a) would not apply. The Second, Fourth, Fifth Sixth and Seventh Circuits have held that control person provisions under the Act and the Securities Act of 1933 are not the exclusive means by which vicarious liability can be imposed and that liability may also be imposed under agency principles—respondeat superior. *See, e.g., Paul F. Newton & Company* v. *Texas Commerce Bank*, 630 F.2d 1111 (5th Cir. 1980); *Marbury Management, Inc.* v. *Kohn*, 629 F.2d, 705 (2nd Cir. 1980); *Holloway* v. *Howerdd*, 536 F.2d 690 (6th Cir. 1976); *Fey* v. *Walston & Co.*, 493 F.2d 1036 (7th Cir. 1974); *Johns Hopkins University* v. *Hutton*, 422 F.2d 1124 (4th Cir. 1970), *cert. denied*, 416 U.S. 910 (1974). The Third and Ninth Circuits have held that a control person's vicarious liability under the Act may only be determined under Section 20(a) and that agency principles—respondeat superior—may not be used. See, e.g., *Roches Brothers* v. *Rhoads*, 537 F.2d 660 (3rd Cir. 1976); *Zweig* v. *Hearst Corp.*, 521 F.2d 1129 (9th Cir.), *cert. denied*, 423 U.S. 1025 (1975).

[Release No. 34-26997; File No. SR-OCC-89-1]

## Self-Regulatory Organization; The Options Clearing Corporation; Notice of Proposed Rulemaking Regarding Cross-Margining

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on January 23, 1989, The Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

### I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

SR–OCC–89–1 proposes Rules pursuant to which OCC would implement a cross-margining program with the Chicago Mercantile Exchange ("CME"). The program would initially be available only for positions in certain OCC-cleared stock index options and CME-cleared stock index futures and options on stock index futures. In addition, OCC–CME cross-margining would initially be available only for positions that qualify as "proprietary" under the rules of the Commodity Futures Trading Commission ("CFTC") and as "non-customer" under the hypothecation rules of the Commission. However, the proposed rule change has been structured to facilitate expansion of the cross-margining program to other commodity clearing organizations, other types of options, futures and commodity options products, and positions other than those that are "proprietary" within the meaning of the CFTC's rules and "non-customer" within the meaning of the Commission's hypothecation rules.

### II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

*A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change*

The purpose of the proposed rule change is to permit OCC to implement a cross-margining program with the CME. OCC and CME have entered into a Cross-Margining Agreement (the "Cross-Margining Agreement" or "Agreement").

The Agreement provides that a firm that is a clearing member of both OCC and CME (a "Joint Clearing Member") would be eligible to elect cross-margining, as would a pair of affiliated firms of which one is a clearing member of OCC and the other is a clearing member of CME (a "pair of Affiliated Clearing Members").

Section 2 of the Agreement provides that Joint Clearing Members and pairs of Affiliated Clearing Members electing cross-margining shall establish cross-margining accounts ("X–M Accounts") at the clearing organizations. Section 2 also provides that each Joint Clearing Member and each pair of Affiliated Clearing Members shall designate either OCC or CME as its "Designated Clearing Organization." The Designated Clearing Organization would provide the Joint Clearing Member or pair of Affiliated Clearing Members with a daily Margin and Settlement Report (described below) and perform settlement functions on behalf of itself and the other clearing organization in connection with the X–M Accounts.

Section 3 of the Agreement provides that a Joint Clearing Member or pair of Affiliated Clearing Members may designate its or their X–M Accounts as "X–M Pledge Accounts" by entering into an "X–M Pledge Account Agreement." Pursuant to an X–M Pledge Account Agreement, the Joint Clearing Member or pair of Affiliated Clearing Members would grant a participating bank (a "Secured Party") a security interest in the positions held in the pair of X–M Pledge Accounts, and all proceeds thereof, as security for loans extended by the Secured Party to the Clearing Member or Clearing Members. The security interest would permit the Joint Clearing Member or pair of Affiliated Clearing Members to borrow against the value of the options positions in the X–M Pledge Accounts to finance payment of variation margin with respect to the futures positions in the X–M Pledge Accounts. (If the futures positions in the account generated variation margin, that variation margin would be used to pay down the outstanding balance of the loans.) The security interest of the Secured Party would be subordinate to that of OCC and CME, but only to the extent of obligations to OCC and CME arising from the X–M Accounts. Thus, if the Joint Clearing Members or pair of Affiliated Clearing Members defaulted on an obligation and the X–M Accounts were liquidated, OCC and CME would first be made whole in respect of all obligations to them arising from the X–M Accounts, but the Secured Party would then be entitled to the remaining proceeds of the positions in the X–M Accounts, up to the amount of the secured obligation.

Section 5 of the Agreement describes the determination by OCC and CME of the initial margin requirement for X–M Accounts. (The term "initial margin" as used in the Agreement refers to options-style margin, held by the clearing organizations, and adjusted on at least a daily basis.) Each clearing organization would utilize its own margin system to calculate a margin amount that it would require on the combined positions in the X–M Accounts. The average of the two amounts would be the "Base Margin Requirement." Either clearing organization could also elect to use as the Base Margin Requirement the margin amount determined by the other clearing organization's system. (OCC and CME have determined that their respective margin systems generate very similar, but not always identical, margin requirements for various combinations of positions.) A "Super Margin" amount would be determined by reference to Exhibit F to the Agreement, and the total initial margin requirement would be determined by adding the Super Margin amount to the Base Margin Requirement.

The Super Margin amount would range between zero and one hundred percent of the Base Margin Requirement, depending upon the size of the Base Margin Requirement—the larger the Base Margin Requirement, the larger the percentage. Clearing Members are accordingly discouraged from maintaining positions in X–M Accounts that would generate large margin requirements. Since large margin requirements are created by unhedged postions, Clearing Members are thereby discouraged from maintaining unhedged positions in the X–M Accounts.

Section 5 also gives each clearing organization the unilateral authority to require additional margin with respect to the obligations in the X–M Accounts and to cause intra-day margin calls to be made.

Section 6 of the Agreement provides that initial margin deposits may be in the form of cash, United States Treasury securities, letters of credit, common stock, or a combination of the foregoing. The Section describes the requirements for, and the methods for holding, each form of margin. The Section also provides that initial margin in the form of cash may be invested overnight by the Designated Clearing Organization, subject to arrangements satisfactory to OCC and CME.

Section 7 of the Agreement describes the daily settlement procedures in respect of X–M Accounts. CME and OCC would exchange reports on positions and settlements early in the morning on each business day. The margin requirement on each pair of X–M Accounts would then be determined as described above. The Designated Clearing Organization for each Joint Clearing Member or pair of Affiliated Clearing Members would then issue a "Margin and Settlement Report" showing the margin requirement and netted settlement obligation in respect of the pair of X–M Accounts. All settlement activity with the Joint Clearing Member or pair of Affiliated Clearing Members would be conducted through a "Joint Settlement Account"—a bank account in the joint names of OCC and CME—and any transfers from that account would require the approval of both CME and OCC.

Section 8 of the Agreement describes close-out of X–M Accounts. The Section provides that positions in X–M Accounts shall be subject to liquidation upon the suspension of the Joint Clearing Member

VOL 54 ISS 48 MR 14 1989 UMI

or one of the pair of Affiliated Clearing Members by either OCC or CME. The Section provides that OCC and CME may agree, consistent with their respective rules, to delay liquidation of some or all of the positions, and also provides that OCC and CME will coordinate liquidation to try to assure that both legs of any hedge position are closed out simultaneously.

Section 8 also provides that, if the funds in the X–M Accounts are insufficient to close out the positions, OCC and CME will share the shortfall equally, regardless of whether the shortfall was in the X–M Account at CME or in the X–M Account at OCC. The Agreement requires that OCC and CME provide in their respective rules that their respective Clearing Funds may be used for this purpose.

Section 8 provides further that, if there are funds remaining after the X–M Accounts are closed out, OCC and CME will each be entitled to apply half of the surplus against defaults in other obligations of the Joint Clearing Member or pair of Affiliated Clearing Members. Each clearing organization, if it does not need all of its half of such surplus, is required to make the excess of such surplus available to the other clearing organization. Any funds remaining after all obligations to both clearing organizations have been satisfied are to be paid to the Clearing Member or its representative.

Section 9 of the Agreement imposes confidentiality obligations on each clearing organization with respect to information obtained by it in connection with the Agreement or the transactions or activities contemplated by the Agreement.

Section 10 of the Agreement provides that OCC and CME will indemnify each other against claims incurred as the result of any action or failure to act by the indemnitor in connection with the Agreement or the procedures contemplated by the Agreement, if the action or failure to act constitutes a violation of the Agreement or any obligation undertaken in connection with the Agreement or such procedures, any rule of the indemnitor, or any law or governmental regulation applicable to the indemnitor. The Section provides in particular for indemnification against claims incurred as the result of any unauthorized investment of cash margin deposits or any defalcation or theft of margin funds by an employee.

Section 11 of the Agreement sets out warranties and representations of OCC and CME to each other with respect to corporate good standing, corporate authority to enter into the Agreement, compliance with corporate agreements, and the securing of all necessary regulatory approvals.

Section 12 of the Agreement provides that the Agreement may be terminated without cause upon thirty days' notice by either OCC or CME after the Agreement has been in effect for at least a year. The Section also provides that, following a default by one of the parties which is not promptly cured after written notice thereof, the Agreement may be terminated by the nondefaulting party upon five business days' notice. In either case, termination of the Agreement would end the cross-margining arrangement, and positions in each of the former X–M Accounts would thereafter be subject to margin requirements without regard to positions in the other of the former X–M Accounts.

OCC proposes to make changes in its By-Laws and Rules to implement the Cross-Margining Agreement. A new Section in Article VI of OCC's By-Laws would set out OCC's authority to enter into the Cross-Margining Agreement with CME, and would provide that Joint Clearing Members and pairs of Affiliated Clearing Members electing cross-margining must enter into account agreements as described above. Non-substantive changes would be made to Article VI, Section 23 of OCC's By-Laws, which describes OCC's existing cross-margining program with The Intermarket Clearing Corporation, so that the Section would parallel the new cross-margining Section.

Changes are proposed to the By-Laws governing use of OCC's Clearing Fund to make clear, in conformance with Section 8 of the Cross-Margining Agreement, that OCC would have recourse to its Clearing Fund in order to pay an obligation to CME arising under the Cross-Margining Agreement.

As noted above, the Cross-Margining Agreement provides that OCC and CME would each use its own margin system to calculate margin for X–M Accounts. Changes are therefore proposed in OCC's margin rule so that the rule applies to futures as well as options.

A new Chapter VII, containing the Rules applicable to cross-margining under the OCC–CME program, would be added to OCC's Rules. Rule 701 would describe the X–M Accounts and Account Agreements described above and require each Joint Clearing Member or pair of Affiliated Clearing Members to establish a separate bank account for cross-margining settlement. Rule 702 would provide for designation by each Joint Clearing Member or pair of Affiliated Clearing Members of its or their Designated Clearing Organization. Rule 703 would describe the pledge program and the Pledge Agreements described above. Rule 704 would state that the amount of margin required by OCC and CME shall be determined in accordance with the Cross-Margining Agreement, and would set out OCC's authority to require intra-day margin. Rule 705 would describe the acceptable forms of margin. Rule 706 would describe the daily settlement procedures. Rule 707, together with conforming changes in OCC's Rules relating to suspension of Clearing Members, would implement the provisions of the Cross-Margining Agreement with respect to close-out.

OCC believes that the proposed rule change is consistent with the purposes and requirements of Section 17A of the Securities Exchange Act of 1934, as amended because it would implement a cross-margining system which would enhance the safety of the clearing system while providing lower clearing margin costs to Clearing Members.

*B. Self-Regulatory Organization's Statement on Burden on Competition*

OCC does not believe that the proposed rule change would impose any burden on competition.

*C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others*

Written comments were not and are not intended to be solicited by OCC with respect to the proposed rule change and none have been received by OCC.

**III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action**

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding, or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or,

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

**IV. Solicitation of Comments**

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to SR–OCC–89–01 and should be submitted by April 4, 1989.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: March 7, 1989.

**[Release No. 34–26898; File No. SR–PSE–87–20]**

**Self-Regulatory Organizations; Pacific Stock Exchange; Order Approving Proposed Rule Change**

On June 22, 1987, the Pacific Stock Exchange ("PSE") filed with the Commission a proposed rule change (SR–PSE–87–20) under section 19(b) of the Securities Exchange Act of 1934 ("Act"). The proposal would amend certain provisions in PSE's Constitution to reflect the termination of services provided by the Pacific Clearing Corporation ("PCC") and the Pacific Securities Depository Trust Company ("PSDTC"). The Commission published notice of the proposal in the **Federal Register** on January 18, 1989.[1] No comments were received. For reasons discussed below, the Commission is approving the proposal.

Article III, section 2(b) of PSE's Constitution currently provides, among other things, that any officer or director of a member firm of PCC or PSDTC, as well as any officer, director, or general partner of affiliates of such firms, may become a member of PSE's Board of Governors. The proposal removes references to PCC and PSDTC and provides that any officer or director of a member firm of a subsidiary of PSE performing depository or clearing functions or any officer or director of affiliates of such firms may be elected as a member of the Board of Governors. According to PSE, this amendment will not affect the eligibility of any current Governor who is an officer or director of a member firm of PCC or PSDTC.

Article IV, section 4 of PSE's Constitution currently specifies that PSE's Clearing Committee shall consist of PCC's Board of Directors, and the Committee shall recommend to the Board of Governors rules and procedures pertaining to the settlement of PSE contracts. The proposal eliminates specific references to the Committee's composition, delegates to the Board of Governors the appointment of Committee members, and prescribes that the Committee shall perform its duties relating to the settlement of PSE contracts as appropriate.

Article VII, section 4(a) of PSE's Constitution currently states that if a PSE member transfers its membership, the purchase price for such transfer shall be paid to PSE prior to admission of the transferee. The transferor shall be entitled to the purchase price minus, among other things, dues and assessments of the transferor payable to PSE and PCC. The proposal deletes the reference to PCC and provides that the amount of the purchase price to which the transferor is entitled shall not include dues and assessments of the transferor payable to PSE and if applicable, to any entity of PSE performing clearing or depository functions.

Article XV, section 1 of PSE's Constitution currently states that PCC shall provide facilities for: (1) Clearing exchange and other transactions of members; (2) borrowing and transferring securities for members; and (3) rendering accounting and other services for members. The proposal eliminates the reference to PCC and states that PSE or any entity designated by the Board of Governors may provide such services.

PSE believes that the proposal is consistent with the Act in that it will protect investors and the public interest by conforming PSE rules to the decision to terminate PCC and PSDTC. The Commission also believes that the proposal is consistent with the Act, specifically, sections 6 and 17A. In particular, the Commission believes that the proposal is designed to facilitate the termination of PCC and PSDTC by amending PSE's Constitution to reflect such termination.

The Commission notes that approval of this proposal does not constitute Commission-authorized termination of PCC and PSDTC. To effect such termination, PSE must file with the Commission, and the Commission must approve, applications to deregister PCC and PSDTC as clearing agencies.

It is therefore ordered, pursuant to section 19(b) of the Act, that the proposed rule change (SR–PSE–87–20) be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

**Jonathan G. Katz,**

*Secretary.*

**SMALL BUSINESS ADMINISTRATION**

**Interest Rates**

As directed by Pub. L. 100–590 SBA will establish a maximum legal interest rate for any commercial loan which funds any non-SBA portion of a project financed under section 504 of the Small Business Investment Act of 1958 as amended.

This rate will be 4% over the rate for direct loans published quarterly by SBA.

For the remainder of the January–March quarter of 1989, this rate will be thirteen and seven-eights (13⅞%), i.e., the direct rate of 9⅞% plus 4.

## DEPARTMENT OF THE TREASURY

### Public Information Collection Requirements Submitted to OMB for Review.

Date: March 8, 1989.

The Department of the Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2224, 15th and Pennsylvania Avenue, NW., Washington, DC 20220.

### Internal Revenue Service

*OMB Number:* 1545-1035

*Form Number:* 8611

*Type of Review:* Revision

*Title:* Recapture of Low-Income Housing Credit

*Description:* Internal Revenue Code section 42 permits owners of residential rental projects providing low-income housing to claim a credit against their income tax. If the property is disposed of or it fails to meet certain requirements over a 15-year compliance period, the owner must recapture on Form 8611 part of the credit(s) taken in prior years.

*Respondents:* Individuals or households, Businesses or other for-profit businesses or organizations

*Estimated Number of Respondents:* 1,000.

*Estimated Burden Hours Per Response/Recordkeeping:*

Recordkeeping—3 hours 50 minutes.

Learning about the law or the form—1 hour 5 minutes.

Preparing, copying, assembling, and sending the form to IRS—1 hour 12 minutes.

*Frequency of Response:* On occasion.

*Estimated Total Recordkeeping/Reporting Burden:* 6,120 hours.

*Clearance Officer:* Garrick Shear (202) 535-4297, Internal Revenue Service, Room 5571, 1111 Constitution Avenue, NW., Washington, DC 20224.

*OMB Reviewer:* Milo Sunderhauf (202) 395-6880, Office of Management and Budget, Room 3001, New Executive Office Building, Washington, DC 20503.

## Internal Revenue Service

### Art Advisory Panel; Closed Meeting

**AGENCY:** Internal Revenue Service, Treasury.

**ACTION:** Notice of closed meeting of Art Advisory Panel.

**SUMMARY:** Closed meeting of the Art Advisory Panel will be held in Washington, DC.

**DATE:** The meeting will be held April 12, 1989.

**FOR FURTHER INFORMATION CONTACT:** Karen Carolan, CC:AP:AS, 1111 Constitution Avenue, NW., Room 2575, Washington, DC 20224, Telephone No. (202) 566-9259 (not a toll free number).

Notice is hereby given pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. (1982), that a closed meeting of the Art Advisory Panel will be held on April 12 in Room 3313 beginning at 9:30 a.m., Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, DC 20224.

The agenda will consist of the review and evaluation of the acceptability of fair market value appraisals of works of art involved in Federal income, estate, or gift tax returns. This will involve the discussion of material in individual tax returns made confidential by the provisions of section 6103 of Title 26 of the United States Code.

A determination as required by section 10(d) of the Federal Advisory Committee Act has been made that this meeting is concerned with matters listed in section 552b(c) (3), (4), (6), and (7) of Title 5 of the United States Code, and that the meeting will not be open to the public.

The Commissioner of Internal Revenue has determined that this document is not a major rule as defined in Executive Order 12291 and that a regulatory impact analysis therefore is not required. Neither does this document constitute a rule subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

**Lawrence B. Gibbs,**

*Commissioner.*

**SECURITIES AND EXCHANGE COMMISSION**

**"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT:** (54 FR 9964 March 8, 1989).

**STATUS:** Open meeting.

**PLACE:** 450 Fifth Street, NW., Washington, DC.

**DATE PREVIOUSLY ANNOUNCED:** Friday, March 3, 1989.

**CHANGES IN THE MEETING:** Additional item.

The following item will be considered at an open meeting for Tuesday, March 14, 1989, at 10:00 a.m.

Consideration of whether to issue a release announcing the adoption of final rules with regard to Regulation D, the limited offering exemptive provisions from the registration requirements of the Securities Act of 1933. An amendment would add to the lists of accredited investors certain governmental employee benefit plans with total assets in excess of $5 million. Other changes address the issue of substantial and good faith compliance with the terms, conditions and requirements of the regulation. For further information, please contact Richard Wulff or William Toomey at (202) 272-2644.

Commissioner Cox, as duty officer, determined that Commission business required the above change.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Pat Daugherty at (202) 272-2200.

## Findings and Determinations by the Deputy Director Under the Convention on Cultural Property Implementation Act; Notice

## Import Restrictions on Cultural Textile Artifacts From Bolivia; Notice

VOL 54 ISS 48 MR 14 1989 UMI

**UNITED STATES INFORMATION AGENCY**

**Findings and Determinations by the Deputy Director Under the Convention on Cultural Property Implementation Act (Pub. L. 97-446, as amended)**

Pursuant to the authority vested in me under Executive Order 12555, and USIA Delegation Order No. 86-3 of March 18, 1986 (51 FR 10137),

**Findings**

I hereby find:

(1) That Government of Bolivia made a request to the United States Government of the type and in the form required by section 303(a) of the Act, 19 U.S.C. 2602(a), on May 6, 1988, seeking emergency U.S. import restrictions and has supplied information which supports a determination that an emergency condition exists with respect to certain ethnological material from the community of Coroma, which material was identified as comprising a part of Bolivia's cultural patrimony in danger of being dispersed and fragmented in crisis proportions;

(2) That, pursuant to section 303(f)(1), 19 U.S.C. 2602(f)(1), notification of this request was published in the **Federal Register** on May 20, 1988 (53 FR 11544);

(3) That, pursuant to section 303(f)(2), 19 U.S.C. 2602(f)(2), this request was submitted to the Cultural Property Advisory Committee on May 19, 1988 for investigation, review and recommendation;

(4) That on August 4, 1988, the Committee transmitted to me its Report within the statutory ninety (90) day period prescribed in section 304(c)(2), 19 U.S.C. 2603(c)(2);

(5) That the Committee, in accordance with the requirements of section 306(f), 19 U.S.C. 2605(f), has thoroughly considered the request of Bolivia and has investigated the situation described in it;

(6) That the Committee recommends that emergency import restrictions be imposed on certain ethnological material from the community of Coroma;

(7) That the ethnological material which is the subject of the request consists of antique ceremonial textiles from the community of Coroma, situated high in the southern Altiplano region of the Andes, in Quijarro Province, Department of Potosi, which for centuries have been kept in bundles called q'epis that the ayllus of Coroma have passed from generation to generation as the collective inheritance from ancestors who lived near sacred areas;

(8) That the antique ceremonial textiles of Coroma are a part of the remains of a particular culture, the record of which is in jeopardy from dispersal and fragmentation which is, or threatens to be, of crisis proportions;

(9) That the imposition of emergency import restrictions on a temporary basis would, in whole or in part, reduce the incentive for dispersal and fragmentation of this ethnological material from the community of Coroma.

**Determinations**

Now, therefore, in accordance with the aforementioned authority vested in me, I hereby determine:

(1) That, pursuant to section 304(b) of the Act, 19 U.S.C. 2603(b), an emergency condition exists with regard to the antique ceremonial textiles from the community of Coroma;

(2) That the import restrictions set forth in section 307, 19 U.S.C. 2606, be applied to the antique ceremonial textiles of the community of Coroma; and

(3) That in accordance with the provisions of section 304(c)(3), 19 U.S.C. 2603(c)(3), the duration of such restrictions shall extend until May 6, 1993, five years from the date on which the Government of Bolivia's request was made to the United States.

Dated: January 19, 1989.

**Marvin L. Stone,**

*Deputy Director.*

**Customs Service**

**[T.D. 89-37]**

**Import Restrictions on Cultural Textile Artifacts From Bolivia**

**AGENCY:** U.S. Customs Service, Department of the Treasury.

**ACTION:** Notice of import restrictions.

**SUMMARY:** This document advises the public that, in accordance with a request from the Government of Bolivia, restrictions are being placed on the importation of certain culturally and historically significant textile artifacts from Bolivia. This action, which is being taken pursuant to the Convention on Cultural Property Implementation Act and in accordance with the United Nations Educational, Scientific and Cultural Organization (UNESCO) Convention on the Means of Prohibiting and Preventing the Illicit Import, Export and Transfer of Ownership of Cultural Property, and in cooperation with the U.S. Information Agency, will assist Bolivia in protecting its cultural property.

**EFFECTIVE DATE:** March 14, 1989.

**FOR FURTHER INFORMATION CONTACT:** Legal Aspects: Samuel Orandle, Commercial Rulings Division (202-566-5765).

Operational Aspects: Phyllis Henry, Trade Operations (202-566-7877). Both are at U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, DC 20229.

**SUPPLEMENTARY INFORMATION:**

**Background**

The value of cultural property, whether archaeological or ethnological in nature, is immeasurable. Such items often constitute the very essence of a society and convey important information concerning a people's origin, history, and traditional setting. The importance and popularity of such items regrettably makes them targets of theft, encourages clandestine looting of archaeological sites, and accompanying illegal exporting and importing.

There has been growing concern in the U.S. regarding the need for protecting endangered cultural property. The appearance in the U.S. of stolen or illegally exported artifacts from other countries where there has been recent pillaging has, on occasion, strained our foreign and cultural relations. This situation, combined with the concerns of the museum, archaeological, and scholarly communities, was recognized by the President and Congress. It became apparent that it was in the national interest for the U.S. to join with other countries to control illegal trafficking of such articles in international commerce.

The U.S. joined international efforts and actively participated in deliberations resulting in the 1970 UNESCO Convention on the Means of Prohibiting and Preventing the Illicit Import, Export and Transfer of Ownership of Cultural Property (823 U.N.T.S. 231 (1972). U.S. acceptance of the 1970 UNESCO Convention was codified into U.S. law as the "Convention on Cultural Property Implementation Act" (Pub. L. 97-446, 19 U.S.C. 2601 *et seq.*). The spirit of the Convention was enacted into law to promote U.S. leadership in achieving greater international cooperation towards preserving cultural treasures that are of importance not only to the nations whence they originate, but also to greater international understanding of mankind's common heritage. In 1983, the U.S. became the first major art importing country to implement the 1970 Convention.

It was with these goals in mind that Customs issued interim regulations to carry out the policies of the act. The interim regulations, which were set forth in §§ 12.104-12.104; Customs Regulations (19 CFR 12.104), were published in the **Federal Register** as T.D. 85-107 on June 25, 1985 (50 FR 26193), and took effect immediately. After consideration of comments received on the interim regulations, final regulations were issued as T.D. 86-52, published in the **Federal Register** on February 27, 1986 (51 FR 6905), and took effect on March 31, 1986.

**Bolivia**

Under section 303(a)(3) of the Cultural Property Implementation Act (19 U.S.C. 2602(a)(3)), the Government of Bolivia, a State Party to the 1970 UNESCO Convention, requested the U.S. Government to impose emergency import restrictions on certain endangered cultural material to assist Bolivia in protecting its cultural patrimony. Notice of receipt of the request was published by the U.S. Information Agency (USIA) in the **Federal Register** on May 20, 1988 (52 FR 11544).

On May 19, 1988, the request was referred to the Cultural Property Advisory Committee, which conducted a review and investigation, and submitted its report in accordance with the provisions of 19 U.S.C. 2605(f) to the Deputy Director, USIA, on August 4, 1988. The Committee found the situation in Bolivia to be an emergency and recommended that emergency import restrictions be imposed on certain ethnological material from the community of Coroma. The Deputy Director, pursuant to the authority vested in him under Executive Order 12555 and USIA Delegation Order 86-3, considered the Committee's recommendations and made his determination that emergency import restrictions be applied. (See this issue of the **Federal Register**.)

The Commissioner of Customs, in consultation with the Deputy Director of the USIA, has drawn up a list of covered ethnological material from the community of Coroma in Bolivia. The materials on the list are subject to the 1970 UNESCO Convention and § 12.104a, Customs Regulations. As provided in 19 U.S.C. 2601 *et seq.*, and § 12.104a, Customs Regulations, listed material from this area may not be imported into the U.S. unless accompanied by documentation certifying that the material left Bolivia legally and not in violation of the laws of Bolivia.

In the event an importer cannot produce the certificate, documentation, or evidence required in § 12.104c, Customs Regulations, at the time of making entry, § 12.104d provides that the district director shall take custody of the material until the certificate, documentation, or evidence is presented. Section 12.104e provides that if the importer states in writing that he will not attempt to secure the required certificate, documentation, or evidence, or the importer does not present the required certificate, documentation, or evidence to Customs within the time provided, the material shall be seized and summarily forfeited to the U.S. in accordance with the provisions of Part 162, Customs Regulations (19 CFR Part 162).

**Antique Ceremonial Textiles From Coroma, Bolivia**

U.S. import restrictions are applied to the antique ceremonial textiles from the community of Coroma, Bolivia. These are woven garments, dating from before 1500 to approximately 1850 A.D., owned communally by the Native people of this small Andean community. For centuries, they have played an integral role in the lives of the people of Coroma who wear them in special ceremonies. When not worn, they are honored and stored in bundles.

Textiles from this community may be identified by their appearance and texture. They are plain, not ornate, with varying widths of vertical stripes or bands. A few textiles display a checkerboard pattern. In color, the textiles are usually red, blue, or purple, or a shade of yellow, tan or brown. Unlike the more modern textiles from this Andean region, Coroma's ceremonial garments are made from high quality yarn from the wool of vicuna, or llama, and feels very soft to the touch, similar to silk.

Coroma's ceremonial garments consist of:

1. *Tunic/Poncho:* (asku or urku for women; unku or ccahua for men; poncho) A tunic is a woven garment consisting of either one or two pieces of woven cloth with sides stitched together; a poncho is a woven garment resembling a tunic but without the sides stitched together. (Approximate size: women's tunic is 1.2 m. by 90 cm.; Men's tunic is 82 cm. by 78 cm.)

2. *Cape/Shawl:* (llaqota or manta; llixilla or awayo; isqayo) Woven garment worn either on the back, like a cape, worn over the back and arms, like a shawl. (Approximate size: 80 cm. by 79 cm.)

3. *Small Ceremonial Cloth:* (tari or inkuna) Woven square cloth small in size used as a woman's head covering for ceremonial purposes.

4. *Hat/Headdress* (sombrero, pillu) A sombrero is a hat made from vicuna hide; a pillu is a wool headdress made in the shape of a crown with fringe.

Dated: March 7, 1989.

**William von Raab,**

*Commissioner of Customs.*

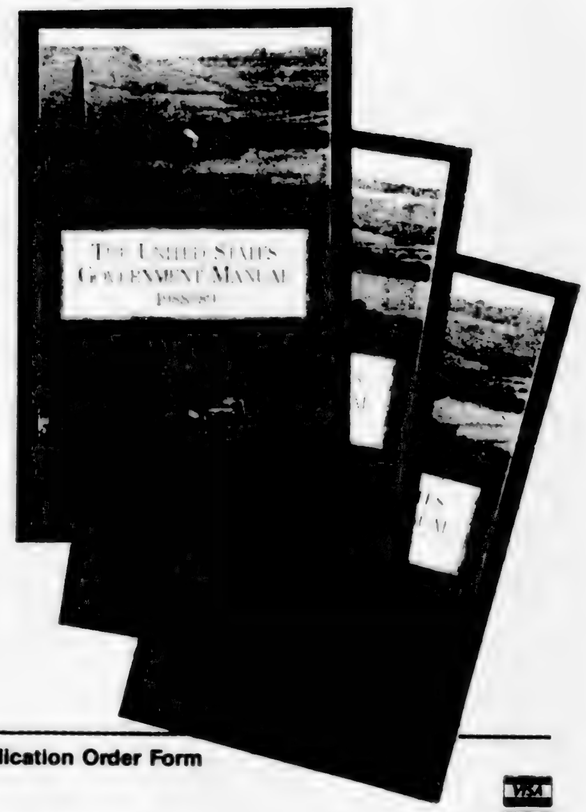
## The United States Government Manual 1988/89



As the official handbook of the Federal Government, the *Manual* is the best source of information on the activities, functions, organization, and principal officials of the agencies of the legislative, judicial, and executive branches. It also includes information on quasi-official agencies and international organizations in which the United States participates.

Particularly helpful for those interested in where to go and who to see about a subject of particular concern is each agency's "Sources of Information" section, which provides addresses and telephone numbers for use in obtaining specifics on consumer activities, contracts and grants, employment, publications and films, and many other areas of citizen interest. The *Manual* also includes comprehensive name and agency/subject indexes.

Of significant historical interest is Appendix C, which lists the agencies and functions of the Federal Government abolished, transferred, or changed in name subsequent to March 4, 1933.

The *Manual* is published by the Office of the Federal Register, National Archives and Records Administration.

**$20.00 per copy**

**Publication Order Form**

Order processing code: *6450

☐ **YES,** please send me the following indicated publications:

_____ copies of THE UNITED STATES GOVERNMENT MANUAL, 1988/89 at $20.00 per copy. S/N 069-000-00015-1.

1. The total cost of my order is $_____ International customers please add 25%. All prices include regular domestic postage and handling and are good through 3/89. After this date, please call Order and Information Desk at 202-783-3238 to verify prices.

**Please Type or Print**

2. _____ (Company or personal name)
_____ (Additional address/attention line)
_____ (Street address)
_____ (City, State, ZIP Code)
(_____) (Daytime phone including area code)

3. Please choose method of payment:
☐ Check payable to the Superintendent of Documents
☐ GPO Deposit Account ☐☐☐☐☐☐☐–☐
☐ VISA, or MasterCard Account
☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐
_____ (Credit card expiration date) *Thank you for your order!*
_____ (Signature) (Rev. 8-88)

**FEDERAL REGISTER** Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

**How To Cite This Publication:** Use the volume number and the page number. Example: 54 FR 12345.

For other telephone numbers, see the Reader Aids section at the end of this issue.

THE FEDERAL REGISTER

WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

PHILADELPHIA, PA

WHEN: March 30, at 1:00 p.m.
WHERE: 841 Chestnut Street, Room 705, Philadelphia, Pa
RESERVATIONS: Call the Philadelphia Federal Information Center
Philadelphia: 215-597-1799
New Jersey: 800-366-4400

WASHINGTON, DC

WHEN: April 11, at 9:00 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC
RESERVATIONS: 202-523-5240

SALT LAKE CITY, UT

WHEN: April 12, at 9:00 a.m.
WHERE: State Office Building Auditorium, Capitol Hill, Salt Lake City, UT
RESERVATIONS: Call the Utah Department of Administrative Services, 801-538-3010

# Rules and Regulations

Federal Register
Vol. 54, No. 49
Wednesday, March 15, 1989

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

## DEPARTMENT OF AGRICULTURE

### Federal Crop Insurance Corporation

### 7 CFR Part 401

**[Docket No. 0636S]**

### Wheat Crop Insurance Endorsement

**AGENCY:** Federal Crop Insurance Corporation, USDA

**ACTION:** Notice clarifying sales period for wheat in certain South Dakota counties.

**SUMMARY:** The Federal Crop Insurance Corporation (FCIC) herewith publishes this notice for the purpose of clarifying for all interested parties the period for accepting application for crop insurance on wheat in certain counties in South Dakota. The intent of this notice is to provide clear guidelines for insuring winter wheat, and winter wheat with a coverage option and to identify the counties affected.

**FOR FURTHER INFORMATION CONTACT:** Peter F. Cole, Secretary, Federal Crop Insurance Corporation, Room 4090, South Building, U.S. Department of Agriculture, Washington, DC 20250, telephone (202) 447-3325.

**SUPPLEMENTARY INFORMATION:** The Wheat Crop Insurance Endorsement (7 CFR 401.101, and the Winter Wheat Coverage Option (7 CFR 401.102) are available for the 1989 crop year in certain counties in the western part of South Dakota.

The sales closing date for accepting applications in those counties for the wheat endorsement with the winter wheat coverage option attached was September 30, 1988.

An apparent confusion exists as to whether the wheat crop insurance endorsement, standing alone, is still available in such counties after September 30, 1988. This matter is currently under review for the 1990 crop year policy provisions.

For purposes of clarification, wheat crop insurance under the provisions of the Wheat Crop Insurance Endorsement (7 CFR 401.101), but without the winter wheat coverage option, is available until April 15, 1989, provided an adequate stand exists for fall-seeded wheat on that date. The sales closing date for spring-seeded wheat is April 15, 1989. This clarification pertains only to the following South Dakota Counties:

## Food Safety and Inspection Service

### 9 CFR Parts 327 and 381

### Imported Canadian Product: Provision for "Streamlined" Inspection Procedures; Exemption From Official Mark of Inspection; Reopening of Comment Period

**AGENCY:** Food Safety and Inspection Service, USDA.

**ACTION:** Interim rule; reopening of comment period.

**SUMMARY:** On January 5, 1989, the Food Safety and Inspection Service (FSIS) published an interim rule that amended the Federal meat and poultry products inspection regulations by providing "streamlined" inspection procedures for the reinspection of Canadian meat and poultry products and by exempting all meat and poultry products imported from Canada from the requirement that such product or containers of product be marked with the official mark of inspection. These actions were a result of the United States-Canada Free-Trade Agreement and the United States-Canada Free-Trade Agreement Implementation Act of 1988, Pub. L. 100-449. The comment period on this interim rule closed on February 6, 1989. FSIS has received requests to reopen the comment period so that additional comments and information could be provided. FSIS is granting these requests and is reopening the comment period for an additional 30 days.

**DATE:** Comments must be received on or before: April 14, 1989.

**ADDRESS:** Comments may be mailed to the Policy Office, ATTN: Linda Carey, FSIS Hearing Clerk, Room 3171, South Agriculture Building, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250. Any person desiring an opportunity for oral presentation of views as provided under the Poultry Products Inspection Act must make such a request to Patricia Stolfa at (202) 447-3473 so that arrangements may be made for such views to be presented. A record will be made of all views orally presented. All comments submitted in response to this action will be made available for public inspection in the Policy Office between 9 a.m. and 4 p.m., Monday through Friday.

**FOR FURTHER INFORMATION CONTACT:** Patricia Stolfa, Deputy Administrator, International Programs, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 447-3473.

**SUPPLEMENTARY INFORMATION:** On January 5, 1989, FSIS published an interim rule that amended the Federal meat and poultry products inspection regulations by providing "streamlined" inspection procedures for the reinspection of Canadian meat and poultry products and by exempting all meat and poultry products imported from Canada from the requirement that such product or containers of product be marked with the official mark of inspection. These actions were a result of the United States-Canada Free-Trade Agreement and the United States-Canada Free-Trade Agreement Implementation Act of 1988, Pub. L. 100-499, which President Reagan signed on January 2, 1989. The comment period on this interim rule closed on February 6, 1989. FSIS has received requests to reopen the comment period so that additional comments and information could be provided. FSIS is granting these

VOL 54 ISS 49 MR 15 1989 UMI

requests and is reopening the comment period for an additional 30 days.

Done at Washington, DC on: March 13, 1989.

**Lester M. Crawford,**

*Administrator, Food Safety and Inspection Service.*

## FEDERAL ELECTION COMMISSION

**11 CFR Part 114**

**[Notice 1989—4]**

**Trade Association Solicitation**

**AGENCY:** Federal Election Commission

**ACTION:** Final rule, transmittal of regulation to Congress

**SUMMARY:** The Commission has revised its regulation at 11 CFR 114.8(f), governing the solicitation of parent and subsidiary corporations by a trade association or a trade association's separate segregated fund. Section 114.8 sets forth the rules under which a trade association may solicit the restricted class of its member corporations. The revision clearly states that a trade association or its separate segregated fund may solicit no part of the restricted class of the parent if the parent corporation is not a member of the association although the parent's subsidiary is a member. The revision also specifies in each sentence the categories of persons who constitute the restricted class. Supplementary information, set out below, provides further information on the revision.

**DATES:** Further action, including the announcement of an effective date, will be taken after the regulation has been before Congress for 30 legislative days pursuant to 2 U.S.C. 438(d).

**FOR FURTHER INFORMATION CONTACT:** Ms. Susan E. Propper, Assistant General Counsel, Federal Election Commission, 999 E Street, NW., Washington, DC 20463, (202) 376-5690 or (800) 424-9530.

**SUPPLEMENTARY INFORMATION:** The Commission is publishing today the final text of a revised rule at 11 CFR 114.8(f), governing the solicitation of parent and subsidiary corporations by a trade association or its separate segregated fund.

On September 15, 1988, the Commission issued a Notice of Proposed Rulemaking in which it sought comments on proposed revisions of § 114.8(f) and two other regulations. 53 FR 35827. The Commission received no comments in response to the Notice.

Section 438(d) of Title 2, United States Code, requires that any rule or regulation prescribed by the Commission to carry out the provisions of Title 2 of the United States Code be transmitted to the Speaker of the House of Representatives and to the President of the Senate 30 legislative days before they are finally promulgated. This regulation was transmitted to Congress on March 10, 1989.

**Explanation and Justification**

The Federal Election Campaign Act of 1971, as amended, (the "Act"), 2 U.S.C. 431 *et seq.*, permits trade associations to solicit the executive or administrative personnel, stockholders, and families of such personnel and stockholders (the "restricted class") of the trade association's member corporations, subject to certain conditions. 2 U.S.C. 441b(b)(4)(D). Section 114.8(f) of the Commission's regulations applies this basic rule to situations where a parent corporation is a member of a trade association but its subsidiary is not, or vice versa.

Under the current § 114.8(f), if the parent corporation is a member of a trade association but the subsidiary is not, the trade association or its separate segregated fund may solicit only the restricted class of the parent. To be consistent with the Act, the regulations should further provide that if the subsidiary corporation is a member of a trade association but its parent is not, then the trade association and its separate segregated fund may solicit only the restricted class of the subsidiary; the trade association may not solicit the parent corporation's restricted class. As the Notice of Proposed Rulemaking pointed out, however, current § 114.8(f) states that the trade association is prohibited from soliciting only the "shareholders" of the non-member parent corporation. The revision corrects this language. The Commission notes that this revision does not represent a change in agency policy but rather is a more accurate statement of the current law. It has been the consistent position of the Commission that trade associations may only solicit the restricted class of their member corporations. In addition, unlike the earlier proposed version, the new rule also specifies in each sentence the categories of persons who constitute the relevant restricted class.

**List of Subjects in 11 CFR Part 114**

Business and industry, Elections.

For the reasons set out in the preamble, Subchapter A, Chapter I, Title 11 of the Code of Federal Regulations is amended as follows:

**PART 114—CORPORATE AND LABOR ORGANIZATION ACTIVITY**

1. The authority citations for Part 114 is revised to read as follows:

**Authority:** 2 U.S.C. 431(8)(B), 431(9)(B), 432, 437d(a)(8), 438(a)(8), and 441b.

2. By revising § 114.8(f) to read as follows:

**§ 114.8 Trade associations.**

* * * * *

(f) *Solicitation of a subsidiary corporation.* If a parent corporation is a member of the trade association but its subsidiary is not, the trade association or its separate segregated fund may only solicit the parent's executive or administrative personnel and their families and the parent's stockholders and their families; it may not solicit the subsidiary's executive or administrative personnel or stockholders or their families. If a subsidiary is a member of the trade association but the parent corporation is not, the trade association or its separate segregated fund may only solicit the subsidiary's executive or administrative personnel and their families and the subsidiary's stockholders and their families; it may not solicit the parent's executive or administrative personnel or stockholders or their families. If both parent and subsidiary are members of the trade association, the executive or administrative personnel and their families and the stockholders and their families of each may be solicited.

* * * * *

Dated: March 10, 1989.

BILLING CODE 6715-01-M

## DEPARTMENT OF TRANSPORTATION

**Federal Aviation Administration**

**14 CFR Part 39**

**[Docket No. 88-NM-126-AD; Amdt. 39-6150]**

**Airworthiness Directives; McDonnell Douglas Model DC-9 Series, Model DC-9-80 Series, Model MD-88, and C-9 (Military) Series Airplanes**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This amendment adopts a new airworthiness directive (AD), applicable to all McDonnell Douglas Model DC-9 series, Model DC-9-80 series, Model MD-88, and C-9 (Military) series airplanes, which requires inspection of the rudder actuator for internal hydraulic fluid leakage, and replacement if necessary, to ensure that degraded actuators are removed from service. This amendment is prompted by reports of degraded actuators. This condition, if not corrected, could lead to reduced rudder authority and uncontrollable airplane sideslip, should an engine failure occur at takeoff.

**DATES:** Effective April 12, 1989.

**ADDRESSES:** The applicable service information may be obtained from McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director of Publications, C1-L00 (54-88). This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at 3229 East Spring Street, Long Beach, California.

**FOR FURTHER INFORMATION CONTACT:** Mr. Robert M. Stacho, Aerospace Engineer, Systems and Equipment Branch, ANM-136L, FAA, Northwest Mountain Region, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California 90806; telephone (213) 988-5336.

**SUPPLEMENTARY INFORMATION:** A proposal to amend Part 39 of the Federal Aviation Regulations to include a new airworthiness directive (AD), applicable to McDonnell Douglas Model DC-9 series, DC-9-80 series, MD-88, and C-9 (Military) series airplanes, which requires inspection of the rudder actuator for internal hydraulic fluid leakage, and replacement, if necessary, to ensure that degraded actuators are removed from service, was published in the **Federal Register** on October 20, 1988 (53 FR 41282).

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter requested that the initial inspection of paragraph B. of the proposed AD be changed from 1,000 flight hours to 1,500 flight hours. This commenter operates a large fleet of recently-delivered Model DC-9-80 airplanes, and suggested that the 1,000-hour compliance time unduly penalizes its operation of low-time airplanes. The FAA concurs. In developing an appropriate compliance time for this AD action, the FAA considered not only the degree of urgency associated with addressing the subject unsafe condition, but the practical aspect of incorporating the required inspections into affected operator's maintenance schedules in a timely manner. The FAA has reviewed data submitted by the aircraft manufacturer as to recommended inspections times and parts availability, as well as average aircraft utilization rates of affected operators, and has determined that extending the initial inspection from 1,000 to 1,500 flight hours will provide an acceptable level of safety. The final rule has been revised accordingly.

One commenter requested the repetitive inspection intervals of paragraph C. of the proposed AD, applicable to Model DC-9-80 series airplanes, be extended from 2,500 to 3,000 flight hours so the inspections can be accomplished during the "C" maintenance check. The FAA concurs with this request. In developing the proposed repetitive inspection interval, the FAA had intended that it fall during a time of regular scheduled maintenance for the majority of affected operators. After reviewing the average utilization rates for U.S. operators, the FAA has determined that revising the repetitive inspection intervals to 3,000 flight hours, for all airplanes specified in paragraph B. of the final rule, will provide an acceptable level of safety. The final rule has been revised accordingly.

The FAA has determined that the changes described above will neither impose an additional economic burden on any operator, nor expand the scope of the AD.

One commenter requested that terminating action for the repetitive inspections be included in the AD if the aircraft manufacturer has developed such corrective action. To date, the aircraft manufacturer has not proposed design changes that would preclude the need for these inspections. When such design changes are available, the FAA may consider further rulemaking to provide for terminating action for the inspection requirements of this AD.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described.

There are approximately 1500 Model DC-9 series airplanes in the worldwide fleet. It is estimated that 870 airplanes of U.S. registry will be affected by this AD, that it will take approximately 10 manhours per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. (Replacement of the rudder actuator, if necessary, would require 13 manhours to accomplish). Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $348,000.

The regulations adopted herein will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic impact, positive or negative, on a substantial number of small entities, because few, if any, Model DC-9 series airplanes are operated by small entities. A final evaluation has been prepared for this regulation and has been placed in the docket.

**List of Subjects in 14 CFR Part 39**

Aviation safety, Aircraft.

**Adoption of the Amendment**

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

**PART 39—[AMENDED]**

1. The authority citation for Part 39 continues to read as follows:

**Authority:** 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

**§ 39.13. [Amended]**

2. By adding the following new airworthiness directive:

**McDonnell Douglas:** Applies to McDonnell Douglas Model DC-9 series, Model DC-9-80 series, Model MD-88, and C-9 (Military) series airplanes, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent uncontrollable airplane sideslip due to an ineffective rudder actuator, accomplish the following:

A. For Model DC-9-11, -12, -13, -14, -15, -15F, -21, and -87 series airplanes: Within 500 flight hours after the effective date of this airworthiness directive (AD), unless already accomplished within the last 1,000 flight hours, inspect the rudder actuator for internal hydraulic fluid leakage in accordance with McDonnell Douglas Alert Service Bulletin A27-291, Revision 3, dated August 24, 1988.

VOL 54 ISS 49 MR 15 1989 UMI

B. For Model DC-9-31, -32, -32F, -33, -34, -34F, -41, -51, -61, -62, -63, and MD-88 series airplanes: Within 1,500 flight hours after the effective date of this AD, unless already accomplished within the last 1500 flight hours, inspect the rudder actuator for internal hydraulic fluid leakage, in accordance with McDonnell Douglas Alert Service Bulletin A27-291, Revision 3, dated August 24, 1988.

C. If the rudder actuator internal hydraulic fluid leakage is within the limits established in McDonnell Douglas Alert Service Bulletin A27-291, Revision 3, dated August 24, 1988, repeat the inspection specified in paragraph A. or B., above, as follows:

1. For those airplanes specified in paragraph A., at intervals not to exceed 1500 flight hours.

2. For those airplanes specified in paragraph B., at intervals not to exceed 3000 flight hours.

D. Any rudder actuator which exceeds the internal hydraulic fluid leakage limit specified in McDonnell Douglas Alert Service Bulletin A27-291, Revision 3, dated August 24, 1988, must be replaced, prior to further flight, with a rudder actuator within those limits.

E. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

Note.—The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

F. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service information from the manufacturer may obtain copies upon request to McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director of Publications, C1-L00 (54-60). These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington or the Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California.

This amendment becomes effective April 12, 1989.

Issued in Seattle, Washington, on February 21, 1989.

**Darrell M. Pederson,**

*Assistant Manager, Transport Airplane Directorate, Aircraft Certification Service.*

[FR Doc. 89-5909 Filed 03-14-89; 8:45 am]

BILLING CODE 4910-13-M

**14 CFR Part 39**

**[Docket No. 88-NM-15-AD; Amdt. 39-6152]**

## Airworthiness Directives; McDonnell Douglas Model DC-9-10 Through -30 Series and C-9 (Military) Airplanes, Equipped with a Non-Ventral Aft Pressure Bulkhead

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This amendment adopts a new airworthiness directive, applicable to certain McDonnell Douglas Model DC-9-10 through -30 series and C-9 (Military) series airplanes equipped with a non-ventral aft pressure bulkhead, which requires both visual and high frequency eddy current inspection of the aft pressure bulkhead from the aft side. This amendment is prompted by a recent report of a crack in the aft pressure bulkhead tee cap. If this condition is not corrected, bulkhead tee cap cracks may develop, which could result in rapid depressurization of the fuselage in flight and cause severe structural damage to the airplane.

**DATES:** Effective March 24, 1989.

**ADDRESSES:** The applicable service information may be obtained from McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director of Publications, C1-L00 (54-60). This information may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or 3229 East Spring Street, Long Beach, California.

**FOR FURTHER INFORMATION CONTACT:** Mr. Michael N. Asahara, DC9/MD80 Program Manager, Airframe Branch, ANM-122L, FAA, Northwest Mountain Region, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California 90806-2425; telephone (213) 988-5321.

**SUPPLEMENTARY INFORMATION:** On May 31, 1988, the FAA issued AD 88-13-09, Amendment 39-5954 (53 FR 21411; June 8, 1988), to require the structural inspection of the aft pressure bulkhead using low frequency eddy current inspection techniques from the forward side of the bulkhead of all McDonnell Douglas Model DC-9 series airplanes. That AD was prompted by reports of cracks in the aft pressure bulkhead tee cap. This condition, if not corrected, could result in rapid depressurization of the fuselage, causing structural damage and possible loss of adjacent structures, including damage to control cables, with subsequent loss of airplane control.

Since issuance of AD 88-13-09, a DC-9 operator reported finding a 24-inch crack in the non-ventral aft pressure bulkhead tee while performing an unscheduled heavy maintenance inspection. Preliminary analysis of the tee revealed that the cracks initiated at multiple sites on the forward surface of the upstanding leg of the tee as the result of metal fatigue due to bending and preloads. The crack was detected on an airplane having logged 36,079 landings, with 40,336 total hours on the fuselage. Fractrographic analysis revealed that the crack initiated approximately 12,000 landings prior to its discovery. In light of this new report of cracking, the FAA has determined that the initial inspection threshold for compliance with the inspection requirements of AD 88-13-09 must be reduced to 25,000 landings on airplanes equipped with non-ventral aft pressure bulkheads in order to adequately detect cracking in a timely manner.

The FAA canvassed the affected airline operators, through the Air Transport Association (ATA) of America, and McDonnell Douglas, to ascertain their experience with the low frequency eddy current inspection from the forward side of the bulkhead, as an option provided in AD 88-13-09. From information supplied by those groups, the FAA has determined that, due to the complexity and difficulty in performing that type of inspection, the results may not be reliable and, therefore, the inspection may not be effective. The FAA has determined that a high frequency eddy current inspection of the 5910163-91 and -92 attach tee from the aft side of the bulkhead, coupled with an optically aided visual inspection, will more adequately detect cracking in the attach tee area. In addition, the FAA has determined that sealant must be removed from the inspection area prior to inspection. Further, because of the differences in the eddy current inspection equipment sensitivity, the FAA has determined that the interval between inspections of the 5910163-91 and -92 attach tees must be reduced to 500 landings.

The FAA has determined that, due to the multiple-site nature of the reported cracking, continued operation of airplanes with cracks is unacceptable. Accordingly, this action does not permit the interim repair for certain cracks as currently described in paragraph C.2.a. of AD 88-13-09.

The FAA has reviewed and approved McDonnell Douglas Alert Service Bulletin A57-231, dated February 24, 1989, which describes high frequency eddy current inspection of the attach tee area, and repairs or replacement, if necessary.

Since this unsafe condition may exist or develop on other airplanes of the same type design equipped with a non-ventral aft pressure bulkhead, this AD requires repetitive high frequency eddy current inspection of the 5910163-91 and -92 attach tee, coupled with repetitive optically aided visual inspections of the attach tee from the aft side of the bulkhead, and repair or replacement, if necessary. Subsequent inspections are also required after any repair or replacement. Additionally, affected operators are required to remove sealant from the inspection area prior to inspection.

The requirements of this AD differ from and replace the requirements of AD 88-13-09 for airplanes equipped with non-ventral aft pressure bulkheads by: (1) Deleting the option for low frequency eddy current inspections from the forward side of the bulkhead; (2) lowering the initial inspection threshold called out in AD 88-13-09 to 25,000 landings; (3) eliminating the interim repair provided by that AD; and (4) eliminating the optional inspections from the forward side of the bulkhead.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

The FAA is currently preparing a similar action to address revised inspection requirements for Model DC-9 series airplanes equipped with a ventral aft pressure bulkhead. However, the proposed compliance time would not preclude a period for public comment. (Therefore, that action will appear as a Notice of Proposed Rulemaking.)

The regulations adopted herein will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required).

**List of Subjects in 14 CFR Part 39**

Aviation safety, Aircraft.

**Adoption of the Amendment**

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

**PART 39—[AMENDED]**

1. The authority citation for Part 39 continues to read as follows:

**Authority:** 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

**§ 39.13 [Amended]**

2. By adding the following new airworthiness directive:

**McDonnell Douglas:** Applies to Model DC-9-10 through -30 series and C-9 (Military) series airplanes, equipped with a non-ventral aft pressure bulkhead, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent cracks which could result in structural failure of the nonventral aft ventral pressure bulkhead, accomplish the following:

A. Prior to the accumulation of 25,000 landings or within 500 landings after the effective date of this AD, whichever occurs later, inspect the aft pressure bulkhead attach tee section, in accordance with the following procedures.

1. Remove any sealant from inspection area of the tee section that might hinder optically aided and high frequency eddy current inspections. Clean dirt, grease, and all foreign materials from inspection area using lint-free wipers and 1,1,1 trichloroethane solvent or equivalent;

2. Using an optically aided visual inspection technique, inspect the 5910163-89, -93, -94, and -95 attach tees from the aft side of the bulkhead, in accordance with McDonnell Douglas Alert Service Bulletin A53-231, dated February 24, 1989 (hereinafter referred to as ASB53-231). Repeat this inspection thereafter at interval not to exceed 1,500 landings; and

3. Using a high frequency eddy current inspection technique, in accordance with ASB53-231, inspect the 5910163-91 and -92 attach tees from the aft side of the bulkhead. Repeat this inspection thereafter at intervals not to exceed 500 landings.

B. If cracks are found, prior to further flight, replace the cracked tee cap or repair by splicing in a section of tee cap with a new like or improved part, in accordance with McDonnell Douglas Service Rework Drawings SR09530001, Revision C, dated August 18, 1987, and SR09530001, Revision "Advance D", dated October 29, 1987. Prior to the accumulation of 25,000 landings after the repair or replacement, resume the repetitive inspections in accordance with paragraph A., above.

C. Compliance with the requirements of this AD constitutes terminating action for the requirements of AD 88-13-09, Amendment 39-5954, relating to airplanes equipped with non-ventral aft pressure bulkheads.

Note.—The requirements of AD 88-13-09 relating to airplanes with ventral aft pressure bulkheads are not affected by this AD.

D. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

Note.—The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments then send it to the Manager, Los Angeles Aircraft Certification Office.

E. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes unpressurized to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director of Publications, C1-L00 (54-60). These documents may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or 3229 East Spring Street, Long Beach, California.

This amendment becomes effective March 24, 1989.

Issued in Seattle, Washington, on February 24, 1989.

**Darrell M. Pederson,**

## Airworthiness Directives; Avions Marcel Dassault-Breguet Aviation (AMD-BA) Model Mystere Falcon 50 and 900 Series Airplanes

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

VOL 54 ISS 49 MR 15 1989 UMI

**SUMMARY:** This amendment adopts a new airworthiness directive (AD), applicable to certain Avions Marcel Dassault-Breguet Aviation (AMD–BA) Model Mystere Falcon 50 and 900 series airplanes, which requires repetitive inspections of the main landing gear (MLG) door emergency release mechanism to detect broken or damaged unlocking pins, and replacement of the pins, if necessary. This amendment is prompted by reports of the MLG door emergency unlocking pin breaking due to fatigue failure. This condition, if not corrected, could prevent emergency extension of the MLG.

**EFFECTIVE DATE:** March 24, 1989.

**ADDRESSES:** The applicable service information may be obtained from Falcon Jet Corporation, 777 Terrace Avenue, Hasbrouck Heights, New Jersey 07604. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

**FOR FURTHER INFORMATION CONTACT:** Mr. Adriano Pasion, Standardization Branch, ANM–113; telephone (206) 431–1977. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

**SUPPLEMENTARY INFORMATION:** The Direction Générale de L'Aviation Civile (DGAC), which is the airworthiness authority of France, has notified the FAA of an unsafe condition which may exist on certain Avions Marcel Dassault Breguet Aviation (AMD–BA) Model Mystere Falcon 50 and 900 series airplanes. There have been two reports of the MLG door emergency unlocking pin breaking due to fatigue failure. This condition, if not corrected, could prevent emergency extension of the MLG.

The DGAC has issued French Airworthiness Directive 88–140–006(B)R1, dated December 28, 1988, which contains procedures for repetitive inspection of the main landing gear door emergency release mechanism for a broken or damaged unlocking pin, and replacement of the pins, if necessary.

This airplane model is manufactured in France and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since this condition is likely to exist or develop on other airplanes of the same type design registered in the United States, this AD requires repetitive inspections of the MLG door emergency release mechanism for a broken or damaged unlocking pin, and replacement, if necessary.

Since a condition exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

The regulations adopted herein will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation and that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required).

**List of Subjects in 14 CFR Part 39**

Aviation safety, Aircraft.

**Adoption of the Amendment**

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

1. The authority citation for Part 39 continues to read as follows:

**Authority:** 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new airworthiness directive:

**Avions Marcel Dassault Breguet Aviation (AMD–BA):** Applies to Model Mystere Falcon 50 and 900 series airplanes, certificated in any category, equipped with emergency unlocking levers part numbers:

—for Mystere Falcon 50:
F50B793600160 or 160A1 or 161 or 161A1—LH side
F50B793700160 or 160A1 or 161 or 161A1—RH side
—for Mystere Falcon 900:
FGFB793600160 or 160A2 or 161 or 161A2 or F50B793600160A1 or 161 or 161A1—LH side
FGFB793700160 or 160A2 or 161 or 161A2 or F50B793700160A1 or 161 or 161A1—RH side.

Compliance is required as indicated, unless previously accomplished.

To prevent inability to open the main landing gear (MLG) door for MLG emergency extension, accomplish the following:

A. Prior to the accumulation of 1,000 landings on the MLG door emergency unlocking pin, or within 7 days after the effective date of this AD, whichever occurs later, verify the integrity of the MLG door emergency unlocking system by operating the manual opening system, in accordance with the instructions in the AMD–BA Falcon 50 or 900 series (as applicable) Maintenance Manual, Work Card 480.0, paragraph 3.

1. If the unlocking pin is broken or damaged, replace the pin with a serviceable pin of the same part number prior to further flight.

2. If the unlocking pin is not damaged, repeat the inspection prior to accumulation of 2,000 landings. Replace broken or damaged pins in accordance with paragraph A.1., above.

B. Upon the accumulation of 2,000 or more landings on the MLG door emergency unlocking pin, repeat the inspection described in paragraph A., above, at intervals not to exceed 50 landings from last inspection. Replace broken or damaged pins in accordance with paragraph A.1., above.

C. Following the replacement of any unlocking pin with a new pin, repeat the inspection required by paragraphs A. and B., above, at the intervals specified. Replace broken or damage pins in accordance with paragraph A.1., above.

D. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

**Note.**—The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Manager, Standardization Branch, ANM–113.

E. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of the inspections required by this AD.

All persons affected by this directive who have not already received the appropriate service information from the manufacturer may obtain copies upon request to Falcon Jet Corporation, 777 Terrace Avenue, Hasbrouck Height, New Jersey 07604. This information may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective March 24, 1989.

Issued in Seattle, Washington, on February 24, 1989.

**Darrell M. Pederson,**

*Assistant Manager, Transport Airplane Directorate, Aircraft Certification Service.*

## NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

### 14 CFR Part 1215

### Tracking and Data Relay Satellite System (TDRSS)

**AGENCY:** National Aeronautics and Space Administration.

**ACTION:** Final rule.

**SUMMARY:** NASA is amending 14 CFR Part 1215, "Tracking and Data Relay Satellite System (TDRSS)," by revising Appendix A to reflect the estimated service rates in 1990 dollars for TDRSS standard services, based on NASA escalation estimates. 14 CFR Part 1215 sets forth the policy governing the Tracking and Data Relay Satellite System (TDRSS) services provided to non-U.S. Government users and the reimbursement for rendering such services. The TDRSS represents a major investment by the U.S. Government with the primary goal of providing improved tracking and data acquisition services to spacecraft in low earth orbit or to terrestrial users.

**EFFECTIVE DATE:** March 15, 1989.

**ADDRESS:** Office of Space Operations, Code T, NASA Headquarters, Washington, DC 20546.

**FOR FURTHER INFORMATION CONTACT:** Eugene Ferrick, 202–453–2030.

**SUPPLEMENTARY INFORMATION:** The existing regulation was published in the **Federal Register** on March 9, 1983 (48 FR 9845). Each year since that time, 14 CFR Part 1215 has been amended by revising Appendix A to reflect the rate changes for the appropriate calendar years (CY). Since this revision of Appendix A to 14 CFR Part 1215 reflects the rate changes for CY 1990 and involves NASA management procedures and decisions, no public comment is required.

The National Aeronautics and Space Administration has determined that this rule is not subject to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601–612, since it will not exert a significant economic impact on a substantial number of small entities, and it is not a major rule as defined in Executive Order 12291.

**List of Subjects in 14 CFR Part 1215**

Satellites, Tracking and Data Relay Satellite System, Communications equipment, Government contract.

**PART 1215—TRACKING AND DATA RELAY SATELLITE SYSTEM (TDRSS)**

For reasons set out in the Preamble, 14 CFR Part 1215 is amended as follows:

1. The authority citation for 14 CFR Part 1215 continues to read as follows:

**Authority:** Sec. 203, Pub. L. 85–568, 72 Stat. 429, as amended; 42 U.S.C. 2473.

2. Appendix A is revised to read as follows:

**Appendix A—Estimated Service Rates in 1990 Dollars for TDRSS Standard Services (Based on NASA Escalation Estimate)**

TDRSS user service rates for services rendered in CY–90 based on current projections in 1990 dollars are as follows:

*Single Access Service*—Forward command, return telemetry, or tracking, or any combination of these, the base rate is $164.00 per minute for non-U.S. Government users.

*Multiple Access Forward Service*—Base rate is $36.00 per minute for non-U.S. Government users.

*Multiple Access Return Service*—Base rate is $11.00 per minute for non-U.S. Government users.

**Robert O. Aller,**

*Associate Administrator for Space Operations.*

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

### 21 CFR Part 176

**[Docket No. 85F–0400]**

### Indirect Food Additives: Paper and Paperboard Components

**AGENCY:** Food and Drug Administration.

**ACTION:** Final rule.

**SUMMARY:** The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the safe use of mono- and di(2-alkenyl)succinyl esters of polyethylene glycol containing not less than 90 percent of the diester product and in which the alkenyl groups are derived from olefins that contain not less than 95 percent of $C_{18}$–$C_{21}$ groups. This action responds to a petition by Chevron Chemical Co.

**DATES:** Effective March 15, 1989; written objections and requests for a hearing by April 14, 1989.

**ADDRESS:** Written objections may be sent to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Julius Smith, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5690.

**SUPPLEMENTARY INFORMATION:** In a notice published in the **Federal Register** of September 19, 1985 (50 FR 38035) FDA announced that a food additive petition (FAP 5B3878) had been filed by Chevron Chemical Co., 575 Market St., P.O. Box 3744, San Francisco, CA 94119, proposing that § 176.180 *Components of paper and paperboard in contact with dry food* (21 CFR 176.180) be amended to provide for the safe use of a mixture of substituted polyethylene glycol succinates in the manufacture of paper and paperboard used in contact with dry food.

FDA, in its evaluation of the safety of this additive, has reviewed the proposed nomenclature for the additive and the safety of both the additive and the starting materials used to manufacture the additive. The agency concludes that a more appropriate name for this additive is mono- and di(2-alkenyl)succinyl esters of polyethylene glycol containing not less than 90 percent of the diester product and in Which the alkenyl groups are derived from olefins that contain not less than 95 percent of $C_{18}$–$C_{21}$ groups. The agency also finds that although the additive has not been found to cause cancer, it may contain minute amounts of ethylene oxide and 1,4-dioxane as impurities carried through the production process. Ethylene oxide and 1,4-dioxane have been shown to cause cancer in test animals. Residual amounts of reactants and impurities in reactants, such as these chemicals, are commonly found as contaminants in chemical products, including food additives.

**I. Determination of Safety**

Under section 409(c)(3)(A) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 348(c)(3)(A)), the so-called "general safety clause" of the statute, a food additive cannot be approved for a particular use unless a fair evaluation of the data available to FDA establishes that the additive is safe for that use. The concept of safety embodied in the Food Additives Amendment of 1958 is explained in the

VOL 54 ISS 49 MR 15 1989 UMI

legislative history of the provision: "Safety requires proof of a reasonable certainty that no harm will result from the proposed use of an additive. It does not—and cannot—require proof beyond any possible doubt that no harm will result under any conceivable circumstance." (H. Rept. 2284, 85th Cong., 2d Sess. 4 (1958).) This definition of safety has been incorporated into FDA's food additive regulations (21 CFR 170.3(i)). The anticancer or Delaney clause of the Food Additives Amendment (section 409(c)(3)(A) of the act (21 U.S.C. 348(c)(3)(A)) provides further that no food additive shall be deemed to be safe if it is found to induce cancer when ingested by man or animal.

In the past, FDA has often refused to approve a use of an additive that contained or was suspected of containing even minor amounts of a carcinogenic chemical, even though the additive as a whole had not been shown to cause cancer. The agency now believes, however, that developments in scientific technology and experience with risk assessment procedures make it possible for FDA to establish the safety of additives that contain a carcinogenic chemical but that have not themselves been shown to cause cancer.

In the preamble to the final rule permanently listing D&C Green No. 6, published in the Federal Register of April 2, 1982 (47 FR 14136), FDA explained the basis for approving the use of a color additive that had not been shown to cause cancer, even though it contains a carcinogenic impurity. Since that decision, FDA has approved the use of other color additives and food additives on the same basis.

An additive that has not been shown to cause cancer, but that contains a carcinogenic impurity, may properly be evaluated under the general safety clause of the statute using risk assessment procedures to determine whether there is a reasonable certainty that no harm will result from the proposed use of the additive.

The agency's position is supported by *Scott v. FDA*, 728 F.2d 322 (6th Cir. 1984). That case involved a challenge to FDA's decision to approve the use of D&C Green No. 5, which contains a carcinogenic chemical but has itself not been shown to cause cancer. Relying heavily on the reasoning in the agency's decision to list this color additive, the U.S. Court of Appeals for the Sixth Circuit rejected the challenge to FDA's action and affirmed the listing regulation.

## II. Safety of Petitioned Use

FDA estimates that the petitioned use in paper and paperboard products that contact dry food of the additive mono- and di(2-alkenyl)succinyl esters of polyethylene glycol containing not less than 90 percent of the diester product and in which the alkenyl groups are derived from olefins that contain not less than 95 percent of $C_{18}$–$C_{21}$ groups will result in levels of exposure to this additive that are quite small. FDA does not ordinarily consider chronic testing to be necessary to determine the safety of an additive whose use will result in such low exposure levels (Refs. 1 and 2), and the agency has not required such testing here. However, the agency has reviewed available acute and subchronic studies in the rat and a mutagenicity test with the additive. No adverse effects were reported in these studies.

As stated above, the additive may Contain 1,4-dioxane and ethylene oxide, substances that have been shown to cause cancer in test animals. These impurities may be present as a result of impurities in reactants used to produce the additive. Because the additive itself has not been shown to cause cancer, however, the anticancer clause does not apply.

FDA has evaluated the safety of this additive under the general safety clause, considering all available data and using risk assessment procedures to estimate the upper bound limit of risk presented by the carcinogenic chemicals, 1,4-dioxane and ethylene oxide, that may be present as impurities in the additive. Based on this evaluation, the agency has concluded that the additive is safe under the proposed conditions of use.

The risk assessment procedures that FDA used in this evaluation are similar to the methods that the agency has used to examine the risk associated with the presence of minor carcinogenic impurities in various other food and color additives that contain carcinogenic impurities (49 FR 13018; April 2, 1984). This risk evaluation of the carcinogenic impurities has two aspects: (1) Assessment of the worst-case exposure to the impurities from the proposed use of the additive; and (2) extrapolation of the risk observed in the animal bioassays to the conditions of probable exposure to humans.

### *A. 1,4-Dioxane*

Based on the fraction of the daily diet that may be in contact with surfaces containing the additive mono- and di(2-alkenyl)succinyl esters of polyethylene glycol containing not less than 90 percent of the diester product and in which the alkenyl groups are derived from olefins that contain not less than 95 percent of $C_{18}$ $C_{21}$ groups, and assuming 100 percent migration of the 1,4-dioxane that could be present in the paper containing the additive, FDA estimated the hypothetical worst-case exposure to 1,4-dioxane to be 4.5 nanograms per person per day (Ref. 5). The agency used data from a carcinogenesis bioassay on 1,4-dioxane conducted for the National Cancer Institute (Ref. 4) to estimate the upper bound level of lifetime human risk from the exposure to this impurity that might result from the proposed use of the additive. The results of the bioassay on 1,4-dioxane demonstrated that the material was carcinogenic for female rats under the conditions of the study. The test material caused significantly increased incidence of squamous cell carcinomas and hepatocellular tumors in female rats.

The Center for Food Safety and Applied Nutrition's Cancer Assessment Committee (the Committee) reviewed this bioassay and other relevant data available in the literature and concluded that the findings of carcinogenicity were supported by this information on 1,4-dioxane. The Committee further concluded that the 1,4-dioxane bioassay provided the appropriate basis on which to calculate an estimate of the upper bound level of lifetime risk from potential exposure to 1,4-dioxane stemming from the proposed use of the additive.

The agency used a quantitative risk assessment procedure ( linear proportional model) to extrapolate from the dose used in the animal experiment to the very low doses encountered under the proposed conditions of use. This procedure is not likely to underestimate the actual risk from very low doses and may, in fact, exaggerate it because the extrapolation models used are designed to estimate the maximum risk consistent with the data. For this reason, the estimate can be used with confidence to determine, to a reasonable certainty, whether any harm will result from the proposed conditions and levels of use of the food additives.

Based on a worst-case exposure of 4.5 nanograms per person per day, FDA estimates that the upper bound limit of individual lifetime risk from the potential exposure to 1,4-dioxane from use of the subject additive is $1.6\times10^{-10}$, or less than 2 in 10 billion (Ref. 6). Because of numerous conservatisms in the exposure estimate, lifetime averaged individual exposure to 1,4-dioxane is expected to be substantially less than the estimated daily intake, and, therefore, the calculated upper bound limit of risk would be less. Thus the agency concludes that there is a reasonable certainty of no harm from the exposure to 1,4-dioxane that might result from the proposed use of the additive.

### *B. Ethylene Oxide*

Based on the fraction of the daily diet that may be in contact with surfaces containing the additive mono- and di(2-alkenyl)succinyl esters of polyethylene glycol containing not less than 90 percent of the diester product and in which the alkenyl groups are derived from olefins that contain not less than 95 percent of $C_{18}$–$C_{21}$ groups (Ref. 5), FDA estimated the hypothetical worst-case exposure to ethylene oxide from the use of the additive to be 4.5 nanograms per person per day. The agency used data from a carcinogenesis bioassay on ethylene oxide conducted by the Institute of Hygiene, University of Mainz, Federal Republic of Germany (Ref. 3), to estimate the upper bound level of lifetime human risk from the exposure to this impurity that might result from the proposed use of the additive. The results of the bioassay on ethylene oxide demonstrated that the material was carcinogenic for female rats under the conditions of the study. The test material caused significantly increased incidence of squamous cell carcinoma of the forestomach and carcinoma in situ of the glandular stomach.

The Committee reviewed this bioassay and other relevant data available in the literature and concluded that the findings of carcinogenicity were supported by this information on ethylene oxide. The Committee further concluded that the ethylene oxide bioassay provided the appropriate basis on which to calculate an estimate of the upper bound level of lifetime risk from potential exposure to ethylene oxide stemming from the proposed use of the additive.

Based on a worst-case exposure of 4.5 nanograms per person per day, FDA estimates that the upper bound limit of individual lifetime risk from the potential exposure to ethylene oxide from the use of the subject additive is $8\times10^{-9}$, or less than 8 in 1 billion (Ref. 6). Because of numerous conservatisms in the exposure estimate, lifetime-averaged individual exposure to ethylene oxide is expected to be substantially less than the estimated daily intake, and, therefore, the calculated upper bound limit of risk would be less. Thus, the agency concludes that there is a reasonable certainty of no harm from the exposure to ethylene oxide that might result from the proposed use of the additive.

## III. Need for Specifications

The agency has also considered whether specifications are necessary to control the amounts of 1,4-dioxane and ethylene oxide in the additive. The agency finds that specifications are not necessary for the following reasons: (1) Because of the low levels at which 1,4-dioxane and ethylene oxide may be expected to remain as impurities following production of the additive, the agency would not expect these impurities to become components of food at other than extremely low levels; and (2) the upper bound limit of lifetime risk from exposure to these impurities, even under worst-case assumptions, is very low, less than 2 in 10 billion for 1,4-dioxane and less than 8 in 1 billion for ethylene oxide.

## IV. Conclusion on Safety

FDA has evaluated the data in the petition and other relevant material and concludes that the proposed use of the additive in paper and paperboard products in contact with dry food is safe, and that § 176.180 (21 CFR 176.180) should be amended as set forth below.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action. FDA has concluded that the action will not have a significant impact on the human environment, and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding, contained in an environmental assessment, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

## V. Objections

Any person who will be adversely affected by this regulation may at any time on or before April 14, 1989 file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

## VI. References

The following references have been placed on display in the Dockets Management Branch (address above) and may be seen by interested persons between 9 a.m. and 4 p.m., Monday through Friday.

## 21 CFR Part 177

**[Docket No. 87F–0360]**

## Indirect Food Additives: Polymers

**AGENCY:** Food and Drug Administration.

**ACTION:** Final rule.

**SUMMARY:** The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the safe use of polyoxyethylene-grafted polydimethylsiloxane as an extrusion aid in the production of olefin polymers for food contact. This action is in response to a petition filed by Union Carbide Corp.

**DATES:** Effective March 15, 1989; written objections and requests for a hearing by April 14, 1989.

**ADDRESS:** Written objections to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Hortense S. Macon, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5690.

**SUPPLEMENTARY INFORMATION:** In a notice published in the **Federal Register** of December 15, 1987 (52 FR 47637), FDA announced that a food additive petition (FAP 7B4041) had been filed by Union Carbide Corp., Bound Brook, NJ 08805, proposing that § 177.1520 *Olefin polymers* (21 CFR 177.1520) be amended to provide for the safe use of polyoxyethylene-grafted polydimethylsiloxane as an extrusion aid in the production of olefin polymers for use in contact with food.

FDA, in its evaluation of the safety of this additive, reviewed the safety of both the additive and the starting materials used to manufacture the additive. Although polyoxyethylene-grafted polydimethylsiloxane has not been found to cause cancer, it may contain minute amounts of ethylene oxide and 1,4-dioxane as impurities from its production. These chemicals have been shown to cause cancer in test animals. Residual amounts of reactants and byproducts, such as these chemicals, are commonly found as contaminants in chemical products, including food additives.

### I. Determination of Safety

Under section 409(c)(3)(A) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 348(c)(3)(A)), the so-called "general safety clause" of the statute, a food additive cannot be approved for a particular use unless a fair evaluation of the data available to FDA establishes that the additive is safe for that use. The concept of safety embodied in the Food Additives Amendment of 1958 is explained in the legislative history of the provision: "Safety requires proof of a reasonable certainty that no harm will result from the proposed use of an additive. It does not—and cannot—require proof beyond any possible doubt that no harm will result under any conceivable circumstance." (H. Rept. No. 2284, 85th Cong., 2d Sess. 4 (1958).) This definition of safety has been incorporated into FDA's food additive regulations (21 CFR 170.3(i)). The anticancer or Delaney clause of the Food Additives Amendment (section 409(c)(3)(A) of the act (21 U.S.C. 348(c)(3)(A))) provides further that no food additive shall be deemed to be safe if it is found to induce cancer when ingested by man or animal.

In the past, FDA has often refused to approve the use of an additive that contained or was suspected of containing even minor amounts of a carcinogenic chemical, even though the additive as a whole had not been shown to cause cancer. The agency now believes, however, that developments in scientific technology and experience with risk assessment procedures make it possible for FDA to establish the safety of additives that contain carcinogenic chemicals but that have not themselves been shown to cause cancer.

In the preamble to the final rule permanently listing D&C Green No. 6, published in the **Federal Register** of April 2, 1982 (47 FR 14138), FDA explained the basis for approving the use of a color additive that had not been shown to cause cancer, even though it contains a carcinogenic impurity. Since that decision, FDA has approved the use of other color additives and food additives on the same basis.

An additive that has not been shown to cause cancer, but that contains a carcinogenic impurity, may properly be evaluated under the general safety clause of the statute using risk assessment procedures to determine whether there is a reasonable certainty that no harm will result from the proposed use of the additive.

The agency's position is supported by *Scott* v. *FDA*, 728 F. 2d 322 (8th Cir. 1984). That case involved a challenge to FDA's decision to approve the use of D&C Green No. 5, which contains a carcinogenic chemical but has itself not been shown to cause cancer. Relying heavily on the reasoning in the agency's decision to list this color additive, the U.S. Court of Appeals for the Sixth Circuit rejected the challenge to FDA's action and affirmed the listing regulation.

### II. Safety of Petitioned Use

FDA estimates that the petitioned use of polyethylene-grafted polydimethylsiloxane will result in extremely low levels of exposure to this additive. The agency calculated the estimated daily intake of the additive based on considerations such as the migration of the additive under the most severe intended use conditions and the types of food-contact articles that may contain this substance. The agency estimated the daily intake for the additive to be 428 micrograms per person per day.

FDA does not ordinarily consider chronic testing to be necessary to determine the safety of an additive

whose use will result in such low exposure levels (Refs. 1 and 2), and has not required such testing here. However, the agency has reviewed available data from acute studies, subchronic rat and dog studies, and mutagenicity tests with the additive. No adverse effects were observed in these studies, except for marginal histopathology effects at the highest dose level in the subchronic dog study. Based upon the agency's further review of this subchronic dog study, FDA determined that there is an adequate margin of safety for the proposed use of the additive.

Because polyoxyethylene-grafted polydimethylsiloxane has not been shown to cause cancer, the anticancer clause does not apply to it. However, FDA has evaluated the safety of this additive under the general safety clause, considering all available data and using risk assessment procedures to estimate the upper bound limit of risk presented by the carcinogenic chemicals that may be present as impurities in this additive. Based on this evaluation, the agency has concluded that the additive is safe under the proposed conditions of use.

The risk assessment procedures that FDA used in this evaluation are similar to the methods that the agency has used to examine the risk associated with the presence of minor carcinogenic impurities in various other food and color additives that contain carcinogenic impurities (see, e.g., 49 FR 13018 and 13019; April 2, 1984). This risk evaluation of the carcinogenic impurities ethylene dioxide and 1,4-dioxane has two aspects: (1) Assessment of the worst case exposure to the impurities from the proposed use of the additive and (2) extrapolation of the risk observed in the animal bioassays to the conditions of probable exposure to humans.

*A. 1,4-Dioxane*

Based on the fraction of the daily diet that may be in contact with surfaces containing polyoxyethylene-grafted polydimethylsiloxane, and on the level of 1,4-dioxane that may be present in the additive (Ref. 5), FDA estimated the hypothetical worst-case exposure to 1,4-dioxane from the use of this additive to be 0.18 microgram per person per day. The agency used data in a carcinogenesis bioassay on 1,4-dioxane conducted for the National Cancer Institute (Ref. 4) to estimate the upper-bound level of lifetime human risk from exposure to this chemical stemming from the proposed use of the additive. The results of the bioassay on 1,4-dioxane indicated that the material was carcinogenic for female rats under the conditions of the study. The test material caused significantly increased incidence of squamous cell carcinomas and hepatocellular tumors in female rats.

The Center for Food Safety and Applied Nutrition's Cancer Assessment Committee (the committee) reviewed this bioassay and other relevant data available in the literature and concluded that the findings of carcinogenicity were supported by this information on 1,4-dioxane. The committee further concluded that the 1,4-dioxane bioassay provided the appropriate basis on which to calculate an estimate of the upper-bound level of lifetime human cancer risk from potential exposure to 1,4-dioxane stemming from the proposed use of the additive.

The agency used a quantitative risk assessment procedure (linear proportional model) to extrapolate from the dose used in the study with male rats (the most sensitive animals) to the very low doses encountered under the proposed conditions of use. This procedure is not likely to underestimate the actual risk from very low doses and may, in fact, exaggerate it because the extrapolation models used are designed to estimate the maximum risk consistent with the data. For this reason, the estimate can be used with confidence to determine to a reasonable certainty whether any harm will result from the proposed conditions and levels of use of the food additive.

Based on a worst-case exposure of 0.18 microgram per person per day, FDA estimates that the upper-bound limit of individual lifetime risk from potential exposure to 1,4-dioxane from use of the subject additive is $6.3 \times 10^{-9}$ or less than 1 in 158 million. (Ref. 6). Because of numerous conservatisms in the exposure estimate, lifetime-averaged individual exposure to 1,4-dioxane is expected to be substantially less than the estimated daily intake, and therefore, the calculated upper-bound risk would be less. Thus, the agency concludes that there is a reasonable certainty of no harm from the exposure to 1,4-dioxane that might result from the proposed use of the additive.

*B. Ethylene Oxide*

Based on the fraction of the daily diet that may be in contact with surfaces containing polyoxyethylene-grafted polydimethylsiloxane, and on the level of ethylene oxide that may be present in the additive, FDA estimated the hypothetical worst-case exposure to ethylene oxide from the use of this additive to be 0.18 microgram per person per day (Ref. 5). The agency used data from a carcinogenesis bioassay on ethylene oxide conducted by the Institute of Hygiene, University of Mainz, Federal Republic of Germany (Ref. 3), to estimate the upper-bound level of lifetime human risk from exposure to this chemical stemming from the proposed use of this additive. The results of the bioassay on ethylene oxide indicated that this material was carcinogenic for female rats under the conditions of the study. The test material caused significantly increased incidence of squamous cell carcinoma of the forestomach and carcinoma *in situ* of the glandular stomach.

The Center for Food Safety and Applied Nutrition's Cancer Assessment Committee reviewed this bioassay and other relevant data available in the literature and concluded that the finding of carcinogenicity was supported by this information on ethylene oxide. The committee further concluded that the ethylene oxide bioassay provided an appropriate basis on which to estimate an upper-bound level of human risk from potential exposure to ethylene oxide stemming from the proposed use of the additive.

Based on a worst-case exposure of 0.18 microgram per person per day, FDA estimates that the upper bound limit of individual lifetime risk from potential exposure to ethylene oxide from the use of the subject additive is $3.3 \times 10^{-7}$ or less than 1 in 3 million (Ref. 6). Because of numerous conservatisms in the exposure estimate, lifetime-averaged individual exposure to ethylene oxide is expected to be substantially less than the estimated daily intake, and therefore, the calculated upper-bound risk would be less. Thus, the agency concludes that there is a reasonable certainty of no harm from the exposure to ethylene oxide that might result from the proposed use of the additive.

*C. Need for Specifications*

The agency has also considered whether specifications are necessary to control the amount of 1,4-dioxane and ethylene oxide in the food additive. The agency finds that specifications are not necessary for the following reasons: (1) Because of the low levels at which ethylene oxide and 1,4-dioxane may be expected to remain as impurities following production of the additive, the agency would not expect these impurities to become components of food at other than extremely small levels; and (2) the upper-bound limit of lifetime risk from exposure to these impurities, even under worst-case assumptions, is very low, less than 1 in 158 million for 1,4-dioxane and less than 1 in 3 million for ethylene oxide.

VOL 54 ISS 49 MR 15 1989 UMI

*D. Conclusion on Safety*

FDA has evaluated the available data and other relevant material and concludes that the proposed use of the additive in olefin polymers is safe, and that § 177.1520 should be amended in paragraph (b) as set forth below.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action. FDA has concluded that the action will not have a significant impact on the human environment, and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding, contained in an environmental assessment, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

**III. References**

The following references have been placed on display in the Dockets Management Branch (address above) and may be seen by interested persons between 9 a.m. and 4 p.m., Monday through Friday.

**IV. Objections**

Any person who will be adversely affected by this regulation may at any time on or before April 14, 1989, file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

**List of Subjects in 21 CFR Part 177**

Food additives, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, Part 177 is amended as follows:

**PART 177—INDIRECT FOOD ADDITIVES: POLYMERS**

1. The authority citation for 21 CFR Part 177 continues to read as follows:

**Authority:** Secs. 201(s), 409, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348); 21 CFR 5.10 and 5.61.

2. Section 177.1520 is amended in paragraph (b) by alphabetically adding a new entry in the table under the headings "Substance" and "Limitations" to read as follows:

**§ 177.1520 Olefin polymers.**

* * * * *

(b) * * *

| Substance | Limitations |
|---|---|
| * * * | * * * |
| Polyoxyethylene-grafted polydimethylsiloxane (CAS Reg. No. 68937–54–2). | For use as an extrusion aid in the production of extruded olefin polymers that comply with § 177.1520(c) at levels not to exceed 0.3 percent by weight of the polymer. The finished polymer is used in contact with foods under conditions of use B through H described in Table 2 of § 176.170 of this chapter. |

BILLING CODE 4160–01–M

---

**DEPARTMENT OF JUSTICE**

**Drug Enforcement Administration**

**21 CFR Part 1308**

**Exempt Chemical Preparations**

**AGENCY:** Drug Enforcement Administration (DEA).

**ACTION:** Interim rule and request for comments.

**SUMMARY:** This interim rule amends § 1308.24 of Title 21 of the Code of Federal Regulations. The below-listed chemical preparations and mixtures which contain controlled substances replace the list of exempt chemical preparations set forth in § 1308.24(i). This action is DEA's periodic review of the exempt chemical preparation list. Preparations included in the list are exempted from the application of specific provisions of the Comprehensive Drug Abuse Prevention and Control Act of 1970, and from certain Drug Enforcement Administration regulations.

**DATES:** Effective date: April 1, 1989. Comments must be submitted on or before April 14, 1989.

**ADDRESS:** Comments should be submitted to the Administrator, Drug Enforcement Administration, 1405 I Street, NW., Washington, DC 20537. Attn: Federal Register Representative.

**FOR FURTHER INFORMATION CONTACT:** Howard McClain, Jr., Chief, Drug Control Section, Telephone: (202) 633–1366.

**SUPPLEMENTARY INFORMATION:** The Controlled Substances Act as amended by the Dangerous Drug Diversion Control Act of 1984 authorizes the Attorney General in accordance with 21 U.S.C. 811(g)(3)(B) to exempt from specific provisions of the Act, a compound, mixture, or preparation which contains any controlled substance, which is not for administration to a human being or animal and which is packaged in such form or concentration, or with adulterants or denaturants, so that as packaged it does not present any significant potential for abuse.

The Deputy Assistant Administrator of the Drug Enforcement Administration's Office of Diversion Control has received applications pursuant to § 1308.23 of Title 21 of the Code of Federal Regulations requesting approval of exempt status provided for in 21 CFR 1308.24. The Deputy Assistant Administrator hereby finds that each of the following preparations and mixtures is intended for laboratory, industrial, educational, or special research purposes, is not intended for general administration to man or animal, and either (a) contains no narcotic controlled substances and is packaged in such a form or concentration that the packaged quantity does not present any significant potential for abuse, (b) contains either a narcotic or non-narcotic controlled substance and one or more adulterating or denaturing agents in such a manner, combination, quantity, proportion, or concentration that the preparation or mixture does not present any potential for abuse, or (c) the formulation of such preparation or mixture incorporates methods of denaturing or other means so that the controlled substance cannot in practice be removed, and therefore the preparation or mixture does not present any significant potential for abuse. The Deputy Assistant Administrator further finds that exemption of the following chemical preparations and mixtures is consistent with the public health and safety as well as the needs of the researchers, chemical analysts, and suppliers of these products.

The Deputy Assistant Administrator for the Office of Diversion Control hereby certifies that these matters will have no significant impact upon small businesses or other entities within the meaning and intent of the Regulatory Flexibility Act, 5 U.S.C. 601 et seq. The addition of preparations to the list of exempt chemical preparations has the effect of exempting them from certain sections of the Controlled Substances Act of 1970 and its regulations.

It has been determined that these changes are internal matters which do not require formal OMB review.

**List of Subjects in 21 CFR Part 1308**

Administrative practice and procedure, Drug traffic control, Narcotics, Prescription drugs.

Under the authority vested in the Attorney General by section 202(d) of the Act (21 U.S.C. 811(g)(3)(B)) and delegated to the Administrator of the Drug Enforcement Administration by regulations of the Department of Justice (28 CFR Part 0.100), and redelegated to the Deputy Assistant Administrator of the Drug Enforcement Administration, Office of Diversion Control, pursuant to 47 FR 43370, the Deputy Assistant Administrator of the Office of Diversion Control hereby amends 21 CFR Part 1308 as set forth below.

**PART 1308—SCHEDULE OF CONTROLLED SUBSTANCES**

1. The authority for Part 1308 continues to read:

**Authority:** 21 U.S.C. 811, 812, 871(b).

2. In § 1308.24(i) the table is revised to read as follows:

**§ 1308.24 Exempt chemical preparations.**

(i) * * *

**Gene R. Haislip,**

*Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.*

Dated: February 28, 1989.

| Abbott Laboratories | Secobarbital Stock Standard, No. 97171 | Bottle: 125ml | 11/21/85 |
| Abbott Laboratories | Spectrum Phenobarbital Calibrator II-VI, Nos. 9755, 9757, 9759, 9761, 9763. | Bottle: 4ml | 10/03/85 |
| Abbott Laboratories | Spectrum Phenobarbital Control, Nos. 9676, 9678, 9680. (L,M,H). | Bottle: 4ml | 10/03/85 |
| Abbott Laboratories | T 4 RIA (PEG) Diagnostic Kit | Kit: 500 tests, 100 tests, 50 tests. | 04/22/76 |
| Abbott Laboratories | TDx Amphetamine/Methamphetamine Calibrator, No. 9568-01. | Bottles: 4ml | 08/23/85 |
| Abbott Laboratories | TDx Amphetamine/Methamphetamine Controls, No. 9568-10. | Bottles: 4ml | 08/23/85 |
| Abbott Laboratories | TDx Barbiturates Calibrators No. 9669 B-F | 5 ml Vial | 07/01/88 |
| Abbott Laboratories | TDx Barbiturates Calibrators No. 9669-01 | Kit: 5 Vials, 5 ml each | 07/01/88 |
| Abbott Laboratories | TDx Barbiturates Calibrators, B-F No. 9669 | Bottle: 4 ml | 10/06/85 |
| Abbott Laboratories | TDx Barbiturates Control L,H No. 9669 L,H | 5 ml Vial | 07/01/88 |
| Abbott Laboratories | TDx Barbiturates Control, L and H No. 9669 | Bottle: 4ml | 10/06/85 |
| Abbott Laboratories | TDx Barbiturates Controls No. 9669-10 | Kit: 2 Vials, 5 ml each | 07/01/88 |
| Abbott Laboratories | TDx Benzodiazepines Calibrator No. 9674 B-F | 5 ml Vial | 07/18/88 |
| Abbott Laboratories | TDx Benzodiazepines Calibrators No. 9674-01 | Kit: 5 Vials, 5 ml each | 07/18/88 |
| Abbott Laboratories | TDx Benzodiazepines Calibrators, No. 9674-01 | Bottles: 4ml | 04/21/86 |
| Abbott Laboratories | TDx Benzodiazepines Controls L,H No. 9674 L,H | 5 ml Vial | 07/18/88 |
| Abbott Laboratories | TDx Benzodiazepines Controls L,H No. 9674-10 | Kit: 2 Vials, 5 ml each | 07/18/88 |
| Abbott Laboratories | TDx Benzodiazepines Controls, No. 9674-10 | Bottles: 4ml | 04/21/86 |
| Abbott Laboratories | TDx Cannabinoids Calibrators B-F (9671-02) | Bottle: 5 ml | 06/19/87 |
| Abbott Laboratories | TDx Cannabinoids Calibrators B-F (No. 9671-01) | Bottles: 5 ml | 10/24/86 |
| Abbott Laboratories | TDx Cannabinoids Controls L,M, and H (9671-11) | Bottle: 5 ml | 06/19/87 |
| Abbott Laboratories | TDx Cannabinoids Controls L,M,H (No. 9671-10) | Bottles: 5 ml | 10/24/86 |
| Abbott Laboratories | TDx Cannabinoids Fluorescein Tracer Solution (No. 9671-T). | Bottle: 5 ml | 10/27/86 |
| Abbott Laboratories | TDx Cannabinoids Reagent Pack (No. 9671-20) | 100 tests | 10/27/86 |
| Abbott Laboratories | TDx Cocaine Metabolite Calibrator B-F No. 9670 B-F | 5 ml Vial | 07/07/88 |
| Abbott Laboratories | TDx Cocaine Metabolite Calibrator, B-F No. 9670 | Bottle: 4ml | 10/02/85 |
| Abbott Laboratories | TDx Cocaine Metabolite Calibrators No. 9670-01 | Kit: 5 Vials, 5 ml each | 07/07/88 |
| Abbott Laboratories | TDx Cocaine Metabolite Control L,H No. 9670 L,H | 5 ml Vial | 07/07/88 |
| Abbott Laboratories | TDx Cocaine Metabolite Control, L and H No. 9669 | Bottle: 4ml | 10/02/85 |
| Abbott Laboratories | TDx Cocaine Metabolite Controls No. 9670-10 | Kit: 2 Vials, 5 ml each | 07/07/88 |
| Abbott Laboratories | TDx Cocaine Metabolite Fluorescein Tracer Solution No. 9670 T0001. | Kit: 100 Vials, 5 ml each | 07/07/88 |
| Abbott Laboratories | TDx Cocaine Metabolite Fluorescein Tracer Solution No. 9670-T. | Box: 5 ml Vial | 07/07/88 |
| Abbott Laboratories | TDx Cocaine Metabolite Reagent Pack | Reagent well: 5ml | 10/02/85 |
| Abbott Laboratories | TDx Cocaine Metabolite Reagent Pack No. 9670-20 | Kit: 100 Tests | 07/07/88 |
| Abbott Laboratories | TDx Multiconstituent Controls L,M,H (No. 9687-L,M,H) | Bottle: 5 ml | 09/03/87 |
| Abbott Laboratories | TDx Opiates Calibrators, B-F No. 9673 | 5 ml Vial | 05/07/86 |
| Abbott Laboratories | TDx Opiates Controls, L and H No. 9673 | Vials: 5ml | 05/07/86 |
| Abbott Laboratories | TDx Opiates Fluorescein Tracer Solution No. 9673 T0001. | Box: 10 Vials, 5 ml each | 07/08/88 |
| Abbott Laboratories | TDx Opiates Reagent, Pack No. 9673-20, 100 tests | Reagent Well: 5ml , 100 tests | 05/07/86 |
| Abbott Laboratories | TDx Phencyclidine Bulk Calibrator B-F No. 9672 B-F | Carboy: 9.5, 19 L | 07/18/88 |

| Syva Co | Emit 700 Amphetamine Assay Catalog No. 3C919 | Bottle: 180ml | 10/12/84 |
| Syva Co | Emit 700 Barbiturate Assay Catalog No. 3D919 | Bottle: 180ml | 10/12/84 |
| Syva Co | Emit 700 Calibrator A Catalog No. 3A919 | Bottle: 3ml | 10/05/84 |
| Syva Co | Emit 700 Calibrator B Catalog No. 3A969 | Bottle: 3ml | 10/05/84 |
| Syva Co | Emit 700 Cannabinoid (100) Assay Catalog No. 3M919. | Bottle: 180ml | 10/12/84 |
| Syva Co | Emit 700 Cannabinoid (100) Calibrator Catalog No. 3M969. | Bottle: 3ml | 10/09/84 |
| Syva Co | Emit 700 Cannabinoid (20) Assay, Catalog No. 3M959 | Plastic Bottle: 180ml | 09/15/86 |
| Syva Co | Emit 700 Cannabinoid Control Set Catalog No. 3M969 | 2 Bottles: 3ml | 10/09/84 |
| Syva Co | Emit 700 Cocaine Metabolite Assay Catalog No. 3H919. | Bottle: 180ml | 10/12/84 |
| Syva Co | Emit 700 Control Set A Catalog No. 3A939 | 2 Bottles: 3ml | 10/09/84 |
| Syva Co | Emit 700 Control Set B Catalog No. 3A969 | 2 Bottles: 3ml | 10/09/84 |
| Syva Co | Emit 700 Methaqualone Assay Catalog No. 3Q919 | Bottle: 180ml | 10/19/84 |
| Syva Co | Emit 700 Opiate Assay Catalog No. 3B919 | Bottle: 180ml | 10/12/84 |
| Syva Co | Emit 700 Phencyclidine Assay Catalog No. 3J919 | Bottle: 180ml | 10/12/84 |
| Syva Co | Emit AED-No. 1 Calibrator | Vial: 3ml , Lyophilized | 08/27/74 |
| Syva Co | Emit AED-No. 2 Calibrator | Vial: 3ml , Lyophilized | 08/27/74 |
| Syva Co | Emit AED-No. 3 Calibrator | Vial: 3ml , Lyophilized | 08/27/74 |
| Syva Co | Emit AED-No. 4 Calibrator | Vial: 3ml , Lyophilized | 08/27/74 |
| Syva Co | Emit AED-No. 5 Calibrator | Vial: 3ml , Lyophilized | 08/27/74 |
| Syva Co | Emit Convenience Pack: T-Uptake Assay (Thyroid Hormone Binding Ratio). | Kit: 100 Tests Ea. Kit-Plastic Cassette: 16 ml | 05/09/88 |
| Syva Co | Emit HVA Amphetamine Assay Catalog No. 3C619 | Kit: 2500 Assays | 06/30/88 |
| Syva Co | Emit HVA Barbiturate Assay Catalog No. 3D619 | Kit: 2500 Assays | 06/30/88 |
| Syva Co | Emit HVA Calibrator Kit Catalog No. 3A619 | Kit: 500 Tests Each Kit -2 Glass Bottles 100 ml | 05/10/88 |
| Syva Co | Emit HVA Cannabinoid 100 ng Assay Control Kit, Catalog No. 3M739. | Kit: 2 Bottles, 50 ml. ea. | 07/15/88 |
| Syva Co | Emit HVA Cannabinoid 100 ng. Assay Calibrator Kit, Catalog No. 3M729. | Kit: 3 Bottles 50 ml. ea. | 07/15/88 |
| Syva Co | Emit HVA Cannabinoid 100 ng. Assay Kit, Catalog No. 3M719. | Kit: 2500 Assays | 07/15/88 |
| Syva Co | Emit HVA Cocaine Metabolite Assay Catalog No. 3H619. | Bottle: 125 ml | 05/10/88 |
| Syva Co | Emit HVA Control Kit Catalog No. 3A629 | Kit: 500 Tests Each Kit-2 Glass Bottles -100 ml | 05/10/88 |

| Supplier | Product | Form of product | Date |
|---|---|---|---|
| Syva Co. | Emit HVA Opiate Assay Catalog No. 3B619 | Bottle: 125 ml | 05/10/88 |
| Syva Co. | Emit HVA Phencyclidine Assay Catalog No. 3J619 | Bottle: 125 ml | 05/19/88 |
| Syva Co. | Emit Phenobarbital Enzyme Reagent B | Vial: 6 ml, Lyophilized | 06/27/74 |
| Syva Co. | Emit Qat Phenobarbital Bulk Powder Reagent | Steel Drum: 7 gallon | 06/05/86 |
| Syva Co. | Emit Qat Primidone Assay Catalog No. 6D619 | Glass Vial: 6ml, 50 Vials/Kit | 11/12/85 |
| Syva Co. | Emit Serum Barbiturate-Enzyme Reagent B | Bottle: 3ml | 05/22/79 |
| Syva Co. | Emit Tox Serum Benzodiazepine Assay Kit Containing: Emit Enzyme Reagent B. | Bottle: 3ml | 02/01/79 |
| Syva Co. | Emit d.a.u. Amphetamine Assay Catalog Nos. 3C019, 3C119. | Kit: 100 tests, 1000 tests | 09/27/84 |
| Syva Co. | Emit d.a.u. Benzodiazepine Assay Catalog Nos. 3F019, 3F119. | Kit: 100 tests, 1000 tests | 09/27/84 |
| Syva Co. | Emit d.a.u. Cannabinoid 100 ng Assay, Catalog No. 3M119. | Kit: 1000 tests | 09/12/86 |
| Syva Co. | Emit d.a.u. Cannabinoid 20ng Assay Catalog No. 3M619. | Kit: 100 tests | 02/10/86 |
| Syva Co. | Emit d.a.u. Cannabinoid 20ng Enzyme Reagent B | Vial: 10ml Lyophilized Powder | 02/10/86 |
| Syva Co. | Emit d.a.u. Cannabinoid Assay Catalog No. 3M019 | Kit: 100 tests | 09/24/84 |
| Syva Co. | Emit d.a.u. Cannabinoid Urine Calibrator Set | Kit: 3 Vials, 3ml Each | 01/03/80 |
| Syva Co. | Emit d.a.u. Cocaine Metabolite Assay Catalog Nos. 3H019, 3H119. | Kit: 100 tests, 1000 tests | 09/27/84 |
| Syva Co. | Emit d.a.u. Low Calibrator A | Bottle: 5ml | 07/20/84 |
| Syva Co. | Emit d.a.u. Low Calibrator A, Catalog No. 3C579 | 5 ml vial | 10/06/88 |
| Syva Co. | Emit d.a.u. Medium Calibrator A, Catalog No. 3C569 | 5 ml vial | 10/06/88 |
| Syva Co. | Emit d.a.u. Medium Calibrator B | Bottle: 5ml | 06/03/84 |
| Syva Co. | Emit d.a.u. Methadone Assay Catalog Nos. 3E019, 3E119. | Kit: 100 tests, 1000 tests | 10/05/84 |
| Syva Co. | Emit d.a.u. Monoclonal Amphetamine/Methamphetamine Assay, Catalog No.3C549 100 tests, 3C559 1000 tests. | Kit: 100 tests, 1000 tests | 10/06/88 |
| Syva Co. | Emit d.a.u. Opiate Assay Catalog Nos. 3B019, 3B119 | Kit: 100 tests, 1000 tests | 09/27/84 |
| Syva Co. | Emit d.a.u. Phencyclidine Assay Kit Containing: (1)Emit Phencyclidine Enzyme Reagent B. | Bottle: 6ml | 02/01/79 |
| Syva Co. | Emit d.a.u. Barbiturate Assay Catalog Nos. 3D019, 3D119. | Kit: 100 tests, 1000 tests | 09/27/84 |
| Syva Co. | Emit d.a.u. Low Calibrator B | Bottle: 5ml | 06/03/84 |
| Syva Co. | Emit d.a.u. Medium Calibrator A | Bottle: 5ml | 07/20/84 |
| Syva Co. | Emit-Tox Serum Barbiturate Assay | Kit: 50 tests | 05/22/79 |
| Syva Co. | Emit-Qat Phenobarbital Assay, Catalog Number 6D619. | Kit: 50 vials | 01/18/84 |
| Syva Co. | Emit-Tox Serum Calibrators Low and Medium | Bottle: 3ml | 02/01/79 |
| Syva Co. | Emit-d.a.u. Methaqualone Assay | Kit: 100 tests | 04/27/82 |
| Syva Co. | Emit-et Amphetamine Assay | Vial: 3ml, 80 vials/kit | 10/03/80 |
| Syva Co. | Emit-et Barbiturate Assay | Vial: 3ml, 80 vials/kit | 10/03/80 |
| Syva Co. | Emit-et Benzodiazepine Assay | Vial: 3ml, 80 vials/kit | 10/03/80 |
| Syva Co. | Emit-et Cannabinoid Assay Catalog No. 3M319 | Vial: 6ml, 80 vials/kit | 09/27/84 |
| Syva Co. | Emit-et Cannabinoid Calibrator | Vial: 3ml, 2 vials/kit | 07/10/81 |
| Syva Co. | Emit-et Cannabinoid Controls | Vial: 3ml, 2 vials/kit | 07/10/81 |
| Syva Co. | Emit-et Opiate Assay | Kit: 3ml, 80 vials/kit | 10/03/80 |
| Syva Co. | Emit-et Phencyclidine Assay | Vial: 3ml, 80 vials/kit | 01/07/81 |
| Syva Co. | Emit-et Serum Barbiturate Assay | Vial: 3ml, 80 vials/kit | 02/16/81 |
| Syva Co. | Emit-et Serum Benzodiazepine Assay | Vial: 3ml, 80 vials/kit | 02/16/81 |
| Syva Co. | Emit-et Serum Calibrator | Vial: 3ml | 02/16/81 |

## DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

### Office of the Assistant Secretary for Public and Indian Housing

### 24 CFR Part 990

**[Docket No. R-89-1400; FR-2437]**

### Revision to the Performance Funding System; Insurance Costs

**AGENCY:** Office of the Assistant Secretary for Public and Indian Housing, HUD.

**ACTION:** Final rule.

**SUMMARY:** Section 118(a) of the Housing and Community Development Act of 1987 amended the United States Housing Act of 1937 to require HUD to act by June 15, 1988 to revise the Performance Funding System (PFS) to accurately reflect the increase in insurance costs incurred by Public Housing Agencies (PHAs), including Indian Housing Authorities (IHAs). In response to this requirement, the Department submitted a draft interim rule to Congress on June 15, 1988 for prepublication review (as required by section 7(o) of the Department of HUD Act) and published the rule on July 5, 1988 (53 FR 25152). That rule revised the PFS by increasing the monthly allowable expense level per unit by $8.45 for PHAs' first fiscal year starting in 1989. This final rule discusses the comments received and adopts as final the provisions of the interim rule.

**EFFECTIVE DATE:** May 1, 1989.

**FOR FURTHER INFORMATION CONTACT:** Theodore R. Daniels, Director, Project Financial Management and Occupancy Division, Office of Public Housing, Room 4208, 451 Seventh Street, SW., Washington, DC 20410, telephone (202) 755-8145. (This is not a toll-free number.)

**SUPPLEMENTARY INFORMATION:**

#### I. Paperwork Reduction Act Statement

There are no information collection requirements contained in this rule, which would be subject to approval by the Office of Management and Budget under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501-3520).

#### II. Background

The PFS provides a means of calculating a PHA's eligibility for operating subsidy each year that is based on deducting the Allowable Expense Level (AEL) approved for the previous year, adjusted for changes in circumstances from the previous year and for inflation, from estimated income for the next year. (Throughout this preamble the term "PHA" and "PHAs" includes reference to Indian Housing Authority and Indian Housing Authorities.) Since the increase in insurance costs over the last few years has clearly outpaced what was permitted under the PFS to cover insurance costs, Congress had provided additional funds to be distributed to PHAs to cover these costs. The amounts distributed amounted to $7.94 per unit in 1987 and $4.36 per unit in 1988, but these distributions were not reflected in the rule governing the PFS. In the HCD Act of 1987, Congress directed HUD to take action to permanently adjust the PFS to compensate for these increased costs. Therefore, the interim rule published in 1988 revised the PFS to increase the AEL permanently by $8.45, the amount determined by HUD to be needed to reflect increases in insurance costs over the period. (See the preamble to the interim rule, 53 FR 25152, for an expanded discussion of the history of insurance cost coverage.)

Before issuance of that rule, the Council of Large Public Housing Authorities (CLPHA) had submitted a petition for rulemaking to HUD seeking a change in the way insurance costs are covered under the PFS. CLPHA had advocated establishing a separate

VOL 54 ISS 49 MR 15 1989 UMI

element of the PFS to cover insurance and risk protection costs only, which would be adjusted at the end of the fiscal year to reflect the actual costs of a PHA. Disputes between HUD and a PHA would be handled under a system of appeals, to be conducted by administrative law judges, under standards providing that an increase to cover actual costs would be denied only if a finding were made that the amount by which the actual costs exceeded the estimated cost for insurance and risk protection was the result of the PHA's unreasonable action, or if there was insufficient operating subsidy funding to cover the increase. This approach was considered during the development of the interim rule and rejected. (See the discussion of an appeals process below, in section III.B. of this preamble.)

**III. Public Comments**

The Department received ten public comments on this rule. Six of the comments were from PHAs, and four were from associations of PHAs or PHA officials. Three of the comments were basically favorable, although one of them stated that provision should be made for future changes in insurance costs. (One of these commenters added that a program not covered by this regulation, the Section 8 Housing Assistance Payments program, is also running into unusual insurance costs that are not covered by the relevant funding mechanism—the administrative fee. That program is outside the scope of this rule.)

The principal criticisms of the rule were that (1) the increase provided is inadequate to compensate PHAs for their increases in insurance costs over the period; (2) an appeals process should be instituted to allow each PHA that had costs higher than the projected increase to seek an additional adjustment, as in CLPHA's petition for rulemaking; and (3) PHAs whose fiscal years started October 1, 1988 missed one year's worth of adjustment for insurance expenses. A few commenters made other suggestions for change in HUD's insurance requirements. One commenter had a question about the adequacy of HUD's prediction of the amount of Federal funding needed for the increase in PFS eligibility made by this rule.

*A. Inadequacy of the Increase*

The criticism of the amount of the increase in the AEL attributable to increased insurance costs was twofold. First, particular PHAs stated that their increases in insurance costs far outpaced the increase permitted. Second, CLPHA and others stated that using the implicit price deflator for State and local government goods and services to determine the increased amount for insurance was improper, because it inadequately reflected PHA insurance costs, and the number of units used by HUD to calculate the estimated need for Fiscal Year 1989 was too low and therefore underestimates the costs.

The method of calculating the PFS eligibility, generally, is based on estimating a PHA's income for the year, estimating its allowable expenses by applying an inflation factor to the previous year's estimated allowable costs (AEL), and subtracting the second result from the first. The system, as authorized by section 9 of the United States Housing Act of 1937, does not pretend to reflect the actual costs of any particular PHA and, consequently, there is not generally any adjustment for actual income or costs.

HUD recognizes that a PHA's actual insurance costs may not match the amount allowed for such costs in the calculation of PFS eligibility. Even though some elements of a PHA's costs may be more than projected under the formula, other elements are likely to be less. The inflation factor used may not predict all these elements equally well; however, the Department has been unable to find another recognized inflation factor that would work better. (Actually, large PHAs are experiencing lower inflation than HUD's figures assumed.) However, even if insurance costs exceed the estimated inflation-adjusted amount, insurance costs comprise an average of only 5 percent of a PHA's total costs, and therefore any shortfall in this element may well be offset by a surplus with respect to another component of a PHA's budget. Rather than complicate the system by applying different factors to different components, the Department confirms its policy of applying one factor—the best it can find—to the composite AEL.

The Department believes that the adjustment built into the PFS by this rule is on average sufficient. Recognizing that significant change is always possible, however, we will continue to monitor the sufficiency of the PFS to cover this element of general PHA costs.

*B. Appeals Process*

An appeals process for adjusting the amount allowed a PHA for insurance costs was first proposed by CLPHA in November 1987 in its petition for rulemaking. CLPHA advocates establishing a separate element of the PFS for risk protection coverage, similar to the Utilities Expense Level, and providing an opportunity for any PHA that experiences risk-related costs that are significantly higher than those estimated by HUD to obtain an increase in its PFS eligibility based on documentation of its costs.

The Performance Funding System is based on providing only the amount of subsidy needed to operate a prototype well-managed PHA. It is based on a formula that uses estimates of income and expenses. For expenses, the formula uses the allowable expenses of the PHA in a base year and makes adjustments to them principally for changes in housing stock and for inflation.

There are only a few exceptions in the PFS to the policy of using estimates. To encourage wise investment of excess funds, there is a year end adjustment to estimated income to reflect a target investment income that is based on the rate of return that was achievable during that year. In recognition of the fact that utility rates, and therefore costs, are not within the control of a PHA but are regulated in the public interest by local utility commissions, utility costs are treated as a separate expense item (the Utilities Expense Level), to which a year end adjustment is permitted. There is also provision for a PHA to receive an adjustment to reflect costs beyond its control, such as changes in law during the year.

The policy of minimizing the use of adjustments to reflect actual experience during a year is intended to give PHAs an incentive for cost control. Creation of a separate element of the PFS for insurance costs and permitting adjustments to reflect actual costs would destroy PHAs' incentive for cost control. The Department believes that insurance costs are a type of expense that should be subject to a cost control incentive, since PHAs do have some control over their potential exposure to claims by exercising risk management and loss control. PHAs also do now have a number of choices in obtaining coverage. Most can choose the type of entity from which they obtain coverage for risk protection, since there are now a number of risk retention pools as well as coverage offered by insurance companies. They also have choices about the size of the deductible that will work best for them. They can also solicit bids based on two options—with the limitation that the PHA's sovereign immunity may not be asserted, or without it. With these choices, the Department believes that PHAs should be encouraged to take responsibility for making decisions about the coverage that is appropriate for them.

Also, it should be noted that the appeals process advocated by CLPHA would only be used to increase the cost of operating subsidies. The proposal would provide an opportunity for a PHA to initiate an adjustment in its PFS eligibility, which a PHA could be expected to exercise only when the PHA believed that an adjustment would be to its advantage. Thus, any PHA whose actual insurance costs were less than the amount provided under the formula would continue to be overcompensated, while those whose costs were greater than the amount provided, would achieve parity between costs and reimbursement.

An appeals process providing for an opportunity for any PHA to appeal its insurance cost coverage would also be costly to the Department in terms of staff time. Accordingly, the Department believes establishing such an appeals process would be administratively infeasible.

For the reasons stated above, the Department again rejects the proposal to establish a separate element of the PFS for risk protection coverage and to permit appeals of the amount included in a PHA's PFS eligibility for that element.

*C. October 1, 1988, Fiscal Years*

One PHA whose FY 1989 began October 1, 1988, wrote to complain that it would miss one year's funding of increased insurance costs as a result of the interim rule's January 1, 1989, effective date. The Department takes issue with that position.

As noted in the preamble to the interim rule, in both HUD Fiscal Years 1987 and 1988, HUD has distributed funds earmarked by Congress for the purpose of covering higher insurance costs. This rule is intended to provide increased funding for PHAs in HUD FY 1989 and beyond and to build that increase into the PFS permanently. The distributions made to PHAs whose fiscal years begin on October 1 have been made from the HUD funds from its fiscal year that ends on September 30. Thus, HUD's FY 1987 distribution to these PHAs was made in their fiscal year that began on October 1, 1987, and HUD's FY 1988 distribution to them was made in their fiscal year that began on October 1, 1988. These same PHAs will first feel the effect of the permanent change in insurance costs in their fiscal year that begins on October 1, 1989, leaving no gap in increased funding for insurance costs.

*D. Other Options*

One method of lowering the cost of insurance coverage that has been used is permitting PHAs to self-insure. This has necessitated a HUD waiver of the requirements of the Annual Contributions Contract ("ACC") for "insurance coverage". Of course, this practice is effective only if there are no significant losses—a risk that most PHAs cannot afford to take. One PHA advocates discontinuing this practice. It also advocates providing additional funding to PHAs to establish contingency loss reserves to cover high deductibles in the event of a major loss.

HUD has discontinued the practice of permitting self-insurance now that coverage is again available and relatively affordable. There are only two PHAs operating without insurance or pooled risk protection coverage now, and they are still self-insured only because they have had great difficulty in obtaining insurance. With respect to contingency loss reserves, HUD recognizes some PHA's need for them and will treat them as distinct from other reserves; however, the Department has limited funds to distribute and has chosen to allocate them under the PFS, without any distinction as to whether the funds are used to pay insurance premiums or to fund a high deductible in the event of a major loss.

One PHA suggested that HUD eliminate its requirement that insurers not be allowed to assert the PHA's sovereign immunity as a defense to a claim, because it believes that insurance premiums would be lower if the insurer had that defense available. HUD does now waive the ACC provision to allow PHAs to solicit bids for insurance with or without the availability of the sovereign immunity defense, to determine if any cost savings can be realized.

One suggestion was that HUD should require insurance companies to allow each PHA to participate in attorney selection and to agree to any settlement. The Department believes that it is impractical to restrict an insurer in these respects, since the insurer bases its premium on its ability to control defense proceedings from the point when a claim is made. On the other side of the question of Federal control, was the comment that PHAs should not be subject to ACC requirements concerning the type and amount of insurance coverage carried. Since HUD has a financial interest in the public housing inventory as well as a policy interest in preserving the affordable housing for lower income families, it needs to protect that interest by assuring (via the ACC requirement) that the housing stock will not be confiscated to satisfy a claim against a PHA.

Risk management was touted as the answer to uncontrolled costs by one commenter, who suggested that HUD provide technical assistance of this sort to PHAs. HUD agrees that PHAs should employ risk management tools to reduce their risk protection costs, but HUD is not in a position to provide the expert assistant.

An Objection was registered against HUD's authority to reduce operating subsidy payments on a prorated basis when appropriations are insufficient to cover full payment to all PHAs. HUD is bound, as are other Federal agencies, by the Antideficiency Act (31 U.S.C. 1511–1519) not to obligate more than has been appropriated. As a result, if HUD has insufficient appropriations to cover full finding under the PFS, it must distribute the available funds on an equitable basis. It has accomplished this by reducing each PHA's funding proportionately.

*E. Understatement of Cost*

CLPHA states that HUD estimates of the total cost of the adjustment provided by this rule understate the need for Federal funds. It points to the fact that the number of units expected to be funded under this rule is 1.2 million, whereas the number of units funded under the FY 1988 distribution was 1.3 million. It is true that the number of units used for these purposes is different. The FY 1988 distribution was made to every PHA, regardless of whether it otherwise receives operating subsidy, whereas the distribution under this rule will be made only to PHAs that receive operating subsidy (1.2 million units). Even if the increase in the AEL effected by this rule causes some PHAs to become eligible for operating subsidy for the first time, the impact on budget requirement would be minimal. If one-third of the PHAs that currently receive no subsidy were to receive an average subsidy of $4.50 per unit as a result of this change to the PFS, the subsidy requirements would increase by $1 million—less than one-tenth of one percent of the total operating subsidy budget.

*F. Miscellaneous*

One commenter suggested that HUD make available to the public the data it used to determine the increase in insurance costs experienced by PHAs since 1986. HUD will provide the data to anyone upon request. (Please contact Mr. Daniels, whose address and telephone number are provided at the beginning of this rule.)

**IV. Findings and Certifications**

*Environmental review.* A Finding of No Significant Impact with respect to the environment was made in accordance with HUD regulations in 24

VOL 54 ISS 49 MR 15 1989 UMI

CFR Part 50 that implement section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332. The Finding of No Significant Impact is available for public inspection and copying during regular business hours in the Office of Regulations, Room 10276, 451 Seventh Street, SW., Washington, DC 20410.

*Economic impact.* This rule does not constitute a "major rule" as that term is defined in section 1(b) of Executive Order 12291 (on Federal Regulation) issued by the President on February 17, 1981. Analysis of the rule indicates that it is not likely to have an annual effect on the economy of $100 million or more. The rule will not cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies or geographic regions, or have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

*Impact on small entities.* Under the Regulatory Flexibility Act, 5 U.S.C. 605(b), the undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities, because its effect would be to implement a statutory directive to increase subsidy to PHAs to reflect increases they have experienced in the costs of insurance coverage in a way that will have a similar effect on small and large PHAs. The insurance costs experienced by a PHA are affected more by location and risk factors than by its size. Therefore, the rule provides no differential treatment based on PHA size.

*Executive Order 12612, Federalism.* The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, *Federalism*, has determined that the policies contained in this rule would not have federalism implications and, thus, are not subject to review under the Order. The rule provides for additional financial assistance to PHAs that operate housing under a contract with HUD to serve lower income families. This assistance will not interfere with State or local government functions.

*Executive Order 12606, the Family.* The General Counsel, as the Designated Official under Executive Order 12606, *The Family*, has determined that this rule does not have potential significant impact on family formation, maintenance, and general well-being, and, thus, is not subject to review under the Order. The rule involves only the provision of additional assistance to agencies that provide assisted housing to lower income families.

*Regulatory agenda.* This rule was listed as sequence number 1073 under the Office of the Assistant Secretary for Public and Indian Housing in the Department's Semiannual Agenda of Regulations published on October 24, 1988 (53 FR 41974, 42013), pursuant to Executive Order 12291 and the Regulatory Flexibility Act.

*Catalog.* The Catalog of Federal Domestic Assistance Program Number is 14.146, Low Income Housing Assistance Program (Public Housing).

**List of Subjects in 24 CFR Part 990**

Grant programs—housing and community development, Low and moderate income housing, Public housing.

Accordingly, the interim rule published on July 5, 1988 at 53 FR 25152 is adopted as final.

**Authority:** Sec. 9, United States Housing Act of 1937 (42 U.S.C. 1437g); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

Dated: March 10, 1989.

**Thomas Sherman,**

*Acting General Deputy Assistant Secretary for Public and Indian Housing.*

BILLING CODE 4210-32-M

## DEPARTMENT OF THE TREASURY

### Internal Revenue Service

### 26 CFR Parts 1 and 601

[T.D. 8217]

### Income Tax; Taxable Years Beginning After December 31, 1953 and OMB Control Numbers Under the Paperwork Reduction Act; Certain Cash or Deferred Arrangements Under Employee Plans; Correction

**AGENCY:** Internal Revenue Service, Treasury.

**ACTION:** Correction to final regulations.

**SUMMARY:** This document contains a correction to Treasury Decision 8217, which was published in the **Federal Register** for Monday, August 8, 1988 (53 FR 29658). The final regulations relate to certain cash or deferred arrangements under employee plans.

**FOR FURTHER INFORMATION CONTACT:** William D. Gibbs, (202) 377-9372 (not a toll-free number).

**SUPPLEMENTARY INFORMATION:**

**Background**

The final regulations that are the subject of this correction provide the public with guidance needed to comply with the law and affect sponsors of plans that contain cash or deferred arrangements and employees who are entitled to make elections under these arrangements. They reflect changes in the applicable tax laws made by the Revenue Act of 1978.

**Need for Correction**

As published, T.D. 8217 contains a typographical error that, if not corrected, might cause confusion to taxpayers and practitioners.

**Correction of Publication**

Accordingly, the publication of the final regulations (T.D. 8217) which was the subject of FR Doc. 88-17720, is corrected as follows:

1. On page 29673, column 1, § 1.401(k)-1(b)(4)(ii), in the next to last line, the language "the ADP test in paragraph (b)(4)(i) of" is removed and the language "the ADP test in paragraph (b)(4)(ii) of" is added in its place.

**Dale D. Goode,**

*Chief, Regulations Unit, Assistant Chief Counsel (Corporate).*

## PENSION BENEFIT GUARANTY CORPORATION

### 29 CFR Part 2610

### Payment of Premiums; Interest Rates

**AGENCY:** Pension Benefit Guaranty Corporation.

**ACTION:** Interim rule.

**SUMMARY:** This is an amendment to the Pension Benefit Guaranty Corporation's interim regulation on Payment of Premiums, which was published on June 30, 1988 (53 FR 24908). Appendix B to the interim regulation contains a table setting forth the interest rates that are required by statute to be used in valuing a plan's vested benefits for purposes of determining the amount of the premium due to the PBGC. This amendment adds to that table the interest rate applicable to plan years beginning in March 1989.

**EFFECTIVE DATE:** March 15, 1989.

**FOR FURTHER INFORMATION CONTACT:** Harold J. Ashner, Senior Counsel, Office of the General Counsel (Code 22500), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, DC 20006; telephone 202-778-8823 (202-778-8859 for TTY and TDD). These are not toll-free numbers.

**SUPPLEMENTARY INFORMATION:** Section 9331 of the Omnibus Budget Reconciliation Act of 1987, Pub. L. 100-203, amended section 4006 of the Employee Retirement Income Security Act of 1974 ("ERISA") to establish a two-part premium structure for single-employer plans, *i.e.*, a flat rate per capita assessment and a variable rate assessment based on a plan's unfunded vested benefits, effective for plan years beginning on or after January 1, 1988. Under amended ERISA section 4006(a)(3)(E)(iii)(II), the interest rate used in valuing a plan's vested benefits for purposes of determining the amount of the plan's unfunded vested benefits must equal 80% of the annual yield on 30-year Treasury securities for the month preceding the month in which the plan year begins.

The Pension Benefit Guaranty Corporation's (the "PBGC's") interim regulation on Payment of Premiums (53 FR 24908 (June 30, 1988)) implements these new premium rules. Under § 2610.23(b)(1) of the regulation, the interest rate for valuing vested benefits is determined by reference to the annual yield for 30-year Treasury constant maturities as reported in Fedeal Reserve Statistical Release G.13 and H.15. The required interest rate for a given "premium payment year" (the plan year for which the premium is being paid) is 80% of this rate for the calendar month preceding the calendar month in which the premium payment year begins. As a convenience, the PBGC established an Appendix B to the interim regulation containing a table setting forth the required interest rates for premium payment years beginning in January 1988 and thereafter.

The PBGC is amending Appendix B to add the required interest rate for premium payment years beginning in March 1989. Appendix B to the interim regulation does not prescribe the required interest rates for valuing vested benefits. These rates are prescribed by section 4006(a)(3)(E)(iii)(II) of ERISA and § 2610.23(b)(1) of the regulation. The purpose of Appendix B is merely to collect and to republish these rates in a convenient place. Thus, the interest rates in Appendix B are informational only. Accordingly, the PBGC finds that notice of and public comment on this amendment would be unnecessary and contrary to the public interest. See 5 U.S.C. 553(b). For these same reasons, the PBGC also finds that good cause exists for making these amendments effective immediately. See 5 U.S.C. 553(d)(3).

The PBGC has determined that this amendment is not a "major rule" within the meaning of Executive Order 12291, because it will not have an annual effect on the economy of $100 million or more; nor create a major increase in costs or prices for consumers, individual industries, or geographic regions, nor have significant adverse effects on competition, employment, investment, innovation or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Because no general notice of proposed rulemaking is required for this amendment, the Regulatory Flexibility Act of 1980 does not apply. See 5 U.S.C. 601(2).

**List of Subjects 29 CFR Part 2610**

Employee Benefit Plans, Pension Insurance, and Pensions.

In consideration of the foregoing, Appendix B to Part 2610 of Chapter XXVI of Title 29, Code of Federal Regulations, is hereby amended as follows:

**PART 2610—PAYMENT OF PREMIUMS**

1. The authority citation for Part 2610 continues to read as follows:

**Authority:** 29 U.S.C. 1302(b)(3), 1306, 1307, as amended by sec. 9331, Pub. L. 100-203, 101 Stat. 1330.

2. Appendix B to Part 2610 is amended by adding to the table of interest rates therein a new entry to read as follows: The explanatory text is republished for the convenience of the reader and remains unchanged.

**Appendix B—Interest Rates for Valuing Vested Benefits**

The following table lists the required interest rates to be used in valuing a plan's vested benefits under § 2610.23(b) and in calculating a plan's adjusted vested benefits under § 2610.23(c)(1):

| For premium payment years beginning in— | Required interest rate [1] |
|---|---|
| • • • • • | |
| March 1989 | 7.21 |

[1] The required interest rate listed above is equal to 80% of the annual yield for 30-year Treasury constant maturities, as reported in Federal Reserve Statistical Release G.13 and H.15, for the calendar month preceding the calendar month in which the premium payment year begins.

Issued in Washington, D.C., on this 9th day of March 1989.

**Kathleen P. Utgoff,**

BILLING CODE 7708-01-M

### 29 CFR Part 2619

### Valuation of Plan Benefits in Single-Employer Plans; Amendment Adopting Additional PBGC Rates

**AGENCY:** Pension Benefit Guaranty Corporation.

**ACTION:** Final rule.

**SUMMARY:** This amendment to the regulation on Valuation of Plan Benefits in Single-Employer Plans contains the interest rates and factors for the period beginning April 1, 1989. The use of these interest rates and factors to value benefits is mandatory for some terminating single-employer pension plans and optional for others. The Pension Benefit Guaranty Corporation adjusts the interest rates and factors periodically to reflect changes in financial and annuity markets. This amendment adopts the rates and factors applicable to plans that terminate on or after April 1, 1989, and will remain in effect until the PBGC issues new interest rates and factors.

**EFFECTIVE DATE:** April 1, 1989.

**FOR FURTHER INFORMATION CONTACT:** John Foster, Attorney, Office of the General Counsel, Code 22500, Pension Benefit Guaranty Corporation, 2020 K Street NW., Washington, DC 20006, 202-778-8824 (202-778-8859 for TTY and TDD only). These are not toll-free numbers.

**SUPPLEMENTARY INFORMATION:** The Pension Benefit Guaranty Corporation's ("PBGC's") regulation on Valuation of Plan Benefits in Single-Employer Plans (29 CFR Part 2619) sets forth the methods for valuing plan benefits of terminating single-employer plans covered under Title IV of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). The recent amendments to Title IV made by the Pension Protection Act ("PPA"), a part of the Omnibus Budget Reconciliation Act of 1987, increase the amount of plan benefits for which an employer is responsible upon plan termination. These new termination rules apply to plan terminations with respect to which the 60-day advance notice to affected parties (the notice of intent to terminate) is issued after December 17, 1987. (For more detail, see the PBGC's Notice of Revised Termination Rules, 53 FR 1905 (January 22, 1988).) However, the PPA does not change the Title IV valuation rules.

Under amended ERISA section 4041(c), all plans wishing to terminate in a distress termination must value guaranteed benefits and "benefit liabilities", i.e., all benefits provided

VOL 54 ISS 49 MR 15 1989 UMI

under the plan as of the plan termination date, using the formulas set forth in Part 2619. Plans terminating in a standard termination may, for purposes of the notice given to the PBGC, use these formulas to value benefit liabilities, although this is not required. (Such plans may value benefit liabilities that are payable as annuities on the basis of a qualifying bid obtained from an insurer.)

Plans that terminate on or after January 1, 1986 (the effective date of the Single-Employer Pension Plan Amendments Act of 1986) and issued notices of intent to terminate prior to December 18, 1987, or against which the PBGC instituted involuntary termination proceedings before that date, shall continue to be responsible for benefit commitments under the plan and to value guaranteed benefits and/or benefit commitments.

Appendix B in Part 2619 sets forth the interest rates and factors that are to be used in the formulas contained in the regulation. Because these rates and factors are intended to reflect current conditions in the financial and annuity markets, it is necessary to update the rates and factors periodically.

The rates and factors currently in use have been in effect since Nov. 1, 1988 (53 FR 40222 (Oct 14, 1988)). This amendment adds to Appendix B a new set of interest rates and factors for valuing benefits in plans that terminate on or after April 1, 1989, which set reflects an increase of ¼ percent in the immediate interest rate to 8 percent.

Generally, the interest rates and factors will be in effect for at least one month. However, any published rates and factors will remain in effect until such time as the PBGC publishes another amendment changing them. Any change in the rates normally will be published in the **Federal Register** by the 15th of the month preceding the effective date of the new rates or as close to that date as circumstances permit.

The PBGC has determined that notice and public comment on this amendment are impracticable and contrary to the public interest. This finding is based on the need to determine and issue new interest rates and factors promptly so that the rates can reflect, as accurately as possible, current market conditions.

Because of the need to provide immediate guidance for the valuation of benefits in plans that will terminate on or after April 1, 1989, and because no adjustment by ongoing plans is required by this amendment, the PBGC finds that good cause exists for making the rates set forth in this amendment effective less than 30 days after publication.

The PBGC has determined that this is not a "major rule" under the criteria set forth in Executive Order 12291, because it will not result in an annual effect on the economy of $100 million or more, a major increase in costs for consumers or individual industries, or significant adverse effects on competition, employment, investment, productivity, or innovation.

**List of Subjects in 29 CFR Part 2619**

Employee benefit plans, Pension insurance, and Pensions.

In consideration of the foregoing, Part 2619 of Chapter XXVI, Title 29, Code of Federal Regulations, is hereby amended as follows:

1. The authority citation for Part 2619 is revised to read as follows:

**Authority:** 29 U.S.C. 1301(a), 1302(b)(3), 1341, 1344, 1362, as amended by secs. 9312–13, Pub. L. 100–203, 101 Stat. 1330.

2. Rate Set 76 of Appendix B is revised and Rate Set 77 of Appendix B is added to read as follows. The introductory text is republished for the convenience of the reader and remains unchanged.

**Appendix B—Interest Rates and Quantities Used to Value Immediate and Deferred Annuities**

In the table that follows, the immediate annuity rate is used to value immediate annuities, to compute the quantity "Gy" for deferred annuities and to value both portions of a refund annuity. An interest rate of 5% shall be used to value death benefits other than the decreasing term insurance portion of a refund annuity. For deferred annuities, $k_1$, $k_2$, $k_3$, $n_1$, and $n_2$ are defined in § 2619.45.

| Rate set | For plans with a valuation date | | Immediate annuity rate (percent) | Deferred annuities | | | | |
|---|---|---|---|---|---|---|---|---|
| | On or after | And before | | $k_1$ | $k_2$ | $k_3$ | $n_1$ | $n_2$ |
| 76 | Nov. 1, 1988 | Apr. 1, 1989 | 7.75 | 1.0700 | 1.0575 | 1.0400 | 7 | 8 |
| 77 | Apr. 1, 1989 | | 8.00 | 1.0725 | 1.0600 | 1.0400 | 7 | 8 |

Kathleen P. Utgoff,

BILLING CODE 7708–01–M

**29 CFR Part 2676**

**Valuation of Plan Benefits and Plan Assets Following Mass Withdrawal—Interest Rates**

**AGENCY:** Pension Benefit Guaranty Corporation.
**ACTION:** Final rule.

**SUMMARY:** This is an amendment to the Pension Benefit Guaranty Corporation's regulation on Valuation of Plan Benefits and Plan Assets Following Mass Withdrawal (29 CFR Part 2676). The regulation prescribes rules for valuing benefits and certain assets of multiemployer plans under sections 4219(c)(1)(D) and 4281(b) of the Employee Retirement Income Security Act of 1974. Section 2676.15(c) of the regulation contains a table setting forth, for each calendar month, a series of interest rates to be used in any valuation performed as of a valuation date within that calendar month. On or about the fifteenth of each month, the PBGC publishes a new entry in the table for the following month, whether or not the rates are changing. This amendment adds to the table the rate series for the month of April 1989.

**EFFECTIVE DATE:** April 1, 1989.

**FOR FURTHER INFORMATION CONTACT:** Deborah C. Murphy, Attorney, Office of the General Counsel (22500), Pension Benefit Guaranty Corporation, 2020 K Street NW., Washington DC 20006; 202–778–8820 (202–778–8859 for TTY and TDD). (These are not toll-free numbers.)

**SUPPLEMENTARY INFORMATION:** The PBGC finds that notice of and public comment on this amendment would be impracticable and contrary to the public interest, and that there is good cause for making this amendment effective immediately. These findings are based on the need to have the interest rates in this amendment reflect market conditions that are as nearly current as possible and the need to issue the interest rates promptly so that they are available to the public before the beginning of the period to which they apply. (*See* 5 U.S.C. 533 (b) and (d).) Because no general notice of proposed rulemaking is required for this amendment, the Regulatory Flexibility Act of 1980 does not apply (5 U.S.C. 601(2)).

The PBGC has also determined that this amendment is not a "major rule" within the meaning of Executive Order 12291 because it will not have an annual effect on the economy of $100 million or more; or create a major increase in costs or prices for consumers, individual industries, or geographic regions; or have significant adverse effects on competition, employment, investment, or innovation, or on the ability of United States-based enterprises to complete with foreign-based enterprises in domestic or export markets.

**List of Subjects in 29 CFR Part 2676**

Employee benefit plans, Pensions.

In consideration of the foregoing, Part 2676 of Subchapter H of Chapter XXVI of Title 29, Code of Federal Regulations, is amended as follows:

**PART 2676—VALUATION OF PLAN BENEFITS AND PLAN ASSETS FOLLOWING MASS WITHDRAWAL**

1. The authority citation for Part 2676 continues to read as follows:

**Authority:** 29 U.S.C. 1302(b)(3), 1399(c)(1)(D), and 1441(b)(1).

2. In § 2676.15, paragraph (c) is amended by adding to the end of the table of interest rates therein the following new entry:

**§ 2676.15 Interest.**

* * * * *

(c) *Interest rates.*

| For valuation dates occurring in the month— | The values of $i_t$ are— | | | | | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | $i_1$ | $i_2$ | $i_3$ | $i_4$ | $i_5$ | $i_6$ | $i_7$ | $i_8$ | $i_9$ | $i_{10}$ | $i_{11}$ | $i_{12}$ | $i_{13}$ | $i_{14}$ | $i_{15}$ | $i_n$ |
| April 1989 | .09875 | .095 | .09 | .085 | .08 | .07375 | .07375 | .07375 | .07375 | .07375 | .0675 | .0675 | .0675 | .0675 | .0675 | .06 |

Issued at Washington, DC, on this 8th day of March 1989.

Kathleen P. Utgoff,
*Executive Director, Pension Benefit Guaranty Corporation.*
[FR Doc. 89–5941 Filed 3–14–89; 8:45 am]
BILLING CODE 7708–01–M

**DEPARTMENT OF THE INTERIOR**

**Office of Surface Mining Reclamation and Enforcement**

**30 CFR Part 925**

**Approval of Missouri's Abandoned Mine Land Reclamation Plan Amendment**

**AGENCY:** Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.
**ACTION:** Final rule.

**SUMMARY:** OSMRE is announcing the approval of a proposed amendment to the Missouri Abandoned Mine Land Reclamation (AMLR) Plan (hereinafter referred to as the Missouri plan) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendment includes a complete revision of the Missouri Plan. Substantive changes were proposed pertaining to the agency organizational structure, the procedures for reclamation project ranking and selection, and the AMLR database. Procedures have been added pertaining to liens, appraisals, and rights of entry on private lands and for land acquisition, management, and disposal. After opportunity for public comment and review of the amendment, the Deputy Director has determined that the Missouri amendment meets the requirements of the Surface Mining Control and Reclamation Act and the Secretary's regulations at 30 CFR Part 884.

**EFFECTIVE DATE:** March 15, 1989.

**ADDRESSES:** Copies of the full text of the amendment are available for review during regular business hours at the following locations:

Office of Surface Mining Reclamation and Enforcement, Kansas City Field Office, 1103 Grand Avenue, Room 502, Kansas City, Missouri 64106, Telephone: (816) 374–6405.
Missouri Department of Natural Resources, Land Reclamation Program, 205 Jefferson Street, P.O. Box 176, Jefferson City, Missouri 65102, Telephone: (314) 751–4041.

**FOR FURTHER INFORMATION CONTACT:** Mr. William J. Kovacic, Director, Kansas City Field Office, (816) 374–6405.

**SUPPLEMENTARY INFORMATION:**

**I. Background**

Title IV of SMCRA, Pub. L. 95–87, 30 U.S.C. 1201 *et seq.*, establishes an AMLR program for the purposes of reclaiming and restoring lands and water resources adversely affected by past mining. This program is funded by a reclamation fee imposed upon the production of coal. Lands and waters eligible for reclamation are those that were mined or affected by mining and abandoned or left in an inadequate reclamation status prior to August 3, 1977, and for which there is no continuing reclamation responsibility under State/Tribe or Federal law. Title IV of SMCRA establishes the conditions under which States/Tribes may obtain primary authority to implement this reclamation program.

The Secretary of the Interior approved the Missouri AMLR program on January 29, 1982. Information pertinent to the general background, revisions, and amendments to the initial program submission, as well as the Secretary's findings and the disposition of comments can be found in the January 29, 1982, **Federal Register** (47 FR 4253–4254).

Information concerning the previously approved plan and the proposed amendments may be obtained from the agency offices listed under **"ADDRESSES."**

The Secretary has adopted regulations that specify the content requirements of a State reclamation plan and the criteria for plan approval (30 CFR Part 884). The regulations provide that a State may submit to the OSMRE proposed amendments or revisions to the approved reclamation plan. If the amendments or revisions change the scope or major policies followed by the State in the conduct of its reclamation program, the Deputy Director must follow the procedures set out in 30 CFR 884.14 in approving or disapproving an amendment or revision.

**II. Discussion of Proposed Amendment**

By letter dated August 22, 1988, Missouri submitted a reclamation plan amendment to OSMRE (Administrative Record No. AML–MO 59). The proposed amendment consists of a complete revision to the approved Missouri Plan as provided for by 30 CFR 884.

VOL 54 ISS 49 MR 15 1989 UMI

Specifically, the following areas of the plan are being revised.

1. Organization (30 CFR 884.13(d)(1) and (2)): Missouri is proposing to update certain portions of its AMLR plan to reflect changes that have occurred in the State agency structure. The State has also submitted additional material incorporating into the plan the staffing policies outlined in the State manual of personnel procedures.

2. Project selection (30 CFR 884.13(c)(2)): Missouri has submitted revised project scoring criteria to ensure that projects involving threats to the public health and safety are addressed before lower priority problems. Missouri is also proposing a project prioritization methodology based upon the OSMRE "Abandoned Mine Land Inventory Update Manual, August 1984".

3. Reclamation on private land (30 CFR 884.13(c)(5)): Missouri has submitted procedures to clarify 10 CSR 40–9.060 regarding liens and appraisals on private lands.

4. Rights of entry (30 CFR 884.13(c)(6)): The State has submitted additional material concerning non-concensual entry requirements as specified in 30 CFR 877.13(c).

5. Coordination of Reclamation Activities (30 CFR 884.13(c)(3)): The State has proposed amending its coordination procedures to eliminate the requirement for a State Reclamation Committee. Missouri has proposed procedures for coordinating with the agencies represented in the original State Reclamation Committee and with other interested agencies on an individual basis, in the development of construction projects.

6. Land Acquisition, Management and Disposal (30 CFR 884.13(c)(4)): Missouri has proposed adding a procedure to allow for acquisition of land through sale, donation or condemnation in accordance with the provisions outlined in 30 CFR 879, 10 CSR 40–9.040 and 10 CSR 40–9.050.

7. Database (30 CFR 884.13(f): Missouri is proposing to amend the database pertaining to eligible lands and waters incorporating approved AML inventory sites.

OSMRE announced receipt of the proposed amendment in the October 27, 1988, **Federal Register** (53 FR 43450–43452), and, in the same notice, opened the public comment period and provided opportunity for a public hearing on its substantive adequacy. No public comments were received by November 28, 1988, the close of the public comment period. Since no one requested an opportunity to testify at a public hearing, the scheduled hearing was cancelled.

Following a thorough review of the Missouri amendment, OSMRE notified the State on December 19, 1988 of the need for several nonsubstantive editorial changes and clarifications. On January 13, 1989, Missouri submitted the necessary clarifications and editorial corrections. The Deputy Director has determined that these corrections are insignificant in nature and accordingly require no further public comment.

Under SMCRA, OSMRE codifies the approved requirements of individual States including decisions on State reclamation plans and amendments under Parts 900 and 950 of 30 CFR Subchapter T. Provisions relating to Missouri are found in 30 CFR Part 925.

## III. Deputy Director's Findings

In accordance with section 405 of SMCRA, the Deputy Director of OSMRE finds that Missouri has submitted an amendment to its Abandoned Mine Land Reclamation Plan and has determined pursuant to 30 CFR 884.15, that:

1. The State provided adequate notice and opportunity for public comment in the development of the amendment and that the record does not reflect major unresolved controversies.

2. Views of other Federal agencies having an interest in the plan have been solicited and considered.

3. The State has the legal authority, policies and administrative structure necessary to implement the amendment.

4. The plan amendment meets all requirements of the OSMRE, AMLR program provisions.

5. The State has an approved Surface Mining Regulatory Program.

6. The proposed amendment is in compliance with all applicable State and Federal laws and regulations.

Under SMCRA, OSMRE codifies the approved requirements of individual States/Tribes, including decisions on State/Tribe reclamation plans and amendments, under 30 CFR Parts 900 to 950. Provisions relating to Missouri are found in 30 CFR Part 925. Based on the findings above, the Deputy Director is amending 30 CFR 925.20 to codify his approval of the Missouri amendment of August 22, 1988.

## IV. Public and Agency Comments

As discussed in the section of this notice entitled "Discussion of Proposed Amendment," OSMRE solicited public comment and provided opportunity for a public hearing on the proposed amendment. Since no one requested an opportunity to testify, the public hearing scheduled for November 21, 1988, was cancelled. No comments were received from the public during the comment period, which closed on November 28, 1988.

Pursuant to 30 CFR 884.14(2), comments were also solicited from various Federal agencies with an actual or potential interest in the Missouri plan. A summary of the comments received and their disposition appears below.

1. The U.S. Fish and Wildlife Service commented that restoration of wetlands should be included as one of the priorities of the Land Reclamation Program, and questioned Missouri's emphasis on restoration of agricultural productivity. In response, the Deputy Director notes that the priorities outlined in the Missouri Plan are identical to those in section 403 of Pub. L. 95–87. Revision of these priorities is not within the scope of this amendment.

2. The U.S. Fish and Wildlife Service commented that the portion of the Missouri Plan enumerating the specific benefits to be considered when selecting reclamation projects should include preservation and/or restoration of wetlands and floodplain values. The Deputy Director finds that this portion of the Missouri Plan has not been revised and that the comment is outside the scope of this amendment.

3. The U.S. Fish and Wildlife Service commented that wetlands should be included in Missouri's project selection criteria. The Deputy Director acknowledges the importance of protecting wetland resources and notes that individual reclamation projects are reviewed prior to approval to ensure that negative impacts to wetlands do not occur.

However, restoration of wetlands is not one of the authorized purposes of the AMLR Fund and is therefore not within the scope of this amendment. The Deputy Director notes that regular coordination between the OSMRE, the U.S. Fish and Wildlife Service and the U.S. Army Corps of Engineers will continue, in order to ensure the protection of wetland resources.

4. The U.S. Fish and Wildlife Service commented that the Rare and Endangered Species list included in the Missouri Plan was out of date and supplied a revised list to the OSMRE. The Deputy Director concurred and required the State to replace the outdated list with the current one.

5. The U.S. Fish and Wildlife Service commented that the maps and legends included in the Missouri Plan reproduced poorly and were hard to read. The Deputy Director notes that the maps are informational only and do not materially affect the implementation of Missouri's AML Program. Original copies of the maps are available from the State of Missouri and from original reference documents.

## V. Deputy Director's Decision

Based upon the findings enumerated above, the Deputy Director is approving the Missouri amendment. A copy of the approved amendment can be obtained by contacting the offices listed under "**ADDRESSES**".

## VI. Procedural Matters

*1. Federal Paperwork Reduction Act*

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507 et seq.

*2. Executive Order No. 12291 and the Regulatory Flexibility Act*

On November 23, 1987, the Office of Management and Budget (OMB) granted OSMRE an exemption from sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or disapproval of State/Tribe AMLR reclamation plans and amendments. Therefore, this action is exempt from preparation of a regulatory impact analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). No burden will be imposed upon entities operating in compliance with the Act.

*3. National Environmental Policy Act*

Approval of State/Tribe AMLR plans and amendments is categorically excluded from compliance with the National Environmental Policy Act by the Department of the Interior's Manual; 516 DM 6, Appendix 8, paragraph 8.4B(30).

## Effective Date

The final rule is effective upon date of publication. Under 5 U.S.C. 553(d), a rule may not be made effective less than 30 days after publication, unless, among other things, good cause exists and is published with the rule. Good cause exists to make the final rule effective upon publication because:

(1) Missouri's Department of Natural Resources Land Reclamation Program is fully staffed and currently administering the abandoned mine land reclamation program; and

(2) OSMRE wishes to expedite the implementation of the revised AMLR plan amendment.

## List of Subjects in 30 CFR Part 925

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Accordingly, 30 CFR Part 925 is amended as set forth herein.

Date: March 8, 1989.

**Robert H. Gentile,**

*Director, Office of Surface Mining Reclamation and Enforcement.*

## PART 925—MISSOURI

1. The authority citation for Part 925 is revised to read as follows:

**Authority:** 30 U.S.C. 1201 *et seq.*

2. Section 925.20 is revised to read as follows:

**§ 925.20 Approval of the Missouri Abandoned Mine Land Reclamation Plan.**

The Missouri Abandoned Mine Land Reclamation Plan as submitted on September 11, 1981, is approved.

3. Section 925.25 is revised to read as follows:

**§ 925.25 Approval of AML Plan Amendments.**

(a) The Missouri AMLR plan amendment submitted to OSMRE on June 22, 1987, is approved effective June 16, 1988.

(b) The amendment to the plan submitted on August 22, 1988, is approved effective March 15, 1989.

Copies of the approved amendments are available at the following locations:

Office of Surface Mining Reclamation and Enforcement, Kansas City Field Office, 1103 Grand Avenue, Room 502 Kansas City, Missouri 64106

Missouri Department of Natural Resources, Land Reclamation Program, 205 Jefferson Street, P.O. Box 176, Jefferson City, Missouri 65102.

BILLING CODE 4310–05–M

## DEPARTMENT OF TRANSPORTATION

### Coast Guard

### 33 CFR Part 117

**[CGD7–89–03]**

### Temporary Drawbridge Operation Regulations; Atlantic Intracoastal Waterway, Florida

**AGENCY:** Coast Guard, DOT.

**ACTION:** Temporary rule.

**SUMMARY:** The Coast Guard is temporarily changing the regulations governing the PGA and Parker drawbridges at North Palm Beach, Florida, by extending the hours of the existing regulations to provide draw openings on 15-minute intervals throughout each weekday between the morning and evening closed periods. This temporary change is being made to evaluate the effect on peak season vehicle and waterway traffic and to evaluate the rule as a permanent regulation.

**DATES:** These temporary regulations become effective February 21, 1989 and terminate on April 21, 1989.

**ADDRESSES:** Comments should be mailed to Commander (oan), Seventh Coast Guard District, Brickell Plaza Federal Building, 909 SE. 1st Avenue, Miami, Florida 33131–3050. The comments and other materials referenced in this notice will be available for inspection and copying on the 4th Floor, of the Brickell Plaza Federal Building, 909 SE. 1st Avenue, Miami, Florida. Normal office hours are between 7:30 a.m. and 4 p.m., Monday through Friday, except holidays. Comments also may be hand-delivered to this address.

**FOR FURTHER INFORMATION CONTACT:** Mr. Walt Paskowsky (305) 536–4103.

**SUPPLEMENTARY INFORMATION:** Interested persons are invited to participate in the proposed permanent rulemaking by submitting written views, comments, data, or arguments. Persons submitting comments should include their names and addresses, identify the bridge, and give reasons for concurrence with or any recommended change in the proposal. Persons desiring acknowledgement that their comments have been received should enclose a stamped, self-addressed postcard or envelope.

Prompt implementation is necessary to synchronize the rules with peak seasonal vehicle traffic. The Commander, Seventh Coast Guard District, will evaluate all communications received, the overall effect of this temporary regulation change, and determine if a permanent regulation change is necessary.

## Drafting Information

The drafters of this notice are Mr. Walt Paskowsky, Bridge Administration Specialist, project officer, and Lieutenant Commander S.T. Fuger, Jr., project attorney.

## Discussion of Temporary Regulations

The PGA and Parker drawbridges presently open on signal, except that, from 7 a.m. to 9 a.m. and 4 p.m. to 7 p.m. Monday through Friday, the PGA opens on the quarter and three quarter-hour

VOL 54 ISS 49 MR 15 1989 UMI

while Parker opens on the hour and half-hour. On weekends and federal holidays both bridges open on the hour, 20 minutes after the hour, and 40 minutes after the hour between 8 a.m. and 6 p.m.

This change which adds 15-minute scheduled openings from 9 a.m. to 4 p.m., Monday through Friday, is intended to space draw openings and virtually eliminate "back to back" openings which can contribute significantly to vehicular traffic delays during these periods.

**List of Subjects in 33 CFR Part 117**

Bridges.

**Temporary Regulations**

In consideration of the foregoing, Part 117 of Title 33, Code of Federal Regulations, is temporarily amended as follows:

## PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for Part 117 continues to read as follows:

**Authority:** 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05–1(g); 33 CFR 117.43.

2. In § 117.261, paragraphs (s) and (t) are suspended and new paragraphs (rr) and (ss) are added to read as follows for the period February 21, 1989 through April 21, 1989.

**117.261 Atlantic Intracoastal Waterway, St. Marys River to Key Largo**

* * * * *

(rr) PGA Boulevard bridge, mile 1012.6. The draw shall open on signal; except that, from 7 a.m. to 9 a.m. and 4 p.m. to 7 p.m., Monday through Friday except federal holidays, the draw need open only on the quarter and three-quarter-hour. From 9 a.m. to 4 p.m. Monday through Friday, except federal holidays, the draw need open only on the hour, quarter-hour, half-hour and three-quarter-hour. On Saturdays, Sundays, and federal holidays from 8 a.m. to 6 p.m. the draw need open only on the hour, 20 minutes after the hour, and 40 minutes after the hour.

(t) Parker bridge, mile 1013.7. The draw shall open on signal; except that, from 7 a.m. to 9 a.m. and 4 p.m. to 7 p.m., Monday through Friday except federal holidays, the draw need open only on the hour and half hour. From 9 a.m. to 4 p.m. Monday through Friday, except federal holidays, the draw need open only on the hour, quarter-hour, half-hour and three quarter-hour. On Saturdays, Sundays, and federal holidays from 8 a.m. to 6 p.m. the draw need open only on the hour, 20 minutes after the hour, and 40 minutes after the hour.

Dated: February 27, 1989.

BILLING CODE 4910-14-M

---

**POSTAL SERVICE**

**39 CFR Part 777**

**Implementation of the Uniform Relocation Act Amendments of 1987**

**AGENCY:** Postal Service.

**ACTION:** Final rule.

**SUMMARY:** This final rule amends the Postal Service's relocation regulations to make them consistent with Title IV of Pub. L. 100-17, the Uniform Relocation Act Amendments of 1987, and, to the extent feasible, with the interpretation of the 1987 amendments by the Federal Highway Administration in its recently published final governmentwide rule. The 1987 amendments made moderate increases in benefit levels, most of which were previously put into effect by the Postal Service in January 1988. In addition, the amendments changed the Uniform Relocation Act to cover virtually any organization, even private persons, if they displace persons or businesses pursuant to a Federal or Federally-assisted program or project. The amendments also provide that the computation of certain relocation benefits be done in accordance with the regulations of the Federal Highway Administration, which is the lead agency, rather than pursuant to a statutory formula. It is the latter amendments that this final rule is primarily implementing.

**EFFECTIVE DATE:** April 2, 1989.

**FOR FURTHER INFORMATION CONTACT:** Fred Underwood, (202) 268-3111.

**SUPPLEMENTARY INFORMATION:** On December 17, 1987, the Postal Service published a final rule implementing those parts of the Uniform Relocation Act Amendments of 1987 (principally increases in benefit levels) concerning which the statute apparently intended little discretion or interpretation would be available to agencies (52 FR 48029). It is the discretionary and interpretive parts of the statute that this final rule is implementing, and the governmentwide rule of the Federal Highway Administration (FHWA) that is being generally followed. We are also making several minor, editorial changes in our regulations.

After notice and comment rulemaking, the FHWA's final rule was published in the **Federal Register** on March 2, 1989 and became effective the same date (54 FR 8912). That document contains a comprehensive explanation of the governmentwide rule, its regulatory background, and the intention of Congress in enacting the Uniform Relocation Act Amendments of 1987.

Although exempt by 39 U.S.C. 410(a) from the provisions of the Administrative Procedure Act regarding rulemaking, 5 U.S.C. 553, the Postal Service ordinarily seeks public comment on changes to its regulations perceived to have an effect on the public. In this case, however, the FHWA has already received and considered voluminous public comment on the substance of the very changes we are adopting. Accordingly, the Postal Service finds it unnecessary to seek further public comment. In addition, the Postal Service ordinarily delays for 30 days the effective date of its final regulations, as also provided by the Administrative Procedure Act, 5 U.S.C. 553(d). In this case, however, we find that the purposes of the 30 day delayed effective date (notification of potential parties affected) are satisfied by the publication of FHWA's final rule. Moreover, the Uniform Relocation Act Amendments of 1987 require that implementing regulations under it bear an effective date no later than two years after enactment, which is April 2, 1989. Accordingly, the Postal Service finds good cause, consistent with the action of the rest of the Federal government, to put these regulations into effect within the April 2 deadline, notwithstanding the provisions of the Administrative Procedure Act.

For the reasons explained above, the Postal Service hereby amends 39 CFR as follows:

**List of Subjects in 39 CFR Part 777**

Real property acquisition, Relocation assistance.

## PART 777—RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES

1. The authority citation for Part 777 continues to read as follows:

**Authority:** 39 U.S.C. 401.

**§ 777.13 [Amended]**

2. In § 777.13, paragraph (a) is revised; paragraphs (c)–(q) are redesignated (d)–(r), and new paragraph (c) is added to read as follows:

**§ 777.13 Definitions.**

(a) *The Act.* The Uniform Relocation Assistance and Real Property

Acquisition Policies Act of 1970 (Pub. L. 91-646; 84 Stat. 1894).

* * * * *

(c) *Small business.* A business having at least one but not more than 500 employees working at the location being acquired.

* * * * *

3. In § 777.13, redesignated paragraph (f)(1) introductory text is amended by removing the words "paragraph (e)(2)" and adding, in their place, the words "paragraph (f)(2)"; redesignated paragraph (f)(1)(ii)(B) is amended by removing the words "at the time of the postal contract to acquire such property" and adding, in their place, the words "on the date title to such property transfers to the Postal Service"; redesignated paragraph (f)(1)(ii)(B) is also amended by removing the word "is" and adding, in its place, the word "in"; redesignated paragraph (f)(2) introductory text is amended by removing the words "paragraph (e)(1)" and adding, in their place, the words "paragraph (f)(1)"; redesignated paragraph (f)(2)(iii) is amended by removing the words "paragraphs (e)(1)(ii)(B) and (e)(1)(iii)" and adding, in their place, the words "paragraphs (f)(1)(ii)(B) and (f)(1)(iii)"; redesignated paragraph (o)(3) is amended by removing the words "paragraph (n)(1) or (n)(2)" and adding, in their place, the words "paragraph (o)(1) or (o)(2)".

4. In § 777.21 paragraph (h) is added reading as follows:

**§ 777.21 General procedures.**

* * * * *

(h) *Eviction for cause.* Any person occupying real property and not in unlawful occupancy on the date of initiation of negotiations is presumed to be entitled to relocation payments and other assistance unless the Postal Service determines that:

(1) The person received an eviction notice prior to initiation of negotiations and, as a result of that notice, is later evicted; or

(2) The person is evicted after initiation of negotiations for serious or repeated violation of material terms of the lease or occupancy agreement; and

(3) In either case the eviction is not undertaken for the purpose of evading the obligation to make the relocation payments and other assistance available.

**§ 777.23 [Amended]**

5. In § 777.23, paragraph (e)(3) is redesignated (e)(4); paragraph (l) is redesignated (m); paragraphs (c), (d)(6), (e)(1), (e)(2), and redesignated paragraphs (m)(1), and (m)(3)(i) are revised redesignated paragraph (m)(3)(ix) is deleted; redesignated paragraph (m)(3)(x) is redesignated (m)(3)(ix); and new paragraphs (e)(3), (e)(5), and (1) are added to read as follows:

**§ 777.23 Moving expenses.**

* * * * *

(c) *Fixed payment for moving expenses. residential moves.* Any person displaced from a dewlling or a seasonal residence is entitled to receive an expense and dislocation allowance as an alternative to a payment for actual moving and related expenses. This allowance shall be determined according to the applicable schedule approved by the Federal Highway Administration. This includes a provision that the expense and dislocation allowance to a person with minimal personal possessions who is in occupancy of a dormitory style room shared by two or more other unrelated persons or a person whose residential move is performed by an agency at no cost to the person shall be limited to $50.

(d) * * *

(6) Relettering signs and replacing stationary on hand at the time of displacement that are made obsolete as a result of the move.

* * * * *

(e) * * *

(1) The business owns or rents personal property which must be moved in connection with such displacement and for which an expense would be incurred in such move; and, the business vacates or relocates from its displacement site; and

(2) The business cannot be relocated without a substantial loss of its existing patronage (clientele or net earnings). A business is assumed to meet this test unless the Postal Service determines that it will not suffer a substantial loss of its existing patronage; and

(3) The business is not part of a commercial enterprise having more than three other entities which are not being acquired by the Postal Service, and which are under the same ownership and engaged in the same or similar business activities.

* * * * *

(5) The business is not operated at a displacement dwelling solely for the purpose of renting such dwelling to others.

* * * * *

(1) *Payment for actual reasonable reestablishment expenses, nonresidential moves.* In addition to the payments available as allowable expenses for nonresidential moves, a small business, farm or non-profit organization may be eligible to receive a payment, not to exceed $10,000 for expenses actually incurred in relocating and reestablishing such small business, farm or non-profit organization at a replacement site.

(1) *Allowable expenses.* Reestablishment expenses must be reasonable and necessary, as determined by the Postal Service. They may include the following:

(i) Repairs or improvements to the replacement real property as required by federal, state, local law, code or ordinance.

(ii) Modifications to the replacement property to accommodate the business operation or make replacement structures suitable for occupancy.

(iii) Construction and installation costs not to exceed $1,500 for exterior signing to advertise the business.

(iv) Installation of security or fire protection devices.

(v) Provision of utilities from right-of-way to improvements on the replacement site.

(vi) Redecoration or replacement of soiled or worn surfaces at the replacement site, such as paint, panelling or carpeting.

(vii) Licenses, fees and permits when not paid as part of the moving expenses.

(viii) Feasibility surveys, soil testing and marketing studies.

(ix) Advertisement of replacement location, not to exceed $1,500

(x) Professional services in connection with the purchase or lease of a replacement site.

(xi) Increased costs of operation during the first two years at the replacement site, not to exceed $5,000, for such items as lease or rental charges, personal or real property taxes, insurance premiums, utility charges including impact fees or one time assessments for anticipated heavy utility usage.

(xii) Other items that the Postal Service considers essential to the reestablishment of the business.

(2) *Non-allowable expenses.* Following is a non-exclusive listing of restablishment expenditures not considered to be reasonable, necessary or otherwise allowable.

(i) Purchase of capital assets such as office furniture, filing cabinets, machinery, or trade fixtures.

(ii) Purchase of manufacturing materials, production supplies, product inventory, or other items used in the normal course of the business operation.

(iii) Interior or exterior refurbishment at the replacement site which are for cosmetic purposes only.

VOL 54 ISS 49 MR 15 1989 UMI

(iv) Interest on money borrowed to make the move or purchase the replacement property.

(v) Payment to a part-time business in the home which does not contribute materially to the household income.

(vi) Payment to a person whose sole business at a replacement dwelling is the rental of such dwelling to others.

(m) * * *

(1) *Self moves.* If the displaced person elects to take full responsibility for all or a part of the move, the Postal Service may approve a payment for the person's moving expenses in an amount not to exceed the lowest of three bids acceptable to the Postal Service. Bids may be obtained by either the displaced person or the Postal Service.

* * * * *

(3) * * *

(i) the cost of moving any structure or other real property improvement.

* * * * *

**§ 777.25 [Amended]**

6. In § 777.25, paragraph (j) is amended by removing "$4,000" and adding, in its place, "$5,250", and by removing "$15,000" and adding, in its place, "$22,500".

**§ 777.28 [Amended]**

7. In § 777.28, paragraph (n) is amended by removing the word "regional" and adding, in its place, the words "Service Center".

**Fred Eggleston,**

*Assistant General Counsel, Legislative Division.*

BILLING CODE 7710-12-M

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 372

[OPTS-400027; FRL-3537-6]

### Cyclohexane; Toxic Chemical Release Reporting; Community Right-to-Know

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Denial of petition.

**SUMMARY:** EPA is denying a petition to delist cyclohexane from the list of toxic chemicals under section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA). The denial is based on EPA's conclusion that cyclohexane is a high volume volatile organic compound that contributes to the formation of tropospheric ozone and other hazardous air pollutants such as formaldehyde. By contributing to ozone pollution, cyclohexane meets the criteria of section 313(d)(2) for both acute and chronic health effects, as well as for ecotoxicity effects.

**FOR FURTHER INFORMATION CONTACT:**

Robert Israel, Petition Coordinator, Emergency Planning and Community Right-to-Know Information Hotline, Environmental Protection Agency, Mail Stop OS-120, 401 M Street SW., Washington, DC 20460, Toll free: 800-535-0202

In Washington, DC, and Alaska, 202-479-2449.

**SUPPLEMENTARY INFORMATION:**

## I. Introduction

### *A. Statutory Authority*

The response to the petition is issued under section 313(d) and (e)(1) of Title III of SARA (Pub. L. 99-499). Title III of SARA is also referred to as the Emergency Planning and Community Right-to-Know Act of 1986.

### *B. Background*

Section 313 of SARA Title III requires certain facilities manufacturing, processing, and using toxic chemicals to report annually their environmental releases of such chemicals. Section 313 establishes an initial list of toxic chemicals that is composed of more than 300 chemicals and chemical categories. Any person may petition EPA to add chemicals to or delete chemicals from the list.

EPA issued a statement of petition policy and guidance in the **Federal Register** of February 4, 1987 (52 FR 3479), to provide guidance regarding the recommended content and format for submitting petitions. EPA must respond to petitions within 180 days either by initiating a rulemaking or by issuing an explanation of why the petition is denied.

## II. Description of Petition

On September 9, 1988, EPA received a petition from the Chemical Manufacturers Association (CMA) to delete cyclohexane from the section 313 list of toxic chemicals. The petition was based on CMA's contention that cyclohexane is not toxic and does not meet the section 313 criteria for listing.

## III. EPA's Toxicity Concerns for Cyclohexane

Cyclohexane belongs to the category of chemicals known as "volatile organic compounds" (VOCs) which contribute significantly to air pollution problems. In particular, chemical reactions of cyclohexane (and other VOCs) in the atmosphere contribute to the formation of ozone and other air pollutants such as formaldehyde which have a direct and unequivocal negative impact on human health and environmental quality.

Ozone is a severe irritant effecting the mucus membranes of the nose and throat, and impairs the normal functioning of the lungs, especially in sensitive individuals such as asthma or allergy sufferers. Exposure to ozone also leads to impaired functioning of the immune system in animal tests. Available data suggest that ozone exposure may also lead to chronic health effects, including morphological changes to, and impaired functioning of, the lungs.

Ozone also has a severe impact on plant life; agricultural losses alone are estimated at $2 to $3 billion a year due to ozone damage.

## IV. Explanation of Denial

EPA has determined that cyclohexane is a VOC that, due to its high volume of production and releases, contributes significantly enough to air pollution concerns to warrant its continued listing as a toxic chemical under section 313.

Cyclohexane is among the 20 highest volume VOCs in production in the U.S.; annual production is over 2 billion pounds. Emissions of cyclohexane exceed 10 million pounds per year. EPA's concerns center around the contribution cyclohexane emissions make to air pollution problems. Cyclohexane emissions contribute to the formation of tropospheric ozone, one of the most intractable and widespread of the nation's environmental problems. The major component of smog, ozone causes serious respiratory problems, and has been implicated in widespread damage to crops and other vegetation. Cyclohexane emissions also contribute to the formation of formaldehyde and other hazardous air pollutants which present a serious health threat. Formaldehyde is a probable human carcinogen and is listed as a toxic chemical for which reporting is required under section 313.

Because cyclohexane is a high volume chemical with substantial emissions, it makes a significant contribution to VOC-related air pollution concerns. Hence, continued listing under section 313 is justified. It is not EPA's intention to include all VOC chemicals on the section 313 list; only those whose volume of use or emissions is large enough to raise substantial VOC concerns. Most high-volume VOC chemicals are already subject to reporting under section 313.

EPA has carefully considered the rationale for listing cyclohexane under section 313. EPA considers the contribution made by the atmospheric chemical reactions of cyclohexane, which result in the formation of ozone and other hazardous air pollutants, to be of sufficient human health and environmental concern as to justify continuing to list it as a "toxic" chemical for the purposes of section 313 reporting. Specifically, by contributing to ozone pollution, cyclohexane meets the criteria of section 313(d)(2) for both acute and chronic health effects, as well as for ecotoxicity effects.

EPA has also concluded that reporting releases of cyclohexane under section 313 will provide useful information to the public, EPA, and States from the point of view of both ozone and hazardous air pollutant concerns. Specifically, the site-specific type of data collected under section 313 will be valuable for validating and improving current data on VOC emission types, quantities, and sources and will aid in conducting research, and in designing regulations, guidelines, and standards, in the manner envisioned in section 313(h).

While EPA may utilize other statutory mechanisms to obtain emissions data on individual toxic chemicals, VOCs or otherwise, section 313 reporting is an appropriate mechanism for continuing to collect data on cyclohexane as a means of improving the current understanding by EPA, States, and the general public, of the quantities of emissions of these chemicals from manufacturing, processing, and user sources.

**List of Subjects in 40 CFR Parts 372**

Community right-to-know, Environmental protection, Reporting and recordkeeping requirements, Toxic chemicals.

Dated: March 8, 1989.

# Proposed Rules

Federal Register
Vol. 54, No. 49
Wednesday, March 15, 1989

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## DEPARTMENT OF ENERGY

### Office of the Secretary

### 10 CFR Part 600

### Financial Assistance Rules; Revised Policy on Objective Merit Review of Discretionary Financial Assistance Applications

**AGENCY:** Department of Energy.

**ACTION:** Proposed rule.

**SUMMARY:** The Department of Energy today proposes a revision of Subparts A and B of the Financial Assistance Rules, 10 CFR Part 600, to establish standards for program offices to follow in conducting the objective merit review of discretionary financial assistance applications, to provide authority for program assistant secretaries to issue general solicitations covering broad areas of research for which financial assistance is being made available, and to establish a requirement whereby applicants may receive an evaluation of their submission. In addition, this revision will give recipients of financial assistance research awards expanded authority to rebudget among categories and authority to carry over funds from one funding period to the next, to incur preaward costs, and to extend project periods without prior approval under certain circumstances. These changes will maintain the Federal stewardship over the funds being awarded while simultaneously allowing research to be done more efficiently and productively.

**DATES:** Written comments on the proposed rule must be received by April 14, 1989.

**ADDRESS:** Comments should be addressed to: James J. Cavanagh, Director, Business and Financial Policy Division (MA-422), Procurement and Assistance Management, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585.

**FOR FURTHER INFORMATION CONTACT:**
Edward F. Sharp, Business and Financial Policy Division (MA-422), U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-8192.
Christopher Smith, Office of the Assistant General Counsel for Procurement and Finance (GC-34), U.S. Department of Energy, Washington, DC 20585, (202) 586-1526.

**SUPPLEMENTARY INFORMATION:**

**Table of Contents**

I. Introduction
II. Proposed Changes to 10 CFR Part 600
III. Review under Executive Order 12291
IV. Review under the Regulatory Flexibility Act
V. Review under the Paperwork Reduction Act
VI. Review under the National Environmental Policy Act
VII. Review under Executive Order 12612
VIII. Public Comments

## I. Introduction

The Department of Energy (DOE) is today proposing to amend its Financial Assistance Rules to establish standards for program offices in setting up procedures for the objective merit review of discretionary financial assistance applications and to allow recipients of financial assistance research awards expanded authority without obtaining prior approval from the Contracting Officer to (1) rebudget among categories; (2) carry over funds from one funding period to the next; (3) incur limited preaward costs; and (4) extend project periods without additional funds.

Also, today's proposed rule establishes an outline for a Department-wide process for the review of applications for financial assistance. Requests for financial assistance funds are to be reviewed and evaluated by the DOE based on scientific merit of the project, applicant's qualifications, adequacy of applicant's facilities and resources, project appropriateness to the mission of the DOE, and other appropriate factors established and set forth by the cognizant program office. The DOE review process is to consist of review by DOE personnel for scientific and technical merit and program policy matters and may include external review by Federal (including DOE) and non-federal personnel either as part of a standing committee, ad hoc committee, or field reader review for scientific and technical merit. The Federal/non-federal composition of the review groups may vary, as long as objective review standards are maintained.

There is another provision of this proposed rule which will allow the issuance of general solicitations such that applications which are in the subject area of one of the listed programs may be treated as having been in response to the general solicitation.

Finally, a provision regarding evaluations provides that, upon request, the applicant will receive a written summary of the evaluation.

The DOE has concluded that the other proposed changes regarding prior approvals, carryovers, preaward costs and project extensions (which are the DOE's implementation of recommendations stemming from the Florida Demonstration Project) will provide additional flexibility to financial assistance recipients and reduce the work involved in managing financial assistance awards without adversely affecting appropriate Federal oversight of certain awards.

## II. Proposed Changes to 10 CFR Part 600

Section 600.3 is proposed to be amended by inserting in alphabetical order definitions for "ad hoc committee," "field readers," "objective merit review," "responsible official," and "standing commitee," and changing the definition of "research."

Section 600.9 is proposed to be changed by revising paragraph (a)(1) to provide authority for program assistant secretaries to issue general solicitations. Paragraph (c)(10) is being amended to allow program offices to establish due dates or periods appropriate for the receipt of applications. Multiple receipt dates throughout the year may be established which would permit applications to be "bunched" and reviewed in comparison to each other. Paragraph (c)(12)(vi) is being changed to provide that solicitations must contain specific requirements for non-statutory cost sharing when cost sharing is to be considered in the selection process.

Section 600.16 is proposed to be amended by revising paragraph (a) to establish the responsibility of the program office for setting up an objective merit review system and ensuring its satisfactory functioning. A new paragraph (b) is added to set out basic review requirements, including the goal to normally obtain review by at

least three individuals who have no other responsibilities concerning the financial assistance applications being reviewed. A new paragraph (c) has been added to outline requirements for comparative review. A new paragraph (d) has been added to describe the types of review processes which may be used, which include field readers, standing committees, and ad hoc committees. A new paragraph (e) has been added establishing a requirement for providing the applicant with an evaluation of his/her application. A new paragraph (f) has been added to address situations in which the reviewer has an interest in the application being reviewed. A new paragraph (g) has been added to establish deviation procedures from this part of the rule. Existing paragraphs (b) and (c) have been redesignated paragraphs (h) and (i).

Section 600.103 is proposed to be amended to eliminate all Federal prior approval requirements for a recipient of financial assistance research awards (including those in OMB Circulars A-21 and A-110) except for change in objective or scope, temporary replacement or change of principal investigator, change of key personnel, and change of the institution to which the award is made. It is also proposed to be amended to establish the authority of these recipients to incur preaward costs up to 90 days prior to a new renewal award. The section also provides that, if a recipient takes such an action, the DOE is not obligated to issue an award.

Section 600.106 is proposed to be amended by including a provision allowing recipients of financial assistance research awards to extend the final year of a project period without receiving the prior approval of the DOE. Recipients must take this prior to the originally established expiration date and notify the DOE within ten days of the extension.

Section 600.108 is proposed to be amended to allow recipients of financial assistance research awards to carry over unexpended funds in a continuation award without the prior approval of the DOE.

## III. Review Under Executive Order 12291

Today's proposal was reviewed under Executive Order 12291 (February 17, 1981). The DOE has concluded that the rule is not a "major rule" because its promulgation will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States based enterprises to compete in domestic or export markets. In accordance with requirements of the Executive Order, this rulemaking has been reviewed by the Office of Management and Budget (OMB).

## IV. Review Under the Regulatory Flexibility Act

These proposed regulations were reviewed under the Regulatory Flexibility Act of 1980, Pub. L. 96-354, 94 Stat. 1164, which requires preparation of a regulatory flexibility analysis for any regulation that will have a significant economic impact on a substantial number of small entities; i.e., small businesses, small organizations, and small governmental jurisdictions. The DOE has concluded that the proposed rule would only affect small entities as they apply for and receive financial assistance and does not create additional economic impact on small entities. The DOE certifies that this proposed rule will not have a significant economic impact on a substantial number of small entities and, therefore, no regulatory flexibility analysis has been prepared.

## V. Review Under the Paperwork Reduction Act

No information collection or recordkeeping requirements are imposed upon the public by this proposed rulemaking. Accordingly, no OMB clearance is required under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501, *et seq.*, or OMB's implementing regulations at 5 CFR Part 1320.

## VI. Review Under the National Environmental Policy Act

The DOE has concluded that promulgation of these wholly procedural rules clearly would not represent a major Federal action having significant impact on the human environment under the National Environmental Policy Act (NEPA) of 1969 (42 U.S.C. 4321, *et seq.* (1976)), the Council on Environmental Quality Regulations (40 CFR Parts 1500-1508), and the DOE guidelines (10 CFR Part 1021) and, therefore, does not require an environmental impact statement pursuant to NEPA.

## VII. Review Under Executive Order 12612

Executive Order 12612 requires that regulations or rules be reviewed for substantial direct effects on States, on the relationship between the national government and the States, or in the distribution of power among various levels of governments. If there are sufficient substantial direct effects, E.O 12612 requires preparation of a federalism assessment to be used in all decisions involved in promulgating or implementing a regulation or rule.

Today's proposed regulatory amendments, when finalized, will have a direct effect of State recipients of financial assistance who receive research awards. The number of awards effected is very small, however, and thus there will be insufficient direct effect to warrant the preparation of a federalism assessment by DOE.

## VIII. Public Comments

Interested persons are invited to participate in this rulemaking by submitting data, views, or arguments with respect to the proposed changes set forth in this notice. Three copies of written comments should be submitted to the address indicated in the "ADDRESS" section of this notice. All comments received will be available for public inspection in the DOE Reading Room, Room 1E-190, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, between the hours of 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays. All written comments received by April 14, 1989, will be fully considered prior to publication of a final rule resulting from this proposal. Any information you consider to be confidential must be so identified and submitted in writing, one copy only. The DOE reserves the right to determine the confidential status of the information and to treat it according to our determination.

The Department has concluded that this proposed rule does not involve a substantial issue of fact or law and that the proposed rule should not have substantial impact on the nation's economy or a large number of individuals or businesses. Therefore, pursuant to Pub. L. 95-91, the DOE Organization Act, and the Administrative Procedure Act (5 U.S.C. 553), the Department does not plan to hold a public hearing on this proposed rule.

**List of Subjects in 10 CFR Part 600**

Administrative practice and procedure, Cooperative agreements/energy, Copyrights, Debarment and suspension, Educational institutions, Energy, Grants/energy, Hospital, Indian tribal governments, Individuals, Inventions and patents; Nonprofit organizations, Reporting requirements, Small businesses.

In consideration of the foregoing, the DOE hereby proposed to amend Chapter

VOL 54 ISS 49 MR 15 1989 UMI

II of Title 10 of the Code of Federal Regulations by amending Part 600 as set fort below.

Issued in Washington, DC, March 7, 1989.

**Berton J. Roth,**

*Deputy Assistant Secretary for Procurement and Assistance Management.*

For the reasons set out in the preamble, Part 600 of Chapter II, Title 10 of the Code of Federal Regulations is proposed to be amended as follows:

**PART 600—[AMENDED]**

1. The authority citation for Part 600 continues to read as follows:

**Authority:** Sec. 644 and 646, Pub. L. 95–91, 91 Stat. 599 (42 U.S.C. 7254 and 7256); Pub. L. 97–258, 96 Stat. 1003–1008 (31 U.S.C. 6301–6308), unless otherwise noted.

**§ 600.3 [Amended]**

2. Section 600.3 is proposed to be amended by adding new definitions for "Ad hoc committee," "Field readers," and "Objective merit review" in alphabetical order and by revising the definition of "Research" as follows:

"Ad hoc committee" means a temporary committee established to perform a single, specific short-term task, after which the committee disbands.

"Field readers" means persons with expertise to evaluate a specific application or category of applications. Field readers may act as independent individuals or as members of a group with the review generally being done by mail.

"Objective merit review" means a thorough, consistent and independent examination of applications based on pre-established criteria by persons knowledgeable in the field of endeavor for which support is requested. This sort of review is conducted to provide advice to selecting officials based on an evaluation of the scientific or technical merit. The reviewers themselves may be engaged in comparable efforts in institutions or organizations similar to the applicant's or have in the past been directly involved in such activities.

"Responsible official" means the Heads of Departmental Elements/Program Assistant Secretaries. These individuals are responsible for the system of objective merit review of financial assistance applications funded by their program or department element. The functions associated with the objective merit review may be delegated, but only to the level specified in the relevant sections of this part. The responsible official, however, remains ultimately responsible for the execution of these functions.

"Standing committee" means a long-term committee established to review applications and may be used when required by legislation or when significant numbers of applications on specified topics are received periodically.

"Research" means any specific or engineering activity which (1) constitutes a systematic, intensive study directed specifically toward greater knowledge or understanding of the subject studied and contributes to a continuing flow of new knowledge; or (2) is directed toward applying new knowledge to meet a recognized need; and/or (3) applies such knowledge toward the production of useful methods, including design, development and improvement of prototypes and new processes to meet established requirements.

**§ 600.9 [Amended]**

3. Section 600.9 is amended by revising paragraphs (a)(1) and (c)(8), (10), and (12)(vi) as follows:

(a) *General.* * * *

(1) A Program Assistant Secretary may annually issue a program notice describing research areas in which financial assistance is being made available. Such notice shall also state whether the research areas covered by the notice are to be added to those listed in a previously issued program rule. If they are to be included, then applications received as a result of the notice may be treated as having been in response to that previously published program rule. If they are not to be included, then applications received in response to the notice are to be treated as unsolicited proposals. Solicitations, e.g., PONS and PRDAS (other than a program rule which serves to solicit applications), may be issued only by a DOE Contracting Officer.

* * * * *

(c) * * *

(8) The names of the responsible DOE Contracting Officer (or, for program notices, the program office contact) to contact for additional information, and, as appropriate, and address where application forms may be obtained;

* * * * *

(10) Appropriate periods or due dates for submission of applications and a statement describing the consequences of late submission. If programs have established a series of due dates to allow for the comparison of applications against each other, these dates shall be indicated in the solicitation;

* * * * *

(12) * * *

(vi) Sources of financing available to the project. Any expectation concerning cost sharing shall be clearly stated. While cost sharing is encouraged, unless the cost sharing expectation is addressed in the solicitation, it shall not be considered in the evaluation process and shall be considered only at the time the award is negotiated.

**§ 600.16 [Amended]**

4. Section 600.16 is amended by revising paragraph (a), redesignating paragraphs (b) and (c) as (h) and (i), and by adding new paragraphs (b) through (g) as follows:

(a) *General.* (1) Each responsible official must establish and publish in the **Federal Register** the details of the system of objective merit review which covers the financial assistance program administered by each cognizant program office within his or her jurisdiction within 120 days of the issuance of this rule for existing programs and prior to the review of applications for new programs. More than one program may adopt the same system. If a program wants to review an application or group of applications using the criteria and procedure of an already established review system other than its own, it may do so by following the deviation procedures described in paragraph (g) of this section. DOE employees designated by responsible officials by carry out the review process shall ensure that the evaluation of applications is conducted in a fair and objective manner.

(2) Objective merit review of financial assistance applications is intended to be advisory and is not intended to replace the authority of the program official with responsibility for deciding whether an award will be made. It is expected that the cognizant project/program officer (scientific monitor) who normally also reviews the proposal for technical/scientific merit, will, additionally, review it from a program policy perspective. Nevertheless, the ojbective merit review system must set forth the relationship between the reviewing individuals, or the review committees or groups, and the official who has the final decision-making authority. In defining this relationship, the system must set out, as a minimum, the decision-making and documentation processes to be followed by the authorized official responsible for selecting when and adverse recommendation has been received through the objective merit review process.

(3)(i) This section applies to all new and renewal applications (except applications for conferences/symposia and for awards which come under the criteria of paragraph (a)(3)(ii) of this section) in programs which make discretionary financial assistance awards and to any other financial assistance programs in which objective merit review is required by the authorizing legislation.

(ii) For projects in which multiple renewals are probable, an objective merit review need not necessarily be done at each renewal, but instead at appropriate points in the overall project period. A determination that a project need not be reviewed at each renewal shall be made in writing by the project officer at the time the initial award is issued, or at least one year prior to the date a renewal award would be issued, and concurred in by an official at least one level above the official responsible for selecting the application for award. The determination shall also indicate the reports required under the award. The criteria on which the determination that a project need not be reviewed at each renewal is based shall be included in the system of objective merit review to be established by the responsible official in accordance with paragraphs (a)(1) and (2) of this section.

(4) Each responsible official shall ensure consistency among DOE field offices in the implementation of the review system(s) for his/her program area.

(5) Each formal review system must contain the elements listed in paragraphs (b) through (e) of this section.

(b) *Basic review standards.* (1) Each application meeting policy and programmatic considerations shall generally be reviewed by at least three qualified persons in addition to the official responsible for selection.

(2) The reviewers of any particular application may be any mixture of federal or non-federal experts, including individuals from within the cognizant program office, except as indicated otherwise below (see paragraphs (b)(3), (5) and (d)(2)(ii) of this section). The DOE shall select external (non-DOE Federal or non-federal) reviewers on the basis of their professional qualifications and expertise in the field of research.

(3) In selecting persons in accordance with § 600.16(b) (1) and (2) to review applications, such selection of additional reviewers should not include, to the extent possible, anyone who, on behalf of the Federal Government, performed or is likely to perform any of the following duties for any of the applications:

(i) Providing substantive technical assistance to the applicant;

(ii) Approving/disapproving or having any decision-making role regarding the application;

(iii) Serving as the project officer or otherwise monitoring or evaluating the recipient's programmatic performance;

(iv) Serving as the Contracting Officer (CO), or performing business management functions for the project; or

(v) Auditing the recipient or the project.

Anyone who has line authority over a person who is ineligible to serve as a reviewer because of the above limitations is also ineligible to serve as a reviewer.

(4) It may occasionally be necessary, after the fact, to change project officer designation, thereby resulting in an individual who participated in the review of an application being appointed as the project officer. This will not be considered a violation of this policy of objective merit review provided the assignment was not expected when the review was conducted.

(5) Persons outside the cognizant program office must not have been employees of that office, including having line authority over that office, for one year prior to participation as a reviewer in the objective merit review process for that program.

(c) *Comparative review.* (1) In order to enhance the validity of the evaluation and rating process, applications can be evaluated in comparison to each other.

(2) If a program area has established a program notice, the responsible official may implement review procedures which will result in applications being evaluated in comparison to each other. Applications in response to that notice may be assigned to a group of field readers, to a standing committee, or to an ad hoc committee, as discussed below, which is capable of reviewing them, and may be considered along with other applications which were submitted in response to the program notice or which are eligible under the most nearly applicable program announcement. For solicitations, review procedures may also permit comparative evaluation with field readers, a standing committee, or an ad hoc committee being used as appropriate.

(d) *Types of review groups*—(1) *Field Readers.* (i) Objective merit review of applications may be obtained by using field readers to whom applications are sent for review and comment. Field readers may also be used as an adjunct to financial assistance application review committees when, for example, the type of expertise needed or the volume of financial assistance applications to be reviewed requires such auxiliary capacity.

(ii) Safeguards should be instituted to ensure that field readers clearly understand the process, their role, and the criteria upon which the applications are to be evaluated.

(iii) For those situations in which a standing committee is the appropriate review mechanism (see paragraph (d)(2) of this section), but a group of field readers must be used instead, it should function as nearly like a committee as possible; e.g., readers must receive all of the applications to be reviewed even though they are in geographically separate locations and all field readers should be instructed to follow the procedures established for evaluating the applications.

(2) *Standing committees.* (i) Standing committees are normally appropriate when required by legislation or when the following conditions prevail:

(A) A sufficient number of applications on specific topics to justify the use of a standing committee(s) is received by the program on a regular basis in accordance with a predetermined review schedule;

(B) There are a sufficient number of persons with the required expertise who are willing and able to (*1*) accept appointments, (*2*) serve over reasonably protracted periods of time, and (*3*) convene at regularly scheduled intervals or at the call of the chairperson; and

(C) The legislative authority for the particular program(s) involved extends for more than one year.

(ii) Persons outside the cognizant program office shall constitute at least half the reviewers on such committees unless a deviation from this requirement has been approved.

(3) *Ad hoc committees.* (i) Ad hoc review committees may not exceed one year in duration and are appropriately used when use of a standing committee is not feasible or when one of the following conditions prevails:

(A) A small number of applications is received on an intermittent basis;

(B) The program is one of limited duration, usually less than one year;

(C) The applications to be reviewed have been solicited to meet a specific program objective and cannot appropriately be reviewed by a standing committee because of subject matter, time constraints, or other limitations;

(D) The volume of applications received necessitates convening an additional committee(s) of available reviewers; or

(E) It is determined that the applications submitted have special review requirements, e.g., construction

BEST COPY AVAILABLE

VOL 54 ISS 49 MR 15 1989 UMI

of a facility, the complexity of subject matter cuts across the areas of expertise of two or more standing committees, or the subject matter is of a special, nonrecurring nature.

(ii) Ad hoc committees may not be used for reviewing financial assistance applications for any program for which a standing committee has been established (except for paragraph (d)(3)(i)(D) of this section) unless a deviation is approved.

(e) *Review summary.* Upon request, applicants are to be provided with a written summary of the evaluation of their application.

(f) *Reviewers with interest in application being reviewed.* Reviewers must comply with the requirements for the avoidance of conflict of interest established in Section 600.17. A committee or group of field readers which includes as objective merit reviewers any individuals who cannot meet these requirements with regard to a particular application being reviewed, e.g., officials mentioned in paragraphs (b)(3) and (5) of this section, shall operate as follows:

(1) These individuals or officials may not review, discuss, and/or make a recommendation on an application(s) in which they have a conflict of interest.

(2) In the case of a review committee, the committee member must absent himself or herself from the committee meeting during the review and discussion of the application(s) in which he/she has a conflict of interest.

(g) *Deviations.* (1) In any instance in which a program's preestablished review system is not to be used to review an application, group of applications, or class of applications, written prior approval for utilization of a different procedure, which itself must, to the extent possible, conform to the provisions of this section pertaining to objective merit review, must be obtained from the responsible official or his or her designee.

(2) If the deviation sought applies to a class of applications and constitutes a deviation from the requirements of this part, approval for deviation must be obtained in accordance with Section 600.4. If such request for deviation is approved, all details of the review procedure utilized and the proceedings and determination must be fully documented.

* * * * *

5. Section 600.31 is amended by revising paragraph (d) to read as follows:

**§ 600.31 Funding.**

* * * * *

(d) *Extensions.* (1) For research awards, recipients' awards may extend the expiration date of the final budget period of the project (thereby extending the project period) if additional time beyond the established expiration date is needed to assure adequate completion of the original scope of work within the funds already made available. A single extension, which shall not exceed twelve (12) months, may be made for this purpose, and must be made prior to the originally established expiration date. The recipient must notify the cognizant DOE Contracting Officer in the awarding office in writing within ten (10) days of the extension.

(2) For any type of financial assistance, the DOE may extend any other budget period without the need for competition or a justification of restricted eligibility if:

(i) In the case of the final budget period of a project period of a non-research award, the additional time necessary is 18 months or less in total, or for all other budget periods of both research and non-research awards, the additional time necessary is 6 months or less in total; and

(ii) The grantee submits a written request for an extension before the expiration date of the budget period in process and includes a justification for the extension along with an expenditure plan for the use of any additional funds requested. An expenditure plan need not be provided when no additional funds are requested, unless the grantee intends to rebudget funds in such a way as to require DOE prior approval or unless the grantee is instructed otherwise by the Contracting Officer.

* * * * *

**§ 600.32 [Amended]**

6. Section 600.32 is amended by revising paragraph (c)(2), removing paragraph (d), and redesignating and revising paragraphs (e) and (f) as (d) and (e) as follows:

* * * * *

(c) *Unobligated balances—(1) Other than research grants.* * * *

(2) *Research grants.* Any unobligated balance of funds which remains at the end of any funding period, except the final funding period of the project period, may be carried over to the next funding period, and may be used to defray costs of the period into which it is carried over. The recipient, in the continuation application, shall advise the DOE of the amount of funds to be carried over, the reason the funds remain, and their anticipated use in the next funding period. After review of the information in the continuation application, the DOE may adjust the amount included in the continuation award. The recipient shall not be entitled to reimbursement if a continuation award is not made. The recipient shall also include in the Financial Status Report the amount of the unobligated balance as of the end of each funding period.

(d) *Added funding not required.* Nothing in paragraph (c) of this section shall in any way require the DOE to increase the total amount obligated for the project.

(e) *Adjustments.* Whenever DOE adjusts the amount of an award under this subpart, it shall also make an appropriate upward or downward adjustment to the amount of required cost sharing in order that the adjusted award maintain any required percentage of DOE and non-Federal participation in the costs of the project.

* * * * *

7. Section 600.103 is amended by revising paragraphs (b)(6) and (g) to read as follows:

**§ 600.103 Cost determinations.**

* * * * *

(b) *Cost principles.* * * *

(6) Before a recipient may make changes in the following areas on research financial assistance awards, the written approval of the cognizant Contracting Officer at the DOE is required: (i) Changes in objectives or scope, (ii) temporary replacement or change of principal investigator or change of key personnel, and (iii) change of the institution to which the award is to be made. All other Federal prior approval requirements, including those in OMB Circulars A-21 and A-110, are waived for research awards. The recipient may maintain such internal prior approval systems as it considers necessary.

* * * * *

(g) *Preaward costs.*—(1) *All awards.* Any preaward expenditures are made at the recipient's risk. Approval of preaward costs by the Contracting Officer or incurrence by the recipient does not impose any obligation on DOE in the absence of appropriations, if an award is not subsequently made, or if an award is made for a lesser amount than the recipient expected.

(2) *Research awards only.* (i) For new or renewal research awards, recipients may incur preaward costs up to ninety (90) days prior to the effective date of the award. Preaward costs for periods preceding 90 days prior to the effective date of the award are allowable only if approved in writing, prior to incurrence, by a DOE Contracting Officer.

(ii) For continuation awards within a multiple year project, prior to recipt of continuation funding, preaward expenditures by recipients are not subject to the limitation or approval requirements of paragraph (g)(2)(i) of this section.

(iii) Preaward costs, as incurred by the recipient, must be necessary for the effective and economical conduct of the proejct, and the costs must be otherwise in accordance with these rules and may not include those specific costs for which agency prior approval is required under the circulars. In any instance in which the circulars permit the agency to grant prior approval to the recipient, it is the Department's intention to do so.

(3) *Other than research awards.* All other financial assistance recipients may incur preaward costs only if the expenditure is approved in writing, prior to incurrence, by the Contracting Officer. In the case of governmental entities, the approval must additionally be reflected on the award notice.

## SECURITIES AND EXCHANGE COMMISSION

**17 CFR Part 240**

**[Rel. No. 34-26609; File No. S7-11-89]**

## Short and Hedged Tendering In Connection With Partial Tender Offers

**AGENCY:** Securities and Exchange Commission.

**ACTION:** Proposed rulemaking.

**SUMMARY:** The Commission is proposing for comment amendments to Rule 10b-4 under the Securities Exchange Act of 1934, known as the short tendering rule. If adopted, these amendments would redesignate the rule as Rule 14e-4 and would clarify its provision. The amendments are not intended to effect any substantive change in the operation of the current rule. In addition, the Commission is requesting comment on the deregulation of hedged tendering.

**DATE:** Comments should be received on or before May 15, 1989.

**ADDRESS:** Comments shoud be submitted in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission 450 Fifth Street, NW., Mail Stop 6-9, Washington, DC 20549. Comment letter should refer to File No. S7-11-89. All submissions will be available for public inspection at the Commission's Public Reference Section, 450 5th Street, NW., Washington, DC 20549.

**FOR FURTHER INFORMATION CONTACT:** M. Blair Corkran or Jodie J. Kelley at (202) 272-2848, Office of Trading Practices, Division of Market Regulation, Securities and Exchange Commission, 450 Fifth Street NW., Mail Stop 5-1, Washington, DC 20549.

**SUPPLEMENTARY INFORMATION:** The Securities and Exchange Commission is publishing for comment amendments to clarify current Rule 10b-4 ("Rule") [1] under the Securities Exchange Act of 1934 ("Exchange Act") [2] and to redesignate the rule as Rule 14e-4. The Commission is also soliciting comment on the possible deregulation of hedged tendering. The Commission's review of the Rule is prompted by the decision of the Second Circuit in *Merrill Lynch, Pierce, Fenner & Smith, Inc. v. Bobker.*[3]

Rule 10b-4 was adopted by the Commission in 1968 [4] for the purpose of prohibiting "short tendering," *i.e.,* tendering more shares than a person owns in order to avoid or reduce the risk of *pro rata* acceptance in tender offers for less than all the outstanding securities of a class or series. The Rule was amended in 1984 [5] to prohibit the practice of "hedged tendering" in connection with partial offers, *i.e.,* tendering and then selling a portion of the tendered shares in the market.

### I. Introduction

#### *A. Background*

In making a tender offer for securities of a subject company, the bidder can tender for all the outstanding securities of the subject company or for a lesser amount. When a tender offer is made for less than all the outstanding equity securities of a class ("partial offer") and when a greater number of securities are tendered than is sought in the offer, the tendered securities must be accepted on a *pro rata* basis from all tendering securityholders.[6]

Partial offers involve a risk to securityholders of the subject company that not all of the securities tendered will be accepted. This risk is referred to as "proration risk." Before the adoption of Rule 10b-4, securityholders occasionally tendered more securities than they owned in order to diminish proration risk. By tendering a greater number of securities than they owned, and by guaranteeing their tenders,[7] market professionals were able to secure acceptance of a disproportionately larger number of the securities owned and tendered by them than could be secured by other persons who tendered only securities that they owned.[8]

The Commission adopted Rule 10b-4 in 1968 for the specific purpose of prohibiting short tendering.[9] The rule currently provides that it is a "manipulative or deceptive device or contrivance" within the meaning of section 10(b) of the Exchange Act for any person, in response to an offer or invitation for tenders of any security, to tender securities that he does not own.[10] Ownership is defined in paragraph (a) of the Rule. The Rule applies to all tender offers, whether made by a third party or by the issuer of the securities sought.[11]

[2] 15 U.S.C. 78a *et seq.*

[3] 808 F.2d 930 (2d Cir. 1986) (herein cited as *Bobker*).

[4] Securities Exchange Act Release No. 8321 (May 28, 1968), 33 FR 8289 ("Release 34-8321").

[5] Securities Exchange Act Release No. 20799 (March 29, 1984), 49 FR 13867, 13868 ("Release 34-20799").

[6] Section 14(d)(6) of the Exchange Act, 15 U.S.C. 78n(d)(6); Rule 13e-4(f)(3) under the Exchange Act, 17 CFR 240.13e-4(f)(3). When tendered securities are accepted on a *pro rata* basis, the offeror accepts only a percentage of the securities tendered by each securityholder. The percentage is calculated from a fraction whose numerator represents the total number of securities accepted and whose denominator represents the total number of securities tendered.

[7] Broker-dealers are able to tender by a letter of guarantee that promises the required shares will be delivered to the bidder in accordance with the terms of the offer.

[8] *See* Testimony of Chairman Manuel F. Cohen in Hearings on S. 510 Before the Subcommittee on Securities of the Senate Committee on Banking and Currency, 90th Cong., 1st Sess. 198-99 (1967).

[9] Release 34-8321.

[10] Short and hedged tendering may involve a "manipulative or deceptive device or contrivance" since securityholders that are not market professionals generally would not be aware that their proration risk may be substantially increased as a result of the use of short and hedged tendering by market professionals. Rule 10b-4 also furthers the purpose stated in the preamble of the Exchange Act "to prevent inequitable and unfair practices on * * * exchanges and markets," and is consistent with some of the goals of the Williams Act amendments to the Exchange Act, namely, to "assur[e] fair and equal treatment of all holders of the class of securities that is the subject of a tender offer," and "to eliminate discriminatory treatment among security holders who desire to tender their shares." *See* Securities Act Release No. 8653 (July 11, 1986), 51 FR 25873, and sources cited therein. *See also* text accompaning notes 39 and 40 *infra.* Moreover, it is an appropriate exercise of the Commission's general authority to adopt such rules and regulations "as may be necessary or appropriate to implement the provisions of [the Exchange Act]." Section 23(a) of the Exchange Act, 15 U.S.C. 78w(a).

[11] Although tender offers by an issuer are exempt from the provisions of section 14(d) of the Exchange Act, 15 U.S.C. 78n(d), they are subject to the antifraud provisions of section 14(e) of the Exchange Act, 15 U.S.C. 78n(e). In addition, issuer tender offers by issuers with a class of equity

Continued

VOL 54 ISS 49 MR 15 1989 UMI

Following the adoption of Rule 10b–4, it became apparent that requiring a shareholder to tender from a long position did not prevent market professionals from tendering shares they owned and then selling a portion of their shares before the proration deadline to a purchaser who would then also be able to tender the shares. This practice, known as hedged tendering, permitted tendering persons who hedged their tenders to shift proration risk to others who did not hedge.[12] The avoidance of proration risk was similar to that achieved by short tendering. The Advisory Committee on Tender Offers recommended that the Commission prohibit hedged tendering.[13]

In 1984, the Commission adopted amendments to Rule 10b–4 that were designed to prohibit hedged tendering without unduly affecting tendering practices or the structure of the trading markets during tender offers.[14] The amendments required a tendering person to have a net long position [15] to the extent of the tender not only at the time of tendering, but also at the end of the proration period. In 1985, the Commission adopted a further amendment to Rule 10b–4 to prohibit hedged tendering by use of call options. That amendment required that a tendering person's net long position be reduced by the number of shares underlying any in-the-money call options that the tendering person had written.[16]

*B. The Bobker Decision*

Jack Bobker, a customer of Merrill Lynch, Pierce, Fenner & Smith Inc. ("Merrill Lynch"), owned and tendered 4,000 shares of Phillips Petroleum Company ("Phillips") common stock in response to a tender offer by Phillips for approximately 50 percent of its outstanding common stock. Before the proration date of the Phillips offer, Bobker sold 2,000 shares of Phillips common stock short, making arrangements through Merrill Lynch to borrow the necessary shares. Shortly thereafter, Merrill Lynch's compliance department cancelled the short sale, apparently on the basis that Bobker would have been in violation of Rule 10b–4 if he had not covered his short position by the proration date.[17] Bobker commenced an arbitration proceeding claiming that his tender and his short sale were "independent transactions" and seeking $23,000 in profits that he allegedly would have earned if Merrill Lynch had not cancelled his short sale. The arbitrators awarded Bobker $11,500 and Merrill Lynch appealed. The District Court adopted the analysis of Rule 10b–4 set forth in the Commission's brief as *amicus curiae* and vacated the arbitration award, finding that the arbitrators had acted in "manifest disregard of the law" with respect to the application of Rule 10b–4 to Bobker's activities.[18] Bobker appealed.

The Second Circuit reversed and held that the arbitrators did not act in "manifest disregard of the law" in the manner in which they disposed of the arbitration proceeding.[19] In reaching that conclusion, the court's opinion emphasized that the arbitrators' "careful and conscientious analysis" of the application of Rule 10b–4 to the facts of the case resulted in "serious doubts * * * about the rationality and interpretation of the 'net long' proviso and how it serves the Rule's avowed purpose of preventing a stockholder such as Bobker from increasing his *pro rata* share of stock tendered and accepted over the *pro rata* share of that tendered by other stockholders." [20]

The court viewed Bobker as having tendered 4000 shares that he owned and continued on own, and then having separately sold 2000 "additional" shares borrowed from non-tendering shareholders.[21] The opinion stated that the "short sale would not enable Bobker to tender more shares than he actually owned or to dilute the *pro rata* acceptance of shares tendered by other shareholders by causing the same shares to be tendered by two or more shareholders by other shareholders." In supporting its view of Bobker's short sale as an indpendent transaction, the court said that Bobker's short sale "amounted to a separate gamble, inherent in every short sale * * * if the market price of Phillips stock, instead of falling, should rise." [22]

The court also noted that the term "net long" is not defined in the Rule, and that the Commission has stated that the meaning of net long is the same as that employed in interpreting Rule 10a–1 (the

---

security registered pursuant to Section 12 of the Exchange Act, 15 U.S.C. 78*l*(g), or which is required to file periodic reports pursuant to Section 15(d) of the Exchange Act, 15 U.S.C. 78o(d), or which is a closed-end investment company registered under the Investment Company Act of 1940, 15 U.S.C 80a–1 *et seq.*, are subject to Rule 13e–4 under the Exchange Act, 17 CFR 240.13e–4.

[12] Market professionals are able to guarantee their tenders and have ready access to borrowable stock. By short tendering or selling in the market after tendering, the professional can significantly reduce its proration risk, while increasing the proration risk of all those who cannot short or engage in a hedged tender, because the short or hedged tendering increases the number of shares that can be tendered. As the number of tendered shares increases, the percentage of shares accepted from each tendering shareholder decreases. *See* n.8 *supra*.

[13] As stated by the Commission Advisory Committee on Tender Offers:

> Notwithstanding contentions that short and hedged tendering operate to increase the efficiency of the market and to reduce the spread between the market price and tender price, thereby benefiting individuals who sell into the market rather than tender, the Committee strongly endorses continuation of Rule 10b–4's prohibition of short tendering and recommends that the rule be strenthened to prohibit specifically hedged tendering. Because short and hedged tendering opportunities are available almost exclusively to market professionals, they appear to provide a substantial, unfair advantage to market professionals. As a result, the Committee found that these techniques created too great a risk of undermining public confidence in the integrity of the markets. Advisory Committee on Tender Offers, Report of Recommendations 47–48 (July 1983) ("Advisory Committee Report") (footnotes omitted).

[14] Release 34–20799.

[15] A person's net long position is determined by offsetting shares owned by any shares sold short. *See* discussion at notes 24 and 25 *infra*.

[16] Securities Exchange Act Release No. 21782 (February 22, 1985), 50 FR 8100. This amendment was also recommended in the Advisory Committee on Tender Offers. Advisory Committee Report 50.

[17] *See* 808 F.2d at 934 n.3. At the time of Bobker's short sale, the transaction did not violate the Rule because paragraph (b)(1) of the Rule requires that a tendering person have a net long position equal to or greater than the amount of shares tendered only at the time of tendering and at the end of the proration period. Had Bobker taken steps to eliminate the short position or reduce his tender by the proration date, no violation would have occurred. Merrill Lynch preempted any such action by Bobker and effectively eliminated Bobker's ability to bring himself into compliance with Rule 10b–4, when it unilaterally cancelled the short sale. However, it seems clear that Bobker did not intend to comply with the net long requirement, because the profits upon which his claim for damages was based would only have accrued if the short position remained open past the proration date.

[18] *Merrill Lynch, Pierce, Fenner & Smith, Inc. v. Bobker*, 666 F. Supp. 444 (S.D.N.Y. 1988). "Manifest disregard of the law" by arbitrators is a judicially created ground for vacating an arbitration award. *See Wilko v. Swan*, 346 U.S. 427, 436–437 (1953).

[19] 808 F.2d at 936.

[20] 808 F.2d at 936–37. Two judges joined in the court's opinion. The third judge concurred in the result but disassociated himself from the court's discussion with respect to Rule 10b–4. 808 F.2d at 937–38 (Meskill, J., concurring).

[21] The court viewed the potential tender by the person who bought the Phillips shares from Bobker as substituting for a tender by "non-tendering" persons and thus not affecting the proration pool, apparently assuming that the person from whom Bobker borrowed Phillips shares to complete his short sale would not be able to tender into the offer. Under Rule 10b–4(a)(1), however, a person who would be deemed to own a security but for having lent it is permitted to tender the security. As a practical matter, shareholders who own margin securities held in street name as collateral by broker-dealers are generally not aware when their securities are loaned.

[22] 808 F.2d at 935.

short sale rule) [23] under the Exchange Act.[24] The court cited a 1938 Commission release on Rule 10a–1 explaining that a net long position is determined by offsetting against shares owned any shared sold short by the same person.[25] While specifically declining to decide whether the "net long" requirement of Rule 10b–4 as administered by the Commission is invalid, the court refused to grant deference to the Commission's interpretation of the net long proviso as applied to Bobker's short sale because the court viewed the interpretation as being inconsistent with the purpose of the Rule and as lacking a rational basis.[26]

*C. Analysis of the Bobker Decision*

The Commission believes that Bobker's short sale, assuming it was not covered by the end of the proration period, would have caused Bobker to violate the provisions of Rule 10b–4, which are intended to ensure that all tendering shareholders are subject to equal proration risk. The purpose of the Rule is not to limit the size of the proration pool (although it has that effect), but rather to promote equality of opportunity and of proration risk for all tendering securityholders.[27]

The amendments to Rule 10b–4 adopted by the Commission in 1984 were designed specifically to address the unfairness inherent in transactions such as Bobker's. The release adopting those amendments sets forth an example of hedged tendering that, but for the numbers used, exactly matches Bobker's tender and subsequent sale of shares.[28] Bobker would have participated in the proration pool as an owner of 4000 shares even though his actual net interest in Phillips shares was that of an owner of 2000 shares. His post-tender sale, whether or not structured as a separate transaction,[29] would have enabled him to shift his proration risk to other tendering shareholders.[30] Had Bobker estimated the *pro rata* acceptance rate correctly, he would have had little proration risk, because he would have received the tender offer price or a tender offer-influenced market price for all of his shares. The shares returned by Phillips could be used to cover Bobker's short position. Other tendering shareholders, by contrast, would have had their *pro rata* acceptance reduced to reflect the additional shares tendered by the buyer of Bobker's shares.

II. Proposals

Rule 10b–4 is a complex rule. In light of the Second Circuit's decision in *Bobker*, the Commission believes that it may be appropriate to clarify the Rule's rationale and substantive provisions.[31] Accordingly, the Commission is requesting comment on a proposed redraft of the Rule to clarify its provisions, particularly the net long proviso. The amendments to the Rule are not intended to effect any substantive change in the operation of the Rule.

The Commission also believes that, because the hedged tendering prohibition has been in effect over four years, it is now appropriate to request comment on whether the amendments to the Rule that prohibited hedged tendering have worked as intended and whether the prohibition continues to be appropriate.

*A. Clarifying Amendments*

The proposed amendments are designed to clarify the requirement of the Rule that all tendering securityholders have a net long position in the securities at least equal to the amount tendered, both when tendering and at the end of the proration period.[32]

In order to remove potential misunderstanding or ambiguity concerning the Rule's application to persons responding to a partial tender offer, paragraph (a)(1) would be restructured to define the term "net long position." [33] A person's "net long position" in a security would equal the excess, if any, of his "long position" in that security over his "short position." A person's "long position," as defined in paragraph (a)(1)(i), would include: (1) Securities to which a person or his agent has title or has purchased but has not yet received, (2) securities for which a person has converted, exchanged, or exercised a standardized call option or an equivalent security, and (3) securities that a person is entitled to receive upon conversion, exchange, or exercise of an equivalent security.[34] A person's "short

[24] *See* Release 34–8321.

[25] 808 F.2d at 934, *citing* Securities Exchange Act Release No. 1671 (February 8, 1936), 11 FR 10968, 10970 (1946). "[I]f a person maintains two accounts and is short 1000 shares of a security in one and long 1000 shares of the same security in another, any sales of such security by such person are short sales and are subject to the provisions of the [short sale rule]." *Id.*

[26] It should be noted that the court's discussion of Rule 10b–4 is dicta and does not constitute a holding in the case. *See* 808 F.2d at 936.

[27] *See* Release 34–20799, 49 FR at 13868. Consistent with this purpose, the Commission has not, for example, attempted to restrict market activities by non-tendering persons, even though short sales by such persons during the tender offer period potentially have the effect of expanding the proration pool. *See* text at n.45 *infra*.

[28] *See* Release 34–20799 n.7, 49 FR at 13868 n.7.

[29] The effect of Bobker's "separate" short sale was the same as if he had tendered 4000 shares by letter of guarantee, sold 2000 of those shares in the market and delivered them, and then borrowed 2000 shares in order to complete delivery to the bidder. Borrowed shares are not considered part of a person's net long position for purposes of Rule 10b–4.

[30] Unlike the typical speculative short seller, Bobker was not attempting to benefit from a post-tender offer decline in the price of Phillips' stock, because any decline that benefitted his short position would be offset by the reduced value of the tendered shares that were not accepted by the bidder.

Bobker probably was able to borrow shares initially to deliver on his short sale through Merrill Lynch only because Rule 10b–4 restricts market professionals from short and hedged tendering. Several commentators on the 1984 amendments stated that, in an environment in which hedged tendering is permitted, non-professionals will not be able to borrow shares in any partial offer in which such borrowing would be advantageous. *See*, e.g., letter from J. E. Buck, Secretary, New York Stock Exchange, to George A. Fitzsimmons, Secretary, SEC (February 2, 1982) ("NYSE Comment Letter"); and letter from Joseph McLaughlin, Chairman, Securities Industry Association, to George A. Fitzsimmons, Secretary, SEC (January 5, 1982) ("SIA Comment Letter"). The letters are contained in File No. S7–903.

[31] The Securities Industry Association ("SIA") has urged the Commission to clarify the uncertainty created by the *Bobker* decision. *See* letter from Dennis H. Greenwald, Chairman, SIA, to Richard Ketchum, Director, Division of Market Regulation, Securities and Exchange Commission (March 11, 1987), contained in File No. S7–11–89.

[32] As used herein, the "proration period" is the time during which acceptance of securities is made on a *pro rata* basis or by lot, including any extensions thereof, whether or not such period is required by statute or rule.

[33] As the *Bobker* court pointed out, the term net long is not defined in the Rule, and the net long proviso of the Rule was derived from another Commission rule. *See* text at n. 23 *supra*.

[34] Equivalent securities, as defined in paragraph (a)(2), are included in a person's long position for purposes of Rule 10b–4 to obviate the hardship of converting, exchanging, or exercising a tendering person's entire equivalent security position where only a small portion of the shares tendered are accepted by a bidder. A significant difference between the tender offer and the short sale context is that ownership of equivalent securities does not establish ownership of the underlying securities for purposes of Rule 3b–3 under the Exchange Act, 17 CFR 240.3b–3, which defines short sales.

Because recent partial tender offers have uniformly required delivery of all shares tendered rather than only those accepted, the Commission requests comment on whether the current ability to tender a subject security based upon mere ownership of an equivalent security is necessary or appropriate. If ownership of equivalent securities did not contribute to a person's long position in the underlying subject security, an equivalent security would have to be converted, exchanged, or exercised prior to tendering such subject securities. This change could be effected by deleting provisions (a)(1)(i)(E), (a)(1)(ii)(C), (a)(2), and (b)(1)(ii), and conforming other provisions in the proposed amendments to the Rule.

Continued

VOL 54 ISS 49 MR 15 1989 UMI

position" would be defined in paragraph (a)(1)(ii) as equivalent to the amount of subject securities that the person (1) has sold, (2) is obligated to return to a lender, (3) is obligated to deliver upon exercise of a non-standardized call option or right pursuant to which the holder may tender, or (4) is obligated to deliver upon exercise of an in-the-money standardized call option sold after a tender offer for the subject security has been announced or otherwise made known by the bidder. These provisions are all drawn from the current Rule.[36]

Paragraph (a)(5) would define a "partial tender offer" as a tender offer for less than all of the outstanding securities subject to the offer where acceptance is by lot or on a *pro rata* basis, or a tender offer for all of the outstanding shares with different offered consideration that involves *pro rata* acceptance. This definition would incorporate current paragraph (c) of the Rule and the staff's interpretive position that Rule 10b–4 applies to any tender offer involving prorationing.[38]

The proposed amendments would reflect the full scope of the Commission's authority to promulgate the Rule by substituting the phrase "it shall be unlawful" in paragraph (b). In addition, the Commission proposes to redesignate the Rule as Rule 14e–4. The redesignation will place the Rule among the provisions specifically relating to tender offers and reflect the primary rationale of the Rule.[37]

In the Williams Act amendments,[38] Congress indicated an intention that each shareholder receive equal treatment based upon the shareholder's interest in the securities that are the subject of a tender offer.[39] The Commission observes that short and hedged tendering require access to borrowed shares, and market professionals have a clear advantage in obtaining access to such shares.[40] A failure to prohibit short or hedged tendering would thus make a shareholder's position in a partial tender offer dependent both on the shareholder's interest in the securities subject to the tender *and* on the shareholder's ability to obtain access to borrowed shares. Was the latter factor a consideration that Congress intended to have influenced the incidence of proration rights?

Paragraph (b) is otherwise unchanged, except to reflect changes made in paragraph (a). Thus, a person may only tender into a partial tender offer if his net long position in the security equals or exceeds the number of securities tendered both at the time of tender and at the end of the proration period of the offer. The Commission requests comment, however, on whether the prohibition of multiple tendering, *i.e.*, tendering to two or more partial offers, set forth in paragraph (b)(3) of the Rule, continues to be appropriate. The Commission has not noted any problem in connection with multiple tendering where it has been permitted, *i.e.*, in offers not subject to the Rule. Moreover, with the elimination of the ten day minimum proration period,[41] the advantages that some tendering persons could obtain by multiple tendering appear to be lessened or eliminated.

Proposed paragraph (c), which permits exemptions, replaces current paragraph (d). Current paragraph (c), which limits the coverage of the rule to certain partial offers, is incorporated in the definition of partial offers in proposed paragraph (a)(5).[42]

Because the proposed amendments are not intended to effect any substantive changes in the current Rule, commentators are invited to address any provisions that might operate differently from those of the current Rule.

*B. Deregulation of Hedged Tendering*

The Commission also is requesting comment on whether it would be desirable to deregulate hedged tendering, while continuing to restrict short tendering. The principal argument in favor of permitting hedged tendering, put forth by several commentators on the 1984 Rule Amendments,[43] is that the practice of hedged tendering ultimately benefits those shareholders who choose not to tender but rather to sell into the market to avoid proration and other risks. According to this view, the ability to reduce the risk of loss on the returned shares enables risk arbitrageurs to increase the volume of their open market purchases of subject securities and thereby raises the market price. In this sense, as Commissioner Cox argued in his dissent from the Commission's 1984 decision to restrict hedged tendering, the hedged tendering prohibition reduces the price to those shareholders choosing to sell into the market in order to improve the prorationing position of shareholders who choose to tender into the offer. Is there any policy reason to prefer the interests of the one shareholder group over the interests of the other?[44]

Commentators are requested to discuss whether the suggested benefits of permitting hedged tendering mitigate or eliminate the potential adverse effects of the application of *pro rata* acceptance to the additional amount of shares that would be tendered, and whether such practices are either consistent or inconsistent with the

---

If the Commission retains the concept of equivalent securities, the proposed new forms of index products involving physical delivery, *see e.g.*, Securities Exchange Act Release No. 26369 [December 22, 1988], 53 FR 52801 (index participations), would not be deemed equivalent securities, *i.e.*, they would have to be exercised before a tender could be based on ownership of the underlying securities. Similarly, a person's unexercised short position in these products would not be part of his short position in the subject security.

[36] The definitions of the terms "equivalent security" in paragraph (a)(2), "subject security" in paragraph (a)(3), "tender" in paragraph (a)(4), and "standardized call option" in paragraph (a)(6) are unchanged from the current Rule.

[37] *See* Release 34–20799 n.13, 49 FR at 13869 n.13.

[38] Rule 10b–4 was adopted by the Commission in response to the suggestion by Congress in 1967 that the Commission exercise its authority under existing Exchange Act antifraud provisions to prohibit the "abuse" of short tendering. *See* Securities Exchange Act Release No. 8234 (January 3, 1968), 33 FR 513, citing Sen. Rep. No. 550, 90th Cong. 1st Sess. 5 (1967). Accordingly, the Rule was adopted pursuant to the authority of sections 10(b) and 23(a) of the Exchange Act, 15 U.S.C. 78j(b) and 78w(a). *See* Securities Exchange Act Release No. 8121 (May 28, 1966), 33 FR 8289. Since that time, the Commission has used its additional authority under the Williams Act in adopting amendments to the Rule. *See, e.g.*, Release 34–20799, 49 FR at 13870 (amendments adopted under sections 3(b), 10(a), 10(b), 14(e), 15(b), and 23(a) of the Exchange Act, 15 U.S.C. 78c(b), 78j(a), 78j(b), 78m(e), 78o(b), 78w(a)). *Cf.* Securities Exchange Act Release No. 24485 (May 20, 1987) n.10, 52 FR 19988, 19987 n.10.

Proposed Rule 14d–4, as amended, would be adopted pursuant to Sections 3(b), 10(a), 10(b), 13(e), 14(e), 15(c), and 23(a) of the Exchange Act, 15 U.S.C. 78c(b), 78j(a), 78j(b), 78m(e), 78n(e), 78o(c), and 78w(a). A parallel amendment is proposed for the Commission's exemptive authority in proposed paragraph (c).

[39] *See, e.g.* Exchange Act sections 14(d) (6) and (7), 15 U.S.C. 78n(d)(6) and (7).

[40] "The purpose of [section 14(d)(7)] is to assure . . . equality of treatment among all shareholders who tender their shares." Sen. Rep. No. 550, 90th Cong. 1st Sess. 10 (1967) and House Rep. No. 1711, 90th Cong. 2nd Sess. 11 (1968).

[41] *See* n.30 *supra*.

[42] Rule 14d–8 under the Exchange Act, 17 CFR 240.14d–8, requires bidders to accord pro rata treatment for all shares deposited during the period the offer remains open. *See* Securities Exchange Act Release No. 19336 (December 13, 1982), 47 FR 57679.

[43] The title of the Rule is proposed to be changed to "Prohibited transactions in connection with partial tender offers."

[44] *See* letter from William R. Harman, Principal, Secretary and General Counsel, Morgan Stanley & Co., to George A. Fitzsimmons, Secretary, SEC (December 3, 1981); letter from John A. Williams, Vice President, Merrill Lynch White Weld Capital Markets Group, to George A. Fitzsimmons, Secretary, SEC (November 13, 1981); letter from Sullivan & Cromwell to George A. Fitzsimmons, Secretary, SEC (November 13, 1981); NYSE Comment Letter; and SIA Comment Letter. The letters are contained in File No. S7–903. *See also* Release 34–20799, 49 FR at 13871 (Commissioner Cox, dissenting).

[44] *See* Release 34–20799, Commissioner Cox dissenting.

Congressional intent reflected in the Williams Act. Commentators are also invited to compare the relationship between the market price of securities subject to a partial tender offer and the tender offer price, both before and after the 1984 amendments that prohibited hedged tendering. Finally, commentators are requested to address how deregulation of hedged tendering would affect public confidence in the integrity of the securities markets.

It has also been suggested that the purpose sought by proscribing hedged tendering cannot be achieved effectively without a much more comprehensive regulation, which the Commission does not favor. Rule 10b–4 does not restrict all short sales, because non-tendering persons are not covered by Rule 10b–4. A short sale by a non-tendering person, however, potentially expands the proration pool in the same way as hedged sales by a tendering person, because the purchaser can tender in both cases. The shares that formerly would have been borrowed to effectuate hedged tendering may now be available to facilitate a higher level of short sales by non-tendering persons, and the impact on tendering shareholders can be similar.[45] The Commission requests comment on the extent of such short sales, and also on whether the ability of broker-dealers to participate as principals in the proration pool while profiting by lending shares to facilitate short sales during a partial tender offer is analogous to, or may be distinguished from, the advantage that market professionals may have if hedged tendering is permitted.

If the Commission determines to permit hedged tendering and determines to adopt the revised Rule, it would delete proposed paragraph (a)(1)(ii)(D) and would delete the words "and at the end of the proration period" from proposed paragraph (b). Accordingly, a tendering securityholder would be required to have a net long position only at the time of tendering.

The Commission is not aware of significant industry support for permitting short tendering.[46] However, because hedged tendering and short tendering have the same purpose and effect,[47] commentators favoring the deregulation of hedged tendering are invited to discuss whether short tendering should also be permitted. Specifically, commentators should consider whether the prohibition on short tendering will have any practical effect if hedged tendering were permitted.[48]

## III. Initial Regulatory Flexibility Act Certification and Effects on Competition

Section 603(a)[49] of the Administrative Procedure Act ("APA"),[50] as amended by the Regulatory Flexibility Act ("Flexibility Act"),[51] generally requires the Commission to undertake a regulatory flexibility analysis of all proposed rules, or proposed rule amendments, to determine the impact of such rulemaking on "small entities."[52] Section 605(b) of the Flexibility Act, specifically exempts from this requirement any proposed rule, or proposed rule amendment, which, if adopted, would not "have a significant economic impact on a substantial number of small entities." Because the proposed amendments do not result in substantive changes to the Rule, the Chairman of the Commission has certified that the proposed amendments, if adopted, would not have a significant economic impact on a substantial number of small entities.

Section 23(a) of the Exchange Act[53] requires the Commission to consider the impact any proposed rules would have on competition. While the Commission is not aware of any competitive impact likely to result from the proposal described in this release, commentators are invited to address that issue.

## IV. Text of Proposed Rule Amendments

On the basis of the above discussion and analysis, the Commission is proposing to amend Part 240 of Chapter II of Title 17 of the Code of Federal Regulations as follows:

---

[45] For those market professionals who are able to borrow stock, short sales during partial tender offers have always offered an opportunity to profit from an expected post-tender market price decline in the target security.

[46] In 1981, the Commission proposed that short tendering be deregulated. Securities Exchange Act Release No. 18050 (August 21, 1981), 46 FR 43656. In response to nearly unanimous commentary that opposed deregulation of short tendering, the Commission withdrew that proposal. Release 34–207799, 49 FR at 13870.

[47] *See* Release 34–20799, 49 FR at 13869.

[48] *Cf. id.*, 49 FR at 13868 n.7.

[49] 5 U.S.C. 603(a).

[50] 5 U.S.C. 551 *et seq.*

[51] Pub. L. No. 96–354 (September 19, 1980), 94 Stat. 1164 (1980), U.S. Code Cong. & Ad. News 1168.

[52] Although section 605(b) of the Flexibility Act defines the term "small entity," the statute permits agencies to formulate their own definitions. The Commission has adopted definitions of the term small entity for the purposes of Commission rulemaking in accordance with the Regulatory Flexibility Act. These definitions, as relevant to this proposed rulemaking, are set forth in Rule 0–10, 17 CFR 240.0–10. See Securities Exchange Act Release No. 18452 (January 28, 1982), 47 FR 5215.

[53] 15 U.S.C. 78w(a).

## PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

1. The authority citation for Part 240 is amended by adding the following citation:

Authority: Sec. 23, 48 stat. 901, as amended (15 U.S.C. 78w), unless otherwise noted. * * * Section 240.14e–4 also issued under the Exchange Act, 15 U.S.C. 78a *et seq.*, and particularly sections 3(b), 10(a), 10(b), 13(e), 14(e), 15(c), and 23(a) of the Exchange Act (15 U.S.C. 78c(b), 78j(a), 78j(b), 78m(e), 78n(e), 78o(c), and 78w(a)).

2. Section 240.10b–4 is proposed to be amended by redesignating it as § 240.14e–4, revising the section heading, and revising paragraphs (a)(1), (a)(5), (b) introductory text, (b)(1), (b)(3), and (c), and removing paragraph (d), as follows: The introductory text of paragraph (a) is republished for the convenience of the reader.

**§ 240.14e–4 Prohibited transactions in connection with partial tender offers.**

(a) *Definitions.* For purposes of this section:

(1) The amount of a person's "net long position" in a subject security shall equal the excess, if any, of:

(i) Such person's "long position," which shall equal the amount of subject securities that such person

(A) Or his agent has title to or would have title to but for having lent such securities, or

(B) Has purchased, or has entered into an unconditional contract, binding on both parties thereto, to purchase but has not yet received, or

(C) Has exercised a standardized call option for, or

(D) Has converted, exchanged, or exercised an equivalent security for, or

(E) Is entitled to receive upon conversion, exchange, or exercise of an equivalent security; over

(ii) Such person's "short position," which shall equal the amount of subject securities or subject securities underlying equivalent securities that such person

(A) Has sold, or has entered into an unconditional contract, binding on both parties thereto, to sell, or

(B) Has borrowed, or

(C) Has written a non-standardized option or granted any other right pursuant to which his shares may be tendered by another person, or

(D) Is obligated to deliver upon exercise of a standardized option sold on or after the date that a tender offer is first publicly announced or otherwise made known by the bidder to holders of the security to be acquired, if the

VOL 54 ISS 49 MR 15 1989 UMI

exercise price of such option is lower than the highest tender offer price or stated amount of the consideration offered for the subject security. For the purpose of paragraph (a)(1)(ii)(C), if one or more tender offers for the same security are ongoing on such date, the announcement date shall be that of the first announced offer. For the purpose of determining the net long position as of the end of the proration period, securities that have been tendered and not withdrawn are deemed to be part of the person's long position as of the end of the proration period.

* * * * *

(5) The term "partial tender offer" means a tender offer or request or invitation for tenders for less than all of the outstanding securities subject to the offer in which tenders are accepted either by lot or on a *pro rata* basis for a specified period, or a tender offer for all of the outstanding shares that offers a choice of consideration in which tenders for different forms of consideration may be accepted either by lot or on a *pro rata* basis for a specified period.

* * * * *

(b) It shall be unlawful for any person acting alone or in concert with others, directly or indirectly, to tender any subject security in a partial tender offer:

(1) For his own account unless at the time of tender, and at the end of the proration period or period during which securities are accepted by lot (including any extensions thereof), he has a net long position equal to or greater than the amount tendered in—

(i) The subject security and will deliver or cause to be delivered such security for the purpose of tender to the person making the offer within the period specified in the offer, or

(ii) An equivalent security and, upon the acceptance of his tender will acquire the subject security by conversion, exchange, or exercise of such equivalent security to the extent required by the terms of the offer, and will deliver or cause to be delivered the subject security so acquired for the purpose of tender to the person making the offer within the period specified in the offer; or

* * * * *

(3) If the same security has been tendered in response to any other partial tender offer, unless such other tender has been withdrawn.

(c) This rule shall not prohibit any transaction or transactions which the Commission, upon written request or upon its own motion, exempts, either unconditionally or on specified terms and conditions.

By the Commission.

Date: March 8, 1989.

**Jonathan G. Katz,**

*Secretary.*

**Regulatory Flexibility Act Certification**

I, David S. Ruder, Chairman of the Securities and Exchange Commission, hereby certify pursuant to 5 U.S.C. 605(b) that the proposed amendments to Rule 10b–4 set forth in Securities Exchange Act Release No. 25809, if promulgated will not have a significant economic impact on a substantial number of small entities. The reasons for this certification are that the proposed amendments (i) only prohibit certain conduct and do not impose any recordkeeping, data collection, or reporting requirements on entities subject to the Rule, and (ii) do not result in substantive changes to the Rule.

Dated: March 8, 1989.

**David S. Ruder,**

*Chairman.*

## 17 CFR Part 240

**[Rel. No. 34–26906; File No. S7–10–89]**

## Customer Protection—Reserves and Custody of Securities

**AGENCY:** Securities and Exchange Commission.

**ACTION:** Proposed rule amendment.

**SUMMARY:** The Securities and Exchange Commission ("Commission") is publishing for comment a proposed rule amendment to its customer protection rule. The amendment will expand the categories of instruments that broker-dealers may deliver as collateral to customers from whom they are borrowing government securities. In addition to the instruments currently permitted under the rule, the amendment will allow broker-dealers to deliver as collateral "government securities," as defined in sections 3(a)(42)(A) (*e.g.* securities issued by the Government National Mortgage Association) and 3(a)(42)(B) of the Securities Exchange Act of 1934 ("Exchange Act"), and securities issued or guaranteed by the Federal Home Loan Mortgage Corporation, the Federal National Mortgage Association, the Student Loan Marketing Association, or the Financing Corporation. In the interim, the Commission is authorizing the Division of Market Regulation ("Division") to issue a letter to the Public Securities Association stating that the Division will not recommend any action to the Commission if broker-dealers expand, in accordance with the proposed rule amendment, the categories of instruments they deliver as collateral to customers in government securities borrowings.

**DATE:** Comments should be received by May 1, 1989.

**ADDRESSES:** Persons wishing to express their views should submit their comments in triplicate addressed to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 5th Street, NW., Mail Stop 6–9, Washington, DC 20549. Reference should be made to File No. S7–10–89.

**FOR FURTHER INFORMATION CONTACT:** Michael A. Macchiaroli at (202) 272–2904, Michael P. Jamroz at (202) 272–2372 or Jerry W. Carpenter at (202) 272–3728, Division of Market Regulation, 450 5th Street, NW., Mail Stop 5–1, Washington, DC 20549.

**SUPPLEMENTARY INFORMATION:**

### I. Background

The Commission's customer protection rule, Rule 15c3–3 (17 CFR 240.15c3–3) under the Exchange Act, requires that a broker-dealer, among other things, promptly obtain and thereafter maintain physical possession or control of all fully-paid and excess margin securities carried by it for the account of "customers." [1] Paragraph (b)(3) sets forth certain conditions under which a broker-dealer may borrow for its own use customer fully-paid or excess margin securities without being deemed to be in violation of the rule's possession or control requirement. Paragraph (b)(3)(iii) requires that the broker-dealer and the lender enter into a written agreement that, among other things, specifies that the broker-dealer must provide to the lender collateral consisting exclusively of cash, United States Treasury bills, United States Treasury notes, or an irrevocable letter of credit issued by a bank.

Because the borrowing of government securities plays an important role in the government securities market, the Commission believes that, for purposes of the customer protection rule, the categories of instruments that broker-dealers can provide to customer lenders in government securities borrowings should be expanded. Therefore, the Commission is proposing for comment an amendment to the customer protection rule to allow broker-dealers to provide, in addition to the instruments currently listed in paragraph (b)(3)(iii) of the rule, certain government securities [2] as the collateral in government securities borrowings.

[1] The term "customer" is defined at subparagraph (a)(1) of Rule 15c3–3.

[2] The term "government securities" is defined at Section 3(a)(42) of the Exchange Act.

### II. Proposed Change

Currently, paragraph (b)(3)(iii) of the customer protection rule requires that a broker-dealer borrowing securities from a customer provide to that customer collateral "consisting exclusively of cash or United States Treasury bills and Treasury notes or an irrevocable letter of credit issued by a bank as defined in section 3(a)(6)(A) through (C) of the Securities Exchange Act which fully secures the loan of securities * * *." The proposed amendment will allow a broker-dealer that is borrowing government securities to provide to the lender collateral consisting of either the instruments currently listed in paragraph (b)(3)(iii), government securities as defined at sections 3(a)(42)(A) and 3(a)(42)(B) of the Exchange Act, [3] or securities issued or guaranteed by the Federal Home Loan Mortgage Corporation ("Freddie Mac"), the Federal National Mortgage Association ("Fannie Mae"), the Student Loan Marketing Association ("Sallie Mae"), or the Financing Corporation ("FICO"). The proposed amendment excludes zero coupon bonds and "stripped" securities as instruments that may be pledged as collateral.

In a request that the Commission review the categories of instruments that may be provided as collateral to customers in government securites borrowings, the Public Securities Association ("PSA") [4] stated its belief that the liquidity of the government securities market would be improved by permitting broker-dealers to use the government securities set forth in the proposed rule amendment. An increase in liquidity would result because broker-dealers would be afforded greater flexibility in the types of government securities that could be pledged as collateral in the securities borrowing used to cover their short sales and fails to deliver. [5] The PSA also believes that by expanding the pool of government securities that could be pledged as collateral under the customer protection rule, liquidity would be increased because the financing opportunities available to broker-dealers in connection with their market-making activities would be significantly expanded. [6]

The Commission preliminarily believes that the PSA's request, that the Commission expand the categories of instruments that broker-dealers may deliver as collateral to customers in government securities borrowings, and the basis for that request have merit; therefore, the Commission is publishing for comment the proposed rule amendment. The Commission requests comments on the sources of potential costs and benefits associated with the proposed amendment to the customer protection rule and seeks quantification of any costs or benefits identified.

The Commission also requests comments on the propriety of amending the rule to permit broker-dealers to deliver as collateral to customers in borrowings of equity securities or other debt securities the government securities set forth in the proposed rule amendment. Specifically, the Commission seeks information and evidence indicating whether, from the standpoint of customer protection, a distinction should be made between collateral eligible for loans of government securities and collateral eligible for loans of other securities. If appropriate, would such a distinction be based upon the nature or needs of the customer lenders, upon the nature of the borrowed securities or their markets, or upon some other consideration? The Commission also seeks comments and quantifiable data on such questions as: (1) How widespread is the practice of borrowing equity securities or other debt securities from customers (*e.g.*, to cover short sales, fails to deliver, or other similar situations); and (2) to what degree would customer lenders in such transactions accept collateral other than the collateral now permitted by the rule?

### III. Regulatory Flexibility Act Certification

Section 603(a) [7] of the Administrative Procedure Act, [8] as amended by the Regulatory Flexibility Act, [9] requires the Commission to undertake a regulatory flexibility analysis of all proposed rules or proposed rule amendments to determine the impact of such rulemaking on "small entities." Section 605(b) of the Regulatory Flexibility Act specifically exempts from this requirement any proposed rule amendment which, if adopted, would not "have a significant economic impact on a substantial number of small entities."

Chairman Ruder has certified that this rule amendment, if adopted, will not have a significant economic impact on a substantial number of small entities because most broker-dealers who are involved in the borrowing of government securities from non-broker-dealers do not fall within the meaning of "small business" or "small organization" as defined by 17 CFR 240.0–10.

### IV. Statutory Authority

Pursuant to the Securities Exchange Act of 1934 and particularly sections 15 (c)(3) and 23 thereof, 15 U.S.C. 78o(c)(3) and 78w, the Commission proposes to amend § 240.15c3–3 of Title 17 of the Code of Federal Regulation in the manner set forth below.

**List of Subjects in 17 CFR Part 240**

Reporting and recordkeeping requirements, Securities.

### V. Text of Proposed Amendments

In accordance with the foregoing, it is proposed to amend 17 CFR Part 240 as follows:

## PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

1. The authority citation for Part 240 continues to read as follows:

**Authority:** Sec. 23, 48 Stat. 901, as amended (15 U.S.C. 78w) * * * § 240.15c3–3 is also issued under Sec. 15(c)(3), 15 U.S.C. 78o(c)(3).

2. By amending § 240.15c3–3 by revising paragraph (b)(3)(iii) as follows:

**§ 240.15c3–3 Customer protection—reserves and custody of securities.**

(b) *Physical possession or control of securities.*

(3) * * *

(iii) Specifies that the broker or dealer (A) must provide to the lender, upon the execution of the agreement or by the close of the business day of the loan if

[3] For a security to fall within the definition of "government securities" found at section 3(a)(42)(B) of the Exchange Act, it must, among other things, be designated an "exempt security" by the Secretary of the Treasury. The current list of designated securities is found at 52 FR 38550 (Oct. 16, 1987).

[4] The PSA represents approximately 300 banks and broker-dealers that underwrite, trade, and distribute U.S. government securities, federal agency securities, certain mortgage-backed securities, and state and local government securities. All primary dealers, designated by the Federal Reserve Bank of New York, in U.S. government securities are members of the PSA.

[5] Since the market for Treasury-issued securities, in particular, depends upon the broker-dealers ability to effectuate short sales without undue expense, flexibility in the government securities which could be used as collateral will increase liquidity.

[6] Currently, a broker-dealer holding government securities that are not allowable collateral under paragraph (b)(3) of the rule must first use those government securities to borrow cash and then pledge the cash as collateral in the securities borrowing.

[7] 5 U.S.C. 603(a).

[8] 5 U.S.C. 551 *et seq.*

[9] Pub. L. No. 96–354, 94 Stat. 1164 (1980).

VOL 54 ISS 49 MR 15 1989 UMI

the loan occurs subsequent to the execution of the agreement, collateral consisting exclusively of cash, United States Treasury bills, United States Treasury notes, or an irrevocable letter of credit issued by a bank as defined in section 3(a)(6) (A) through (C) of the Securities Exchange Act which fully secures the loan of securities or, when the broker or dealer is borrowing government securities, collateral consisting of, in addition to that previously provided for in this section (but excluding zero coupon bonds and "stripped" securities), "government securities" as defined in section 3(a)(42)(A) or section 3(a)(42)(B) of the Securities Exchange Act, or securities issued or guaranteed by the Federal Home Loan Mortgage Corporation, the Federal National Mortgage Association, the Student Loan Marketing Association, or the Financing Corporation and (B) must mark the loan to the market not less than daily and, in the event that the market value of all the outstanding securities loaned at the close of trading at the end of the business day exceeds 100 percent of the collateral then held by the lender, the borrowing broker or dealer must provide additional collateral of the type described in paragraph (b)(3)(iii)(A) of this section to the lender by the close of the next business day as necessary to equal, together with the collateral then held by the lender, not less than 100 percent of the market value of the securities loaned; and

* * * * *

By the Commission.

**Jonathan G. Katz,**

*Secretary.*

March 8, 1989.

### Regulatory Flexibility Act Certification

I, David S. Ruder, Chairman of the Securities and Exchange Commission, hereby certify, pursuant to 5 U.S.C. 605(b), that the proposed amendment to Rule 15c3-3 set forth in Securities Exchange Act Release No. 26608, if adopted, will not have a significant economic impact on a substantial number of small entities. The reason for this Certification is that most broker-dealers who are involved in the borrowing of government securities from non-broker-dealers do not fall within the meaning of "small business" or "small organization" as defined by 17 CFR 240.0-10.

**David S. Ruder,**

*Chairman.*

Dated: February 24, 1989.

## FEDERAL EMERGENCY MANAGEMENT AGENCY

### 44 CFR Part 67

**[Docket No. FEMA-6861]**

### Proposed Flood Elevation Determinations; Florida et al.

**AGENCY:** Federal Emergency Management Agency.

**ACTION:** Proposed rule.

**SUMMARY:** Technical information or comments are solicited on the proposed base (100-year) flood elevations and proposed base flood elevation modifications listed below for selected locations in the nation. These base (100-year) flood elevations are the basis for the floodplain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

**DATES:** The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in each community.

**ADDRESSES:** See table below.

**FOR FURTHER INFORMATION CONTACT:** John L. Matticks, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-2767.

**SUPPLEMENTARY INFORMATION:** The Federal Emergency Management Agency gives notice of the proposed determinations of base (100-year) flood elevations and modified base flood elevations for selected locations in the nation, in accordance with Section 110 and Section 208 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR 67.4.

These elevations, together with the floodplain management measures required by § 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the proposed flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under Section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the floodplain area. The local community voluntarily adopts floodplain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the floodplain and do not prohibit development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

## ACTION

### National Volunteer Advisory Council Meeting—Change of Date and Location

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, as amended), notice is hereby given of a meeting of the National Volunteer Advisory Council, change of date and location as previously noticed, 54 FR 8577, March 1, 1989.

*From:* March 17, 1989, 9:00 a.m., Grand Hyatt Hotel, 1000 H Street NW., Washington, DC.

*To:* March 16, 1989, 9:00 a.m., Omni Shoreham Hotel, 2500 Calvert St., NW., Washington, DC.

*Purpose:* To select nominees for the President's Volunteer Action Awards for 1989 and hold the regular Council meeting.

In accordance with the determination of the Director of ACTION, this meeting will be partially closed to the public from 9:00 a.m. until 1:00 p.m., pursuant to subsection (c)(9)(B) of section 552b of Title 5, United States Code. The determination of the Director of ACTION is available for public inspection at 806 Connecticut Avenue, NW., Washington, DC. 20525, during regular business hours of 8:30 a.m. to 5:30 p.m.

**FOR FURTHER INFORMATION CONTACT:** Alyse Best, Special Assistant to the Director, at (202) 634-9380.

Signed this 10th day of March 1989, in Washington, DC.

**Donna M. Alvarado,**
*Director of ACTION.*

Date: March 10, 1989.

## DEPARTMENT OF AGRICULTURE

### Forms Under Review by Office of Management and Budget

March 10, 1989.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of Pub. L. 96-511 applies; (9) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA, OIRM, Room 404-W Admin. Bldg., Washington, DC 20250, (202) 447-2118.

Comments on any of the items listed should be submitted directly to: Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attn: Desk Officer for USDA.

If you anticipate commenting on a submission but find that preparation time will prevent you from doing so promptly, you should advise the OMB Desk Officer of your intent as early as possible.

**Reinstatement**

## COMMISSION ON CIVIL RIGHTS

### West Virginia Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a community forum of the West Virginia Advisory Committee to the Commission will convene at 1:30 p.m. and adjourn at 4:30 p.m. on March 21, 1989, at the Governor's Conference Room, State Capitol Building., Charleston, WV 25305. The purpose of the meeting is to hear presentations on the current civil rights laws in West Virginia, their enforcement, and the prospect of new legislation.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson, Adam R. Kelly (304/652-4141) or John I. Binkley, Director of the Eastern Regional Division of the Commission at (202/523-5264 or TDD 202/276-8117). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter should contact the Regional Division office at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, March 2, 1989.

**Melvin L. Jenkins,**
*Acting Staff Director.*

## DEPARTMENT OF COMMERCE

### Bureau of Export Administration

### MCTL Implementation Technical Advisory Committee; Partially Closed Meeting

A meeting of the MCTL Implementation Technical Advisory Committee will be held March 16, 1989, at 10:00 a.m., in the Herbert C. Hoover Building, Room 1617-F, 14th Street and Constitution Avenue NW., Washington, DC. The Committee advises the Office of Technology and Policy Analysis in the implementation of the Militarily Critical Technologies List (MCTL) into the Export Administration Regulations as needed. The meeting is called on short notice because of COCOM deliberations which have just recently been scheduled.

**Agenda**

*General Session*

1. Opening Remarks by the Commerce Representative.
2. Introduction of Members and Visitors.
3. Presentation of Papers or Comments by the Public.
4. Election of Committee Chairman.
5. Discussion of Unilateral Technical Data Controls.

*Executive Session*

6. Discussion of matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control programs and strategic criteria related thereto.

The General Session of the meeting will be open to the public and a limited number of seats will be available. To the extent time permits, members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on January 10, 1988, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, that the series of meetings or portions of meetings of the Committee and of any Subcommittee thereof, dealing with the classified materials listed in 5 U.S.C. 552(c)(1) shall be exempt from the provisions relating to public meetings found in section 10 (a)(1) and (a)(3), of the Federal Advisory Committee Act. The remaining series of meetings or portions thereof will be open to the public. A copy of the Notice of Determination to close meetings or portions of meetings of the Committee is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, Washington, DC. For further information or copies of the minutes call Ruth D. Fitts, 202-377-4950.

Date: March 8, 1989.

**Betty A. Ferrell,**
*Director, Technical Advisory Committee Unit, Office of Technology and Policy Analyses.*

## DEPARTMENT OF COMMERCE

### International Trade Administration

## DEPARTMENT OF THE INTERIOR

### Office of the Secretary

**[Docket No. 80996-8243]**

### Allocation of Duty-Exemptions for Calendar Year 1989 Among Watch Producers Located in the Virgin Islands and Guam

**AGENCY:** Import Administration, International Trade Administration, Department of Commerce; and Office of the Secretary, Department of the Interior.

**ACTION:** Allocation of duty-exemptions for calendar year 1989 among producers located in the Virgin Islands and Guam.

**SUMMARY:** This action allocates 1989 duty-exemptions for watch producers located in the Virgin Islands and Guam pursuant to Pub. L. 97-446.

**FOR FURTHER INFORMATION CONTACT:** Faye Robinson, (202) 377-1660.

**SUPPLEMENTARY INFORMATION:** Pursuant to Pub. L. 97-446, the Departments of the Interior and Commerce (the Departments) share responsibility for the allocation of duty exemptions among watch assembly firms in the U.S. insular possessions and the Northern Mariana Islands. The total quantity of watches and watch movements which may be entered free of duty from the insular possessions and the Northern Mariana Islands is 6,700,000 units. Of this amount, 4,700,000 units may be allocated to Virgin Islands producers, 1,000,000 to Guam producers, 500,000 to American Samoa producers and 500,000 to Northern Mariana Islands producers (53 FR 52678).

The criteria for the calculation of the 1989 duty-exemption allocations among insular producers are set forth in § 303.14 of the regulations (15 CFR Part 303) as amended on December 29, 1988 (53 FR 52678). The amendments to § 303.14 of the regulations dated December 30, 1988 (53 FR 52994) are not included in the criteria because these amendments were effective only with respect to entries made and wages and taxes paid on or after January 1, 1989.

The Departments have verified the data submitted on application form ITA-334P by producers in the territories and inspected the current operations of all producers in accordance with § 303.5 of the regulations.

The verification established that in calendar year 1988 the Virgin Islands watch assembly firms shipped 3,438,149 watches and watch movements into the customs territory of the United States under Pub. L. 97-446. The dollar amount of creditable corporate income taxes paid by Virgin Islands producers during calendar year 1988 plus the creditable wages paid by the industry during calendar year 1988 to residents of the territory totalled $6,825,179.

There is only one producer in Guam. Publication of the Guam data, accordingly, would disclose competitively sensitive information. The calendar year 1989 Virgin Islands and Guam annual allocations set forth below are based on the data verified by the Departments in the Virgin Islands and Guam. The allocations reflect adjustments made in data supplied on the producers' annual application forms (ITA Form-334P) as a result of the Departments' verification; and reallocation of duty-exemptions which have been voluntarily relinquished by some producers pursuant to § 303.6(b)(2) of the regulations.

The duty-exemption allocations for calendar year 1989 in the Virgin Islands are as follows:

| Name of firm | Annual allocation |
|---|---|
| Belair Quartz, Inc. | 500,000 |
| Hampden Watch Co., Inc. | 300,000 |
| Master Time Co., Ltd. | 550,000 |
| Progress Watch Co., Inc. | 700,000 |
| Unitime Industries, Inc. | 770,000 |
| Tropex, Inc. | 500,000 |
| Timex, V.I., Inc. | 750,000 |

The duty-exemption allocation for Guam is as follows:

| Name of Firm | Annual Allocation |
|---|---|
| Timewise Ltd. | 800,000 |

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

### Issuance of Endangered Species Permit; Archie Carr Center for Sea Turtle Research (P436)

On November 23, 1988, notice was published in the **Federal Register** (53 FR 47568) that an application had been filed by the Archie Carr Center for Sea Turtle Research, Department of Zoology, University of Florida, Bartham Hall, Gainesville, Florida 32611, for a permit to take the following species of sea turtles for scientific research: Green turtle (*Chelonia mydas*), loggerhead turtle (*Caretta caretta*), hawksbill turtle (*Eretmochelys imbricata*), leatherback turtle (*Dermochelys coriacea*), olive ridley turtle (*Lepidochelys olivacea*), and Kemp's ridley turtle (*Lepidochelys kempi*).

Notice is hereby given that on February 21, 1989, as authorized by the provisions of the Endangered Species Act of 1973, the National Marine Fisheries Service issued a Permit for the above taking, subject to certain conditions set forth therein.

Issuance of this Permit, as required by the Endangered Species Act of 1973, is based on the finding that such Permit: (1) Was applied for in good faith; (2) will not operate to the disadvantage of the endangered species which is the subject of the Permit; and (3) will be consistent with the purposes and policies set forth in section 2 of the Act. This Permit was also issued in accordance with and is subject to Parts 220–222 of Title 50 CFR, of the National Marine Fisheries Service regulations governing endangered species permits.

The Permit is available for review in the following offices:

Office of Protected Resources, National Marine Fisheries Service, 1335 East West Hwy., Room 7324, Silver Spring, Maryland 20910; and

Director, Southeast Region, National Marine Fisheries Service, 9450 Koger Blvd., St. Petersburg, Florida 33702.

Date: March 9, 1989.

**Nancy Foster,**

*Director, Office of Protected Resources and Habitat Programs, National Marine Fisheries Service.*

BILLING CODE 3510-22-M

### Issuance of Marine Mammals Permit; Micke Grove Zoo (P416)

On December 1, 1988, notice was published in the **Federal Register** (53 FR 48572) that an application had been filed by the Micke Grove Zoo, 11793 N. Micke Grove Road, Lodi, California 95240, to permanently maintain a beached/stranded harbor seal (*Phoca vitulina*) for public display purposes.

Notice is hereby given that on March 9, 1989, as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), the National Marine Fisheries Service issued a Permit for the above taking, subject to certain conditions set forth therein.

Issuance of this Permit is based on a finding that the proposed taking is consistent with the purposes and policies of the Marine Mammal Protection Act. The Service has determined that Micke Grove Zoo offers an acceptable program for education or conservation purposes. The Micke Grove Zoo facilities are open to the public on a regularly scheduled basis and access is not limited or restricted other than by an admission fee.

The Permit is available for review in the following offices:

Office of Protected Resources, National Marine Fisheries Service, 1335 East West Hwy., Rm 7324 Silver Spring, Maryland 20910; and

Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731.

Date: March 3, 1989.

**Nancy Foster,**

*Director, Office of Protected Resources and Habitat Programs, National Marine Fisheries Service.*

**[Modification No. 2 to Permit No. 558]**

### Marine Mammals Permit Modification; Loro Parque (P365)

Notice is hereby given that pursuant to the provisions of § 216.33(d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216), Public Display Permit No. 558 issued to Loro Parque, S.A., 38400 Puerto de la Cruz, Tenerife, Spain, on July 9, 1986 (51 FR 26178) and modified on July 31, 1987 (52 FR 29406) is further modified as follows:

Section B.7 is changed to read

B.7 The authority to capture or otherwise acquire these marine mammals shall extend from the date of issuance through December 31, 1989. The terms and conditions of this Permit (Sections B and C) shall remain in effect as long as one of the marine mammals taken hereunder is maintained in captivity under the authority and responsibility of the Permit Holder.

This modification became effective on January 1, 1989.

Documents pertaining to the Permit and all modifications are available for review in the following Offices:

Office of Protected Resources, National Marine Fisheries Service, 1335 East West Hwy., Room 7324, Silver Spring, Maryland 20910.

Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731–7415.

Dated: March 9, 1989.

### National Technical Information Service

### Intent To Grant Exclusive Patent License

The National Technical Information Service (NTIS), U.S. Department of Commerce, intends to grant to Perkin-Elmer Corporation, having a place of business at 761 Main Avenue Norwalk, CT 06859–0181, an exclusive right in the United States and foreign countries to practice the invention embodied in U.S. Patent Application SN 7–212,390 "Process and Apparatus for Direct Ultrasonic Mixing Prior to Analysis." The patent rights in this invention have been assigned to the United States of America, as represented by the Secretary of Commerce.

The intended exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The intended license may be granted unless, within sixty days from the date of this published notice, NTIS receives written evidence and argument which establishes that the grant of the intended license would not serve the public interest.

Inquiries, comments, and other materials relating to the intended license must be submitted to Charles Bevelacqua, Office of Federal Patent Licensing, NTIS, Box 1423, Springfield, VA 22151.

A copy of the instant patent application may be purchased from the NTIS Order Desk by writing to 5285 Port Royal Road, Springfield, VA 22161 or by telephone at 703–487–4650.

## COMMODITY FUTURES TRADING COMMISSION

### Advisory Committee on CFTC-State Cooperation; Meeting

This is to give notice, pursuant to section 10(a) of the Federal Advisory Committee Act, 5 U.S.C. App. I, section 10(a), that the Commodity Futures Trading Commission's Advisory Committee on CFTC-State Cooperation will conduct a public meeting in the Fifth Floor Hearing Room at the Commission's Washington, DC, headquarters located at Room 532, 2033 K Street, NW., Washington, DC 20581, April 11, 1989, beginning at 10:00 a.m. and lasting until 3:30 p.m. The agenda will consist of:

**Agenda**

1. Opening remarks—Wendy L. Gramm, Chairman, CFTC; Fowler C. West, Commissioner, CFTC and Chairman, Advisory Committee on CFTC-State Cooperation;
2. Report on the activities of the Securities and Commodities Fraud Working Group and the recent formation of regional Securities and Commodities Fraud Task Forces by the Department of Justice;
3. Discussion of methods for developing educational tools about investment fraud for use in consumer education programs in public schools;
4. Presentation of the film, "The Boiler Room", produced by the Arizona Corporation Commission and the Arizona Department of Education;
5. Report by the Industry Council for Tangible Assets on its self-regulatory efforts regarding bank-financed precious metals programs;
6. Discussion of the proposed Commission rule on hybrid and related instruments;
7. Report on the Commission's leverage report to Congress;
8. Status report on the proposed NASAA Model State Commodity Code;
9. Report on the formation of the Florida boiler room task force; and
10. Discussion of other questions of concern to Advisory Committee members.

The Advisory Committee was created by the Commodity Futures Trading Commission for the purpose of receiving advice and recommendations on matters of joint concern to the States and the Commission arising under the Commodity Exchange Act, as amended. The purposes and objectives of the Advisory Committee on CFTC-State Cooperation are more fully set forth in the March 31, 1988 Sixth Renewal Charter of the Advisory Committee.

The meeting is open to the public. The Chairman of the Advisory Committee, Commissioner Fowler C. West, is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Advisory Committee should mail a copy of the statement to the attention of: The Advisory Committee on CFTC-State Cooperation c/o Commissioner Fowler C. West, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581, before the meeting. Members of the public who wish to make oral statements should also inform Commissioner West in writing at the foregoing address at least three business days before the meeting.

Reasonable provision will be made, if time permits, for an oral presentation of no more than five minutes each in duration.

Issued by the Commission in Washington, DC, on March 8, 1989.

**Jean A. Webb,**

*Secretary of the Commission.*

## DEPARTMENT OF DEFENSE

### Public Information Collection Requirement Submitted to OMB for Review

**ACTION:** Notice.

The Department of Defense has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

**SUMMARY:** This collection was previously published in Vol. 53, No. 206, on Thursday, October 27, 1988.

*Title, Applicable Form, and Applicable OMB Control Number:* Wage Rates and Fringe Benefits; No Form; and OMB Control Number 0701–0102.

*Type of Request:* Resubmission.

*Average Burden Hours/Minutes Per Response:* 1 hour.

*Frequency of Response:* On occasion.

*Number of Respondents:* 165.

*Annual Burden Hours:* 165.

*Annual Reponses:* 165.

*Needs and Uses:* The Service Contract Act requires Air Force contractors to pay wages and fringe benefits that are compatible with those prevailing in the local area where the work is to be performed. Section 4(c) of the Act provides that the parties to the contract may request a hearing to establish prevailing rates when negotiated wages and fringe benefits appear to be substantially at variance with local rates. The Air Force needs the Wage Rates and Fringe Benefits survey to determine prevailing local rates and, when necessary, to support its position during formal hearings.

*Affected Public:* State or local governments; Businesses or other for-profit; Non-profit institutions; and Small businesses or organizations.

*Frequency:* Continuing.

*Respondent's Obligation:* Voluntary.

*OMB Desk Officer:* Dr. J. Timothy Sprehe.

Written comments and recommendations on the proposed information collection should be sent to Dr. J. Timothy Sprehe at Office of Management and Budget, Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503.

*DOD Clearance Officer:* Ms. Pearl Rascoe-Harrison.

Written request for copies of the information collection proposal should be sent to Ms. Rascoe-Harrison, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, Virginia 22202–4302.

**L.M. Bynum,**

*Alternate OSD Federal Register Liaison Officer, Department of Defense.*

March 9, 1989.

### Vocational Rehabilitation Service Projects for American Indians with Handicaps Program; Information Collection Requirements

**Applicable Regulations**

On February 8, 1989, a notice was published in the **Federal Register** inviting applications for new awards for fiscal year 1989 under the Vocational Rehabilitation Service Projects for American Indians with Handicaps Program (54 FR 5850. Detailed information concerning this program was included in that notice.

VOL 54 ISS 49 MR 15 1989 UMI

The purpose of this notice is to provide additional data concerning the information collection requirements contained in the applicable regulations for this program in 34 CFR Parts 369 and 371.

The information collection requirements, including selection criteria, for Parts 369 and 371 are pending approval by the Office of Management and Budget. If any substantive changes are made in the information collection requirements for this program, applicants will be given an opportunity to revise or resubmit their applications.

*For Applications or Information Contact:* Joseph DePhillips, U.S. Department of Education, 400 Maryland Avenue, SW., Room 3324 Switzer Building, Washington, DC 20202–2575. Telephone: (202) 732–1329.

**Program Authority:** 29 U.S.C. 777(b)

Dated: March 10, 1989.

**Madeleine Will,**

*Assistant Secretary, Office of Special Education and Rehabilitative Services.*

### Notice Inviting Applications for New Awards Under the Indian Education Act of 1988, Subpart 1 (Formerly Part A)—Formula Grant Program for Fiscal Year 1989

*Purpose:* Provides grants to local educational agencies (LEAs) and certain Indian tribes and organizations that received funds under this program in fiscal year 1988, and, if sufficient funds become available, as determined under the Act, to schools operated by the Bureau of Indian Affairs (BIA). Supplementary projects that meet the special educational and culturally related academic needs of Indian children enrolled in the applicant schools are supported.

*Deadline for Transmittal of Applications:* May 1, 1989.

*Deadline for Intergovernmental Review:* June 30, 1989.

*Applications Available:* March 17, 1989.

*Available Funds:* The appropriation for this program for fiscal year 1989 is $49,248,000, of which $46,583,400 will be allocated only to those LEAs and tribal schools that received funds under this program in fiscal year 1988. The remaining $2,665,000 is available for allocation to BIA-operated schools. The following estimates are based on the appropriation for fiscal year 1989 for LEAs and tribal schools that received awards in fiscal year 1988. The Secretary has no basis upon which to provide estimates for range, average size or numbers of awards to BIA-operated schools.

*Estimated Range of Awards:* $1,150 to $1,140,329.

*Estimated Average Size of Awards:* $41,802.

*Estimated Number of Awards* 1,112.

**Note:** The Department is not bound by any estimates in this notice.

*Project Period:* 12 to 36 months.

*Applicable Regulations:* (a) The Indian Education Program Regulations, 34 CFR Parts 250 and 251; (b) the Education Department General Administrative Regulations, 34 CFR Parts 75, 77, 78, 79, 80 and 85.

**FOR APPLICATIONS OR INFORMATION CONTACT:** Julia Lesceux, U.S. Department of Education, 400 Maryland Avenue, SW., Room 2177, Washington, DC 20202–6335, telephone: (202) 732–5146.

**Program Authority:** 25 U.S.C. 2601–2606, 2651

Dated: March 9, 1989.

**Beryl Dorsett,**

*Assistant Secretary, Office of Elementary and Secondary Education.*

BILLING CODE 4000-01-M

## DEPARTMENT OF ENERGY

### Intent To Negotiate a Grant With the State of New Mexico; New Mexico Research and Development Institute

**AGENCY:** Department of Energy.

**ACTION:** Intent to negotiate a Grant with the state of New Mexico, New Mexico Research and Development Institute (NMRDI).

**SUMMARY:** "Planning Phase for the New Mexico Improved Oil Recovery Project." The U.S. Department of Energy (DOE), Idaho Operations Office, through the DOE Bartlesville Project Office, intends to negotiate on a noncompetitive basis a cost share grant for approximately $287,000 with NMRDI, Santa Fe, New Mexico. This action is prompted by the consummation of Joint Powers Agreement #1 (JPA#1) to the Memorandum of Understanding between the DOE and the State of New Mexico, which defines the research proposal and the participants, and specifies cost-sharing. The grant will be to develop and validate advanced methods of reservoir characterization for oil recovery processes through interdisciplinary and multi-institutional efforts focused at a field laboratory at a New Mexico reservoir. The goal of the New Mexico Improved Oil Recovery Project (MNIORP) will not be to study specific EOR processes, but rather various injection schemes that will be utilized to aid in reservoir characterization. The field laboratory will be available for use by industry, universities, states, and federal laboratories. As defined in JPA#1, this effort is further broken down into the following tasks: (1) Select a small oil producing field within New Mexico, (2) contract for site operation, (3) establish a project office, (4) select a steering committee, and technical review panel, (5) initiate pressure testing of the reservoir, (6) drill and core a well, (7) analyze initial data, and (8) plan for future activities. The authority and justification for determination of noncompetitive financial assistance (DNCFA) is DOE Financial Assistance Rules 10 CFR Part 600.7(b)(2)(i), (B) and (C). The activities would be conducted by the applicant using its own resources or those donated or provided by third parties; however, DOE support of that activity would enhance the public benefits to be derived and DOE knows of no other entity which is conducting or is planning to conduct such activities. The applicant is a unit of government and the activity to be supported is related to performance of a governmental function within the subject jurisdiction, thereby precluding DOE provision of support to another entity.

The State of New Mexico has entered into a Memorandum of Understanding with the Federal Government and has begun cooperative efforts in the areas of resource characterization, research technology development, and technology transfer in order to successfully make New Mexico fossil energy reserves available to the consumer in a safe, economic, and environmentally acceptable manner. The activities proposed in JPA#1 to the Memorandum of Understanding are in support of a public purpose and are as directed by the Memorandum of Understanding. Public response may be addressed to the contract specialist below.

**FOR FURTHER INFORMATION CONTACT:** U.S. Department of Energy, Idaho Operations Office, 785 DOE Place, Idaho Falls, Idaho 83402, Trudy Thorne, Contract Specialist (208) 526–0519.

Date: March 7, 1989.

**H. Brent Clark,**

*Director, Contracts Management Division*

### Advisory Committee on Nuclear Facility Safety Notice of Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770), notice is hereby given of the following advisory committee meeting:

*Name:* Advisory Committee on Nuclear Facility Safety.

*Date and Time:* Thursday, March 30, 1989, 8:30 p.m. to 6:00 p.m.; Friday, March 31, 1989, 9:00 a.m. to 1:00 p.m.

*Place:* U.S. Department of Energy, Forrestal Building, Room BE–089, 1000 Independence Avenue, SW., Washington, DC 20585.

*Contact:* Wallace R. Kornack, Executive Director, ACNFS, S–2, 1000 Independence Avenue, SW., Washington, DC 20585, Telephone: 202/586–4400.

*Purpose of the Committee:* The Committee was established to provide the Secretary of Energy with advice and recommendations concerning the safety of the Department's production and utilization facilities, as defined in section 11 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2014).

**Tentative Agenda**

March 30, 1989 Meeting

8:30–5:30 Subcommittee Reports
- Review of Savannah River Plant Issues
- Restart Strategy Status
- Reactor Safety Improvement Program Status
- Water Hammer Report
- Safety Policy
- Committee Business

5:30–6:00 Public Comment

March 31, 1989 Meeting

9:00–12:30 DOE Environmental Cleanup Plans and Issues

12:30–1:00 Public Comment

*Public Participation:* This meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Wallace R. Kornack at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. The Chairperson of the Committee is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

*Transcripts:* The transcript of the meeting will be available for public review and copying at the Freedom of Information Public Reading Room, IE–190, Forrestal Building, 1000 Independence Ave., S.W., Washington, DC, between 9:00 a.m. and 4:00 p.m. Monday through Friday, except Federal holidays.

Issues at Washington, DC on March 10, 1989.

**J. Robert Franklin,**

*Deputy Advisory Committee Management Officer.*

## Energy Information Administration

### Agency Information Collections Under Review By the Office of Management and Budget

**AGENCY:** Energy Information Administration, DOE.

**ACTION:** Notice of requests submitted for review by the Office of Management and Budget.

**SUMMARY:** The Energy Information Administration (EIA) has submitted the energy information collection(s) listed at the end of this notice to the Office of Management and Budget (OMB) for review under provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The listing does not include information collection requirements contained in new or revised regulations which are to be submitted under 3504(h) of the Paperwork Reduction Act, nor management and procurement assistance requirements collected by the Department of Energy (DOE).

Each entry contains the following information: (1) The sponsor of the collection (the DOE component or Federal Energy Regulatory Commission (FERC)); (2) Collection number(s); (3) Current OMB docket number (if applicable); (4) Collection title; (5) Type of request, e.g., new, revision, or extension; (6) Frequency of collection; (7) Response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefit; (8) Affected public; (9) An estimate of the number of respondents per report period; (10) An estimate of the number of responses annually; (11) An estimate of the average hours per response; (12) The estimated total annual respondent burden, and (13) A brief abstract describing the proposed collection and the respondents.

**DATES:** Comments must be filed on or before April 14, 1989.

**ADDRESS:** Address comments to the Department of Energy Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503. (Comments should also be addressed to the Office of Statistical Standards, at the address below.)

**FOR FURTHER INFORMATION CONTACT:** *For further information and copies of relevant materials contact:* Jay Casselberry, Office of Statistical Standards (EI–70), Energy Information Administration, M.S. lH–023, Forrestal Building, 1000 Independence Ave., SW., Washington, DC 20585, (202) 586–2171.

**SUPPLEMENTARY INFORMATION:** If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this Notice, you should advise the OMB DOE Desk Officer of your intention to do so as soon as possible. The Desk Officer may be telephoned at (202) 395–3084. (Also, please notify the DOE contact listed above.)

The energy information collection submitted to OMB for review was:

1. International Affairs and Energy Emergencies
2. IE–417R
3. 1901–0288
4. Major Electric Power System Emergency Report
5. Extension
6. Annually
7. Mandatory
8. State and local governments, Businesses or other for profit, Federal agencies or employees
9. 40 respondents annually
10. 45 responses annually
11. The estimated average hours per response for each of the respondents is 2.39 burden hours.
12. The estimated total reporting hours are 130.
13. IE–417P will provide the DOE with information regarding the location of where emergency electric power supply situations exist on an electric power system or on a regional electric system. The data also provide DOE with a basis for determining the appropriate Federal action to relieve an electrical energy supply emergency. Respondents are electric utilities.

**Authority:** Sec. 5(a), 5(b), and 13(b), Pub. L. 93–275, Federal Energy Administration Act of 1974, (15 U.S.C. 764(a), 764(b), and 772(b); and Sec. 202(c) and 311 of the Federal Power Act, (16 U.S.C. 82a(c) and 825j.

Issued in Washington, DC, March 9, 1989.

**Yvonne M. Bishop,**

*Director, Statistical Standards, Energy Information Administration.*

[FR Doc. 89–6029 Filed 03–14–89; 8:45 am]

BILLING CODE 6450-01-M

VOL 54 ISS 49 MR 15 1989 UMI

## FEDERAL ENERGY REGULATORY COMMISSION

[Docket No. ER89-444-000 et al.]

### Iowa Public Service Co. et al.; Electric Rate, Small Power Production, and Interlocking Directorate Filings

March 8, 1989.

Take notice that the following filings have been made with the Commission:

**1. Iowa Public Service Company**

[Docket No. ER89-444-000]

Take notice that Iowa Public Service Company (IPS) on February 28, 1989, submitted in response to a request from Commission Staff, additional cost and Operational data to support the proposed Full Requirements Wholesale—Service Schedule No. 2 Original Issue Sheets Nos. 5 and 6, and executed Full Requirements Power Agreements filed on May 31, 1988, to permit the following Iowa municipalities to receive services pursuant to the filed rates: Auburn, Denver, Estherville, Hudson, Livermore, Pocahontas, Rockford, and Sergeant Bluff.

IPS requests a waiver of the Commission's regulations and allow the Agreements to become effective as of their respective operative dates. The earliest operative date is May 1, 1987.

These amendments have been served on all the affected municipalities and the Iowa Utilities Board.

Comment date: March 23, 1989, in accordance with Standard Paragraph E at the end of this notice.

**2. Kanawha Valley Power Company**

[Docket No. ER86-499-001]

Take notice that in accordance with the Commission's January 31, 1989 Order in Docket No. ER88-499-001, Kanawha Valley Power Company (Kanawha) submitted its required compliance filing. Kanawha states that its compliance filing sets forth the calculation of the amounts in excess of the Commission-approved settlement rate levels collected by Kanawha from Appalachian Power Company (Appalachian) together with interest computed under the Commission's regulations. According to Kanawha, a refund check in the appropriate amount was forwarded to Appalachian on February 15, 1989.

Kanawha further states that a copy of its compliance filing was either served upon or supplied to all parties of the record, Appalachian Power Company, the Virginia State Corporation Commission and the Public Service Commission of West Virginia.

Comment date: March 23, 1989, in accordance with Standard Paragraph E at the end of this document.

**3. Southwestern Public Service Company**

[Docket No. ER86-477-002]

Take notice that on March 1, 1989, Southwestern Public Service Company (Southwestern) tendered for filing its compliance filing in compliance with the Commission's order issued February 1, 1989.

Comment date: March 23, 1989, in accordance with Standard Paragraph E at the end of this notice.

**4. Idaho Power Company**

[Docket No. EC89-7-000]

Take notice that on February 27, 1989, Idaho Power Company ("Idaho Power" on the "Company"), a Maine corporation, and Idaho power Migrating Corporation ("IPMC"), an Idaho corporation, pursuant to section 203 of the Federal Power Act, filed an application for authorization for Idaho Power to be merged with and into IPMC.

It is stated that IPMC is a wholly owned subsidiary of Idaho Power. Idaho Power provides electric service in the States of Idaho, Oregon, and Nevada.

It is further stated that the principle purposes of the proposed merger are as follows:

(1) Incorporation in Idaho will promote better understanding of the Company by state and local government authorities and by its customers.

(2) After the Migration, the Company's business will be subject only to the corporation laws of the State of Idaho, and other states in which it operates, and the Company will be relieved of miscellaneous expenses incident to compliance with Maine laws. No additional annual taxes will be payable to the State of Idaho as a result of the change.

(3) The issuance of stock, bonds and other long-term debt by the Company is now subject to regulation by the Idaho Public Utilities Commission, the Wyoming Public Service Commission, the Oregon Public Utinty Commission, and the Federal Energy Regulatory Commission. The effect of the Migration will be to exempt the Company from such duplicative regulation by the Federal Energy Regulatory Commission and the expenses attendant thereto. Regulation by the other state regulatory commissions will continue.

(4) The Migration will enable the Company to qualify for an exemption from the Public Utility Holding Company Act of 1935 (the "1935 Act") in the event that its business plans may at some future time contemplate the establishment of subsidiaries to engage in the transmission and/or generation of electric power for resale. Several relevant exemptions from the 1935 would require the Company to be incorporated in one of the states in which it operates. The Company has under study plans to construct a transmission line and certain generating facilities. Determination of whether to place the transmission line and generating facilities in subsidiary companies would depend, among other things, upon the action of various regulatory bodies.

Applicants state that upon the effective date of the merger each outstandng share of Idaho Power Common Stock and Preferred Stock will automatically be converted into one share of IPMC Common Stock and comparable series of IPMC Preferred Stock, respectively. Each outstanding certificate presenting shares of Idaho Power Common Stock and Preferred Stock will continue to represent the same number of shares of Common Stock and Preferred Stock of IPUC, respectively.

Comment date: March 27, 1989, in accordance with Standard Paragraph E at the end of this notice.

**Standard Paragraphs**

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

**Lois D. Cashell,**

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

[Project No. 9194-000 New Jersey]

### Passaic Valley Water Commission; Availability of Environmental Assessment

March 9, 1989.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, 18 CFR Part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing has reviewed the application for major license, less than 5 megawatts, for the Little Falls Hydroelectric Project located on the Passaic River in Passaic County, near Little Falls, New Jersey, and has prepared an Environmental Assessment (EA) for the proposed project. In the EA, the Commission's staff has analyzed the potential environmental impacts of the proposed project and has concluded that approval of the proposed project, with appropriate mitigative measures, would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Public Reference Branch, Room 1000, of the Commission's offices at 825 North Capitol Street NE., Washington, DC 20426.

**Lois D. Cashell,**

[Project Nos. 2392-004, et al.]

### Hydroelectric Applications, Georgia-Pacific Corp.; Applications Filed With the Commission

Take notice that the following hydroelectric applications have been filed with the Commission and are available for public inspection:

1a. Type of Application: New Major License.

b. Project No.: 2392.004.

c. Date Filed: December 27, 1988.

d. Applicant: Georgia-Pacific Corporation.

e. Name of Project: Gilman Project.

f. Location: On the Connecticut River in Essex County, Vermont and Coos County, New Hampshire.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)—825(r).

h. Applicant Contact: Mr. David G. Blanchette, Georgia-Pacific Corporation, Gilman, VT 05904, (802) 892-5515.

i. FERC Contact: Steven H. Rossi, (202) 376-9814.

j. Comment Date: May 5, 1989.

k. Description of Project: The existing operating project commenced operation in 1941 and was issued an initial license in 1965, which will expire in 1990. The licensee has filed for a new license for the continued operation of the project. The existing project consists of: (1) the Gilman Dam, (a) a concrete gravity structure approximately 170 feet long and 29 feet high, and (b) a rock-filled timber crib dam approximately 108 feet long and 40 feet high, each with a crest elevation of 828.3 feet USGS; (2) 5-foot-high flashboards bringing the normal water surface elevation to 833.3 feet USGS; (3) a hydraulically operated crest gate 18 feet high and 27 feet wide; (4) a reservoir having an area of 130 acres, a storage capacity of 705 acre-feet, and a normal water surface elevation of 833.3 feet USGS; (5) a powerhouse containing four turbine-generator units, one rated at 2,250 kW, one rated a 1,000 kW, and two rated at 800 kW each for a total rated capacity of 4,850 kW; (6) a 200-foot-long transmission line; and (7) appurtenant facilities. The project generates an average of 25,750 MWh annually. The dam is owned by the applicant. The existing project would be subject to Federal takeover under Sections 14 and 15 of the Federal Power Act. The cost of the existing project is $4,848,500.

l. Purpose of Project: Project power would continue to be sold to New England Power Company.

m. This notice also consists of the following standard paragraphs: B, C and Dl.

2a.Type of Application: Transfer of License.

b. Project No.: 5000-014.

c. Date Filed: February 1, 1989.

d. Applicant: Trafalgar Power Inc. and Trafalgar Power Limited Partnership.

e. Name of Project: Kayuta Lake Project.

f. Location: On the Black River in Oneida County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)—825(r).

h. Applicant Contacts:

Mr. Arthur H. Steckler, President, Trafalgar Power Inc., Smith and Canal Streets, Franklin, NH 03235.

Mr. John M. Cutler, McCarthy, Sweeney & Harkaway, P.C., 1750 Pennsylvania Avenue, NW., Washington, DC 20006, (202) 393-5710.

i. FERC Contact: Steven H. Rossi, (202) 376-9814.

j. Comment Date: April 10, 1989.

k. Description of Transfer: On February 1, 1989, Trafalgar Power Inc. (licensee) and Trafalgar Power Limited Partnership (transferee) filed a joint application for transfer of a minor license for the Kayuta Lake Project No. 5000.

The purpose of the proposed transfer of license is to facilitate the financing of the project.

The proposed transfer would not result in any changes in the operation of the project. All engineering, design, and feasibility studies performed would be transferred to the transferee. The transferee states that it would comply with all the terms and conditions of the license.

l. This notice also consists of the following standard paragraphs: B and C.

3a. Type of Application: Transfer of License.

b. Project No.: 9685-004.

c. Date Filed: February 1, 1989.

d. Applicant: Trafalgar Power, Inc.

e. Name of Project: Cranberry Lake Project.

f. Location: On the Oswegatchie River, in St. Lawrence County, New York.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a)—825(r).

h. Applicant Contact: Arthur H. Steckler, President, Trafalgar Power, Inc., Smith and Canal Streets, Franklin, NH 03235, (514) 273-8891.

i. FERC Contact: Mary Nowak (202) 376-9634.

j. Comment Date: April 19, 1989.

k. Description of Project: The Trafalgar Power, Inc. proposes to transfer the license for the Cranberry Lake Project No. 9685 to Trafalgar Power Limited Partnership. The transfer is requested in order to facilitate the financial arrangements of the project. The transferee states that it will comply with all of the terms and conditions of the license.

l. This notice also consists of the following standard paragraphs: B, C, and D2.

4a. Type of Application: Transfer of License.

b. Project No.: 9709-005.

c. Date Filed: February 1, 1989.

d. Applicant: Trafalgar Power Inc. and Trafalgar Power Limited Partnership.

e. Name of Project: Herkimer Project.

f. Location: On the West Canada Creek in Herkimer County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)—825(r).

h. Applicant Contacts:

Mr. Arthur H. Steckler, President, Trafalgar Power Inc., Smith and Canal Streets, Franklin, NH 03235.

Mr. John M. Cutler, McCarthy, Sweeney & Harkaway, P.C, 1750 Pennsylvania Avenue, NW., Washington, DC 20006, (202) 393-5710.

VOL 54 ISS 49 MR 15 1989 UMI

i. FERC Contact: Steven H. Rossi, (202) 376–9814.

j. Comment Date: April 10, 1989.

k. Description of Transfer: On February 1, 1989, Trafalgar Power Inc. (licensee) and Trafalgar Power Limited Partnership (transferee) filed a joint application for transfer of a minor license for the Herkimer Project No. 9709.

The purpose of the proposed transfer of license is to facilitate the financing of the project.

The proposed transfer would not result in any changes in the operation of the project. All engineering, design, and feasibility studies performed would be transferred to the transferee. The transferee states that it would comply with all the terms and conditions of the license.

l. This notice also consists of the following standard paragraphs: B and C.

5a. Type of Application: Transfer of License.

b. Project No.: 9821–010.

c. Date Filed: February 1, 1989.

d. Applicant: Trafalgar Power Inc. and Trafalgar Power Limited Partnership.

e. Name of Project: Ogdensburg Project.

f. Location: On the Oswegatchie River in St. Lawrence County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)—825(r)

h. Applicant Contacts:

Mr. Arthur H. Steckler, President, Trafalgar Power Inc., Smith and Canal Streets, Franklin, NH 03235.

Mr. John M. Cutler, McCarthy, Sweeney & Harkaway, P.C, 1750 Pennsylvania Avenue, NW., Washington, DC 20006, (202) 393–5710.

i. FERC Contact: Steven H. Rossi, (202) 376–9814.

j. Comment Date: April 10, 1989.

k. Description of Transfer: On February 1, 1989, Trafalgar Power Inc. (licensee) and Trafalgar Power Limited Partnership (transferee) filed a joint application for transfer of a major license for the Ogdensburg Project No. 9821.

The purpose of the proposed transfer of license is to facilitate the financing of the project.

The proposed transfer would not result in any changes in the operation of the project. All engineering, design, and feasibility studies performed would be transferred to the transferee. The transferee states that it would comply with all the terms and conditions of the license.

l. This notice also consists of the following standard paragraphs: B and C.

6a. Type of Application: Surrender of License.

b. Project No.: 9876–005.

c. Date Filed: January 17, 1989.

d. Applicant: Clearwater Hydro Associates.

e. Name of Project: Village Creek.

f. Location: On Village Creek near Birmingham, Jefferson County, Alabama.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)—825(r).

h. Applicant Contacts: Mr. Charles Gresham, 634 R. Inskip Road, #80, Knoxville, TN 37912.

i. FERC Contact: Michael Dees, (202) 376–9414.

j. Comment Date: April 10, 1989.

k. Description of Project: On February 2, 1988, a license was issued to construct, operate, and maintain the Village Creek Project No. 9876. The project would consist of: (1) an existing gravity dam 550 feet long and 115 feet high; (2) an existing 440 acre reservoir; (3) a proposed intake structure and a penstock six feet in diameter; (4) a proposed reinforced concrete powerhouse 24 feet by 24 feet by 30 feet high housing a 1,100-kW hydropower unit; (5) a proposed 12.47-kV three-phase transmission line 1.3 miles long; and (6) appurtenant facilities.

Licensee states that the project is no longer economically feasible because of the existing buyback rate structure.

l. Anyone desiring to be heard or to make any protest about this action should file a motion to intervene or a protest with the Federal Energy Regulatory Commission in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR 385.211 or 385.214 (1988). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in section 385.211 for protests. To become a party, or to participate in any hearing that might be held, a person must file a motion to intervene in accordance with the Commission's Rules. The Commission's address is: 825 North Capitol Street NE., Washington, DC 20426.

7a. Type of Application: Preliminary Permit.

b. Project No.: 10718–000.

c. Date filed: January 10, 1989.

d. Applicant: JDJ Energy Company.

e. Name of Project: Pomme de Terre Water Power Project.

f. Location: Pomme de Terre Lake, Pomme de Terre River, near Hermitage, in Hickory County, Missouri.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Applicant Contact: Doyle W. Jones, P.E., JDJ Energy Company, Rt. 5, Box 463, Malvern, AR 72104, (501) 844–4435.

i. FERC Contact: Mary Nowak—(202) 376–9634.

j. Comment Date: May 1, 1989.

k. Description of Project: The proposed project would utilize the existing Corps of Engineers' dam and would consist of: (1) a proposed 300-foot-long penstock 8 feet in diameter; (2) a proposed powerhouse containing two turbine generating units having a total installed capacity of 4,625 kilowatts; (3) a proposed 13.8-kilovolt transmission line 600 feet long; and (4) appurtenant facilities. The applicant estimates that the average annual generation would be 12,450,000 kilowatthours. The applicant estimates that the cost of the studies under permit would be $30,000.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.

8a. Type of Application: Preliminary Permit.

b. Project No.: 10728–000.

c. Date Filed: February 6, 1989.

d. Applicant: City of Marseilles and City of Ottawa.

e. Name of Project: Marseilles Dam.

f. Location: On the Illinois River near Marseilles, La Salle County, Illinois.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Applicant Contact: Poundstone, Etscheid & Associates, Inc., Michael A. Etscheid P.E., Northpoint Professional Centre, Suite 2, Streator, IL 61364.

i. FERC Contact: Michael Dees (202) 376–9414.

j. Competing Application: 10654–000, filed September 1, 1988.

k. Comment Date: May 5, 1989.

l. Description of Project: The proposed project would utilize the existing Corps of Engineers' Marseilles Lock and Dam and reservoir and would consist of: (1) an existing canal; (2) reconstructuring an existing concrete powerhouse to house four new hydropower units with a combined capacity of 10,800 kW; (3) a reconstructed tailrace; (4) upgrading an existing 400-foot-long transmission line; and (5) appurtenant facilities. The estimated annual energy production is 60 GWh. Applicant estimates that the cost of the work to be performed under the preliminary permit would be $80,000.

m. This notice also consists of the following standard paragraphs: A8, A10, B, and C.

9a. Type of Application: Major License.

b. Project No.: 10228–000.

c. Date Filed: January 2, 1987.

d. Applicant: WV Hydro, Inc.

e. Name of Project: Cannelton.

f. Location: On the Ohio River in Hancock County, Kentucky.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a)–825(r).

h. Applicant Contact: James B. Price, 120 Calumet Ct., Aiken, SC 29801, (803) 642–2749.

i. FERC Contact: Charles T. Raabe (202) 376–9778.

j. Comment Date: May 12, 1989.

k. Description of Project: The proposed project would utilize the existing U.S. Army Corps of Engineers' Cannelton Locks and Dam, and would consist of: (1) A 190-foot-wide, 80-foot-deep intake at the left bank; (2) a 190-foot-wide, 250-foot-long powerhouse containing 3– 26,670–kW bulb-type turbine/generator units, each operated at a 20.8-foot head and at a flow of 17,667cfs each; (3) a 190-foot-wide, 51-foot-long tailrace; (4) a 4.16/161–kV switchyard; (5) a 700-foot-long, 161–kV transmission line; and (6) appurtenant facilities. Applicant estimates that the average annual generation would be 370,000,000 kWh. Project power would be sold to Southern Indiana Gas & Electric Company.

l. This notice also consists of the following standard paragraphs: A3, A9, B, C, and D1.

10.a Type of Application: License (less than 5 MW).

b. Project No.: 2610–002.

c. Date filed: December 16, 1988.

d. Applicant: Northern States Power Co.

e. Name of Project: Saxon Falls.

f. Location: On the Montreal River in Iron County, Wisconsin, and Gogebic County, Michigan.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a)–825(r).

h. Applicant Contact: Mr. William J. Madden, Jr., Bishop, Cook, Purcell & Reynolds, 1400 L St. NW., Washington, DL 20005–3502, (202) 371–5715.

i. FERC Contact: Michael Dees (202) 376–9414.

j. Comment Date:

k. Description of Project: The existing Saxon Falls Project consists of: (1) A dam 40 feet high and 510 feet long; (2) a reservoir with a storage capacity of 550 acre-feet and a surface area of 69 acres; (3) a 6-foot diameter steel conduit 1,607 feet long; (4) a steel surge tank 23.5 feet in diameter and 59.50 feet high, (5) two 4.5-foot diameter steel penstocks each 156 feet long; (6) a reinforced concrete powerhouse containing two equally sized generating units for a total installed capacity rated at 1,500 kW; (7) a substation with step-up transformer; (8) a 92.4-kV transmission line 0.25 mile long from powerhouse to substation and a 34.5-kV line for connection with applicant's interconnected transmission system; and (9) appurtenant facilities.

The applicant estimated from historical generation that the average annual energy generation will be 12,283 MWh. The applicant is the sole owner of the existing project facilities and has no plans to modify the existing facilities or operation.

l. This notice also consists of the following standard paragraphs: A3, A9, B, C, and D1.

11a. Type of Application: Surrender of License.

b. Project No.: 10028–001.

c. Date Filed: August 29, 1988.

d. Applicant: Tultex Corporation.

e. Name of Project: Mayo Dam.

f. Location: On the Mayo River in Rockingham County, North Carolina.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a)–825(r).

h. Applicant Contact: David M. Coombe, 410 Severn Ave., Suite 313, Annapolis, MD 21403, (301) 268–8820.

i. FERC Contact: Charles T. Raabe (202) 376–9778.

j. Comment Date: April 21, 1989.

k. Description of Project: The proposed project would have consisted of: (1) A 560-foot-long stone masonry dam including a 350-foot-long, 15-foot-high uncontrolled spillway with a crest elevation of 585.4 feet MSL; (2) a headgate structure containing five wooden lift gates and trash racks; (3) a 10-acre reservoir with a storage capacity of approximately 85 acre-feet at a normal water surface elevation of 585.4 feet MSL; (4) a levee approximately 30 feet long; (5) a 38.5-foot by 20-foot reinforced concrete open flume powerhouse; (6) a 50-foot-long by 25-foot-wide tailrace excavated in ledge, discharging into the Mayo River at a normal tailwater elevation of 571.4 feet MSL; (7) a control house containing switchgear, project metering, and a programmed controller; (8) a 0.33–MW induction generator; (9) the 480-volt generator leads; (10) a three-phase, 500–kVA, 480/4,160-volt step-up transformer; (11) a 200-foot-long, 4.16–kV overhead transmission line; and (12) appurtenant facilities.

Licensee states that the construction and operation of this project is not economically feasible and that financial strategies have been exhausted. Therefore, licensee has requested that its license be terminated. The license was issued March 9, 1988 and would have expired February 28, 2028. The licensee has not commenced construction of the project.

l. This notice also consists of the following standard paragraphs: B, C, and D2.

12a. Type of Application: Preliminary Permit.

b. Project No.: 10724–000.

c. Date filed: January 30, 1989.

d. Applicant: Blycol, Inc.

e. Name of Project: Oregon Hydropower Project.

f. Location: On the Rock River, near Oregon, in Ogle County, Illinois.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a)—825(r).

h. Applicant Contact: Mr. Andrew R. Blystra, 1481 Ring Road, Calumet City, IL 60409, (312) 730–1100.

i. FERC Contact: Mary Nowak (202) 376–9634.

j. Comment Date: May 12, 1989.

k. Competing Application: Project No. 10716; Date Filed: January 3, 1989.

l. Description of Project: The proposed project would consist of the following facilities: (1) An existing 867.5-foot-long timber crib dam approximately 12 feet high; (2) an existing reservoir 900 acres in surface area with a storage capacity of 3,500 acre-feet, and a normal surface elevation of 670.50 feet mean sea level; (3) a rehabilitated powerhouse containing three new generating units for a total installed capacity of 1,200 kilowatts; (4) a proposed 12,000-volt transmission line approximately 600 feet long; and (5) appurtenant facilities. The applicant estimates that the average annual generation is 11,000 kilowatthours. The existing dam is owned by the Illinois Department of Conservation and the City of Oregon. The applicant estimates that the cost of the studies under permit would be $95,000.000.

m. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.

13a. Type of Application: Minor License.

b. Project No.: 10624–000.

c. Date Filed: July 11, 1988.

d. Applicant: French Paper Company.

e. Name of Project: French Paper Company Project.

f. Location: On the St. Joseph River in Berrien County, Michigan.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)—825(r).

h. Applicant Contacts:

Mr. R. Dale Clark, French Paper Company, 100 French Street, Niles, MI 49120, (616) 683–1100

Mr. Michael L. Magliola, P.E., Parsons Brinckerhoff Quade, & Douglas, Inc., 230 West Monroe Street, Chicago, IL 60606, (312) 782–8150

Mr. J. Edward French, French Paper Company, 100 French Street, Niles, MI 49120, (616) 683–1100

VOL 54 ISS 49 MR 15 1989 UMI

l. FERC Contact: Steven H. Rossi, (202) 376–9814.

j. Comment Date: May 12, 1989.

k. Description of Project: The existing project has been operating since 1922 and consists of: (1) Niles Dam, a concrete gravity overflow structure 321 feet long and 13 feet high in the St. Joseph River, topped by 2.3-foot-high flashboards; (2) a headrace 100 feet wide and about 600 feet long, bypassing the northwest end of the dam; (3) a powerhouse 115 feet long, 55 feet wide and 56 feet high, equipped with four turbine-generator units in two open flumes, with a total installed capacity of 1,300 kW; (4) a reservoir on the St. Joseph River of about 80 acres, a storage capacity of about 510 acre-feet with a water surface elevation of 653.75 feet MSL; (5) a 7-foot-long transmission line; and (6) appurtenant facilities. In addition there is a proposed fish passage to be constructed near the northwest abutment of the dam, composed of reinforced concrete, 10 feet wide, about 220 feet long with 18 steps, and with appurtenant water conveyance and attraction facilities. The applicant estimates the average annual generation would be 5,000,000 kWh. The existing dam is owned by the applicant.

l. Purpose of Project: Project power would be used internally by the applicant and sold to Indiana and Michigan Electric Company.

m. This notice also consists of the following standard paragraphs: A3, A9, B, C, and D1.

k. Competing Application: Project No. 10656; Date Filed: September 9, 1988.

l. Description of Project: The proposed project would consist of: (1) The 230-foot-high Calaveras Dam and 31.55 billion-gallon reservoir; (2) a 40-foot-long, 36-inch-diameter penstock; (3) a powerhouse downstream of the reservoir containing one or more generating units; and (4) a second power generation site, the location and capacity of which would be determined during the term of the preliminary permit. Total generating capacity is expected to be less than five megawatts. The estimated cost of permit activities is $50,000.

m. This notice also consists of the following standard paragraphs: A8, A10, B, C, and D2.

**Standard Paragraphs**

*A3. Development application*—Any qualified development applicant desiring to file a competing application must submit to the Commission, on or before the specified comment date for the particular application, a competing development application, or a notice of intent to file such an application. Submission of a timely notice of intent allows an interested person to file the competing development application no later than 120 days after the specified comment date for the particular application. Applications for preliminary permits will not be accepted in response to this notice.

*A5. Preliminary permit*—Anyone desiring to file a competing application for preliminary permit for a proposed project must submit the competing application itself, or a notice of intent to file such an application, to the Commission on or before the specified comment date for the particular application (see 18 CFR 4.36). Submission of a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application. A competing preliminary permit application must conform with 18 CFR 4.30(b)(1) and (9) and 4.36.

*A7. Preliminary permit*—Any qualified development applicant desiring to file a competing development application must submit to the Commission, on or before the specified comment date for the particular application, either a competing development application or a notice of intent to file such an application. Submission of a timely notice of intent to file a development application allows an interested person to file the competing application no later than 120 days after the specified comment date for the particular application. A competing license application must conform with 18 CFR 4.30(b)(1) and (9) and 4.36.

*A8. Preliminary permit*—Public notice of the filing of the initial preliminary permit application, which has already been given, established the due date for filing competing preliminary permit and development applications or notices of intent. Any competing preliminary permit or development application or notice of intent to file a competing preliminary permit or development application must be filed in response to and in compliance with the public notice of the initial preliminary permit application. No competing applications or notices of intent to file competing applications may be filed in response to this notice. A competing license application must conform with 18 CFR 4.30(b)(1) and (9) and 4.36.

*A9. Notice of intent*—A notice of intent must specifiy the exact name, business address, and telephone number of the prospective applicant, include an unequivocal statement of intent to submit, if such an application may be filed, either (1) a preliminary permit application or (2) a development application (specify which type of application), and be served on the applicant(s) named in this public notice.

*A10. Proposed scope of studies under permit*—A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit would be 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on the results of these studies, the Applicant would decide whether to proceed with the preparation of a development application to construct and operate the project.

*B. Comments, protests, or motions to intervene*—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, 385.211, 385.214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

*C. Filing and service of responsive documents*—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing, the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. An additional copy must be sent to Dean Shumway, Director, Division of Project Review, Federal Energy Regulatory Commission, Room 203–RB, at the above-mentioned address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

*D1. Agency comments*—States, agencies established pursuant to federal law that have the authority to prepare a comprehensive plan for improving, developing, and conserving a waterway affected by the project, federal and state agencies exercising administration over fish and wildlife, flood control, navigation, irrigation, recreation, cultural or other relevant resources of the state in which the project is located, and affected Indian tribes are requested to provide comments and recommendations for terms and conditions pursuant to the Federal Power Act as amended by the Electric Consumers Protection Act of 1986, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. No. 88–29, and other applicable statutes. Recommended terms and conditions must be based on supporting technical data filed with the Commission along with the recommendations, in order to comply with the requirement in section 313(b) of the Federal Power Act, 16 U.S.C. a8251(b), that Commission findings as to facts must be supported by substantial evidence.

All other federal, state, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the statutes listed above. No other formal requests will be made. Responses should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the applicant. If an agency does not respond to the Commission within the time set for filing, it will be presumed to have no comments., One copy of an agency's response must also be sent to the Applicant's representatives.

*D2. Agency comments*—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Dated: March 10, 1989, Washington, DC.

**Lois D. Cashell,**

*Secretary.*

[FR Doc. 89–6024 Filed 3–14–89; 8:45 am]

BILLING CODE 6717–01–M

---

**[Docket Nos. CP89–493–000 et al.]**

**CNG Transmission Corporation et al.; Natural Gas Certificate Filings**

Take notice that the following filings have been made with the Commission:

**1. CNG Transmission Corporation**

[Docket No. CP89–493–000]

March 6, 1989.

Take notice that on December 28, 1988, CNG Transmission Corporation (CNG), 445 West Main Street, Clarksburg, West Virginia 26301, filed in Docket No. CP89–493–000 an application pursuant to section 7(c) of the Natural Gas Act, for a certificate of public convenience and necessity authorizing it to render long-term firm transportation service for three industrial cogeneration developers, Albany Cogeneration Associates (ACA), Onondaga Cogeneration Limited Partnership (Onondaga) and Indeck Energy Services, Inc. (Indeck), and to construct and operate related transmission facilities in West Virginia, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

CNG proposes to transport up to 25,634 dekatherms (dt) of natural gas per day on a firm basis, 15,360 dt per day for Onondaga, 6,274 dt per day for ACA, and 4,000 dt per day for Indeck. The ACA and Onondaga quantities would be delivered to Niagara Mohawk Power Corporation and the Indeck quantities to National Fuel Gas Supply Corporation. All quantities would be transported at the rates set forth in Rate Schedule TF of CNG's FERC Gas Tariff, Original Volume No. 1. CNG states that it has reserved the right to interrupt deliveries for up to 65 days and has agreed to waive D–1 Demand charges for each day during which an interruption occurs.

CNG proposes to construct and operate the following facilities in order to render the long-term, firm transportation service; (a) replacement of 45.85 miles of 12-inch pipeline known as TL–263 with 20-inch pipeline; (b) replacement of 125 horsepower with 300 horsepower of compression at CNG's McDonald Station; (c) addition of 880 horsepower of compression at CNG's Oscar Nelson Station; (d) 2,160 horsepower of new compression to be known as Jackson Station to be located near the junction of CNG line No. TL–263 and line H–171 in Kanawha County, West Virginia; (e) 1,200 horsepower of new compression to be known as the Guyan Station to be located between the existing Oscar Nelson and McDonald Stations; (f) replacement of 0.55 miles of 10-inch pipeline known as line No. H–171 with 20-inch pipeline; and (g) construction of two metering and regulation stations which would enable CNG to receive the Appalachian gas purchased by ACA, Onondaga, and Indeck for transportation. The total cost of facilities is estimated to be $30,530,372. CNG proposes to finance this project with funds on has or with funds obtained from its parent company, CNG Natural Gas Company.

*Comment date:* March 27, 1989, in accordance with Standard Paragraph F at the end of this notice.

**2. Colorado Interstate Gas Company**

[Docket No. CP89–922–000]

March 6, 1989.

Take notice that on February 28, 1989, Colorado Interstate Gas Company (CIG), Post Office Box 1087, Colorado Springs, Colorado 80944, filed in Docket No. CP89–922–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Union Pacific Resources Company (Union Pacific), a natural gas producer, under its blanket authorization issued in Docket No. CP86–589–000, *et al.*, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

CIG would perform the proposed interruptible transportation service for Union Pacific, pursuant to an interruptible transportation service agreement dated November 1, 1988. The transportation agreement is effective for a primary term of 15 years and year-to-year thereafter subject to termination at the end of the 15th year or any contract year thereafter by 90 days written notice by either party. CIG proposes to transport up to a maximum of 50,000 Mcf of natural gas per day; on an average day up to 45,500 Mcf; and on an annual

VOL 54 ISS 49 MR 15 1989 UMI

basis 16,425,000 Mcf of natural gas for Union Pacific. CIG proposes to receive the subject gas at various existing points of receipt located in the states of Kansas, Wyoming and Colorado and redeliver the gas, less fuel gas and lost and unaccounted-for gas, for the account of Union Pacific in Texas and Oklahoma. CIG avers that no new facilities are required to provide the proposed service.

It is explained that the proposed service is curreatly being performed pursuant to the 120-day self implementing provision of § 284.223(a)(1) of the Commission's Regulations. CIG commenced such self-implementing service on November 1, 1988, as reported in Docket No. ST 89-842-000.

*Comment date*: April 20, 1989, in accordance with Standard Paragraph G at the end of this notice.

**3. Northwest Pipeline Corporation**

[Docket No. CP89-932-000]

March 7, 1989.

Take notice that on March 1, 1989, Northwest Pipeline Corporation, (Northwest) 295 Chipeta Way, Salt Lake City, Utah 84108 filed in Docket No. CP89-932-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Williams Gas Marketing Company (Williams), under its blanket authorization issued in Docket No. CP86-578-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Northwest would perform the proposed interruptible transportation service for Williams, a marketer of natural gas, pursuant to a transportation agreement dated February 10, 1988, as amended June 10, 1988, October 21, 1988, December 5, 1988, and December 8, 1988, under its Rate Schedule TI-1. The term of the transportation agreement is from the date of execution and shall remain in full force and effect for a term continuing on a month to month basis, subject to termination upon 30 business days written notice by either party. Northwest proposes to transport on a peak day up to 770,000 MMBtu; on an average day up to 10,000 MMBtu; and on an annual basis 3,600,000 MMBtu for Williams. Northwest proposes to transport the subject gas through its transmission system from any transportation receipt to any transportation delivery points. It is stated that the natural gas transported under the transportation agreement may be received on behalf of Williams by any local distribution company or affiliate of Williams which has an appropriate contractual arrangement with Williams. It is alleged that at this time Northwest understands that Williams has arranged for deliveries to the distribution systems of Northwest Natural Gas Company, Washington Natural Gas Company, and Cascade Natural Gas Corporation. Northwest avers that no new facilities are required to provide the proposed service.

It is explained that the proposed service is currently being performed pursuant to the 120-day self implementing provision of § 284.223(a)(1) of the Commission's Regulations. Northwest commenced such self-implementing service on February 16, 1989, as reported in Docket No. ST89-2273-000.

*Comment date*: April 21, 1989, in accordance with Standard Paragraph G at the end of this notice

**4. Tennessee Gas Pipeline Company**

[Docket No. CP89-919-000]

March 7, 1989.

Take notice that on February 28, 1989, Tennessee Gas Pipeline Company (Tennessee), P. O. Box 2511, Houston, Texas 77252, filed in Docket No. CP89-919-000 a request pursuant to § 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas under the blanket certificate issued in Docket No. CP87-115-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Tennessee proposes to transport natural gas on an interruptible basis for Texas-Ohio Gas, Inc. (Texas-Ohio). Tennessee explains that service commenced January 27, 1989 under § 284.223(a) of the Commission's Regulations, as reported in Docket No. ST89-2199. Tennessee further explains that the peak day quantity would be 15,000 dekatherms, the average daily quantity would be 15,000 dekatherms, and that the annual quantity would be 5,475,000 dekatherms. Tennessee explains that it would receive natural gas for the account of Texas-Ohio at points of receipt located Offshore Louisiana and in the states of Pennsylvania and Texas. Tennessee states that the points of delivery are located in the states of Texas, Louisiana and Pennsylvania.

*Comment date*: April 21, 1989, in accordance with Standard Paragraph G at the end of this notice.

**5. Northwest Pipeline Corporation**

[Docket No. CP89-941-000]

March 8, 1989.

Take notice that on March 2, 1989, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP89-914-000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to provide transportation service on behalf of CP National Corporation (CP National), under Northwest's blanket certificate issued in Docket No. CP86-578-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Northwest requests authorization to transport, on an interruptible basis, up to a maximum of 45,000 MMBtu of natural gas per day for CP National, a local distribution company, from receipt points located in Colorado, Oklahoma, Oregon, Utah, Washington and Wyoming to delivery points located in Colorado, Idaho, New Mexico, Oklahoma, Oregon, Utah, Washington and Wyoming. Northwest anticipates transporting, on an average day 800 MMBtu and an annual volume of 300,000 MMBtu.

Northwest states that the transportation of natural gas for CP National commenced January 27, 1989, as reported in Docket No. ST89-2276-000, for a 120-day period pursuant to § 284.223(a) of the Commission's Regulations and the blanket certificate issued to Northwest in Docket No. CP86-578-000.

*Comment date:* April 24, 1989 in accordance with Standard Paragraph F at the end of the notice.

**6. Columbia Gas Transmission Corporation**

[Docket No. CP89-939-000]

March 8, 1989.

Take notice that on March 2, 1989, Columbia Gas Transmission Corporation (Applicant), 1700 MacCorkle Avenue, SE., Charleston, West Virginia 25314, filed in Docket No. CP89-939-000 a request pursuant to §§ 157.205 and 157.216 of the Commission's Regulations under the Natural Gas Act for authorization to abandon approximately 3.9 miles of 3-inch pipeline and appurtenant facilities located in Hardin County, Ohio, under Applicant's blanket certificate issued in Docket No. CP83-76-000 pursuant to section 7 of the Natural Gas Act. In addition, Applicant also requests authority under §§ 157.205 and 157.212 to establish a new point of delivery of Columbia Gas of Ohio, Inc. (COH) at the interconnection of certain new facilities to be constructed by COH, all as more fully set forth in the request on file with the Commission and open to public inspection.

COH would construct approximately 21.6 miles of 10-inch pipeline from the East Liberty area, Logan County, Ohio, to a proposed new point of delivery by Applicant to COH from Applicant's 12- and 16-inch pipelines located in Hardin County, Ohio. It is stated that such facilities would be utilized by COH to serve its existing market area in the Mt. Victory, Ohio area including a new Honda of America plant under construction in East Liberty, Logan County, Ohio. Applicant states that its 3.9 miles of 3-inch pipeline and appurtenant facilities (Mt. Victory System), presently in the area, will no longer be required for service to COH upon completion of COH's new facilities. Accordingly, Applicant further states that it proposes to abandon such facilities and sell the rights-of-way associated therewith to COH for the utilization in the construction and operation of its facilities.

Applicant also states that it does not serve any customers other than COH from the facilities to be sold and thus, the abandonment will not result in the abandonment of service to any natural gas consumer.

The quantities to be provided through the new point of delivery are within Applicant's currently authorized level of service to COH and would not result in revisions to either peak day or seasonal entitlements, it is stated. The sales to be made through the point of delivery would be under Applicant's currently effective service agreement with COH under Rate Schedule CDS, it is further stated.

*Comment date:* April 24, 1989, in accordance with Standard Paragraph G at the end of this notice.

**7. Texas Gas Transmission Corporation**

[Docket No. CP89-936-000]

March 8, 1989.

Take notice that on March 2, 1989, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP89-936-000 an application pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Energy Marketing Exchange, Inc. (Energy Exchange), a marketer of natural gas, under Texas Gas' blanket certificate issued in Docket No. CP88-686-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Texas Gas proposes to transport, on an interruptible basis up to 100,000 MMBtu per day for Energy Exchange. Texas Gas states that construction of facilities would not be required to provide the proposed service.

Texas Gas further states that the maximum day, average day, and annual transportation volumes would be approximately 100,000 MMBtu, 50,000 MMBtu and 36,500,000 MMBtu respectively.

Texas Gas advises that service under § 284.223(a) commenced January 18, 1989, as reported in Docket No. ST89-1933.

*Comment date:* April 24, 1989, in accordance with Standard Paragraph G at the end of this notice.

**8. Northern Natural Gas Company**

[Docket No. CP89-956-000]

March 9, 1989.

Take notice that on March 6, 1989, Northern Natural Gas Company, Division of Enron Corp., (Northern) 1400 Smith Street, Houston, Texas 77251, filed in Docket No. CP89-956-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas under its blanket authorization issued in Docket No. CP86-435-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Northern proposes to transport natural gas on an interruptible basis for Chevron U.S.A. Inc. (Chevron). Northern explains that the service commenced under § 284.223(a) of the Commission's Regulations, as reported in Docket No. ST-89-2390. Northern proposes to transport on a peak day up to 75,000 MMBtu; on an average day up to 56,250 MMBtu; and on an annual basis up to 27,375,000 MMBtu. Northern proposes to receive and deliver the gas at various points in Texas.

*Comment date:* April 24, 1989 in accordance with Standard Paragaph F at the end of the notice.

**9. Texas Gas Transmission Corporation**

[Docket No. CP89-935-000]

March 9, 1989.

Take notice that on March 2, 1989, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP89-935-000 a request to §§ 157.205 and 284.223 of the Commission's Regulations (18 CFR 157.205 and 284.223) for authorization to transport natural gas for Sun Operating Limited Partnership (Sun), pursuant to Texas Gas's blanket certificate issued in Docket No. CP88-686-000 and section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Specifically, Texas Gas requests authority to transport up to 1.2 billion Btu of natural gas per day on an interruptible basis on behalf of Sun pursuant to a transportation agreement dated January 4, 1989. Texas states that the transportation agreement provides for Texas Gas to receive gas from a point in Block 146, South Marsh Island Area, offshore Louisiana, and to redeliver the gas into the facilities of ANR Pipeline Company in Block 146, South Marsh Island Area, Offshore Louisiana.

Texas Gas indicates it would provide the service on a month-to-month basis unless terminated upon thirty days written notice. Texas Gas states that it would charge the rates provided by its Rate Schedule IT.

It is indicated that the estimated maximum daily volume and average daily volume would be 1.2 billion Btu and the estimated annual volume would be 438 billion Btu. Texas Gas states it commenced a 120-day transportation service for Sun on January 21, 1989, as reported in Docket No. ST89-2091. Texas gas indicates that it would render the service through the use of Texas Gas's existing facilities.

*Comment date:* April 24, 1989, in accordance with Standard Paragraph G at the end of this notice.

**10. Tennessee Gas Pipeline Company**

[Docket No. CP89-949-000]

March 9, 1989.

Take notice that on March 6, 1989, Tennessee Gas Pipeline Company (Tennessee), Post Office Box 2511, Houston, Texas 77252, filed in Docket No. CP89-949-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Shell Offshore, Inc. (Shell), a natural gas producer, under its blanket authorization issued in Docket No. CP87-115-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Tennessee would perform the proposed interruptible transportation

VOL 54 ISS 49 MR 15 1989 UMI

service for Shell, pursuant to an interruptible transportation service agreement dated January 16, 1989. The transportation agreement is effective for a primary term of one month and month-to-month thereafter subject to termination by either party at any time upon at least 30 days written notice by either party. Tennessee proposes to transport 35,000 dekatherms (dth) of natural gas on a peak and average day; and on an annual basis 12,775,000 dth of natural gas for Shell. Tennessee proposes to receive the subject gas at various existing points of receipt located offshore Louisiana and in the state of Louisiana for redelivery to interconnections with Southern Natural Gas, Columbia Gulf Transmission Company and Transcontinental Gas Pipe Line Corporation. Tennessee avers that no new facilities are required to provide the proposed service.

It is explained that the proposed service is currently being performed pursuant to the 120-day self implementing provision of § 284.223(a)(1) of the Commission's Regulations. Tennessee commenced such self-implementing service on February 1, 1989, as reported in Docket No. ST89-2361-000.

*Comment date:* April 24, 1989, in accordance with Standard Paragraph G at the end of this notice.

**11. Northern Natural Gas Company**

[Docket No. CP89-854-000]

March 9, 1989.

Take notice that on March 6, 1989, Northern Natural Gas Company, Division of Enron Corp., (Northern) 1400 Smith Street, Houston, Texas 77251, filed in Docket No. CP89-854-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas under its blanket authorization issued in Docket No. CP86-435-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Northern proposes to transport natural gas on an interruptible basis for Damson Oil Corporation (Damson). Northern explains that the service commenced under § 284.223(a) of the Commission's Regulations, as reported in Docket No. ST89-2366. Northern proposes to transport on a peak day up to 10,000 MMBtu; on an average day up to 7,500 MMBtu; and on an annual basis up to 3,650,000 MMBtu. Northern proposes to receive and deliver the gas at various points in Texas.

*Comment date:* April 24, 1989, in accordance with Standard Paragraph G at the end of this notice.

**12. United Gas Pipe Line Company**

[Docket No. CP89-836-000]

March 9, 1989.

Take notice that on March 2, 1989, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP89-836-000 a request pursuant to § 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to provide an interruptible transportation service on behalf of the Polaris Corporation (Polaris), a local distribution company, under its blanket certificate issued in Docket No. CP88-6-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

United states that it proposes to transport natural gas on behalf of Polaris from various points of receipt located in Louisiana and Texas to two points of delivery located in Louisiana.

United further states that the maximum daily, average daily and annual quantities that it would transport on behalf of Polaris would be 30,000 MMBtu equivalent, 20,000 MMBtu equivalent, and 2,472,000 MMBtu equivalent of natural gas, respectively.

United indicates that in Docket No. ST89-2184, filed with the Commission on February 8, 1989, it reported that transportation service for Polaris had begun under the 120-day automatic authorization provisions of § 284.223(a).

*Comment date:* April 24, 1989, in accordance with Standard Paragraph G at the end of this notice.

**13. National Fuel Gas Supply Corporation**

[Docket No. CP89-881-000]

March 8, 1989.

Take notice that on February 22, 1989, National Fuel Gas Supply Corporation (National), Ten Lafayette Square, Buffalo, New York 14203, filed in Docket No. CP89-881-000, as supplemented on March 2, 1989, a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to construct and operate sales taps for the delivery of natural gas to three end users to be served by an affiliate, National Fuel Gas Distribution Corporation (Distibution) (§157.211), and to relocate one delivery point for deliveries of gas to Distribution (§ 157.212), under the certification authorization issued in Docket No. CP85-4-000 pursuant to section 7(c) of the Natural Gas Act, all as more fully set forth in the application that is on file with the Commission and open to public inspection.

National proposes to construct and operate sales taps and delivery points to provide service to end user customers of Distribution, and to serve Distribution, as listed below. National states that the proposed sales taps/delivery points are not prohibited by any of its existing tariffs and that the additional taps would have no significant impact on National's peak day and annual deliveries. National estimates that the new customers would increase its peak day deliveries by 4,804 Mcf and the relocated delivery point for Distribution would accommodate 13,000 Mcf on a peak day.

| Customer | Location | Estimated volume Mcf/year |
|---|---|---|
| Distribution | Hamburg, NY [1] | 2,180,000 |
| Allegany Particleboard Limited. | McKean Co., PA | 250,800 |
| Charles R. Hester | Jefferson Co., PA | 160 |
| Roger F. Post | Erie Co., PA | 150 |

Comment date: April 24, 1989, in accordance with Standard Paragraph G at the end of this notice.

[1] The location is described as Line T, relocated as proposed in Docket No. CP88-85.

**Standard Paragraph**

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

BILLING CODE 6717-01-M

[Docket No. RP89-98-000]

**Colorado Interstate Gas Co.; Proposed Changes in FERC Gas Tariff**

March 9, 1989.

Take notice that Colorado Interstate Gas Company ("CIG"), on March 2, 1989, tendered for filing the following tariff sheets to revise its FERC Gas Tariff, Original Volume No. 1:

Twelfth Revised Sheet No. 2
Original Sheet No. 61G5
Original Sheet No. 61G6
Original Sheet No. 61G7
Original Sheet No. 61G8
Original Sheet No. 61G9
Original Sheet No. 61G10
Original Sheet No. 61G11
Original Sheet No. 61G12

CIG states that the above-referenced tariff sheets are being filed to incorporate a buyout-buydown cost recovery procedure under § 2.104 of the Commission's Regulations. Under the proposed filing, CIG will allocate its buyout-buydown costs between its jurisdictional and nonjurisdictional customers, absorb 50 percent of the jurisdictional portion of the buyout-buydown costs, and recover 50 percent of such costs through fixed surcharges applicable to its jurisdictional firm sales customers. CIG states that the total of the jurisdictional portion of the buyout-buydown costs related to this filing are $23,741,401. Therefore, CIG is proposing to recover $11,870,700 from its affected jurisdictional firm sales customers.

CIG has requested that the Commission accept this filing, to become effective March 3, 1989.

CIG states that copies of the filing were served upon all of its affected firm sales customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before March 16, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

[Docket No. TQ89-2-32-000]

**Colorado Interstate Gas Co.; Quarterly Purchased Gas Adjustment**

March 9, 1989.

On March 1, 1989, Colorado Interstate Gas Company ("CIG") filed the following proposed tariff sheets to reflect a quarterly purchased gas adjustment ("PGA"):

Thirty-Eighth Revised Sheet No. 7
Thirty-Eighth Revised Sheet No. 8

CIG requests that these proposed tariff sheets be made effective on April 1, 1989.

CIG states that this filing, *inter alia*, reflects no change in demand, and a 0.22¢ decrease in the commodity rate for the G-1, P-1, SG-1, H-1, F-1, and PS-1 Rate Schedules, compared with rates filed by CIG on February 13, 1989 in Docket No. RP85-122, *et al.* In the event the Commission does not act, or does not act favorably on the compliance filing in Docket No. RP85-122, *et al.*, then CIG requests that the Commission accept effective April 1, 1989, *Alternate* Thirty Eighth Revised Sheet Nos. 7 and 8 which were also submitted for filing.

CIG states that copies of this filing have been served upon CIG's jurisdictional customers and public bodies, and are otherwise available for public inspection at CIG's offices in Colorado Springs, Colorado.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before March 16, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

BILLING CODE 6717-01-M

[Docket No. RP89-92-000]

**El Paso Natural Gas Co.; Tariff Filing**

March 9, 1989.

Take notice that El Paso Natural Gas Company ("El Paso"), on March 3, 1989, tendered for filing pursuant to Part 154 of the Federal Energy Regulatory Commission ("Commission") Regulations Under the Natural Gas Act, in compliance with the Commission's Order No. 509, *et seq.*, Third Revised Sheet Nos. 232 and 233 to its FERC Gas Tariff, Original Volume No. 1-A.

El Paso states that it currently has on file with the Commission Rate Schedule T-3 that conforms to §§ 284.7 and 284.8(d) of the Commission's Regulations for firm transportation service and Rate Schedule T-1 that conforms to §§ 284.7 and 284.9(d) of the Commission's Regulations for interruptible transportation service, both of which are contained in El Paso's FERC Gas Tariff, Original Volume No. 1-A. The offshore transportation rates contained in Rate Schedules T-3 and T-1, from time to time, will be applicable to all OCS transportation service performed by El Paso.

El Paso further states that the tendered tariff sheets add a new paragraph 20.3(b) to section 20, Operating Provisions for Firm Transportation Service, of El Paso's FERC Gas Tariff, Original Volume No. 1-A, which provides that in the event that two or more shippers seek to obtain the firm capacity that one or more shippers offer to relinquish on the OCS during the open season conducted by El Paso such capacity will be reallocated on a pro rata basis. El Paso also states that at the conclusion of open season and thereafter firm capacity on the OCS will be available for contract on a first come/first served basis, as it becomes available and that allocation of contracted firm capacity on the OCS will be on a pro rata basis.

It is also stated that inasmuch as El Paso is already an open access transporter, the requirements for declaring open season for interruptible capacity on the OCS does not apply to El Paso.

El Paso requested that the tendered tariff sheets become effective thirty (30) days after the date of filing.

Copies of the filing were served upon all shippers utilizing the El Paso system and all interested state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825

VOL 54 ISS 49 MR 15 1989 UMI

North Capitol Street NE., Washington, DC 20426, in accordance with §§ 385.214 and 351.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before March 16, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the commission and are available for public inspection in the Public Reference Room.

BILLING CODE 6717-01-M

---

[Docket No. TQ89-3-33-000]

**El Paso Natural Gas Co., Proposed Change in Rates**

March 9, 1989.

Take notice that El Paso Natural Gas Company ("El Paso"), on March 1, 1989, tendered for filing pursuant to Part 154 of the Federal Energy Regulatory Commission's ("Commission") Regulations Under the Natural Gas Act, a notice of a Quarterly Adjustment in Rates, effective April 1, 1989, for jurisdictional gas service rendered to sales customers served by El Paso's interstate gas transmission system under rate schedules affected by and subject to section 19, Purchased Gas Cost Adjustment Provision ("PGA"), of the General Terms and Conditions in El Paso's FERC Gas Tariff, First Revised Volume No. 1.

El Paso states that it has tendered certain tariff sheets in compliance with its PGA provisions which reflect a net decrease of $0.2070 per dth below those rates placed in effect on January 1, 1989 at Docket No. TQ89-3-33-000. The decrease of $0.2070 per dth, after elimination of the Current Adjustment reflected in El Paso's Interim PGA effective January 1, 1989, results in a Current Adjustment of $.3134 per dth. Regarding the Surcharge Adjustment, El Paso will continue not collecting such surcharge in accordance with the Commission's September 30, 1988 order accepting and suspending El Paso's Quarterly PGA filing at Docket No. TQ88-1-33-000, *et al.*, effective October 1, 1988.

Copies of the filing were served upon all of El Paso's interstate pipeline system sales customers and all interested state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with § 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before March 16, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestant parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

[Docket No. RP89-87-000]

**Northwest Pipeline Corp.; Proposed Change in FERC Gas Tariff**

March 9, 1989.

Take notice that on March 2, 1989, Northwest Pipeline Corporation (Northwest) submitted for filing, to be a part of its FERC Gas Tariff, the following tariff sheets.

First Revised Volume No. 1

Twenty-Sixth Revised Sheet No. 10-A

Original Volume No. 1-A

Fifth Revised Sheet No. 202

Original Volume No. 2

Sixth Revised Sheet No. 2.2

Northwest states the purpose of the filing is to reflect a new Fuel Reimbursement Percentage of 1.56%, to be effective April 1, 1989, pursuant to the provisions contained in Northwest's FERC Gas Tariff, Volumes 1, 1-A, and 2.

Northwest requests an effective date of April 1, 1989 for each of the respective tariff sheets, which date is 30 days from the date of filing.

A copy of this filing has been served on Pacific Interstate Transmission Company, Northwest's jurisdictional customers, and affected state regulatory commissions.

Any persons desiring to be heard or protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 or 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 16, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RP89-86-000]

**Northwest Pipeline Corp.; Proposed Change in FERC Gas Tariff**

March 9, 1989.

Take notice that on March 2, 1989, Northwest Pipeline Corporation ("Northwest") submitted for filing, to be a part of its FERC Gas Tariff, the following tariff sheets, to be effective April 1, 1989:

First Revised Volume No. 1

Fifth Revised Sheet No. 33
Fourth Revised Sheet No. 41
First Revised Sheet No. 110
Third Revised Sheet No. 117
Second Revised Sheet No. 118
Second Revised Sheet No. 119

Original Volume No. 1-A

Second Revised Sheet No. 417
Third Revised Sheet No. 418
First Revised Sheet No. 418-A
Original Sheet No. 418-B
Fifth Revised Sheet No. 419
First Revised Sheet No. 420
Second Revised Sheet No. 421
Original Sheet No. 421-A

Northwest states that these sheets were filed to incorporate revisions to the nomination, determination of deliveries, imbalances and penalty provisions currently stated in Northwest's tariff.

A copy of this filing is being served on Northwest's jurisdictional sales and transportation customers and affected state commissions.

Any person desiring to be heard or protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 16, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

[Docket No. RP88-227-010]

**Paiute Pipeline Co.; Notice of Compliance Filing**

March 9, 1989.

Take notice that on March 3, 1989, Paiute Pipeline Company (Paiute), pursuant to section 4 of the Natural Gas Act and Part 154 of the Commission's Regulations thereunder, tendered for filing certain revised tariff sheets in compliance with the Commission's Order issued on January 31, 1989 in Docket Nos. RP88-227-000 and RP88-227-005.

Paiute states that the Commission's January 31, 1989 Order, among other things, accepted Original Sheet Nos. 77 and 78 to Paiute's Original Volume No. 1 and Original Sheet No. 71 and Sheet Nos. 72-79 of its Original Volume No. 1-A, subject to certain conditions, and directed that Paiute refile, within 30 days of the date of the Order, tariff sheets that conformed to the Commission's Order.

In response to the Commission's Order, Paiute filed revised tariff sheets to conform to the Commission's Order. To accomplish this purpose, Paiute submitted tariff sheets which further define rates and penalties for authorized and unauthorized D-2 and R-2 annual entitlement overruns.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 16, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RP89-85-000 and RP89-85-001]

**Sea Robin Pipeline Co.; Proposed Changes in FERC Gas Tariff**

March 9, 1989.

Take notice that on March 1, 1989, Sea Robin Pipeline Company (Sea Robin), Post Office Box 1478, Houston, Texas 77251-1478, filed pursuant to § 284.305(e) of the Federal Energy Regulatory Commission's (Commission) Regulations, tariff sheets to Original Volume No. 1 of its FERC Gas Tariff. The tariff sheets filed by Sea Robin are:

To Be Effective April 1, 1989

Second Revised Sheet No. 70
Original Sheet No. 70-A

Sea Robin states that these tariff sheets are filed, as required by Order No. 509 issued December 9, 1988, as amended by Order No. 509-A issued February 21, 1989, to establish the manner in which firm capacity will be reallocated under § 284.304(c) of the Commission's Regulations in the event that more than one Shipper seeks to obtain the firm capacity relinquished.

In Docket No. RP89-85-001, Sea Robin states that it provides notice to the Commission of its intent to continue use, after April 1, 1989, its previously certificated rates for transportation services provided under Rate Schedules X-5, X-11, X-12, and X-13.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, or or before March 16, 1989, and in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385-214).

Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person desiring to become a party must motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

## DEPARTMENT OF ENERGY

[Docket No. RP89-90-000]

**Superior Offshore Pipeline Co.; Election To Continue Use of Current Transportation Rates**

March 9, 1989

Take notice that on February 28, 1989, Superior Offshore Pipeline Company (SOPCO), pursuant to Commission Order No. 509-A, filed its notification of election to use its current blanket transportation rate of $0.01 per MMBtu for the transportation services provided after April 1, 1989.

Pursuant to § 284.305(d)(2), SOPCO submits that its continued use of its current $0.01 per MMBtu transportation rates would not be unjust and unreasonable for the following reasons:

(1) The current cost-based $0.01 per MMBtu transportation rates were approved by the Commission following a through evaluation of the actual costs incurred in providing the transportation services in Docket No. RP86-101 as an integral part of SOPCO's voluntary election to become an open-access blanket certificate holder under Part 284 of the Commission's Regulations;

(2) The current $0.01 per MMBtu rate is a one-part rate calculated upon a volumetric basis and thus is the sole basis upon which SOPCO recovers its operating costs as well as its return and related taxes as it only provides transportation services and does not purchase and resell any natural gas whatsoever;

(3) The amount of the current $0.01 per MMBtu transportation rate must be viewed as *de minimus* in terms of the overall costs associated with delivering natural gas production onshore to any eligible shipper, and to impose the additional regulatory burden of justifying its $0.01 per MMBtu transportation rate would serve no regulatory purpose whatsoever.

For the foregoing reasons, SOPCO requests that it be permitted to continue to charge its current cost-justified $0.01 per MMBtu transportation for blanket transportation service until such time as it seeks the requested authority pursuant to Section 4 of the Natural Gas Act, to modify its existing rate.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure [18 CFR 385.214, 385.211 (1988)]. All such motions or protests should be filed on or before

VOL 54 ISS 49 MR 15 1989 UMI

March 16, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

---

**[Docket No. RP89-84-000]**

**Tennessee Gas Pipeline Co.; Filing**

March 9, 1989.

Take notice that on March 2, 1989, Tennessee Gas Pipeline Company (Tennessee) submitted for filing (1) Original Tariff Sheet Nos. 208C and 208D in Second Revised Volume No. 1 of its FERC Gas Tariff to be effective April 1, 1989, and (2) notification of its election to continue to use its current rates for certain OCS transportation services after April 1, 1989.

Tennessee states that the purpose for filing Original Sheet Nos. 208C and 208D is to comply with Commission Order Nos. 509 and 509-A. The tariff sheets describe the procedures Tennessee will implement pursuant to the Commission orders. In particular, the sheets set forth the manner in which Tennessee will satisfy requests for firm OCS transportation services at the open season to be conducted for ten days commencing April 1, 1989. At any time after the open season Tennessee states that it will satisfy requests received for firm OCS transportation services from any available capacity on a first-come, first served basis. To the extent a request for a firm transportation service cannot be satisfied from available capacity, Tennessee shall provide the requesting shipper with a list of existing firm shippers within ten (10) days after receiving the request. In the event the requesting shipper finds an existing firm shipper who is willing to relinquish all or a portion of its firm service entitlement, Tennessee shall satisfy the request for firm service by providing a replacement service.

Additionally, Tennessee states that it is providing notification of its election and its justification to continue to use its current rates for certain OCS transportation services after April 1, 1989, rendered pursuant to the following Tennessee Rate Schedules:

A. Firm Transportation Services—T-173, T-174, T-175 and T-176.

B. Interruptible Transportation Services—T-77, T-136, T-144, T-145, T-148, T-165 and T-172.

Although Tennessee does not believe any waivers are necessary for the Commission to accept the filed tariff sheets to be effective April 1, 1989, Tennessee requests the Commission grant any waivers it deems necessary.

Tennessee states that copies of its filings are available for inspection at its principal place of business in the Tenneco Building, Houston, Texas and have been mailed to all affected customers.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 16, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

**[Docket No. RP89-85-000]**

**Texas Eastern Transmission Corp.; Compliance Filing in FERC Gas Tariff**

March 9, 1989.

Take notice that Texas Eastern Transmission Corporation (Texas Eastern) on March 2, 1989, tendered for filing, in compliance with the Commission's Order Nos. 509 and 509A, issued in Docket Nos. RM88-14 and RM88-15, certain tariff sheets.

Texas Eastern is making this instant filing in order to (1) set forth tariff provisions in its Rate Schedules FT-1 and IT-1 which expand the applicability of the Rate Schedules to firm and interruptible transportation on the OCS, and (2) file a statement explaining why Texas Eastern believes that continued use of current rates to perform transportation pursuant to certificates other than Part 284 blanket transportation certificates is not unjust, unreasonable, or unduly discriminatory.

The tariff sheets being filed herewith are proposed to be effective April 1, 1989, the effective date required in order to comply with § 284.305(e) of the Commission's Regulations.

Copies of the filing were served on Texas Eastern's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 16, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

**[Docket Nos. CP89-852-000, CP89-853-000, CP89-854-000, CP89-855-000, CP89-856-000, CP89-857-000, CP89-858-000, CP89-859-000, CP89-860-000, CP89-862-000, and CP89-863-000]**

**Transcontinental Gas Pipe Line Corp.; Applications**

March 9, 1989.

Take notice that on February 21, 1989, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP89-852-000, *et al.*, applications pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon firm sales entitlement to eleven customers, all as more fully set forth in the applications on file with the Commission and open to public inspection.[1]

Transco states that pursuant to § 284.10 of the Commission's Regulations, the customer, as noted in the Appendix, converted firm sales entitlements under their respective Service Agreements to firm transportation under Transco's Rate Schedule FT. Transco states that it now requests to abandon firm sales entitlements to each customer associated with the reductions in firm sales service to be effective as of the dates noted in the Appendix. Transco states that pursuant to § 284.10(f)(2), the exercise of contract conversion rights by a firm sales customer under § 284.10(d) constitutes consent by the customer to the abandonment of sales service to the extent of the conversion.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 30, 1989, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules and Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission and open to public inspection.

[1] See attached appendix for details of each application, including customer name, rate schedule, revised sales entitlement, etc.

Transco states that pursuant to § 284.10 of the Commission's Regulations, the customer, as noted in the Appendix, converted firm sales entitlements under their respective Service Agreements to firm transportation under Transco's Rate Schedule FT. Transco states that it now requests to abandon firm sales entitlements to each customer associated with the reductions in firm sales service to be effective as of the dates noted in the Appendix. Transco states that pursuant to § 284.10(f)(2), the exercise of contract conversion rights by a firm sales customer under § 284.10(d) constitutes consent by the customer to the abandonment of sales service to the extent of the conversion.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 30, 1989, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules and Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission and open to public inspection.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 16, 1989. Protests will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in the subject to the jurisdiction confered upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed adandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Transco to appear or be represented at the hearing.

**Lois D. Cashell,**

*Secretary.*

**[Docket No. RP89-38-000]**

**U-T Offshore System; Proposed Changes in FERC Gas Tariff**

March 9, 1989.

Take notice that on March 2, 1989, U-T, Offshore System (U-TOS) tendered for filing its FERC Gas Tariff, First Revised Volume No. 1.

According to U-TOS, an entirely new Volume No. 1 (First Revised Volume No. 1) is being submitted because so many changes in its presently effective Original Volume No. 1 are required in order to comply with the Commission's Order Nos. 509 and 509-A.

U-TOS proposes to continue to charge its presently effective rates, which are being collected, subject to refund, in Docket No. RP89-38-000. The principal changes relate to changes being made to comply with Order Nos. 509 and 509-A. In this connection, a new Rate Schedule FT is included which relates to the procedures to be followed in allocating available firm capacity on the U-TOS system.

U-TOS proposes that the rates contained in the Schedule of Rates

VOL 54 ISS 49 MR 15 1989 UMI

(Original Sheet No. 5) become effective on April 1, 1989, subject to refund in Docket No. RP89-38-000. U-TOS also proposes that the remainder of first Revised Volume No. 1 become effective on April 1, 1989, without suspension.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulation Commission, 825 North Capitol Street, NE. Washington, DC 20426, in accordance with Rule 211 or Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before March 16, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

**[Docket No. TQ89-3-42-000]**

### Transwestern Pipeline Co.; Proposed Changes in FERC Gas Tariff

March 9, 1989.

Take notice that on March 2, 1989, Transwestern Pipeline Company (Transwestern) tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following tariff sheet:

57th Revised Sheet No. 5

Transwestern states this tariff sheet is filed pursuant to its Purchased Gas Adjustment provision set forth in Article 19.4 of the General Terms and Conditions of Transwestern's FERC Gas Tariff, Second Revised Volume No. 1. The Current Adjustment reflected herein represents an increase of $0.2914/dth as measured against Transwestern's flex PGA filing in Docket No. TF89-8-42, which became effective on March 2, 1989.

The proposed effective date for the tariff sheet listed above is April 1, 1989.

Copies of the filing were served on Transwestern's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 16, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are available for public inspection in the Public Reference Room.

## ENVIRONMENTAL PROTECTION AGENCY

**[FRL-3536-9]**

### Agency Information Collection Activities Under OMB Review

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden; where appropriate, it includes the actual data collection instrument.

**FOR FURTHER INFORMATION CONTACT:** Sandy Farmer at EPA, (202 382-2740).

**SUPPLEMENTARY INFORMATION:**

**Office of Solid Waste and Emergency Response**

*Title:* Generator Requirements—Exports of Hazardous Waste (EPA ICR #0820); OMB #2050-0035. This is an extension of a currently approved collection.

*Abstract:* The requirements for generators and transporters of hazardous waste for export include: providing notification of intent to export, obtaining consent from the receiving government, attaching the consent to the manifest, filing an annual report summarizing information on all wastes exported, filing exception reports where applicable, and delivering a copy of the manifest to U.S. Customs. The Agency uses the information as an enforcement tool, and to determine whether the right to export is being abused and if additional controls are necessary or desirable.

*Burden Statement:* The estimated average public burden for this collection of information is about 20 minutes for reporting and 45 minutes for the recordkeeping per respondent, per shipment. This estimate includes all aspects of the information collection including time for reviewing instructions, gathering and maintaining the data needed, and submitting reports.

*Respondents:* Generators or Transporters of Hazardous Waste.

*Estimated No. of Respondents:* 1,300.

*Estimated Total Annual Burden on Respondents:* 5,356 hours.

*Frequency of Collection:* Each Shipment of Hazardous Waste.

Send comments regarding the burden estimate, or any other aspect of this collection of information, including suggestions for reducing the burden, to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM-223), 401 M Street, SW., Washington, DC 20460,

and

Tim Hunt, Office of Management and Budget, Office of Information and Regulatory Affairs, 728 Jackson Place, NW., Washington, DC 20503, (Telephone (202) 395-3084).

Date: March 3, 1989.

*Title:* Surface impoundment retrofitting requirements—information request (ICR #1494). This is a new collection.

*Abstract:* This is a model letter directed to owners and operators of surface impoundments, for use by EPA in enforcement of the retrofit requirements of RCRA § 3005(j)(1). The letter requests information from the impoundment facility on: whether it will retrofit or close, anticipated closure date, date of last receipt of waste, measures taken to retrofit, and extent of on-site storage of waste.

*Burden Statement:* The estimated average public reporting burden for this collection of information is 6 hours per respondent, per letter. This estimate includes all aspects of the information collection including time for reviewing instructions, gathering and maintaining the data needed, and preparing and submitting letter.

*Respondents:* Owners and Operators of Surface Impoundments.

*Estimated No. of Respondents:* 143.

*Estimated Total Annual Burden on Respondents:* 858 hours.

*Frequency of Collection:* One time.

Send comments regarding the burden estimate, or any other aspect of these information collections, including suggestions for reducing the burden, to:

### Receipt of an Application for a Specific Exemption to Use Avermectin $B_1$; Solicitation of Public Comment

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** EPA has received a specific exemption request from the Florida Department of Agriculture and Consumer Services (hereafter referred to as the "Applicant") for use of avermectin $B_1$ (AGRI-MEK 0.15 EC™) to control two-spotted spider mites (*Tetranychus urticae*) on 5,400 acres of strawberries in Florida. Avermectin $B_1$ (CAS 63AB) contains a mixture of avermectins containing > 80% avermectin $B_{1a}$ (5-0-demethyl avermectin $A_{1a}$) and < 20% avermectin $B_{1b}$ (5-0-demethyl-25-de(1-methylpropyl-25-(1-methylethyl)avermectin $A_{1a}$). In accordance with 40 CFR 166.24, EPA is soliciting comment before making the decision whether or not to grant this specific exemption request.

**DATE:** Comments must be received on or before March 30, 1989.

**ADDRESS:** Three copies of written comments, bearing the identification notation "OPP-180809" should be submitted by mail to:

Public Docket and Freedom of Inforamtion Section, Field Operations Division (H750 6C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 246, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information (CBI)." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for inspection in Rm. 246 at the address given above from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

**FOR FURTHER INFORMATION CONTACT:** By mail:

Libby Pemberton, Registration Division (H750 5C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 716, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

**SUPPLEMENTARY INFORMATION:** Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at his discretion, exempt a State agency from any provisions of FIFRA if he determines that emergency conditions exist which require such exemption.

The Applicant has requested the Administrator to issue a specific exemption for the use of avermectin $B_1$, manufactured as AGRI-MEK 0.15 EC™, by Merck & Co., Inc., on strawberries in Florida. No tolerances have been established for avermectin $B_1$ on any raw agricultural commodities.

Information in accordance with 40 CFR Part 166 was submitted in part of this request. The Applicant proposes ground applications applied at a rate of 16 ounces of product per acre per application. A maximum of four applications will be made per acre per crop season. Treatment would not be allowed 3 days prior to harvest.

The Applicant indicates that Florida's strawberry industry has dramatically increased acreage of a single variety, the Selva. Unfortunately, Selvas has proven to be extremely susceptible to the two-spotted mites. The Applicant also states that the extremely warm winter seasons allowed the unseasonable increase in mite populations. An additional factor in allowing the increase of this pest was the loss of Plictran, which was the primary miticide used on strawberries. Additionally, currently registered pesticides have failed to control high population levels for a variety of reasons. Lack of efficacy eliminates malathion, diazinon, naled, methyl parathion, and parathion. Fenbutatin-oxide and propargite are limited in their efficacy. Mevinphos and dicofol are limited by resistant populations throughout the area. The product Safer soap has resulted in crop phytotoxicity under Florida crop production conditions.

The Applicant indicates that without adequate control of the spider mites a potential loss of $10 million could occur from this pest.

VOL 54 ISS 49 MR 15 1989 UMI

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 require that the Agency publish notice in the Federal Register and solicit public comment on an application involving the first food use of pesticide. Accordingly, interested persons may submit written views on this subject to the Field Operations Division at the address above.

The Agency, accordingly, will review and consider all comments received during the comment period.

## Receipt of an Application for a Specific Exemption to Use Avermectin $B_1$; Solicitation of Public Comment

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** EPA has received a specific exemption request from the California Department of Food and Agriculture (hereafter referred to as the "Applicant") for use of avermectin $B_1$ (AVID 0.15 EC™) to control two-spotted spider mites (*Tetranychus urticae*) and European red mites (*Panonychus ulmi*) on 21,500 acres of pears in California. Avermectin $B_1$ (CAS 63AB) contains a mixture of avermectins containing > 80% avermectin $B_{1a}$ (5-O-demethyl avermectin $A_{1a}$) and < 20% avermectin $B_{1b}$ (5-O-demethyl-25-de(1-methylpropyl-25-(1-methylethyl)avermectin $A_{1a}$). In accordance with 40 CFR 166.24, EPA is soliciting comment before making the decision whether or not to grant this specific exemption request.

**DATE:** Comments must be received on or before March 30, 1989.

**ADDRESS:** Three copies of written comments, bearing the identification notation "OPP-180806" should be submitted by mail to:

Public Docket and Freedom of Information Section, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 246, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information (CBI)." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for inspection in Rm. 246 at the address given above from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

**FOR FURTHER INFORMATION CONTACT:** By mail:

Libby Pemberton, Registration Division (H7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 716, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA. (703-557-1806).

**SUPPLEMENTARY INFORMATION:** Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at his discretion, exempt a State agency from any provisions of FIFRA if he determines that emergency conditions exist which require such exemption.

The Applicant has requested the Administrator to issue a specific exemption for the use of avermectin $B_1$, manufactured as AVID 0.15 EC™, by Merck & Co., Inc., on pears in California. No tolerances have been established for avermectin $B_1$ on any raw agricultural commodities.

Information in accordance with 40 CFR Part 166 was submitted as part of this request. The Applicant proposes ground applications applied at a rate of 10 to 20 ounces of product per acre per application. A maximum of two applications will be made per crop season. Applications would be made through October 31, 1989.

The Applicant indicates that the percent control with registered alternatives has been steadily decreasing over the past five years. Those products include hexakis, amitraz, dicofol, chinomethionat, foliar spray oil, formetanate, and propargite.

The Applicant indicates that without adequate control of the mites economc losses expected could total over $5 million.

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 require that the Agency publish notice in the Federal Register and solicit public comment on an application involving the first food use of pesticide. Accordingly, interested persons may submit written views on this subject to the Field Operations Division at the address above.

The Agency, accordingly, will review and consider all comments received during the comment period.

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** EPA has received a specific exemption request from the Oregon Department of Agriculture (hereafter referred to as the "Applicant") for use of avermectin $B_1$ (AGRI-MEK 0.15 EC Miticide/Insecticide ™) to control two-spotted spider mites (*Tetranychus urticae*); yellow spider mites (*Eotetranychus carpini*); and McDaniel spider mites (*Tetranychus mcdanieli*) on 18,000 acres of pears in Oregon. Avermectin $B_1$ (CAS 63AB) contains a mixture of avermectins containing > 80% avermectin $B_{1a}$ (5-O-demethyl avermectin $A_{1a}$) and < 20% avermectin $B_{1b}$ (5-O-demethyl-25-de(1-methylpropyl-25-(1-methylethyl) avermectin $A_{1a}$). In accordance with 40 CFR 166.24, EPA is soliciting comment before making the decision whether or not to grant this specific exemption request.

**DATE:** Comments must be received on or before March 30, 1989.

**ADDRESS:** Three copies of written comments, bearing the identification notation "OPP-180807" should be submitted by mail to: Public Docket and Freedom of Information Section, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person, bring comments to: Rm. 246, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information (CBI)." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A Copy of the comment that does contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for inspection in Rm. 246 at the address given above from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

**FOR FURTHER INFORMATION CONTACT:** By mail: Libby Pemberton, Registration Division (H7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 716, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-1806).

**SUPPLEMENTARY INFORMATION:** Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at his discretion, exempt a State agency from any provisions of FIFRA if he determines that emergency conditions exist which require such exemption.

The Applicant has requested the Administrator to issue a specific exemption for the use of avermectin $B_1$, manufactured as AGRI-MEK 0.15 EC Miticide/Insecticide ™, by MSD AGVET, a division of Merck & Co., Inc., on pears in Oregon. No tolerances have been established for avermectin $B_1$ on any raw agricultural commodities.

Information in accordance with 40 CFR Part 166 was submitted as part of this request. The Applicant proposes ground applications applied at a rate of 10 to 20 ounces of product per acre per application. A maximum of two applications will be made per crop season. Treatment would not be allowed 7 days prior to harvest. Applications would be made from April 20, 1989 through September 1, 1989.

The Applicant indicates that during the past three years there has been an increasing and alarming mite resistance to registered miticides. Growers have been making four and five applications (either individual or combinations of pesticides using cyhexatin, hexakis, oxamyl, amitraz, dicofol, formetanate, chinomethionat, ethion and/or parathion).

The Applicant indicates that without adequate control of the mites economic losses expected would primarily come in the form of loss of fruit size, set, and quality. Losses in fruit size and lower fruit quality, without the requested acaricide this year, could total over $4.5 million.

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 require that the Agency publish notice in the Federal Register and solicit public comment on an application involving the first food use of a pesticide. Accordingly, interested persons may submit written views on this subject to the Field Operations Division at the address above.

The Agency, accordingly, will review and consider all comments received during the comment period.

Dated: February 27, 1989.

Anne E. Lindsay,

*Director, Registration Division, Office of Pesticide Programs.*

## Ciba-Geigy Corp.; Amended and Withdrawn Pesticide Petitions

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** This notice announces the filing of an amendment to pesticide petition (PP) 9F3706 and the withdrawal of PP 2F2618 by the Ciba-Geigy Corp.

**ADDRESS:** By mail, submit written comments to:

Public Docket and Freedom of Information Section, Field Operations Division (H-7502C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person, bring comments to: Rm. 246, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in this public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 246 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

**FOR FURTHER INFORMATION CONTACT:** By mail: Registration Division (TS-767C), Attention: Product Manager (PM) named in petition, Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person, contact the PM named in each petition at the following office/telephone number:

| Product manager | Office location/ telephone number | Address |
|---|---|---|
| Lois Rossi (PM 21). | Rm. 227, CM #2, 703-557-1900. | 1921 Jefferson Davis Hwy., Arlington, VA. Do. |
| Robert Taylor (PM 25). | Rm. 245, CM #2, 703-557-1800. | |

**SUPPLEMENTARY INFORMATION:** EPA has received from the Ciba-Geigy Corp., Agricultural Division, P.O. Box 18300, Greensboro, NC 27419, an amendment to PP 9F3706, which proposed to amend 40 CFR 180.434 by proposing to establish a regulation to permit the combined residues of the fungicide 1-[[2-(2,4-dichlorophenyl)-4-propyl-1,3-dioxolan-2-yl]methyl)-1H-1,2,4-triazole and its metabolites determined as 2,4-dichlorobenzoic acid, by adding the raw agricultural commodity grass seed screenings at 10 parts per million (ppm). The notice of the petition to amend 40 CFR Part 180 by establishing a regulation for the fungicide was originally published in the Federal Register of February 22, 1989 (54 FR 7597). (PM 21)

EPA also gives notice that the Geigy-Corp. has submitted a request to withdraw without prejudice PP 2F2618 for propazine on sorghum forage and fodder at 1.0 ppm; milk and eggs at 0.02 ppm; meat, fat, and meat byproducts of cattle, goats, hogs, horses, and sheep (excluding liver and kidney) at 0.05 ppm; liver and kidney of cattle, goats, hogs, horses, poultry, and sheep at 0.10 ppm; and sorghum grain and sorghum, sweet at 0.25 ppm. Notice of the petition appeared in the Federal Register of February 24, 1982 (47 FR 8087). Ciba-Geigy has recently voluntarily cancelled all its propazine-containing products. (PM 25).

**Authority:** 21 U.S.C. 346a.

Dated: February 27, 1989.

Anne E. Lindsay,

[OPP-180604; FRL-3536-4]

**Emergency Exemptions; Cyromazine, etc.**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** EPA has granted specific exemptions for the control of various pests to the seven States listed below. Seven crisis exemptions were also initiated, and two by the United States Department of Agriculture/APHIS. These exemptions, issued during the months of October, November, and December, are subject to application and timing restrictions and reporting requirements designed to protect the environment to the maximum extent possible. Information on these restrictions is available from the contact persons in EPA listed below.

**DATES:** See each specific or crisis exemption for its effective dates.

**FOR FURTHER INFORMATION CONTACT:** See each emergency exemption for the name of the contact person. The following information applies to all contact persons: By mail:

Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 716, CM#2, 1921 Jefferson Davis Highway, Arlington, VA. (703-557-1806).

**SUPPLEMENTARY INFORMATION:** EPA has granted specific exemptions to the:

1. Arizona Commission of Agriculture and Horticulture for the use of cyromazine on lettuce (head only) with rotation to alfalfa, sudan grass, and wheat to control leafminers; November 23, 1988, to March 31, 1989. (Gene Asbury)

2. California Department of Food and Agriculture for the use of triadimefon on artichokes to control powdery mildew; December 5, 1988, to October 31, 1989. (Libby Pemberton)

3. California Department of Food and Agriculture for the use metalaxyl on strawberries to control *Phytophthora fragariae* (red stele disease); November 23, 1988, to April 30, 1989. (Gene Asbury)

4. California Department of Food and Agriculture for the use of prometryn on parsley to control cheeseweed, burning nettle, and shepherd's purse; December 12, 1988, to May 31, 1989. (Libby Pemberton)

5. Florida Department of Agriculture and Consumer Services for the use of diquat dibromide on green peppers and tomatoes to control nightshade and parthenium; December 28, 1988, to August 31, 1989. (Libby Pemberton)

6. Florida Department of Agriculture and Consumer Services for the use of methyl bromine with chloropicrin on watermelons to control nematodes, fungi, and weeds; November 23, 1988, to April 1, 1989. (Robert Forrest)

7. Illinois Department of Agriculture for the use of sethoxydim on Canola (rape seed) to control volunteer grains and grasses; November 28, 1988, to May 1, 1989. (Jim Tompkins)

8. Montana Department of Agriculture for the use of chlorpyrifos on wheat to control Russian wheat aphid; November 23, 1988, to October 18, 1989. Montana had initiated a crisis exemption for this use. (Robert Forrest)

9. Puerto Rico Department of Agriculture for the use of fenvalerate on pineapples to control *Batrachedra comosae* moths; October 18, 1988, to September 30, 1989. (Gene Asbury)

10. Tennessee Department of Agriculture for the use of chlorothalonil on mushrooms to control dry bubble, stripe blast, and brown spot diseases; November 1, 1988, to October 31, 1989. (Gene Asbury)

Crisis exemptions were initiated by the:

1. California Department of Food and Agriculture on November 4, 1988, for the use of zinc phosphide on sugarbeets to control meadow mice. Since it was anticipated that this program would be needed for more than 15 days, California has requested a specific exemption to continue it. This program will last until April 30, 1989. (Libby Pemberton)

2. Florida Department of Agriculture and Consumer Services on November 22, 1988, for the use of cyromazine on carrots to control leafminers. This program has ended. (Gene Asbury)

3. Florida Department of Agriculture and Consumer Services on December 14, 1988, for the use of iprodione on cabbage to control white mold. Since it was anticipated that this program would be needed for more than 15 days, Florida has requested a specific exemption to continue it. The need for this program is expected to last until April 30, 1989. (Libby Pemberton)

4. Florida Department of Agriculture and Consumer Services on December 29, 1988, for the use of Tilt (propiconazole) on celery to control early blight. Since it was anticipated that this program would be needed for more than 15 days, Florida is expected to request a specific exemption to continue it. The need for this program is expected to last until January 1, 1990. (Jim Tompkins)

5. Oklahoma Department of Agriculture on November 23, 1988, for the use chlorpyrifos on wheat to control greenbugs. This program has ended. (Robert Forrest)

6. Texas Department of Agriculture on December 20, 1988, for the use of (S)-cyano(3-phenoxyphenyl)methyl-(S)-4-chloro-alpha-(1-methylethyl) benzeneacetate on kale, kohlrabi, and mustard greens to control cabbage loopers. Since it was anticipated that this program would be needed for more than 15 days, Texas has requested a specific exemption to continue it. The need for this program is expected to last until November 30, 1989. (Libby Pemberton)

7. Washington Department of Agriculture on October 12, 1988, for the use of chlorpyrifos on wheat to control Russian wheat aphid. This program has ended. (Robert Forrest)

8. United States Department of Agriculture/APHIS on December 22, 1988, for the use of methyl bromide on imported pineapples to control various plant pests. Since it was anticipated that this program would be needed for more than 15 days, USDA/APHIS is expected to request a specific exemption to continue it. The need for this program is expected to last until December 22, 1991. (Libby Pemberton)

9. United States Department of Agriculture/APHIS on November 10, 1988, for the use of ethylene oxide on hemp seed imported as wild bird feed to control plant diseases. This program has ended. (Jim Tompkins)

BILLING CODE 6560-50-M

[OPP-180610; FRL-3537-5]

**Receipt of Application for Specific Exemption to Use Oxyfluorfen; Solicitation of Public Comment**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** EPA has received a specific exemption request from the Illinois Department of Agriculture (hereafter referred to as "Applicant") for use of the herbicide oxyfluorfen (goal) to control broadleaf weeds in horseradish in Illinois. EPA is soliciting comment before making the decision whether or not to grant this specific exemption request.

**DATE:** Comments must be received on or before March 30, 1989.

**ADDRESS:** Three copies of written comments, bearing the identification notation "OPP-180610," should be submitted by mail to: Public Docket and Freedom of Information Section, Field Operations Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person, bring comments to: Rm. 236, Crystal Mall 2 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for inspection in Rm. 236 at the address given above from 8 a.m. to 4 p.m., Monday through Friday excluding legal holidays.

**FOR FURTHER INFORMATION CONTACT:** By mail: Gene Asbury, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 716C, Crystal Mall 2 1921 Jefferson Davis Highway, Arlington, VA. (703-557-1806).

**SUPPLEMENTARY INFORMATION:** Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at his discretion, exempt a State agency from any registration provision of FIFRA if he determines that emergency conditions exist which require such exemption.

The Applicant has requested the Administrator to issue a specific exemption to permit the use of the herbicide oxyfluorfen (CAS 42874 03 3) available as Goal 1.6E, EPA Reg. No. 707-174, to control broadleaf weeds in horseradish. Information in accordance with 40 CFR Part 166 was submitted as part of this request.

Illinois has requested authorization to apply 2.5 pints of Goal 1.6E herbicide (0.5 pounds active ingredient) per acre as a ground spray application on 1,000 acres of horseradish in Madison, Monroe and St. Clair counties. Goal 1.6E is a selective herbicide recommended for preemergence control of certain broadleaf weeds. Goal 1.6E will be applied in a minimum of 40 gallons of water per acre.

According to the Applicant, weed control in horseradish fields in Illinois is mainly limited to mechanical means. The rising costs of fuel and labor in the past years has made the use of cultivation increasingly impractical. Five to ten cultivations at $13,000/acre/operation costs the grower $65 to $130/season for between row weed control and three hand hoeings at $100/acre for weed control within the row. Net savings could amount to between $317,600 to $382,000 with proper weed control.

Oxyfluorfen was referred to Special Review in January of 1980 because pesticide products containing oxyfluorfen as an active ingredient were shown to be contaminated with perchloroethylene (PCE), a liver carcinogen in B6C3F1 mice. The Special Review process was completed on June 23, 1982, and the decision was made to continue registration of the herbicide subject to certain restrictions (on PCE) pertaining to formulation of the product (47 FR 27118).

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 require publication of a notice in the Federal Register of receipt of an application for a specific exemption proposing use of a pesticide which contains an active ingredient which has been the subject of a Special Review and is intended for a use that could pose a risk similar to the risk posed by any use of a pesticide which is or has been the subject of a Special Review (40 CFR 166.24(a)(5)).

Accordingly, interested persons may submit written views on this subject to the Field Operations Division (TS-757C), at the address given above. The Agency will review and consider all comments received during the comment period in determining whether to issue the emergency exemption requested by the Illinois Department of Agriculture.

**Dated:** March 3, 1989.

**Anne E. Lindsay,**

*Director Registration Division, Office of Pesticide Programs.*

[FR Doc. 89-5978 Filed 3-14-89; 8:45 am]

BILLING CODE 6560-50

[OPP-240064; FRL-3536-2]

**State Registrations of Pesticides**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** EPA has received notices of registration of pesticides to meet special local needs under section 24(c) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, from 30 States. A registration issued under this section of FIFRA shall not be effective for more than 90 days if the Administrator disapproves the registration or finds it to be invalid within that period. If the Administrator disapproves a registration or finds it to be invalid after 90 days, a notice giving that information will be published in the Federal Register.

**DATE:** The last entry for each item is the date the State registration of that product became effective.

**FOR FURTHER INFORMATION CONTACT:** Owen. F. Beeder, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 716A, CM #2, 1921 Jefferson Davis Highway, Arlington, VA. 22202 (703)-557-7893.

**SUPPLEMENTARY INFORMATION:** This notice only lists the section 24(c) applications submitted to the Agency. The Agency has 90 days to approve or disapprove each application listed in this notice. Applications that are not approved are returned to the appropriate State for action. Most of the registrations listed below were received by the EPA in September through December of 1988. Receipts of State registrations will be published periodically. Of the following registrations, none involve a changed-use pattern (CUP). The term "changed-use pattern" is defined in 40 CFR 162.3(k) as a significant change from a use pattern approved in connection with the registration of a pesticide product. Examples of significant changes include, but are not limited to, changes from a nonfood to food use, outdoor to indoor use, ground to aerial application, terrestrial to aquatic use, and nondomestic to domestic use.

EPA SLN No. ID 88 0010. E.I. du Pont de Nemours & Co. Registrations is for Du Pont Benlate 50 DF Fungicide to be used on sweet corn for seed treatment control of seed-borne diseases caused by Penicillium sp. Aspergillus. October 28, 1988.

**Indiana**

EPA SLN No. IN 88 0011. Aceto Agricultural Chemicals Corp. Registration is for Dimethogon 25 PW Dimethoate Insecticide to be used on soybeans to control two-spotted spider mites. August 2, 1988.

EPA SLN No. IN 88 0013. Platte Chemical Co., Inc. Registration is for Clean Crop Diazinon 500–AG to be used on soybeans to control spider mites. August 3, 1988.

EPA SLN No. IN 88 0014. Drexel Chemical Co. Registration is for Drexel Diazinon Insecticide to be used on soybeans to control spider mites. August 4, 1988.

EPA SLN No. IN 88 0015. Agricultural Division, Ciba-Geigy Corp. Registration is for Triumph 4E Insecticide to be used on tees, greens, and aprons of golf courses and on sod farms to control various insects. August 10, 1988.

EPA SLN No. IN 88 0016. Gowan Co. Registration is for Prokil Dimethoate E267 to be used on soybeans to control spider mites. August 11, 1988.

EPA SLN No. IN 88 0017. FMC Corp. Registration is for Talstar 10 WP to be used on ornamental trees, shrubs, plants, and flowers grown in the field to control aphids, armyworms, and several other pests. September 19, 1988.

**Kansas**

EPA SLN No. KS 88 0001. FMC Corp. Ag. Chemical Group. Registration is for Furadan 4 Flowable Insecticide/Nematicide to be used on sorghum to control chinchbugs and greenbugs. April 20, 1988.

EPA SLN No. KS 88 0002. FMC Corp. Ag. Chemical Group. Registration is for Furadan 4 Flowable Insecticide/Nematicide to be used on sorghum to control chinchbugs and greenbugs. April 27, 1988.

EPA SLN No. KS 88 0003. Uniroyal Chemical Co., Inc. Registration is for Comite to be used on corn to control mites. June 17, 1988.

**Louisiana**

EPA SLN No. LA 88 0006. Fermenta Plant Protection Co. Registration is for Bueno 6 to be used on cotton to control postemergence weeds. September 7, 1988.

EPA SLN No. LA 88 0009. Fermenta Plant Protection Co. Registration is for Arsonate Liquid to be used on cotton to control postemergence weeds. September 7, 1988.

EPA SLN No. LA 88 0010. Fermenta Plant Protection Co. Registration is for DSMA Liquid to be used on cotton to control postemergence weeds. September 7, 1988.

EPA SLN No. LA 88 0011. Coopers Animal Health, Inc. Registration is for Saber Insecticide Ear Tags to be used on beef and nonlactating dairy cattle and calves to control horn flies and face flies. September 12, 1988.

**Maine**

EPA SLN No. ME 88 0004. FMC Corp. Registration is for Furadan 4F Insecticide/Nematicide to be used on strawberries to control root weevils. September 22, 1988.

**Michigan**

EPA SLN No. MI 88 0011. Chevron Chemical Co. Registration is for Ortho Diquat H/A Herbicide to be used on potatoes for desiccation of potato plants to facilitate harvest. October 27, 1988.

**Minnesota**

EPA SLN No. MN 88 0001. Metropolitan Mosquito Control District, St. Paul. Registration is for Zoecon Altosid Liquid Larvicide Mosquito Growth Regulator to be used on field sites as larvicide growth regulator for control of mosquitoes. June 30, 1988.

**Missouri**

EPA SLN No. MO 88 0006. FMC Corp., Agricultural Chemical Group. Registration is for Command 4 EC Herbicide to be used on soybeans to control selected weed species applied preemergence. November 28, 1988.

**Montana**

EPA SLN No. MT 88 0002. J.T. Eaton & Co., Inc. Registration is for Eaton's Answer for the Control of Pocket Gophers to be used on rangeland, cropland, forest, and noncrop areas to control pocket gophers. December 28, 1988.

VOL 54 ISS 49 MR 15 1989 UMI

**Nevada**

EPA SLN No. NV 88 0008. Hopkins Agricultural Chemical Co. Registration is for Ramik Green to be used inside and outside of buildings, loading areas, under granaries, garbage dumps, etc. to control rats. September 16, 1988.

EPA SLN No. NV 88 0009. Fermenta Plant Protection Co. Registration is for Dacthal W-75 to be used on alfalfa grown for seed to control dodder. November 3, 1988.

EPA SLN No. NV 88 0010. J.T. Eaton & Co., Inc. Registration is for Eaton's Answer for the Control of Pocket Gophers to be used on rangeland, cropland, forest, and noncrop areas to control pocket gophers. November 18, 1988.

**New Hampshire**

EPA SLN No. NH 88 0002. FMC Corp. Agricultural Chemical Group. Registration is for Furadan 4 Flowable to be used on alfalfa new-seedling establishments to control alfalfa blotch, leafminers, and potato leafhoppers. November 8, 1988.

**New Jersey**

EPA SLN No. NJ 88 0005. Dow Chemical Co. Agricultural Products Dept. Registration is for Dursban TC to be used on plenum-type structures to control termites. September 16, 1988.

EPA SLN No. NJ 88 0006. Bellemead Develoment Corp. Registration is for Rodeo to be used on meadowlands to control phragmites. October 20, 1988.

EPA SLN No. NJ 88 0007. FMC Corp. Registration is for Furadan 15 Granules to be used on alfalfa to control nematodes, potato leafhoppers, and several other pests. October 28, 1988.

EPA SLN No. NJ 88 0006. FMC Corp. Registration is for Furadan 15 Granules to be used on nonbearing fruit trees to control nematodes. October 28, 1988.

**North Carolina**

EPA SLN No. NC 88 0008. Nor-Am Chemical Co. Registration is for Carzol SP to be used on greenhouse-grown ornamental plants to control thrips. September 15, 1988.

**North Dakota**

EPA SLN No. NC 88 0002. Coopers Animal Health, Inc. Registration is for Sabef Insecticide Ear Tags to be used on beef and nonlactating dairy cattle and calves. October 5, 1988.

**Ohio**

EPA SLN No. OH 88 0010. Ciba-Geigy Agricultural Div. Registration is for Triumph 4E Insecticide to be used on lawns and golf courses and sod farms to control several pests. December 20, 1988.

**South Dakota**

EPA SLN No. SD 88 0002. Chempar, a Div. of Lipha Chemicals. Registration is for Rozol Pocket Gopher Bait to be used on rangelands, pastures, golf courses, rights-of-way and other noncrop areas. October 28, 1988.

**Tennessee**

EPA SLN No. TN 88 0006. Rhone Poulenc Ag Co. Registration is for Temik Brand 15G Aldicarb Pesticide to be used on soybeans to control nematodes. October 4, 1988.

EPA SLN No. TN 88 0007. Rhone Poulenc Ag Co. Registration is for Weedone 2,4-DP to be used on loblolly pine plantations to control certain species of hardwood brush and broadleaf weeds. October 4, 1988.

EPA SLN No. TN 88 0008. Rhone Poulenc Ag Co. Registration is for Weedone 2,4-DP to be used on forest sites in preparation to control oaks, elm, cherry, willow, and other similar species before planting seedlings. October 4, 1988.

EPA SLN No. TN 88 0009. Fairfield American Corp. Registration is for Permanone Tick Repellent to be used on domestic animals to control mosquitoes, ticks, and chiggers. October 28, 1988.

EPA SLN No. TN 88 0010. Beekeepers of Tennessee. Registration is for Menthol (100%) to be used on over-wintering honey bee hives to control tracheal mites. December 21, 1988.

EPA SLN No. TN 88 0011. Ed Heathman and Frank Heathman. Registration is for Menthol Crystals to be used on over-wintering honey bee hives to control tracheal mites. December 21, 1988.

**Texas**

EPA SLN No. TX 88 0001. Ciba-Geigy Corp., Agricultural Div. Registration is for Tilt Fungicide to be used on corn grown for seed to control corn leaf blight. September 15, 1988.

EPA SLN No. TX 88 0002. Wilbur Ellis Co. Registration is for Wilbur-Ellis Lorsban 50 SL to be used on stored planting seed to control various insect pests. September 26, 1988.

EPA SLN No. TX 88 0003. Pennwalt Corp. Registration is for Decco 240 Liquid Chlorine to be used on fruit and vegetable packing houses for sanitation. October 21, 1988.

EPA SLN No. TX 88 0006. E.I. du Pont de Nemours & Co. Registration is for Du Pont Sana XL Insecticide 0.66 EC to be used on cotton to control several pests. December 28, 1988.

EPA SLN No. TX 88 0007. E.I. du Pont de Nemours & Co. Registration is for Du Pont Sana XL Insecticide 0.66 EC to be used on cotton to control several pests. December 28, 1988.

**Utah**

EPA SLN No. UT 88 0004. Fermenta Plant Protection Co. Registration is for Dacthal W-75 to be used on alfalfa grown for seed to control dodder. November 3, 1988.

**Virginia**

EPA SLN No. VA 88 0007. Virginia Department of Agriculture and Consumer Service. Registration is for Methanol 100 to be used on honey bee colonies to control tracheal mites. November 16, 1988.

**Washington**

EPA SLN No. WA 88 0011. Sandoz Crop Protection Corp. Registration is for Spur 22 EW Insecticide to be used on alfalfa grown for seed only to control several pests. July 7, 1988.

EPA SLN No. WA 88 0012. FMC Corp. Agricultural Chemical Group. Registration is for Thiodan 3 EC to be used on seeded alfalfa to control spotted alfalfa aphids. June 21, 1988.

EPA SLN No. WA 88 0022. BASF Corp. Registration is for Poast Herbicide to be used on cabbage, carrots, and red beets for postemergence control of watergrass and other grass weeds. September 20, 1988.

EPA SLN No. WA 88 0023. Fermenta Plant Protection Co. Registration is for Daconil 2787 Flowable Fungicide to be used on nonbearing and flowering ornamental fruit trees. October 6, 1988.

EPA SLN No. WA 88 0024. Aceto Agricultural Chemicals Corp. Registration is for Dimethoate 267 E.C. to be used on wheat to control aphids and mites. October 18, 1988.

EPA SLN No. WA 88 0025. Wilbur-Ellis Co. Registration is for Dimethoate 267 to be used on wheat to control aphids. October 25, 1988.

EPA SLN No. WA 88 0026. American Cyanamid Co. Registration is for Prowl Herbicide to be used on alfalfa grown for seed to control several weeds. December 8, 1988.

**Wyoming**

EPA SLN No. WY 88 0006. Hopkins Agricultural Chemical Co. Registration is for Ramik Green to be used on various locations in the State to control ground squirrels. September 20, 1988.

EPA SLN No. WY 88 0008. Coopers Animal Health, Inc. Registration is for Sabef Insecticide Ear Tags to be used on beef and nonlactating dairy cattle to control horn and face flies. October 17, 1988.

EPA SLN No. WY 88 0009. Gustafson, Inc. Registration is for Gustafson Flo-Pro IMZ Flowable Systemic Fungicide to be used on wheat and barley to control common root rot and barley leaf stripe. September 22, 1988. (Sec. 24, as amended, 92 Stat. 835 (7 U.S.C. 136).)

Dated: February 24, 1989.

## FEDERAL COMMUNICATIONS COMMISSION

**[Report No.1769]**

### Petitions for Reconsideration and Clarification and Applications for Review of Actions in Rule Making Proceedings

March 9, 1989.

Petitions for reconsideration and clarification and applications for review have been filed in the Commission rule making proceeding listed in this Public Notice and published pursuant to 47 CFR 1.429(e). The full text of these documents are available for viewing and copying in Room 239, 1919 M Street, NW., Washington, DC, or may be purchased from the Commission's copy contractor International Transcription Service (202-875-3800). Oppositions to these petitions and applications must be filed within 15 days of the date of public notice of the petitions and applications in the **Federal Register**. See § 1.4(b)(1) of the Commission's rules (47 CFR 1.4(b)(1)). Replies to an opposition must be filed within 10 days after the time for filing oppositions has expired.

*Subject:* Amendment of § 73.1206: Broadcast of Telephone Conversations. (MM Docket No. 85-37, RM's 2564, 2571 & 4680) Number of petitions received: 2

*Subject:* Regulatory Policies and International Telecommunications. (CC Docket No. 88-494) Number of petitions received: 1

*Subject:* Amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations. (Bastrop, Louisiana) (MM Docket No. 878-242, RM-5604) Number of petitions received: 1

*Subject:* Amendment of Parts 2 and 22 of the Commission's Rules and Permit Liberalization of Technology and Auxiliary Service Offerings in the Domestic Public Cellular Radio Telecommunications Service for Rural Cellular Service. (Gen Docket No. 87-390) Number of petitions received: 1

*Subject:* Amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations. (Springdale, Arkansas, Carthage, Aurora and Willard, Missouri. (MM Docket No. 87-474, RM's 5855, 5878 & 5915) Number of petitions received: 2

*Subject:* Amendment of Parts 13 and 80 of the Rules concerning ship radio officer qualifying service endorsements. (Gen Docket No. 88-37) Number of petitions received: 1

*Subject:* Amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations. (Evans, Martinez and Warrenton, Georgia) (MM Docket No. 88-51, RM's 6076 & 6265) Number of petitions received: 1

### Applications for Review Filed

*Subject:* Amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations. (Ponte Verde Beach, Florida) (MM Docket No. 85-376, RM's 4988 & 5378) Number of applications received: 1

## FEDERAL EMERGENCY MANAGEMENT AGENCY

**[FEMA-821-DR]**

### Amendment to Notice of a Major Disaster Declaration; Kentucky

**AGENCY:** Federal Emergency Management Agency.

**ACTION:** Notice.

**SUMMARY:** This notice amends the notice of a major disaster for the Commonwealth of Kentucky (FEMA-821-DR), dated February 24, 1989, and related determinations.

**DATED:** March 8, 1989.

**FOR FURTHER INFORMATION CONTACT:** Neva K. Elliott, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472 (202) 646-3614.

**NOTICE:** The notice of a major disaster for the Commonwealth of Kentucky, dated February 24, 1989, is hereby amended to include the following areas among those areas determined to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of February 24, 1989:

The counties of Caldwell, Carlisle, Christian, Graves, Marshall, McCracken, and Trigg for Individual Assistance and Public Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance.)

## FEDERAL MARITIME COMMISSION

### Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

*Agreement No.:* 224-200096-003.

*Title:* North Carolina Terminal Agreement.

*Parties:*

North Carolina State Ports Authority
Senator Linie (USA) Inc.

*Synopsis:* The Agreement extends the term of the basic agreement for an additional two year period.

By Order of the Federal Maritime Commission.

**Joseph C. Polking,**

*Secretary.*

Dated: March 10, 1989.

**[Docket No. 89-07]**

### Inquiry Into Laws, Regulations and Policies of the Government of Ecuador Affecting Shipping in the United States/Ecuador Trade

**AGENCY:** Federal Maritime Commission.

**ACTION:** Notice of inquiry.

**SUMMARY:** The Federal Maritime Commission in response to information received from the Overseas Enterprises, Inc., a U.S.-owned carrier, and the Department of State, regarding the effect

VOL 54 ISS 49 MR 15 1989 UMI

of laws, regulations and policies of the Government of Ecuador on shipping conditions in the United States/Ecuador trade, is issuing this Notice of Inquiry to provide interested parties an opportunity to submit comments on shipping conditions in that trade. These comments will assist the Commission in determining whether issuance of a countervailing rule pursuant to section 19(1)(b) of the Merchant Marine Act, 1920, is warranted.

**DATE:** Comments due on or before April 14, 1989.

**ADDRESS:** Comments (Original and 15 copies) to: Joseph C. Polking, Secretary, Federal Maritime Commission, 1100 L Street NW., Washington, DC 20573, (202) 523-5725.

**FOR FURTHER INFORMATION CONTACT:** Robert D. Bourgoin, General Counsel, Federal Maritime Commission, 1100 L Street NW., Washington, DC 20573, (202) 523-5740.

**SUPPLEMENTARY INFORMATION:** On December 22, 1988, the Department of State ("DOS") transmitted to the Federal Maritime Commission ("FMC" or "Commission") a letter from Overseas Enterprises, Inc. ("OEI"), a U.S.-owned company, wherein OEI advises that it has been unable to reestablish a liquid bulk service in the U.S./Ecuador trade ("Trade") because of the Government of Ecuador's ("GOE") requirement that OEI employ U.S.-flag vessels in such a service. OEI contends that such a requirement arises from GOE cargo reservation laws which are applied only in the trade between the United States and Ecuador. OEI concludes that the cargo reservation laws of Ecuador have created conditions unfavorable to shipping in the Trade.

By letter of January 19, 1989, Commission staff requested that DOS advise the Commission of any efforts being made by the U.S. Embassy in Quito to reach a satisfactory resolution to the situation alleged by OEI and any other information that DOS may have regarding OEI's allegations. On February 8, 1989, DOS responded to the Commission's January 19 letter. This response included correspondence from OEI and the GOE's Director General of the Merchant Marine ("DIGMER"), as well as a copy of Resolution No. 012/87, a cargo reservation law. DOS reports that its involvement began in October 1987, when OEI initially requested assistance. DOS advises that the U.S. Embassy in Quito and the Consulate General in Guayaquil have raised the issue of OEI a number of times with GOE authorities in an effort to resolve the situation through diplomatic channels. It reports, however, that no such resolution has been reached and that it continues to seek a satisfactory resolution and will report further to the Commission on its efforts.

DOS states that OEI ceased operations in the Trade in 1983 when GOE laws allegedly made OEI participation impossible. Resolution No. 20/83 of 1983 reserved 50 percent of Ecuadorian imports of solid and liquid bulk cargo for Ecuadorian-flag vessels or foreign-flag vessels chartered by Ecuadorian shipping companies, and 50 percent for vessels flying the flag of the country of origin of the cargo. GOE Resolution No. 012/87 of March 1987, supercedes the 1983 resolution. Resolution No. 012/87 reserves solid and liquid bulk import cargo from the United States to Ecuador for Ecuadorian-flag vessels belonging to Ecuadorian shipping companies, or foreign vessels chartered by Ecuadorian shipping companies, or vessels flying the flag of the United States. The stated rationale in Resolution No. 012/87 for narrowing the application of the cargo reservation law solely to the trade between the United States and Ecuador is that 88 percent of Ecuador's imported bulk cargo originates "in the Gulf of the United States."

DOS and OEI communications indicate that OEI was informed by DIGMER that it could not operate a liquid bulk service in the U.S. Gulf to Ecuador trade unless it operates U.S.-flag vessels. OEI advises that the U.S. merchant marine does not have any vessels of the size and capabilities necessary to offer such a service in the Trade. OEI alleges, therefore, that the GOE has created a situation wherein an Ecuadorian-flag carrier, Maritima Transligra, has been given a monopoly position in the liquid bulk trade. Further, it is reported that OEI continues to receive inquiries from shippers interested in employing OEI services in the Trade, but the OEI has been unable to provide the service requested due to its inability to obtain traffic rights from DIGMER. DOS states that the allegations made by OEI have serious implications for U.S./Ecuador relations as well as for U.S. shipping policy.

OEI's allegations raise possible issues under section 19(1)(b) of the Merchant Marine Act, 1920, 46 U.S.C. app. 876(1)(b) ("Section 19").[1] On its face, Resolution No. 012/87 appears to restrict access of third-flag carriers to the Trade as well as limit the ability of a U.S. company to employ non-U.S.-flag vessels in the Trade. Further, the Resolution appears to restrict the ability of shippers to select the carrier of their choice. In order to assist the Commission in determining whether issuance of a countervailing rule pursuant to section 19 is warranted, interested parties are requested to submit information, comments and data concerning the current status and effects of GOE laws, rules and policies on the operations of carriers currently operating or proposing to operate in the Trade and on the ability of shippers to employ their preferred carriers.

Comments in response to this Notice of Inquiry need not necessarily be limited to the effect of specified GOE laws, rules and policies on solid or liquid bulk services. The Commission is interested in obtaining any and all information relating to any GOE laws and policies which may adversely affect shipping services in the Trade.

By letter the Commission is also requesting that the Department of State inform the Commission of its most recent efforts and prospects for a diplomatic resolution of the situation.

By the Commission.

**Joseph C. Polking,**

*Secretary.*

[FR Doc. 89-5907 Filed 3-14-89; 8:45 am]

BILLING CODE 6730-01-M

[1] Section 19(1)(b) authorizes and directs the Federal Maritime Commission to "make rules and regulations affecting shipping in the foreign trade not in conflict with law in order to adjust or meet general or special conditions unfavorable to shipping in the foreign trade, * * * which arise out of or result from foreign laws, rules, or regulations * * *."

## FEDERAL RESERVE SYSTEM

**[Docket No. R-0661]**

### Risk on Automated Clearing House Transactions; Clarification and Extension of Comment Period

**AGENCY:** Board of Governors of the Federal Reserve System.

**ACTION:** Proposed policy statement; clarification and extension of comment period.

**SUMMARY:** On March 2, 1989, the Board of Governors of the Federal Reserve System ("Board") published for comment several changes in the way that Federal Reserve Banks treat automated clearing house ("ACH") transactions. (54 FR 8822). Comments were due by April 3, 1989. The Board has extended the deadline for comments an additional 60 days, so the new deadline is June 2, 1989. In addition, the proposed policy statement is clarified by specifying that the proposed changes only apply to commercial ACH transfers, not to Treasury payments.

**DATE:** Comments must be received by June 2, 1989.

**ADDRESS:** Comments, which should refer to Docket No. R-0661, may be mailed to the Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW., Washington, DC 20551, to the attention of Mr. William W. Wiles, Secretary, or delivered to room B-2223 between 8:45 a.m. and 5:15 p.m. Comments may be inspected in room B-1122 between 9:00 a.m. and 5:00 p.m., except as provided in § 261.8 of the Board's Rules Regarding Availablity of Information, 12 CFR 261.8.

**FOR FURTHER INFORMATION CONTACT:** Florence Young, Adviser, Division of Federal Reserve Bank Operations (202/452-3955); Oliver I. Ireland, Associate General Counsel (202/452-3625), or Elaine M. Boutilier, Senior Attorney, Legal Division (202/452-2418), Board of Governors of the Federal Reserve System, Washington, DC 20551. For the hearing impaired only, Telecommunications Device for the Deaf ("TDD"), Earneatine Hill or Dorothea Thompson (202/452-3544).

**SUPPLEMENTARY INFORMATION:** On March 2, 1989, the Board requested comments on proposals related to reducing risks related to ACH payments. These proposals included specifying the finality for ACH payments and procedures for reversing entries if finality is not to be granted. In response to a request, the Secretary of the Board, acting pursuant to delegated authority, 12 CFR 265.2(a)(6), has extended the comment period for 60 days.

In addition, it is clarified that these proposed changes to the treatment of ACH transactions apply only to commercial ACH transactions; they do not apply to any payments that are made pursuant to regulations of the U.S. Treasury Department, such as direct deposit of Social Security payments.

By order of the Secretary of the Board, acting pursuant to delegated authority, 12 CFR 265.2(a)(6), March 7, 1989.

**William W. Wiles,**

*Secretary of the Board.*

[FR Doc. 89-5903 Filed 3-14-89; 8:45 am]

BILLING CODE 6210-01-M

### First United Corporation et al.; Applications To Engage de Novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 5, 1989.

**A. Federal Reserve Bank of Richmond** (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *First United Corporation*, Oakland, Maryland; to engage *de novo* through its subsidiary, Oakfirst Life Insurance Corporation, Phoenix, Arizona, in underwriting as reinsurer credit life and credit accident and health insurance issued by Security of America Life Insurance Company in connection with extensions of credit made by Applicant's subsidiary bank, First United National Bank & Trust, Oakland, Maryland, pursuant to § 225.25(b)(8) of the Board's Regulation Y. These activities will be conducted in Garrett and Allegany Counties, Maryland.

**B. Federal Reserve Bank of St. Louis** (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Farmers Capital Bank Corporation*, Frankfort, Kentucky; to engage *de novo* through its subsidiary, Money One Credit Corporation, Frankfort, Kentucky, in the consumer finance business pursuant to § 225.25(b)(1) of the Board's Regulation Y. These activities will be conducted in the State of Kentucky.

**C. Federal Reserve Bank of Dallas** (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *PSB Financial Corporation*, Many, Louisiana; to engage *de novo* in providing individuals, businesses, and nonprofit organizations with tax planning and preparation services pursuant to § 225.25(b)(21) of the Board's Regulation Y. These activities will be conducted in West Louisiana and East Texas. Comments on this application must be received by March 31, 1989.

## GENERAL ACCOUNTING OFFICE

### Exemptions of Remote or Inconsequential Financial Interests Under 18 U.S.C. 208(b)

**AGENCY:** General Accounting Office

**ACTION:** Notice of Exemptions Adopted Under 18 U.S.C. 208(b)

Federal government employees are prohibited by 18 U.S.C. 208(b) (1982) from participating in any particular matter affecting their financial interests. Section 208(b) permits the Comptroller General to exempt from the prohibition financial interests which are too remote or too inconsequential to affect the integrity of the services expected of General Accounting Office employees who hold such interests. Section 208(b)(2) requires that exempted financial interests be published in the **Federal Register**.

In accordance with the provisions of section 208(b)(2), the Comptroller General has determined that the following financial interests are too remote or too inconsequential to affect the integrity of GAO employees' services.

a. Securities issued by the United States Government or agencies thereof.

b. Policy holdings in an insurance company.

c. Deposits in a bank, savings and loan association, credit union or similar financial institution.

d. Shares of a widely held, diversified mutual fund and the holding of such fund, provided the employee has no role in investment decisions made by the

VOL 54 ISS 49 MR 15 1989 UMI

fund. The term mutual fund will be broadly construed to include any publicly traded pooling arrangement used for the purpose of diversification of investments, such as tax exempt bond funds. A fund is widely held if the holdings of an employee, his spouse, minor children, partners and organizations in which he serves as an officer, director, trustee or employee or in which he is negotiating for employment, constitute less than 1 percent of the number of investors and hold less than 1 percent of the assets of the fund. A fund is diversified if no more that 20 percent of its investments are in any single industry.

e. The investment interests of an organization exempt from taxation under 26 U.S.C. 501(c)(3), provided the employee has no role in making investment decisions for that organization. This exemption applies where an employee is an officer, director, trustee or employee of an organization such as a church or university, or arrangement concerning future employment with such an organization.

**FOR FURTHER INFORMATION CONTACT:** Frances McCoy, Management-Employee Relations, GAO Office of Personnel, (202) 275-3889.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Centers for Disease Control

### Program Announcement Number 907; For Development and Initiation of a National Laboratory Training Network for State Laboratories

#### Introduction

The Centers for Disease Control (CDC) announces the availability of funds in Fiscal Year 1989 for a cooperative agreement with the Association of State and Territorial Public Health Laboratory Directors (ASTPHLD) to develop and implement a National Laboratory Training Network for laboratorians within the States.

#### Authority

This project is authorized by section 317(k)(3) of the Public Health Service Act, as amended.

#### Eligible Applicants

Assistance will be provided only to the Association of State and Territorial Public Health Laboratory Directors (ASTPHLD) for this project. ASTPHLD is an organization that represents all the public health laboratory officials of each State and Territory. By working through its own membership, the ASTPHLD Training Committee, other affiliate organizations, and the Public Health Foundation, ASTPHLD has developed a unique knowledge and understanding of the needs and operations of State health laboratory agencies. The members of ASTPHLD have already gained an enormous wealth of experience in information systems and laboratory training and have identified laboratory training programs as a priority need for State health agencies. As an organization, ASTPHLD has direct, familiar, and certain access to its own membership of chief public health laboratory officials, and therefore, has the capacity to meet the objectives of this agreement in a timely, and forthright manner.

#### Availability of Funds

It is expected that up to $1,000,000 will be available during FY 1989 to support this cooperative agreement for a 12-month budget period. Estimated cost of the remaining years of this 5-year project will be $1,000,000 each. Continuation awards within the 5-year project period, will be made on the basis of satisfactory progress in meeting project objectives and is subject to the availability of funds. The funding estimate outlined above may vary and is subject to change.

#### Purpose

The purposed cooperative agreement is intended to address the need to maintain effective laboratory information and management systems and for State health agencies to practice effective laboratory training.

The objective is to establish a National Laboratory Training Network consisting of seven Area Laboratory Training Alliances. Each area resource office will consist of space for staff and an area library to house training products available for continuous use within the area. There will be an area resource director and a CDC training advisor to assist State training coordinators in the delivery, assessment and evaluation of training activities; promote interstate communication; and serve ASTPHLD in training related activities.

The field training efforts will include HIV/retrovirus test procedures. Training may occur at any site within any State in the region. States will work together to conduct area training needs assessments (TNA) to guide the development of training products. After the TNA is conducted, the area resource director will work with the State training coordinator to identify resources and utilize available training services to meet the need in their States.

#### Program Requirements

*1. ASTPHLD Activities*

a. Maintain and provide to the public health laboratory community management and information systems. These systems include, but are not limited to, work measurement standards, standard cost accounting methodology, consolidated annual reports of State and territorial public health laboratory activities, annual laboratory work force profiles, personnel classification guides, and data processing systems.

b. Develop an implementation plan for the National Laboratory Training Network, selecting sites for resource offices and providing oversight through the ASTPHLD.

c. Develop a mechanism for submitting initiatives for the seven area laboratory training alliances (ALTA). Develop guidelines for ALTA resource office operations.

d. Select seven Area Resource Directors who will administer the Area Resource Office and serve as the focus for communication among CDC, States within area alliances, ASTPHLD, and the National Laboratory Training Network Office (ASTPHLD headquarters). These Area Resource Directors will also assist in conducting and analyzing training needs assessments, develop and maintain training resource roster of content specialists and training products, coordinate the area alliance training calendar, promote area development of training products, and maintain a resource library.

e. Maintain a forum for effective exchange of information and methodologies which prove to be effective in promoting the transfer of laboratory technology and the improvement of laboratory services in the U.S.

f. Evaluate the effectiveness of the National Laboratory Training Network in meeting the training needs of the Nation's laboratories.

g. Develop a plan to establish and strengthen new Federal, state and local health partnerships to address high priority laboratory issues and national laboratory objectives.

*2. CDC Activities*

a. Provide a forum for communication, coordination, collaboration and consensus development among the participants in the National Laboratory Training Network as well as a similar forum for a national laboratory partnership.

b. Serve as a collaborator in the design, development, promotion, and evaluation of laboratory training materials.

c. Provide the interface between the educational and technical experts who develop and deliver laboratory training.

d. Compile and maintain national laboratory training resource guides and national training calendars.

e. Collaborate in the development and delivery of train-the-trainer workshops and seminars.

f. Collaborate in the evaluation of the overall effectiveness of the National Laboratory Training Network.

g. Collaborate in establishment of a Federal/State/Private Partnership to promote quality laboratory practice to achieve national health objectives.

#### Review and Evaluation Criteria

The application will be reviewed and evaluated on the following:

A. Extent to which the applicant understands the requirements, problems, objectives, complexities, and interactions required of this cooperative agreement;

B. Degree to which proposed objectives are clearly stated, realistic, measurable, time-phased, and related to the purpose of this project;

C. Degree to which the applicant provides evidence of an ability to carry out the proposed project and the extent to which the applicant institution documents demonstrated capability to achieve objectives similar to those of this project;

D. Extent to which professional personnel involved in this project are qualified, including evidence of past achievements appropriate to this project; and

E. Adequacy of plans for administering the project.

#### Executive Order 12372 Review

The application is not subject to review as governed by Executive Order 12372, Intergovernmental Review of Federal Programs.

#### Catalog of Federal Domestic Assistance Number

The Catalog of Federal Domestic Assistance number assigned to this program is 13.282.

#### Application Submission and Deadline

The Association of State and Territorial Public Health Laboratory Directors has been notified of the availability of funds for this project and must submit an original and two copies of application form PHS 5161-1 to Henry S. Cassell, III, Grants Management Officer, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road NE., Room 300 (E-14), Atlanta, Georgia 30305 on or before April 15, 1989.

#### Where to Obtain Additional Information

If you are interested in obtaining additional information regarding this project, please refer to Announcement Number 907 and contact the following:

*Business:* Terry Maricle, Grants Management Specialist, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, NE., Room 300 (E-14), Atlanta, Georgia 30305, Telephone: (404) 842-6575 or FTS 236-6575.

*Technical:* Carl H. Blank, Division of Training (G-25), Training and Laboratory Program Office, Centers for Disease Control, Atlanta, Georgia 30333, Telephone: (404) 639-3674 or FTS 236-3674.

Dated: March 7, 1989.

Robert L. Foster,
*Acting Director, Office of Program Support, Centers for Disease Control.*

## Food and Drug Administration

[Docket No. 88N-0335]

### Frank Veterinary Laboratories et al.; Drugs Containing Sulfamethazine, Sulfaquinoxaline, Sulfamerazine, Sulfathiazole, Sulfapyridine, or Sulfanilamide for Oral, Injectable, Intramammary, or Intrauterine Use in Food-Producing Animals; Refusal to Approve NADA's

**AGENCY:** Food and Drug Administration.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA), Center for Veterinary Medicine (CVM), is issuing a final order refusing to approve certain new animal drug applications (NADA's) for drugs containing sulfamethazine, sulfaquinoxaline, sulfamerazine, sulfathiazole, sulfapyridine, or sulfanilamide for oral, injectable, intramammary, or intrauterine use in food-producing animals. Each of the NADA's in question was listed in a notice of opportunity for a hearing, published in the Federal Register of November 15, 1988 (53 FR 45050), on a proposal by CVM to refuse approval of the NADA's. This action is being taken because the sponsors either did not respond to the notice of opportunity for a hearing by December 15, 1988, as provided by the November 15, 1988, notice, or affirmatively elected not to avail themselves of an opportunity for a hearing on the refusal to approve the applications.

**DATES:** The refusals to approve certain NADA's are effective March 15, 1989; distribution of the products must cease May 15, 1989.

**FOR FURTHER INFORMATION CONTACT:** Philip J. Frappaolo, Center for Veterinary Medicine (HFV-240), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4940.

**SUPPLEMENTARY INFORMATION:**

#### I. Background Information

In the Federal Register of November 15, 1988 (53 FR 46050) (corrected December 12, 1988 (53 FR 49968), and December 23, 1988 (53 FR 51950)), CVM provided a notice of opportunity for a hearing on its proposal to refuse approval of 142 listed pending NADA's sponsored by 11 firms for products covered by § 510.450 (21 CFR 510.450). Section 510.450 provides for interim marketing of drugs that contain sulfamethazine, sulfaquinoxaline, sulfamerazine, sulfathiazole, sulfapyridine, or sulfanilamide for oral, injectable, intramammary, or intrauterine use in food-producing animals and that are the subject of pending applications. The notice of opportunity for a hearing gave sponsors until December 15, 1988, to request a hearing on the proposed refusal.

#### II. List of Firms Having NADA's Subject to This Notice

1. Frank Veterinary Laboratories, 149 East Thompson, West St. Paul, MN 55118.
2. Veterinary Laboratories, Inc., 12340 Santa Fe Dr., Lenexa, KS 66215.
3. Illini Skylab, Inc., 1000 Macomb Rd., Rushville, IL 62681.
4. Salsbury Laboratories, Inc., 2000 Rockford Rd., Charles City, IA 50616-9989.
5. Norden Laboratories, Inc., 601 West Cornhusker Highway, Lincoln, NE 68521.

#### III. Affected NADA's and Grounds for Refusing Approval

All the pending NADA's for the sulfonamide-containing drugs affected by this notice are listed in the tables below, by the same drug groups and in

VOL 54 ISS 49 MR 15 1989 UMI

the same format used in the November 15, 1988, notice of opportunity for a hearing. The tables list each pending NADA, current sponsor, and product name. The grounds on which CVM provided an opportunity for a hearing on the proposed refusal to approve each listed NADA under section 512(d)(1) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360b(d)(1)) and FDA's regulations were provided in detail in the November 15, 1988, notice of opportunity for a hearing, which is being made a part of this notice by reference.

Frank Veterinary Laboratories, Veterinary Laboratories, Inc., and Illini Skylab, Inc., did not respond to the November 15, 1988, notice of opportunity for a hearing and CVM is refusing to approve those firms' NADA's. Salsbury Laboratories, Inc., by a letter dated December 14, 1988, stated that it elected not to request a hearing on the proposal to refuse approval of 11 of its pending NADA's, and CVM is refusing to approve those applications. Norden Laboratories, Inc., by a letter dated December 8, 1988, stated that it elected not to request a hearing on the proposal to refuse approval of two of its pending NADA's, and CVM is refusing to approve those applications. Therefore, under section 512(d)(1) of the act and § 514.200 (21 CFR 514.200), CVM is issuing this refusal to approve the following NADA's for the listed products, effective March 15, 1989. Because the NADA's are no longer pending, the products may no longer be marketed under § 510.450. To facilitate an orderly transition to the use of approved new animal drugs, however, distribution of the products is not required to cease until May 15, 1989.

## Drug Export; Demerol® Hydrochloride (Meperidine Hydrochloride, USP)

**AGENCY:** Food and Drug Administration.
**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing that Sterling Drug Inc. has filed an application requesting approval for the export of the human drug Demerol® Hydrochloride (meperidine hydrochloride, USP) to Canada.

**ADDRESS:** Relevant information on this application may be directed to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, and to the contact person identified below. Any future inquiries concerning the export of human drugs under the Drug Export Amendments Act of 1986 should also be directed to the contact person.

**FOR FURTHER INFORMATION CONTACT:** Rudolf Apodaca, Division of Drug Labeling Compliance (HFD-310), Center for Drug Evaluation and Research, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8063.

**SUPPLEMENTARY INFORMATION:** The Drug Export Amendments Act of 1986 (Pub. L. 99-660) (section 802 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 382)) provides that FDA may approve applications for the export of drugs that are not currently approved in the United States. The approval process is governed by section 802(b) of the act. Section 802(b)(3)(B) of the act sets forth the requirements that must be met in an application for approval. Section 802(b)(3)(C) of the act requires that the agency review the application within 30 days of its filing to determine whether the requirements of section 802(b)(3)(B) have been satisfied. Section 802(b)(3)(A) of the act requires that the agency publish a notice in the **Federal Register** within 10 days of the filing of an application for export to facilitate public participation in its review of the application. To meet this requirement, the agency is providing notice that Sterling Drug Inc., 90 Park Ave., New York, NY 10016, has filed an application requesting approval for the export of the drug Demerol® Hydrochloride (meperidine hydrochloride, USP), to Canada. This product is used in the relief of moderate to severe pain in may medical, surgical, obstetrical, and dental situations. The application was received and filed in the Center for Drug Evaluation and Research on February 24, 1989, which shall be considered the filing date for purposes of the act.

Interested persons may submit relevant information on the application to the Dockets Management Branch (address above) in two copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. These submissions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

The agency encourages any person who submits relevant information on the application to do so by March 27, 1989, and to provide an additional copy of the submission directly to the contact person identified above, to facilitate consideration of the information during the 30-day review period.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 802, Pub. L. 99-660 (21 U.S.C. 382)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Center for Drug Evaluation and Research (21 CFR 5.44).

Dated: March 6, 1989.

**FOR FURTHER INFORMATION CONTACT:** Rudolf Apodaca, Division of Drug Labeling Compliance (HFD-310), Center for Drug Evaluation Research, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8063.

**SUPPLEMENTARY INFORMATION:** The Drug Export Amendments Act of 1986 (Pub. L. 99-660) (section 802 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 382)) provides that FDA may approve applications for the export of drugs that are not currently approved in the United States. The approval process is governed by section 802(b) of the act. Section 802(b)(3)(B) of the act sets forth the requirements that must be met in an application for approval. Section 802(b)(3)(C) of the act requires that the agency review the application within 30 days of its filing to determine whether the requirements of section 802(b)(3)(B) have been satisfied. Section 802(b)(3)(A) of the act requires that the agency publish a notice in the **Federal Register** within 10 days of the filing of an application for export to facilitate public participation in its review of the application. To meet this requirement, the agency is providing notice that Sterling Drug Inc., 90 Park Ave., New York, NY 10016, has filed an application requesting approval for the export of the drug Hypaque® Meglumine 18%, to Canada. This product is used as a radiopaque contrast media. The application was received and filed in the Center for Drug Evaluation and Research on February 24, 1989, which shall be considered the filing date for purposes of the act.

Interested persons may submit relevant information on the application to the Dockets Management Branch (address above) in two copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. These submissions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

The agency encourages any person who submits relevant information on the application to do so by March 27, 1989, and to provide an additional copy of the submission directly to the contact person identified above, to facilitate consideration of the information during the 30-day review period.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 802, Pub. L. 99-660 (21 U.S.C. 382)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Center for Drug Evaluation and Research (21 CFR 5.44).

Dated: March 6, 1989.

## Drug Export; Marcaine® (Bupivacaine Hydrochloride Injection, USP) and Marcaine® E (Bupivacaine and Epinephrine Injection, USP)

**AGENCY:** Food and Drug Administration.
**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing that Sterling Drug Inc. has filed an application requesting approval for the export of the human drug Marcaine® (bupivacaine hydrochloride injection, USP) and Marcaine® E (bupivacaine and epinephrine injection, USP) to Canada.

**ADDRESS:** Relevant information on this application may be directed to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, and to the contact person identified below. Any future inquiries concerning the export of human drugs under the Drug Export Amendments Act of 1986 should also be directed to the contact person.

**FOR FURTHER INFORMATION CONTACT:** Rudolf Apodaca, Division of Drug Labeling Compliance (HFD-310), Center for Drug Evaluation and Research, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8063.

**SUPPLEMENTARY INFORMATION:** The Drug Export Amendments Act of 1986 (Pub. L. 99-660) (section 802 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 382)) provides that FDA may approve applications for the export of drugs that are not currently approved in the United States. The approval process is governed by section 802(b) of the act. Section 802(b)(3)(B) of the act sets forth the requirements that must be met in an application for approval. Section 802(b)(3)(C) of the act requires that the agency review the application within 30 days of its filing to determine whether the requirements of section 802(b)(3)(B) have been satisfied. Section 802(b)(3)(A) of the act requires that the agency publish a notice in the **Federal Register** within 10 days of the filing of an application for export to facilitate public participation in its review of the application. To meet this requirement, the agency is providing notice that Sterling Drug Inc., 90 Park Ave., New York, NY 10016, has filed an application requesting approval for the export of the drug Marcaine® (bupivacaine hydrochloride injection, USP) and Marcaine® E (bupivacaine and epinephrine injection, USP), to Canada. This product is used as a long acting local anesthetic for epidural anesthesia, nerve block, and infiltration. The application was received and filed in the Center for Drug Evaluation and Research on February 24, 1989, which shall be considered the filing date for purposes of the act.

Interested persons may submit relevant information on the application to the Dockets Management Branch (address above) in two copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. These submissions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

The agency encourages any person who submits relevant information on the application to do so by March 27, 1989, and to provide an additional copy of the submission directly to the contact person identified above, to facilitate consideration of the information during the 30-day review period.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 802, Pub. L. 99-660 (21 U.S.C. 382)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Center for Drug Evaluation and Research (21 CFR 5.44).

Dated: March 6, 1989.

**[Docket No. 89N-0073]**

## Public Meeting; Development of Educational Information for Women Considering Implantation of Breast Prostheses

**AGENCY:** Food and Drug Administration.
**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing a 2-day meeting to develop educational materials for women considering surgical implantation of breast prostheses devices. FDA is inviting interested persons, including device manufacturers, health professional organizations, industry and consumer groups, and health educators to attend the meeting. Because of space constraints, attendance can be assured only for those persons who make telephone reservations.

**DATES:** The open meeting will be held on Wednesday, March 22, 1989, 9 a.m. to 5:30 p.m., and Thursday, March 23, 1989, 8 a.m. to 3 p.m. Interested persons, whether or not they are able to attend, may submit written comments on the issues described in this notice by May 15, 1989. Telephone reservations regarding attendance should be made with the contact person listed below by March 20, 1989.

**ADDRESSES:** The meeting will be held at the Days Inn, Congressional Park, 1775 Rockville Pike, Rockville, MD 20852. Submit written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, referencing the docket number found in the heading of this notice.

**FOR FURTHER INFORMATION CONTACT:** Joan M. Rudick, Center for Devices and Radiological Health, (HFZ-210), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4190.

**SUPPLEMENTARY INFORMATION:** Classification of medical devices in commercial distribution is required by the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 301-392). In the **Federal Register** of June 24, 1988 (53 FR 23856), FDA published a final rule classifying 51 general and plastic surgery devices. In that rule, FDA classified the silicone inflatable breast prosthesis (21 CFR 878.3530) and the silicone gel-filled breast prosthesis (21 CFR 878.3540) into class III. The effect of classifying a device into class III is to require each manufacturer of such devices, to submit to FDA a premarket approval application (PMA) that includes information providing reasonable assurance of the safety and effectiveness of the device.

In the **Federal Register** of November 2, 1988 (53 FR 44239), FDA announced a meeting of the agency's General and Plastic Surgery Devices Advisory Committee (the committee) to be held on November 22, 1988. The committee discussed the types of data needed to assess the safety and effectiveness of these breast prostheses devices. As part of that discussion, the committee recommended, and FDA agreed, that the agency should develop an educational program to assure that women considering surgical implantation of breast prostheses devices are fully informed of the benefits and risks associated with the devices before consenting to the surgical procedure.

VOL 54 ISS 49 MR 15 1989 UMI

In response to the committee's recommendation, FDA developed a plan to convene relevant members of health professional groups, the industry, consumer groups, and health educators to develop educational materials for women regarding breast implants. In the **Federal Register** of December 29, 1988 (53 FR 52790), FDA announced another meeting of the committee to be held on January 26, 1989. At that time the committee agreed with FDA's plans to convene a meeting to develop the educational materials.

Accordingly, FDA is inviting interested persons to attend this meeting. Interested persons who will be unable to attend the meeting may submit written comments to the Dockets Management Branch (address above) that set forth their view on the issues outlined in this notice. Minutes of the meeting will be made available. Submission of written comments is encouraged. The comments will be carefully considered before the educational materials are approved for use.

Dated: March 9, 1989.

**Alan L. Hoeting,**

*Acting Associate Commissioner for Regulatory Affairs.*

## National Institutes of Health

### National Institute of Dental Research; Meeting for Industry and Research Representatives Regarding the NIDR "Long-Range Plan for the 1990s"

The National Institute of Dental Research (NIDR) has initiated the development of a Long-Range Research Plan for the 1990s. As part of this effort, a set of research recommendations has been proposed be expert panels for each of the following six areas:

(1) Dental Caries, Fluoride Studies, Nutrition, Pulp Biology, and Restorative Materials;

(2) Periodontal Diseases and Dental Implants;

(3) Congenital Craniofacial Malformations, Acquired Craniofacial Defects, Dentofacial Malrelations, and Mineralized Tissue Studies;

(4) AIDS, Salivary Glands and Secretions, and Soft Tissue Diseases;

(5) Orofacial Pain and Oral Sensory-motor Dysfunctions; and

(6) Aging, Epidemiology, Health Promotion/Disease Prevention, Science Transfer, and Psychoneuroimmunology.

The NIDR is inviting representatives of private industry to discuss specific Long-Range Research Plan recommendations which may be appropriate for collaborative efforts. For this purpose, a meeting will be convened on May 16, 1989, in Building 31, Conference Room 10, National Institutes of Health, Bethesda, Maryland, from 9 a.m. to adjournment.

The meeting will be open to the public. Attendance will be limited to space available.

For further information, please contact Dr. James Lipton, Chief, Planning and Evaluation Section, Office of Planning, Evaluation, and Communications, NIDR, NIH, Room 2C-36, Building 31, 9000 Rockville Pike, Bethesda, MD 20892 (telephone 301/496-6705).

Dated: March 8, 1989.

### Consensus Development Conference on Oral Complications of Cancer Therapies: Diagnosis, Prevention, and Treatment

Notice is hereby given of the NIH Consensus Development Conference on "Oral Complications of Cancer Therapies: Diagnosis, Prevention, and Treatment," sponsored by the National Institute of Dental Research, the National Cancer Institute, the Clinical Center, and the Food and Drug Administration in collaboration with the NIH Office of Medical Applications of Research. The conference will be held on April 17-19, 1989, in the Masur Auditorium of the Warren Grant Magnuson Clinical Center (Building 10) at the National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20892.

The oral cavity is a common site of complications resulting from cancer therapies. Surgical, medical (chemotherapeutic), and radiation treatments all have acute and chronic effects on the mouth and oral functions. Oral complications are frequent and serious and contribute to the morbidity and mortality of cancer patients.

Dental and medical professionals debate the usefulness of treating oral complications before beginning cancer therapy. Controversy exists concerning the most effective means of limiting oral complications by pretherapy interventions and the strategies indicated for management of acute and chronic complications arising during cancer therapy.

The conference will bring together dentists and physicians, including specialists in oral medicine, oncology, oral surgery, radiotherapy, surgery and pathology, nurses, other health care professionals, pharmacists, pharmacologists, and representatives of the public. Following two days of presentations by dental and medical experts and discussion by the audience, a consensus panel will weigh the scientific evidence and formulate a draft statement in response to several key questions:

- Is there a role for pretherapy interventions affecting the oral cavity in reducing the incidence of oral complications in the cancer patient?
- Which pretreatment strategies are optimal to prevent or minimize oral complications?
- What are the most effective strategies for management of acute oral complications occurring during cancer therapy?
- What are the indicated strategies for management of chronic oral complications following cancer therapy?
- What are the directions for future research?

On the final day of the meeting, the Consensus Panel chairman will read the draft statement to the conference audience and invite comments and questions.

Information on the program may be obtained from: Kathleen Edmonds, Prospect Associates, 1801 Rockville Pike, Suite 500, Rockville, Maryland (301) 468-6555.

Dated: March 9, 1989.

## DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

### Office of the Assistant Secretary for Public and Indian Housing

**[Docket No. N-89-1896; FR-2529]**

### Policy on Establishment of Ceiling Rents for Indian Housing

**AGENCY:** Office of the Assistant Secretary for Public and Indian Housing, HUD.

**ACTION:** Notice of HUD Policy on Establishment of Ceiling Rents for Indian Housing.

**SUMMARY:** This Notice informs the public that HUD Indian Field Offices will consider applications from Indian Housing Authorities (IHAs) for waiver of the requirements of 24 CFR 913.107 and for permission to adopt rents for projects or dwelling units that will establish a cap on the total tenant payment computed under that section. Where the conditions set out in this Notice are met, HUD will waive the cited regulation to permit IHAs to establish ceiling rents for Indian rental housing projects. Section 102(a) (entitled "Economic Rent") of the Housing and Community Development Act of 1987 (1987 Act) amended section 3(a) of the United States Housing Act of 1937 (1937 Act) to allow IHAs to establish, upon approval by HUD, maximum rents, or "ceiling rents," in Indian housing projects. Until HUD proposes a rule for public comment and adopts a final rule for effect, IHAs may apply to HUD for permission to establish ceiling rents that are not more than a family would pay under the present income-based formula and not less than the average monthly amount of debt service and operating expenses attributed to units of similar size in Indian housing projects owned and operated by the IHA.

**EFFECTIVE DATE:** March 15, 1989.

**FOR FURTHER INFORMATION CONTACT:** Mr. Dominic Nessi, Director, Office of Indian Housing, Department of Housing and Urban Development, Room 4232, 451 Seventh Street SW., Washington, DC 20410; telephone number (202) 755-1015. Hearing- or speech-impaired persons may call HUD's TDD number (202) 426-0015. (These telephone numbers are not toll-free.)

**SUPPLEMENTARY INFORMATION:** The collection of information requirements contained in this Notice have been submitted to the Office of Management and Budget (OMB) for review under the Paperwork Reduction Act of 1980 and have been assigned OMB control number 2577-0118, which expires February 28, 1990. Public reporting burden for each of these collections of information is estimated to include the time for reviewing the instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Information on the estimated public reporting burden is provided in this Notice under the heading *Other Matters*. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Department of Housing and Urban Development, Rules Docket Clerk, 451 Seventh Street SW., Room 10276, Washington, DC 20410; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

### I. Introduction

Section 102(a) of the 1987 Act amended section 3(a) of the 1937 Act to permit IHAs to establish, upon approval by HUD, ceiling rents in Indian housing projects. Section 3(a) of the 1937 Act (implemented by HUD at 24 CFR 913.107) requires that the tenant's rent be based on the tenant family's income. The Act establishes the tenant's rent as the highest of (1) 30 percent of the family's monthly adjusted income; (2) 10 percent of the family's monthly income; or, (3) if a family receives welfare assistance and the grant is subject to adjustment in accordance with actual housing costs, any portion of that assistance designated for housing costs. (For purposes of this Notice, section 3(a) rent will be referred to as "income-based rent". The term "rent" refers to the total tenant payment that is payable by the tenant, including any utility allowance.)

Section 102(a) amended section 3(a) to allow an IHA to establish, with HUD approval, a maximum rent that would be not more than the present income-based rent and not less than the average monthly amount of debt service and operating expenses attributed to units of similar size in Indian housing projects owned and operated by the IHA. (For purposes of this Notice, section 102(a) rent will be referred to as "ceiling rent".)

Ceiling rents are based on the *dwelling unit*, whereas rents under section 3(a) of the 1937 Act are based on the tenant family's *income*. Section 102(a) authorizes an IHA to establish ceiling rents as an alternative rent, but IHAs are not required to do so. An IHA may establish ceiling rents for particular classes of units, particular projects, or the entire inventory of the IHA.

Tenants do not have a right to ceiling rents if an IHA does not adopt them. However, once ceiling rents have been established by an IHA, each family residing in, and each new tenant of, an affected dwelling unit would be charged the *lower* of the ceiling rent for that unit or the family's income-based rent. There is no limitation on the time period that a family in Indian housing may be eligible for ceiling rents. If a family on ceiling rent experiences a change in financial circumstances such that an income-based rent would be lower than the ceiling rent, the family must be given the benefit of the lower rent.

The IHA may revoke or raise its ceiling rents at any time after giving reasonable notice to the affected tenants. The IHA must revoke or change its ceiling rents if directed by HUD to do so for reasonable cause.

### II. Applicability

This Notice applies only to Indian rental housing projects assisted under the 1937 Act. It does not apply to the Turnkey III and Mutual Help Homeownership programs. (The current regulations already provide a cap on tenant payment for these programs. See 24 CFR 905.416(a)(2) and 24 CFR 904.107(h).) Although section 102(a) of the 1987 Act also authorizes ceiling rents in public housing projects and in lower income housing projects assisted under section 8 that contain more than 2,000 dwelling units, this Notice does not apply to public housing projects or to any section 8 program fitting that description.

### III. Purpose of Ceiling Rent

Since 1982, income-based rent has been the only method available to IHAs for calculating rent. The purpose of ceiling rents is to provide a cap on rents for families whose incomes have increased since moving into Indian housing to a point where an income-based rent exceeds the value of the housing provided.

The legislative history of section 102(a) shows that Congress, in authorizing ceiling rents, was concerned with easing the burden of these increased rents on working families. There is usually very little, if any, alternative rental housing on Indian reservations. In many instances, Indian housing projects provide the only rental housing. Ceiling rents will assure that Indian families are not required to pay more than their housing is worth because they have no other option, other than leaving the reservation.

HUD considers the burden of increased rents on Indian families with no alternative housing sufficiently significant to permit consideration of individual waiver requests from IHAs seeking relief from the requirements of 24 CFR 913.107 for rent based on income until the necessary rule revisions implementing section 102(a) are effective. Therefore, IHAs that choose to establish ceiling rents in Indian housing projects may apply to HUD for approval in accordance with the procedures outlined below. (IHAs should be aware that the terms of approval of ceiling rents may be affected by the final rule on ceiling rents.)

### IV. Determining Ceiling Rent

Section 102(a) provides an IHA with an alternative method for calculating rent. (Section 102(a) has no effect on income-eligibility requirements for admission to Indian housing.) IHAs may establish ceiling rents, with HUD

VOL 54 ISS 49 MR 15 1989 UMI

approval, at an amount that the IHA determines reflects the value of the unit. However, ceiling rents may not be less than the average monthly amount of debt service and operating expenses attributed to dwelling units of a given size in Indian housing projects owned and operated by the IHA.

An IHA may establish ceiling rents for all dwelling units in a project or for one or more classes of units. A class of units may be based on any reasonable classification so long as the classification is *unit-based* (*e.g.*, number of bedrooms). The classification may *not* be *tenant-based, i.e.*, applicable to particular families because of their personal circumstances, rather than the characteristics of the housig in which they live.

If an IHA establishes ceiling rents in an Indian housing project, with HUD approval, each family living in an affected dwelling unit would pay the lower of a ceiling rent or an income-based rent. In situations where a family's income is so low that the ceiling rent for the unit rented by that family is an amount higher than income-based rent would be, the family would pay the income-based rent. Ceiling rents are intended for families whose incomes have increased to the point that an income-based rent exceeds the value of the housing provided.

Section 102(a) provides that the *minimum* amount that a ceiling rent may be is the sum of the average monthly debt service and the average monthly operating expense attributed to units of similar size owned by the IHA. An example appears as an appendix to this notice showing a method for determining this total average monthly amount ("TAMA").

The average monthly debt service is an amount imputed by HUD based on total development and modernization costs for the IHA. When the legislative provision implemented by this notice was originally drafted in the early 1980s, all development and modernization programs were funded by debt instruments that were tied to specific projects and became liabilities of an IHA. In practice, however, these debt obligations were paid by HUD, and assignment of debt to the IHA was more of an accounting than a substantive transaction. As many of these debts as possible were forgiven, starting with passage of section 3004 of the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA). (See 53 FR 31274 (Aug. 17, 1988) for HUD's Statement of Policy on loan forgiveness.) Subsequent development and modernization funding was provided in the form of grants rather than loans to IHAs. Certain Federal Financing Bank debt instruments and long-term bonds issued on behalf of IHAs, however, could not be forgiven in the same manner and remain as long-term IHA debt obligations. The net effect is that there is no relationship between the amount of HUD development and modernization funding provided and an IHA's current debt obligations. When two otherwise identical IHAs are examined, one may have no unforgiven debts while the other may have large unforgiven debts.

Both the 1987 Act and its legislative history make it apparent that the operating costs and debt service amounts Congress intended to be used in establishing an "economic rent" were to be based on an *attributed* amount. Therefore, HUD will impute debt service using total grant funding, forgiven debt, and outstanding debt. This conforms to the intent of the legislation and avoids treating an IHA that has had all debt forgiven differently from an otherwise identical IHA with a large outstanding debt obligation because the debt instruments used were not subject to forgiveness.

The average monthly operating expense is one-twelfth of the sum of: (1) All annual operating expenses reported on the Statement of Operating Receipts and Expenditures as of the end of the most recent fiscal year and (2) the aggregate annual utility allowances for all tenant paid utilities; *minus* the sum of (1) excess utility charges and (2) annual costs, if any, associated with units approved for deprogramming.

The sum of the debt service and operating expenses, or TAMA, is to be distributed over all IHA units, except those approved for deprogramming, whether or not ceiling rents are proposed for all units, with an adjustment only for unit size (number of bedrooms), with a larger unit to receive a larger portion of the IHA'S TAMA than a smaller unit.

The distribution by unit size is accomplished using a unit rent relationship based on the rent of a two-bedroom unit (100%). The rent relationships vary from 70% of the two-bedroom rent for an efficiency to 182% of the two-bedroom rent for a six-bedroom unit. The adjustment factors for all units are as follows: zero-bedroom units (efficiencies), 0.70; one-bedroom units, 0.85; two-bedroom units, 1.00; three-bedroom units, 1.25; four-bedroom units, 1.40; five-bedroom units, 1.61; six-bedroom units, 1.82.

HUD believes that the need for ceiling rents in a project can be shown by the IHA demonstrating that there are tenant families paying rents that are excessive for the housing provided. For example, the IHA may show that there are families paying rents that exceed rents for comparable unassisted rental housing in the area, as determined by the IHA in an informal survey of such comparable housing. In comparing Indian housing dwelling units to unassisted rental housing, IHAs should use private rental housing of similar age, condition, amenities, design, and size in the same market area. The IHA may show, if available, that there are families that pay more than the current effective Section 8 Existing Housing Certificate Program's Fair Market Rents (FMRs) for comparable housing in the area.

In the absence of private market units to provide a basis for determining comparable rents or FMRs representative of the Indian area, an IHA may offer other evidence acceptable to HUD that ceiling rents are necessary to ensure that families do not pay more in rent than the fair rental value of the dwelling units.

## V. Requirements for HUD Approval

To gain the necessary waiver of the income-based rent requirement of 24 CFR 913.107 and permission to adopt ceiling rents in an Indian housing project or projects owned and operated by an IHA, the IHA must submit a written request to the appropriate HUD Indian Field Office and must:

(1) Demonstrate the number of families currently residing in units owned and operated by the IHA that are paying rent of an amount calculated as required by 24 CFR 913.107 that exceeds the value of the housing provided, as determined by the IHA through an informal survey of comparable unassisted rental units, the current effective FMRs under the section 8 Existing Housing Certificate Program for that locality, or other method.

(2) State the unit sizes and projects, the ceiling rents proposed in each case, and the number of units to which each ceiling rent will apply;

(3) State the statutory minimum ceiling rent for each unit size for which ceiling rents are proposed (the average monthly amount of debt service and operating expenses attributed to units of similar size in projects owned and operated by the IHA);

(4) Estimate the direct financial impact of the ceiling rents by stating the number of families affected, the average dollar amount of rent reduction per family, and the total cost of the rent reductions.

The HUD Indian Field Office will notify the IHA in writing whether the requirements of 24 CFR 913.107 will be waived and permission granted to adopt ceiling rents as proposed in the IHA's application. HUD's decision will be based upon the need for rent relief in the units for which ceiling rents are proposed as determined by the number of families paying excessive rents.

## VI. Other Matters

The collection of information requirements contained in this notice have been submitted to the Office of Management and Budget for review under section 3504(h) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.), and approved sections IV and V of this Notice have been determined by the Department to contain collection of information requirements. Information on these requirements is provided as follows:

| Description | Number of Respondents | Responses per Respondent | Total Annual Responses | Hrs per Response | Total Hours |
|---|---|---|---|---|---|
| *Section IV* | | | | | |
| Determining Ceiling Rents | 100 | 1 | 100 | 5 | 500 |
| *Section V* | | | | | |
| Gathering data to submit for approval | 100 | 1 | 100 | 12 | 1,200 |
| Revise, adopt and implement policies and procedures | 100 | 1 | 100 | 2 | 200 |
| Recordkeeping:—create files to retain copies of package submitted for HUD approval—create logs to track interim determination for families who go off and on program due to change in income | 100 | 1 | 100 | 1 | 100 |
| Total estimated annual burden | | | | | 2,000 |

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C 4332. The Finding is available for public inspection during regular business hours at the Office of Rules Docket Clerk, Room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410.

The General Counsel, as the Designated Official under Executive Order 12606, *The Family*, has determined that this Notice does not have a potential significant impact on family formation, maintenance, and general well-being and, thus, is not subject to review under the Order. The Notice merely announces an alternative method of setting tenant payments for rent in public housing, which will assist families to afford decent, safe, and sanitary, housing of their choice. The General Counsel has also determined, as the Designated Official for HUD under section 6(a) of Executive Order 12612, *Federalism*, that the policies contained in this Notice do not have federalism implications and, thus, are not subject to review under that Order.

Dated: March 9, 1989.

**Thomas Sherman,**

*Acting General Deputy, Assistant Secretary for Public and Indian Housing.*

## Appendix

*Example for Determining Average Monthly Debt Service and Operating Expenses for Units of Similar Size*

| | | |
|---|---|---|
| 1. Debt Service (total annual debt or imputed debt payments made by or on the behalf of HUD) | | $120,000 |
| 2. Operating Expenses (Line 620 from the Statement of Operating Receipts and Expenditures for the IHA's most recent fiscal year) | | $214,800 |
| 3. Total Costs (not including tenant-paid utilities) (Line 1 plus Line 2) | | $334,800 |
| 4. Total Monthly Cost (Line 3 divided by 12) | | $27,900 |
| 5. Average Monthly Cost (not including tenant-paid utilities) (Line 4 divided by number of units*) | | $372 |
| 6. Total Adjustment Factors: | | |
| 0.70X0 efficiency units | | |
| 0.85X0 1-bedroom units | | |
| 1.00X25 2-bedroom units | 25 | |
| 1.25X25 3-bedroom units | 32 | |
| 1.40X25 4-bedroom units | 38 | |
| 1.61X0 5-bedroom units | | |
| 1.82X0 6-bedroom units | | |
| | | 93 |
| 7. Average 2-bedroom basecost (line 4 divided by line 6) | | $300 |
| 8. Minimum Ceiling Rents (not including tenant-paid utilities): | | |
| 0-bedroom units (0.70XLine 7) | | |
| 1-bedroom units (0.85XLine 7) | | |
| 2-bedroom units (1.00XLine 7) | | $300 |
| 3-bedroom units (1.25XLine 7) | | $375 |
| 4-bedroom units (1.40XLine 7) | | $420 |
| 5-bedroom units (1.61XLine 7) | | |
| 6-bedroom units (1.82XLine 7) | | |

*Whether or not ceiling rent is proposed for these units, and irrespective of the method of financing on any individual project or class of dwelling units.

**[Docket No. N-89-1913; FR-2597]**

## Policy on Establishment of Ceiling Rents for Public Housing

**AGENCY:** Office of the Assistant Secretary for Public and Indian Housing, HUD.

**ACTION:** Notice of HUD Policy on Establishment of Ceiling Rents for Public Housing.

**SUMMARY:** This Notice informs the public that HUD will consider applications from public housing agencies (PHAs) for waiver of the requirements of 24 CFR 913.107 and for permission to adopt rents for projects or dwelling units that will establish a cap on the total tenant payment computed under that section. Where the conditions set out in this Notice are met, HUD will waive the cited regulation to permit PHAs to establish ceiling rents in public housing projects. Section 102(a) (entitled "Economic Rent") of the Housing and Community Development Act of 1987 (1987 Act) amends section 3(a) of the United States Housing Act of 1937 (1937 Act) to allow PHAs to establish, upon approval by HUD, maximum rents, or "ceiling rents," in public housing

projects. Until HUD proposes a rule for public comment and adopts a rule for effect, PHAs may apply to HUD for permission to establish ceiling rents that are not more than a family would pay under the present income-based formula and not less than the average monthly amount of debt service and operating expenses attributed to units of similar size in public housing projects owned and operated by the PHA.

**EFFECTIVE DATE:** March 15, 1989.

**FOR FURTHER INFORMATION CONTACT:** Nancy Chisholm, Director, Policy Staff, Office of Public and Indian Housing, Department of Housing and Urban Development, Room 4118, 451 Seventh Street SW., Washington, DC 20410; telephone number (202) 755–6713. Hearing or speech impaired persons may call HUD's TDD number (202) 426–0015. (These telephone numbers are not toll-free.)

**SUPPLEMENTARY INFORMATION:** The collection of information requirements contained in this notice have been submitted to the Office of Management and Budget (OMB) for review under the Paperwork Reduction Act of 1980 and have been assigned OMB control number 2577 –0117. Public reporting burden for each of these collections of information is estimated to include the time for reviewing the instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Information on the estimated public reporting burden is provided in this Notice under the heading *Other Matters*. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Department of Housing and Urban Development, Rules Docket Clerk, 451 Seventh Street SW., Room 10276, Washington, DC 20410; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

## I. Introduction

Section 102(a) of the 1987 Act amends section 3(a) of the 1937 Act to permit PHAs to establish, upon approval by HUD, ceiling rents in public housing projects. Section 3(a) of the 1937 Act (implemented by HUD at 24 CFR 913.107) requires that a tenant's rent be based on the tenant family's income. The Act establishes a tenant's rent as the highest of (1) 30 percent of the family's monthly adjusted income; (2) 10 percent of the family's monthly income; or (3) if the family receives welfare assistance and the grant is subject to adjustment in accordance with actual housing costs, any portion of that assistance designated for housing costs. (For purposes of this Notice, section 3(a) rent will be referred to as "income-based rent." The term "rent" refers to the total tenant payment that is payable by the tenant, including any utility allowance.)

Section 102(a) amends section 3(a) to allow PHAs to establish, with HUD approval, maximum rents that would be not more than the present income-based rent and not less than the average monthly amount of debt service and operating expenses attributed to units of similar size in public housing projects owned and operated by the PHA. (For purposes of this Notice, section 102(a) rent will be referred to as "ceiling rent.") A ceiling rent would be available for any one family residing in public housing for a period of up to 36 months.

Ceiling rents are based on the *dwelling unit*, whereas rents under section 3(a) of the 1937 Act are based on the tenant family's *income*. Section 102(a) authorizes PHAs to establish ceiling rents as an alternative rent, but PHAs are not required to do so. A PHA may establish ceiling rents for particular units, particular projects, or the entire inventory of the PHA.

Tenants do not have a right to ceiling rents if a PHA does not adopt them. However, once ceiling rents have been established by a PHA, each family residing in and each new tenant of an affected dwelling unit would be charged the *lower* of the ceiling rent for that unit or the family's income-based rent. A PHA may revoke or raise its ceiling rents at any time after giving reasonable notice to the affected tenants. A PHA must revoke or change its ceiling rents if directed by HUD to do so for reasonable cause.

## II. Applicability

This Notice applies only to public rental housing projects assisted under the 1937 Act. It does not apply to Indian rental housing projects or Turnkey III programs. (Although section 102(a) of the 1987 Act also authorizes ceiling rents in Indian rental housing projects and in lower income housing projects assisted under section 8 that contain more than 2,000 dwelling units, this Notice does not apply either to Indian housing or to any section 8 program fitting that description. Ceiling rents for Indian housing are the subject of a separate notice. The section 8 provision will be addressed in the Department's proposed rule on ceiling rents.)

## III. Purpose of Ceiling Rent

Since 1982, the income-based rent has been the only method available to PHAs for calculating rent. The purpose of ceiling rents is to provide a cap on rents for families whose incomes have increased since moving into public housing to a point where an income-based rent is unreasonable for the housing provided.

The legislative history of section 102(a) shows that Congress, in authorizing ceiling rents, established a three-year limitation on ceiling rent benefits for a tenant family residing in public housing to encourage higher-income families to seek housing on the private market after a reasonable time. (See H.R. Rep. No. 100–122, 100th Cong., 1st Sess. 12, (1987).) HUD policy has always been that families that were income-eligible at initial occupancy may continue to reside in public housing even though their incomes increase to an amount that would make them ineligible for occupancy were they applying at that time. Therefore, a PHA may not force tenant families paying ceiling rent to move once the 36-month period has expired. However, tenant families for whom the 36-month period expires will no longer be eligible for ceiling rents and must be charged an income-based rent after that time.

HUD believes that tenant families should not pay more in rent for public housing than comparable housing would cost on the private rental market. Therefore, HUD has determined that an equitable ceiling rent would be an amount equal to the current effective Section 8 Existing Housing Certificate Program's Fair Market Rents (FRMs) for the area of, if a PHA finds that the FMRs substantially exceed or understate the fair rental value of some or all of the PHA's units, an amount equal to comparable unassisted rental housing in the area, as determined by the PHA in a survey of such comparable housing. In any event, section 102(a) provides that ceiling rents may not be less than the average monthly amount of debt service and operating expenses attributed to units of similar size in public housing projects owned and operated by the PHA. In comparing public housing dwelling units to unassisted rental housing, PHAs should use private rental housing of similar age, location, condition, amenities, design, and size in the same market area.

HUD considers issues such as the burden of increased rents on working families in public housing projects sufficiently significant to permit consideration of individual waiver requests from PHAs seeking relief from the requirements of 24 CFR 913.107 for rent based on income until the necessary rule revisions implementing section 102(a) are effective. Therefore, PHAs that choose to establish ceiling rents in public housing projects may apply to HUD for approval in accordance with the procedures outlined below. (PHAs should be aware that the terms of approval of ceiling rents under this waiver may be affected by the final rule ceiling rents.)

## IV. Determining Ceiling Rent

Section 102(a) provides a PHA with an alternative method for calculating rent. (Section 102(a) has no effect on income-eligibility requirements for admission to public housing.) PHAs may establish ceiling rents, with HUD approval, that are not less than the average monthly amount of debt service and operating expenses attributed to dwelling units of a given size in public housing projects owned and operated by the PHA.

A PHA may establish ceiling rents for all dwelling units in a project or for one or more classes of units. A class of units may be based on any reasonable classification so long as the classification is *unit-based (e.g.,* number of bedrooms). The classification may *not* be *tenant-based, i.e.,* applicable to particular families because of their personal circumstances, rather than the characteristics of the housing they live in.

HUD believes that the need for ceiling rents in a project can be shown by the PHA's demonstrating that there are tenant families paying rent of an amount greater than the current effective section 8 Existing Housing Certificate Program's Fair Market Rents (FMRs) for the area or, if a PHA finds that the FMRs substantially exceed or understate the fair rental value of some or all of the PHA's units, an amount equal to comparable unassisted rental housing in the area, as determined by the PHA in a survey of such comparable housing. In comparing public housing dwelling units to unassisted rental housing, PHAs should use private rental housing of similar age, condition, amenities, design, and size in the same market area.

If a PHA establishes ceiling rents in a public housing project, with HUD approval, each family living in an affected dwelling unit would pay the lower of a ceiling rent or an income-based rent. In situations where a family's income is so low that the ceiling rent for the unit rented by that family is an amount higher than income-based rent would be, the family would pay the income-based rent. Ceiling rents are intended for families whose incomes have increased to the point that an income-based rent is unreasonable for the housing provided.

Families that are eligible for ceiling rent may benefit from ceiling rent for a cumulative total of 36 months. A family may go on and off a ceiling rent because of changed financial circumstances, and any months during which a family pays an income-based rent will not count toward the 36-month limitation. However, if the family goes back on a ceiling rent, all previous months spent on a ceiling rent will count toward the 36-month limitation.

Section 102(a) provides that the *minimum* amount that a ceiling rent may be is the sum of the average monthly debt service and the average monthly operating expense attributed to units of similar size owned by the PHA. An example appears as an appendix to this Notice showing a method whereby a PHA may determine this total average monthly amount ("TAMA").

The average monthly debt service is an amount imputed by HUD based on total development and modernization costs for the PHA. When the legislative provision implemented by this Notice was originally drafted in the early 1980s, all development and modernization programs were funded by debt instruments that were tied to specific projects and became liabilities of a PHA. In practice, however, these debt obligations were paid by HUD, and assignment of debt to the PHA was more of an accounting than a substantive transaction. As many of these debts as possible were forgiven, starting with passage of section 3004 of the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA). (See 53 FR 31274 (Aug. 17, 1988) for HUD's Statement of Policy on loan forgiveness.) Subsequent development and modernization funding was provided in the form of grants rather than loans to PHAs. Certain Federal Financing Bank debt instruments and long-term bonds issued on behalf of PHAs, however, could not be forgiven in the same manner and remain as long-term PHA debt obligations. The net effect is that there is no relationship between the amount of HUD development and modernization funding provided and a PHA's current debt obligations. When two otherwise identical PHAs are examined, one may have no unforgiven debts while the other may have large unforgiven debts.

Both the 1987 Act and its legislative history make it apparent that the operating costs and debt service amounts Congress intended to be used in establishing an "economic rent" were to be based on an *attributed* amount. Therefore, HUD will impute debt service using total grant funding, forgiven debt, and outstanding debt. This conforms to the intent of the legislation and avoids treating a PHA that has had all debt forgiven differently from an otherwise identical PHA with a large outstanding debt obligation because the debt instruments used were not subject to forgiveness.

The average monthly operating expense is one-twelfth of the sum of: (1) all annual operating expenses reported on the Statement of Operating Receipts and Expenditures as of the end of the most recent fiscal year and (2) the aggregate annual utility allowances for all tenant paid utilities; *minus* the sum of (1) excess utility charges and (2) annual costs, if any, associated with units approved for deprogramming.

The sum of the debt service and operating expenses, or TAMA, is to be distributed over all PHA units, except those approved for deprogramming, whether or not ceiling rents are proposed for all units, with an adjustment only for unit size (number of bedrooms), with a larger unit to receive a larger portion of the PHA's TAMA than a smaller unit.

The distribution by unit size is accomplished using a unit rent relationship, which is based on the rent of a two-bedroom unit (100%). The rent relationships vary from 70% of the two-bedroom rent for an efficiency to 162% of the two-bedroom rent for a six-bedroom unit. The adjustment factors for all units are as follows: Zero-bedroom units (efficiencies), 0.70; one-bedroom units, 0.85; two-bedroom units, 1.00; three-bedroom units, 1.25; four-bedroom units, 1.40; five-bedroom units, 1.61; six-bedroom units, 1.62.

When calculating the *minimum* amount that ceiling rents in public housing projects may be, *i.e.,* the average monthly debt service and operating expenses attributed to units of similar size owned by the PHA, a PHA may follow the three-step procedure shown in the example in the appendix to this notice. The result of the procedure is the *minimum* that the ceiling rent may be. However, HUD believes that it is fair and in keeping with the purpose of section 102(a) that ceiling rents should be set at an amount equal to the current effective Section 8 FMRs for existing housing in the same area or, if a PHA determines that the FMRs substantially exceed or understate the fair rental value of some or all of the PHA's units, an amount equal to comparable unassisted rental housing in the area, provided such amounts are not less than

VOL 54 ISS 49 MR 15 1989 UMI

the statutory minimum. FMRs for each fiscal year are published annually by HUD in the **Federal Register**.

**V. Requirements for HUD Approval**

To gain the necessary waiver of the income-based rent requirement of 24 CFR 913.107 and permission to adopt ceiling rents in a public housing project or projects owned and operated by a PHA, the PHA must submit a written request to the appropriate HUD Field Office and must:

(1) State the number of families currently residing in units owned and operated by the PHA that are paying rent of an amount calculated as required by 24 CFR 913.107 that is greater than the current effective Fair Market Rent (FMR) under the Section 8 Existing Housing Certificate Program for that locality or, if the proposed ceiling rents are based on the results of a comparability study conducted by the PHA, greater than rents of projects and/or units used as the basis for the study;

(2) State the unit sizes and projects, the ceiling rents proposed in each case, and the number of units to which each ceiling rent will apply;

(3) State the statutory minimum ceiling rent for each unit size for which ceiling rents are proposed (the average monthly amount of debt service and operating expenses attributed to units of similar size in projects owned and operated by the PHA);

(4) State whether the proposed ceiling rents are Section 8 Existing Fair Market Rents, are based on a comparability survey, or are the statutory minimum ceiling rent. If the proposed ceiling rents are based on a comparability survey, provide information on the survey, identify the rents of unassisted projects and/or units which are generally comparable to the projects and/or units designed for ceiling rents, and show any adjustments made to the private market rents for any differences between the private market units and the public housing units that would affect the rental value, such as amenities, locations, design, age, condition, size, or other characteristics; and

(5) Estimate the direct financial impact of the ceiling rents by stating the number of families affected, the average dollar amount of rent reduction per family, and the total cost of the rent reductions.

The HUD Field Office will notify the PHA in writing whether the requirements of 24 CFR 913.107 will be waived and permission granted to adopt ceiling rents as proposed in the PHA's application. HUD's decision will be based upon the need for rent relief in the units for which ceiling rents are proposed as determined by the number of families paying excessive rents compared to the FMRs for the area or rents for comparable unassisted housing.

**VI. Other Matters**

The collection of information requirements contained in this Notice have been submitted to the Office of Management and Budget for review under section 3504(h) of the Paperwork Reduction Act of 1980 (44 U.S.C. §§ 3501 et seq.) and approved. Sections IV and V of this Notice has been determined by the Department to contain collection of information requirements. Information on these requirements is provided as follows:

| Description | Number of respondents | Responses per respondent | Total annual responses | Hours per response | Total hours |
|---|---|---|---|---|---|
| Section IV: | | | | | |
| Determining ceiling rents | 775 | 1 | 775 | 5 | 3,875 |
| Section V: | | | | | |
| Gathering data to submit for approval | 775 | 1 | 775 | 12 | 9,300 |
| Revise, adopt and implement policies and procedures | 775 | 1 | 775 | 2 | 1,550 |
| Recordkeeping: | | | | | |
| Create files to retain copies of package submitted for HUD approval | | | | | |
| Create logs to track interim determination for families who go off and on program due to change in income | 775 | 1 | 775 | 1 | 775 |
| Total estimated annual burden | | | | | 15,500 |

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332. The Finding is available for public inspection during regular business hours at the Office of Rules Docket Clerk, Room 10276, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410.

The General Counsel, as the Designated Official under Executive Order 12606, *The Family*, has determined that this Notice does not have a potential significant impact on family formation, maintenance, and general well-being and, thus, is not subject to review under the Order. The Notice merely announces an alternative method of setting tenant payments for rent in public housing, which will assist families to afford decent, safe, and sanitary housing of their choice. The General Counsel has also determined, as the Designated Official for HUD under section 6(a) of Executive Order 12612, *Federalism*, that the policies contained in this Notice do not have federalism implications and, thus, are not subject to review under that Order.

Dated: March 9, 1989.

**APPENDIX**

*Example for Determining Average Monthly Debt Service and Operating Expenses for Units of Similar Size*

*Step 1*

| | |
|---|---|
| 1. Operating expenses (Line 620) from the Statement of Operating Receipts and Expenditures for the PHA's most recent fiscal year | $190,000 |
| 2. Cost of utility allowances for tenant-paid utilities for the PHA's most recent fiscal year | 30,000 |
| 3. Add line 1 and line 2 | 220,000 |
| 4. Cost of excess utilities (Line 070) from Form HUD–52599 for the PHA's most recent fiscal year | 5,200 |

| | |
|---|---|
| 5. Costs associated with deprogrammed units, if any, for the PHA's most recent fiscal year | 0 |
| 6. Add line 4 and line 5 | 5,200 |
| 7. Subtract line 6 from line 3 | 214,800 |
| 8. Imputed debt service costs based upon total development and modernization costs (this figure will be provided to the PHA by the HUD Field Office upon request) | 120,000 |
| 9. Add lines 7 and 8 | 334,800 |
| 10. Total average monthly amount (line 9 divided by 12) | 27,900 |

*Step 2*

| | |
|---|---|
| Number of units owned by PHA* | |
| Times adjustment factor: | |
| 0-bedroom units 20×0.70 | 14 |
| 1-bedroom units 40×0.85 | 34 |
| 2-bedroom units 20×1.00 | 20 |
| 3-bedroom units 20×1.25 | 25 |
| 4-bedroom units 0×1.40 | 0 |
| 5-bedroom units 0×1.61 | 0 |
| 6-bedroom units 0×1.82 | 0 |
| Total | 93 |

*Whether or not ceiling rent is proposed for these units, and irrespective of the method of financing on any individual project or class of dwelling units.

*Step 3*

| | |
|---|---|
| Calculate the two-bedroom minimum monthly rent: | |
| 1. Enter line 10 from Step 1 | 27,900 |
| 2. Enter Total from Step 2 | 93 |
| 3. Calculate 2-bedroom minimum monthly rent (line 1 divided by line 2 | 300 |
| 4. Calculate the minimum monthly rents for other size units: | |
| a. 0-bedroom (line 3×.70) | 210 |
| b. 1-bedroom (line 3×.85) | 255 |
| c. 3-bedroom (line 3×1.25) | 375 |
| d. 4-bedroom (line 3×1.40) | N/A |
| e. 5-bedroom (line 3×1.61) | N/A |
| f. 6-bedroom (line 3×1.82) | N/A |

**Meetings; National Public Lands Advisory Council**

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of meeting of the National Public Lands Advisory Council.

**SUMMARY:** Notice is hereby given that the National Public Lands Advisory Council will meet April 13 and 14, 1989. The meeting will be held in Room 7000 A&B of the Main Interior Building, 18th and C Streets, NW., Washington, DC. The meeting hours will be 8:00 a.m. to 12:00 p.m. on Thursday, April 13, and 8:00 a.m. to 5:00 p.m. on Friday, April 14. The proposed agenda for the 2-day meeting is:

*Thursday, April 13:* Morning: Election of Council Officers for 1989; Status report on natural resource legislation;

VOL 54 ISS 49 MR 15 1989 UMI

Discussion and presentation of Council resolutions to Secretary of the Interior; Address by Interior Secretary Manuel Lujan, Jr., Meeting of Council Subcommittees (Energy and Minerals, Lands, and Renewable Resources).

*Friday, April 14:* Morning: Council old and new business, to include setting of agendas for future Council sessions and status report on the wild horse and burro program; Meeting of Council Subcommittees.

Afternoon: Public statement period; Final meetings of Council Subcommittees; Reports from Subcommittees to full Council and consideration of Council resolutions.

All meetings of the Council are open to the public. Opportunity will be given for members of the public to make oral statements to the Council, beginning at 1:00 p.m. on Friday, April 14. Speakers should address national public lands issues and are encouraged to submit a copy of their written comments by April 7 to the Bureau of Land Management's Washington, DC, office of at the address listed below. Depending on the number of people who wish to address the Council, it may be necessary to limit the length of oral presentations.

**DATES:** April 13 and 14—Council Meeting. April 14—Public Statements.

**ADDRESS:** Copies of public statements should be mailed by April 7 to: Director (150), Bureau of Land Management, MS–5558, Department of the Interior, Washington, DC 20240.

**FOR FURTHER INFORMATION CONTACT:** Karen Slater, Washington, DC Office, Bureau of Land Management, telephone (202) 343–5101.

**SUPPLEMENTARY INFORMATION:** The Council advises the Secretary of the Interior through the Director, Bureau of Land Management, regarding policies and programs of a national scope related to public lands and resources under the jurisdiction of BLM.

### Gulf of Mexico Region; Availability of the Draft Environmental Impact Statement and Intent To Hold Public Hearings Regarding Proposed Central and Western Gulf of Mexico Sales 123 (March 1990) and 125 (August 1990)

**March 10, 1989.**

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Minerals Management Service (MMS) has prepared a draft Environmental Impact Statement (EIS) relating to the proposed 1990 Outer Continental Shelf (OCS) oil and gas lease sales of available unleased blocks in the central and western Gulf of Mexico (GOM). The proposed Central Gulf Sale 123 will offer for lease approximately 32.1 million acres, and the Western Gulf Sale 125 will offer approximately 27.8 million acres. Single copies of the draft EIS can be obtained from the Minerals Management Service, Gulf of Mexico Region, Attention: Public Information Office, 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana 70123.

Copies of the draft EIS will be available for review by the public in the following libraries: Austin Public Library, 402 West Ninth Street, Austin, Texas; Houston Public Library, 500 McKinney Street, Houston, Texas; Dallas Public Library, 1513 Young Street, Dallas, Texas; Brazoria County Library, 410 Brazoport Boulevard, Freeport, Texas; LaRatama Library, 506 Mesquite Street, Corpus Christi, Texas; Texas Southmost College Library, 1825 May Street, Brownsville, Texas; Rosenberg Library, 2310 Sealy Street, Galveston, Texas; Texas State Library, 1200 Brazos Street, Austin, Texas; Texas A&M University, Evans Library, Spence and Lubbock Streets, College Station, Texas; University of Texas, Lyndon B. Johnson School of Public Affairs Library, 2313 Red River Street, Austin, Texas; The University of Texas at Dallas Library, 2801 North Floyd Road, Richardson, Texas; Lamar University, Gray Library, Virginia Avenue, Beaumont, Texas; Texas Tech University, Law Library, 1802 Hartford Street, Lubbock, Texas; East Texas State University Library, 2600 Neal Street, Commerce, Texas; Stephen F. Austin State University, Steen Library, Wilson Drive, Nacogdoches, Texas; University of Texas, 21st and Speedway Streets, Austin, Texas; University of Texas Law School, Tarlton Law Library, 727 East 26th Street, Austin, Texas; Baylor University Library, 13125 Third Street, Waco, Texas; University of Texas at Arlington, 701 South Cooper Street, Arlington, Texas; University of Houston-University Park, 4800 Calhoun Boulevard, Houston, Texas; University of Texas at El Paso, Wiggins Road and University Avenue, El Paso, Texas; Abilene Christian University, Margaret and Herman Brown Library, 1600 Campus Court, Abilene, Texas; Texas Tech University Library, 18th and Boston Street, Lubbock, Texas; University of Texas at San Antonio, John Peace Boulevard, San Antonio, Texas; Tulane University, Howard Tilton Memorial Library, 7001 Freret Street, New Orleans, Louisiana; Louisiana Tech University, Prescott Memorial Library, Everet Street, Ruston, Louisiana; New Orleans Public Library, 219 Loyola Avenue, New Orleans, Louisiana; Louisiana State Library, 760 Riverside Road, Baton Rouge, Louisiana; Lafayette Public Library, 301 W. Congress Street, Lafayette, Louisiana; Calcasieu Parish Library, 411 Pujo Street, Lake Charles, Louisiana; McNeese State University, Luther E. Frazar Memorial Library, Ryan Street, Lake Charles, Louisiana; Nicholls State University, Nicholls State Library, Leighton Drive, Thibodaux, Louisiana; University of Southwestern Louisiana, Dupre Library, 302 East St. Mary Boulevard, Lafayette, Louisiana; LUMCOM, Library, Star Route 541, Chauvin, Louisiana; Harrison County Library, 14th and 21st Avenues, Gulfport, Mississippi; Gulf Coast Research Lab., Gunter Library, 703 East Beach Drive, Ocean Springs, Mississippi; Auburn University at Montgomery, Library, Taylor Road, Montgomery, Alabama; University of Alabama Libraries, 809 University Boulevard East, Tuscaloosa, Alabama; Mobile Public Library, 701 Government Street, Mobile, Alabama; Montgomery Public Library, 445 South Lawrence Street, Montgomery, Alabama; Gulf Shores Public Library, Municipal Complex, Route 3, Gulf Shores, Alabama; Dauphin Island Sea Lab, Marine Environmental Science Consortium, Library, Bienville Boulevard, Dauphin Island, Alabama; University of South Alabama, University Boulevard, Mobile, Alabama; University of Florida Libraries, University Avenue, Gainesville, Florida; Florida A&M University, Coleman Memorial Library, Martin Luther King Boulevard, Tallahassee, Florida; Florida Atlantic University, Library, 20th Street, Boca Raton, Florida; University of Miami Library, 4600 Rickenbacker Causeway, Miami, Florida; University of Florida, Holland Law Center Library, Southwest 25th Street and 2nd Avenue, Gainesville, Florida; St. Petersburg Public Library, 3745 Ninth Avenue North, St. Petersburg, Florida; West Florida Regional Library, 200 West Gregory Street, Pensacola, Florida; Florida Northwest Regional Library System, 25 West Government Street, Panama City, Florida; Leon County Public Library, 127 North Monroe Street, Tallahassee, Florida; Lee County Library, 3355 Fowler Street, Fort Myers, Florida; Charlotte-Glades Regional Library System, 2280 NW Aaron Street, Port Charlotte, Florida; Tampa-Hillsborough County Public Library System, 800 North Ashley Street, Tampa, Florida; Key Largo Public Library, 99551 No. 3 Overseas Highway, Key Largo, Florida; Selby Public Library, 1001 Boulevard of the Arts, Sarasota, Florida; Monroe County Public Library, 700 Fleming Street, Key West, Florida.

Two public hearings pertaining to these lease sales will be held at the following locations and times: Minerals Management Service, Gulf of Mexico OCS Region, 1201 Elmwood Park Boulevard, Conference Room 111, New Orleans, Louisiana 70123, April 25, 1989, 9:00 a.m.; Rosenberg Library, 2310 Sealy, Room 125, Galveston, Texas 77550, April 25, 1989, 9:00 a.m. The purpose of these public hearings is to provide the Department of the Interior and MMS with information from individuals, public and private groups, and Government Agencies to further evaluate the potential effects of the proposed lease sales. Pertinent testimony and comments will be addressed in the final EIS for Sales 123 and 125.

Persons who wish to testify at these hearings are requested to contact the Regional Supervisor, by writing the Office of Leasing and Environment (LE–2), Gulf of Mexico Region, 1201 Elmwood Park Boulevard, Room 311, New Orleans, Louisiana 70123, or by telephone (504) 736–2540, no later than 3:30 p.m., April 21, 1989. Unscheduled speakers may have an opportunity to speak following testimony of those who have made arrangements in advance, if time permits. Oral testimony should be limited to 10 minutes. Testimony may be supplemented by a written statement which, if submitted at a hearing, will be considered as part of the hearing record. Those unable to attend the hearing may submit written statements until the close of the comment period, May 9, 1989. Written statements will receive the same degree of consideration in the final EIS as oral testimony presented at the hearing.

### Onshore Oil and Gas Production Accounting, Transfer of Responsibility

**AGENCY:** Minerals Management Service (MMS), Interior.

**ACTION:** Notice to lease operators to report onshore production data.

**SUMMARY:** On May 9, 1988, the Minerals Management Service (MMS) published a Notice of Final Rulemaking in the **Federal Register** [53 FR 16408] to amend its regulations to provide for lease operators to report onshore production data to MMS, as a result of the transfer of accounting responsibility from the Bureau of Land Management (BLM). As stated in the Final Rule, MMS is following a phased conversion schedule to accomplish the transfer. Phases 1A and 1B conversions have been completed. The purpose of this notice is to inform operators on onshore leases/agreements that phases 2, 3, and 4 will be converted simultaneously. These operators will begin reporting production data to MMS for the August 1989 production month, the report for which is due to MMS by October 15, 1989.

*Conversion Date:* Phases 2, 3, and 4 operators are required to begin reporting onshore production data to MMS for the August 1989 production month, the report for which is due to MMS by October 15, 1989.

**FOR FURTHER INFORMATION CONTACT:** John Russo, Deputy Chief, Production Accounting Division, Royalty Management Program, Minerals Management Service, Denver Federal Center, Building 85, P.O. Box 25165, Mail Stop 657, Denver, Colorado 80225, (303) 231–3520.

**SUPPLEMENTARY INFORMATION:** Phase 1a of the conversion schedule transferred leases/agreements under the jurisdiction of the Rawlins, Wyoming, BLM District Office. Phase 1b converted leases/agreements under the jurisdiction of the Colorado, Montana, and Utah BLM State Offices and the remaining leases/agreements under the jurisdiction of the Wyoming BLM State Office. Phases 2, 3, and 4 convert leases/agreements under the jurisdiction of the Alaska, California, Eastern States, Nevada, and New Mexico (which includes the Tulsa District Office) BLM State Offices.

Prior to the conversion date, MMS will provide affected operators with information regarding various aspects of the conversion. This information will include a listing of all leases, agreements, and well reference data in MMS's data base for purposes of comparison and reconciliation prior to conversion.

Affected operators will be assigned a unique five-digit operator number which is required to be reported on the Monthly Report of Operations, form MMS–3160.

The MMS will also provide operators with reporting instructions and training sessions to facilitate an orderly transfer of production reporting from BLM.

Dated: March 8, 1989.

## INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

### Agency For International Development

### Microenterprise Advisory Committee; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act, notice is hereby given of the A.I.D. Microenterprise Advisory Committee meeting on April 3, 1989 at the Westpark Hotel, 1900 North Fort Myer Drive, Rosslyn, Virginia. The Committee will discuss guidelines for the implementation of the Agency for International Development's microenterprise program in light of the Agency's microenterprise stocktaking exercise and its FY 1989 microenterprise obligations package.

The meeting will begin at 9:00 a.m. and adjourn at 5:00 p.m. on April 3. The meeting is open to the public. Any interested persons may attend, file written statements with the Committee before or after the meeting, or may present oral statements in accordance with procedures established by the Committee and the extent the time available for the meeting permits.

Dr. Michael Farbman, Chief Employment and Enterprise Development Division, Office of Rural and Institutional Development, Bureau for Science and Technology, is designated as the A.I.D. representative at the meeting. Dr. Rose E. Bigelow, of the same Division, may be deputized to act for Dr. Farbman during part or all of this meeting. It is suggested that those who wish more specific information concerning this meeting contact Dr. Bigelow, 1601 N. Kent Street, Arlington, Virginia 22209, call 704–235–8984.

## INTERNATIONAL TRADE COMMISSION

**[Determination in Investigation No. 731–TA–207 (Final–Remand)]**

### Cellular Mobile Telephones and Subassemblies Thereof from Japan

In 1985, the U.S. International Trade Commission determined in Investigation No. 731–TA–207 (Final) that an industry in the United States was materially injured by reason of imports from Japan of Cellular Mobile telephones and subassemblies thereof, provided for in items 685.28 and 685.32 of the Tariff Schedules of the United States, that were found by the Department of Commerce to be sold in the United States at less than fair value (USITC Pub. No. 1766 (1985)). That determination was subsequently appealed to The U.S. Court of International Trade and remanded to the Commission for further consideration (*Mitsubishi Electirc Corporation, et al.*, v. *United States and Motorola, Inc.*, Slip Op. 88–152 (October 31, 1988)). On the basis of its consideration of the record [1] developed in its remand investigation, the Commission has made a unanimous affirmative determination.[2] The views were submitted to the Court in response to the remand.

The views of the Commission are contained in USITC Publication 2155 (February 1989), entitled "Cellular Mobile Telephones and Subassemblies Thereof from Japan: Views on Remand in Investigation No. 731–TA–207 (Final)."

By Order of the Commission.

[1] The record is defined in § 207.2(i) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(i)).

[2] Commissioner Brunsdale, Cass, and Newquist, not present in the initial case, determined on the basis of consideration of the record as supplemented by the remand investigation, that an industry in the United States was materially injured by reason of imports of cellular mobile telephones and subassemblies thereof from Japan.

**[Investigation No. 337–TA–283]**

### Certain Crystalline Cefadroxil Monohydrate; Investigation

**AGENCY:** International Trade Commission.

**ACTION:** Institution of investigation pursuant to 19 U.S.C. 1337 and provisional acceptance of motion for temporary relief.

**SUMMARY:** Notice is hereby given that a complaint and a motion for temporary relief were filed with the U.S. International Trade Commission on February 1, 1989, under section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), on behalf of Bristol-Myers Company, 345 Park Avenue, New York, New York 10154. The complaint and motion for temporary relief were supplemented on February 24, 1989.

The complaint, as supplemented, alleges violation of subsection (a)(1)(B) of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation by the owner, importer, or consignee, of certain crystalline cefadroxil monohydrate by reason of alleged direct and induced infringement of U.S. Letters Patent 4,504,657; and that there exists an industry in the United States as required by subsection (a)(2) of the section 337. Complainant requests that the Commission institute an

investigation and, after a full investigation, issue a permanent exclusion order and permanent cease and desist orders.

The motion for temporary relief, as supplemented, requests that the Commission issue a temporary exclusion order and temporary cease and desist orders prohibiting the importation into and sale in the United States of infringing crystalline cefadroxil monohydrate.

**ADDRESSES:** The complaint and motion for temporary relief, except for any confidential information contained therein, are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., Room 112, Washington, DC 20436, telephone 202–252–1802. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–252–1810.

**FOR FURTHER INFORMATION CONTACT:** Cheri M. Taylor, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, telephone 202–252–1568.

**AUTHORITY:** The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930, as amended, and in § 210.12 of the Commission's Interim Rules of Practice and Procedure, 53 FR 33034, 33057 (Aug. 29, 1988). The authority for provisional acceptance of the motion for temporary relief is contained in § 210.24(e)(8) of the Commission's Interim Rules of Practice and Procedure, 53 FR 33034, 33061 (Aug. 29, 1988).

**SCOPE OF INVESTIGATION:** Having considered the complaint and motion for temporary relief, the U.S. International Trade Commission, on March 8, 1989, *Ordered That*—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended, an investigation be instituted to determine whether there is a violation of subsection (a)(1)(B) of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation by the owner, importer, or consignee, of certain crystalline cefadroxil monohydrate by reason of alleged direct or induced infringement of the claim of U.S. Letters Patent 4,504,657, and whether there exists an industry in the United States as required by subsection (a)(2) of section 337.

(2) Pursuant to § 210.24(e)(8) of the Commission's rules, the motion for temporary relief under subsection (e) of section 337 of the Tariff Act of 1930, which was filed with the complaint, be provisionally accepted for referral to an administrative law judge.

(3) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is—

Bristol-Myers Company, 345 Park Avenue, New York, New York 10154.

(b) The respondents are the following companies alleged to be in violation of section 337, and are the parties upon which the complaint and motion for temporary relief are to be served:

Istituto Biochimico, Italiano Industria Giovanni, Lorenzini S.p.A., Via G. Lorenzini 2–4, 20139 Milano, Italy

Kalipharama, Inc., 200 Elmora Avenue, Elizabeth, New Jersey 07207

Purepac Pharmaceutical Co., 200 Elmora Avenue, Elizabeth, New Jersey 07207

Biocraft Laboratories, Inc., 92 Route 46, Elmwood Park, New Jersey 07407

Institut Biochimique, S.A., Via al Ponte 13, 6900 Massagno, Switzerland

Gema S.A., Via Agusta 158, Planta 7, 08006 Barcelona, Spain

(c) Cheri M. Taylor, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, 500 E Street S.W., Room 401J, Washington, DC 20436, shall be the Commission investigative attorney, party to this investigation; and

(4) For the investigation and temporary relief proceedings so instituted, Janet D. Saxon, Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding administrative law judge.

Responses to the complaint, the motion for temporary relief and the notice of investigation must be submitted by the named respondents in accordance with §§ 210.21 and 210.24 of the Commission's Interim Rules of Practice and Procedure, 53 FR 33034, 33059–33063 (Aug. 29, 1988) and 53 FR 49118, 49129–49133 (Dec. 6, 1988). Pursuant to §§ 201.16(d), 210.21(a), and 210.24(e)(9) of the Commission's Rules (19 CFR 201.16(d), 53 FR 33034, 33059 and 53 FR 49118, 49130–49131), such responses will be considered by the Commission if received not later than ten (10) days after the date of service by the Commission of the complaint, the motion for temporary relief and the notice of investigation. Extensions of time for submitting responses to the complaint, the motion for temporary relief and the notice of investigation will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint, in the motion for temporary relief and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint, the motion for temporary relief, and this notice, and to authorize the administrative law judge and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint, motion for temporary relief and this notice, and to enter both an initial determination and a final determination containing such findings, and may result in the issuance of a limited exclusion order or a cease and desist order or both directed against such respondent.

By order of the Commission.

### Certain Electric Power Tools Battery Cartridges and Battery chargers; Initial Determination Terminating Respondent on the Basis of Settlement Agreement

**AGENCY:** International Trade Commission.

**ACTION:** Notice is hereby given that the Commission has received an initial determination from the presiding officer in the above-captioned investigation terminating the following respondent on the basis of a settlement agreement: Robert Bosch Power Tool Corporation.

**SUPPLEMENTARY INFORMATION:** This investigation is being conducted pursuant to section 337 of the Tariff Act of 1930 (19 U.S.C. 1337). Under the Commission's rules, the presiding officer's initial determination will become the determination of the Commission thirty (30) days after the date of its service upon the parties, unless the Commission orders review of the initial determination. The initial determination in this matter was served upon the parties on March 7, 1989.

Copies of the initial determination, the settlement agreement, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, S.W., Washington, DC 20436, telephone 202–252–1000. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the

**[Investigation No. 332–271]**

## Lime From Mexico; Investigation and Hearing

**AGENCY:** United States International Trade Commission.

**ACTION:** Institution of investigation and scheduling of public hearing.

**SUMMARY:** Following receipt on February 8, 1989, of a request from the U.S. Trade Representative (USTR), the Commission instituted investigation No. 332–271 under section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)) (the act). As requested by USTR, the Commission will report to the President on the probable economic effect on an industry in the United States of revocation by the Department of Commerce of the outstanding countervailing duty order on lime from Mexico, provided for in subheadings 2522.10.00, 2522.20.00 and 2522.30.00 of the Harmonized Tariff Schedule of the United States. In accordance with USTR's request, the Commission will submit its report to the President within 150 days of the date of the request, or by July 10, 1989.

**EFFECTIVE DATE:** February 8, 1989.

**FOR FURTHER INFORMATION CONTACT:** Elizabeth Haines (202–252–1200), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–252–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–252–1000.

### Background and Scope of Investigation

On February 8, 1989, the Commission received a request from the USTR (copy attached) to "conduct an investigation into, and report to the President on whether, the probable economic effect on an industry in the United States of revocation by the Department of Commerce of the outstanding countervailing duty order on lime from Mexico, 49 FR 35672, would be such that (1) an industry in the United States would be materially injured, or would be threatened with material injury, or (2) the establishment of an industry in the United States would be materially retarded." USTR further stated that the terms used in its request are defined at 19 U.S.C. 1677.

### Public Hearing

The Commission will hold a public hearing in connection with this investigation beginning at 9:30 a.m. on May 16, 1989, at the U.S. International Trade Commission Building, 500 E Street SW, Washington, DC. All persons will have the opportunity to appear by counsel or in person, to present information, and to be heard.

Requests to appear at the public hearing should be filed with the Secretary, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, not later than the close of business (5:15 p.m.) on May 10, 1989. If the number of persons requesting an opportunity to appear by counsel or in person is large, limitation of time for the presentation of oral testimony is in the public interest to ensure that all viewpoints are aired. Accordingly, in scheduling appearances at the hearing, the time to be allotted to witnesses for the presentation of oral testimony will be limited. The Commission will determine appropriate allocations of time based on the number of persons requesting an opportunity to appear. Questioning of witnesses will be limited to members of the Commission and its staff and witnesses should be prepared to provide additional information in response to such questioning.

Any written materials presented at the hearing must be submitted in accordance with the requirements of § 201.8 of the Commission's *Rules of Practice and Procedure* (19 CFR 201.8).

### Written Submissions

Interested persons are invited to submit written statements in the form of one prehearing and/or one posthearing statement (as described below) concerning the investigation, in lieu of, or in addition to, appearances at the public hearing. Commercial or financial information that a submitter desires that the Commission treat as confidential must be submitted on separate sheets of paper, each clearly marked "Confidential Business Information" at the top. All submissions requesting confidential treatment must conform with the requirements of § 201.6 of the Commission's *Rules of Practice and Procedure* (19 CFR 201.6).

A signed original and fourteen (14) copies of each written statement must be submitted to the Commission in accordance with § 201.8(d) of the Commission's rules (19 CFR 201.8(d)). All written submissions, except for confidential business information, will be made available for inspection by the public during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary to the Commission.

Persons who intend to submit a written statement to the Commission should so inform the Secretary of the Commission no later than the close of business on May 10, 1989. To be assured of consideration by the Commission, a prehearing statement should be submitted not later than the close of business on May 15, 1989. Posthearing statements must be submitted not later than the close of business on May 25, 1989.

The Secretary will prepare a service list containing the names and addresses of all persons, or their representatives, who have requested an opportunity to appear at the public hearing or who have indicated an intention to submit a written statement. The service list will be made available to the public on May 11, 1989. The Commission encourages all persons or counsel therefor filing a written statement with the Commission to serve a non-confidential copy of such statement on each person on the service list.

### Release of Data

A public version of the tables prepared for inclusion in the Commission's report will be released to

the persons on the service list on May 5, 1989.

By order of the Commission.

**Kenneth R. Mason,**

*Secretary.*

## DEPARTMENT OF JUSTICE

### Office of Juvenile Justice and Delinquency Prevention

### Missing Children's Assistance Act Final Program Priorities

**AGENCY:** Office of Juvenile Justice and Delinquency Prevention.

**ACTION:** Notice of Final FY 1989 Research, Demonstration, and Service Program Priorities and Merit Selection Criteria under the Missing Children's Assistance Act.

**SUMMARY:** The Office of Juvenile Justice and Delinquency Prevention (OJJDP) is publishing its final program priorities for making grants and contracts under the Missing Children's Assistance Act, title IV, section 405, of the Juvenile Justice and Delinquency Prevention Act of 1974, as amended by the Juvenile Justice and Delinquency Prevention amendments of 1988, subtitle F of title VII of Pub. L. 100–690, November 18, 1988.

**FOR FURTHER INFORMATION CONTACT:** Mary Witten Neal, Director, Missing Children's Program, Office of Juvenile Justice and Delinquency Prevention, 633 Indiana Avenue NW., Washington, DC 20531, (202) 724–7655.

**SUPPLEMENTARY INFORMATION:** Responsibility for establishing annual research, demonstration, and service program priorities and criteria for making grants and contracts pursuant to section 405 of the Missing Children's Assistance Act rests with the Administrator of the Office of Juvenile Justice and Delinquency Prevention. For FY 1989, the final funding priorities for section 405 will be the continuation of three programs. The Acting Administrator is hereby announcing these priorities, specifying merit and performance criteria to be applied in their review.

Listed below are programs currently funded under section 405 of the Missing Children's Assistance Act that will be considered for continued funding in FY 1989 under their existing project period grants.

### The Child Victim as Witness Research and Development Program

This program implements and tests new strategies to be used to improve court policies and practices for handling child victim witnesses (405(a)(6)).

### Families of Missing Children: Psychological Consequences and Promising Interventions

The purpose of this project is to increase our knowledge of, and develop effective treatment alternatives for, the psychological consequences to families with missing and exploited children (405(a)(4) (A) and (B)).

### Reunification of Missing Children

The purpose of this development initiative is to identify promising or effective strategies to assist families in adjusting to the return of a missing child (405(a)(7)).

The following criteria, based on merit, will be considered in assessing the three noncompeting continuation applications (a noncompeting continuation grant is made in support of a new budget period within an approved and existing project period):

(1) The results of title IV funding under the recipient's current award justify further program activity;

(2) The recipient has promptly submitted all required reports;

(3) Adequate grantor agency funds are available to support the project;

(4) The recipient has shown satisfactory progress in achieving the objectives of the project and has met all material terms and conditions of the award;

(5) The recipient's management practices have provided adequate stewardship of grantor agency funds; and

(6) Any other reason that would indicate continued funding would be in the best interest of the Government.

Dated: March 9, 1989.

Approved:

**Diane M. Munson,**

## DEPARTMENT OF LABOR

### Office of the Secretary

### Commission on Workforce Quality and Labor Market Efficiency; Meeting

The Commission on Workforce Quality and Labor Market Efficiency was established under the provisions of the Federal Advisory Committee Act to increase the excellence of the American workforce.

A public meeting of the Commission on Workforce Quality and Labor Market Efficiency will be held on April 4, 1989, commencing at 1:00 p.m., in room S–2506 of the Department of Labor, 200 Constitution Avenue, NW., Washington, DC.

The purpose of the meeting is to focus on the specific recommendations that the Commissioners wish to consider and refine in subsequent meetings.

**FOR FURTHER INFORMATION CONTACT:** Laurie J. Bassi, Deputy Director, Commission on Workforce Quality and Labor Market Efficiency, U.S. Department of Labor, 200 Constitution Avenue, NW. Room C–2313, Washington, DC 20210, telephone (202) 523–6836.

Individuals or organizations wishing to submit written statements to the Commission on Workforce Quality and Labor Market Efficiency should send 40 copies to the address given above. Papers will be accepted and included in the record of the meeting if received on or before March 28, 1989.

On May 4, 1989 and thereafter, official records of the meeting will be available for public inspection at: Department of Labor, 200 Constitution Avenue, Room C–2313, Washington, DC.

Signed at Washington, DC., this 9th day of March 1989.

### Office of the Assistant Secretary for Veterans' Employment and Training

### Funding for Fiscal Year 1989; Stewart B. McKinney Homeless Assistance Act; Homeless Veterans' Reintegration Projects

**AGENCY:** Office of the Assistant Secretary for Veterans' Employment and Training.

**ACTION:** Notice.

**SUMMARY:** This notice sets forth the Fiscal Year 1989 funding procedures for Homeless Veterans' Reintegration Projects (HVRP) operating under Title VII, Subtitle C, section 738 of the Stewart B. McKinney Homeless Assistance Act. Grantees which were funded under the competitive process held by the U.S. Department of Labor, Office of the Assistant Secretary for Veterans' Employment and Training, in FY 1988 will be given the opportunity to apply for additional funds and for a

VOL 54 ISS 49 MR 15 1989 UMI

program extension through September 30, 1990. The purpose of these programs is to expedite the reintegration of homeless veterans into the labor force.

**DATE:** During March 1989, application instruction will be sent to the current HVRP grantees which were funded through the FY 1988 competitive process as described below. Applications will be due at least sixty days prior to the expiration date of the FY 1988 HVRP grants, but in all cases must be submitted no later than July 15, 1989. Awards will be made between July 1 and September 30, 1989.

**FOR FURTHER INFORMATION CONTACT:** Ms. Christine Chudd, Office of the Assistant Secretary for Veterans' Employment and Training, 200 Constitution Ave., NW., Rm. S1316, Washington, DC 20210, Telephone (202) 523-9110.

**SUPPLEMENTARY INFORMATION:** The Office of the Assistant Secretary for Veterans' Employment and Training announces the availability of approximately $1.35 million to extend programs operated by FY 1988 HVRP grantees through September 30, 1990. These grantees were funded as a result of a competition held in FY 1988, and the recipients of the funds are State or local public agencies providing services to the following geographic areas: San Diego, California; San Jose, California; Denver, Colorado; Jacksonville, Florida; Atlanta, Georgia; Boston, Massachusetts; Detroit, Michigan; St. Louis, Missouri; New York City, New York; Portland, Oregon; Pittsburgh, Pennsylvania; Nashville, Tennessee; San Antonio, Texas; Olympia, Seattle, and Tacoma, Washington, (one grant); and Milwaukee, Wisconsin.

To determine funding levels for the second year, individual negotiations will be held with each grantee. Factors effecting the funding determination will include current spending rate, program performance to date, the number and needs of homeless veterans in the geographic area, and any adjustments to program design and would enhance the probability of long term job retention.

In all likelihood, those grantees with slow start-up will be funded at less than the first year level since carryover funds will be available for several months into the second year. Those grantees who will have little or no carryover funds will most likely receive an amount equal to or more than the first year depending on the factors noted above. It is anticipated that grantees will be funded at 75% to 125% of the first year level. However, the Office of the Assistant Secretary reserves the right not to fund grantees which are performing extremely poor and which show little promise of improvement in a second year of operation.

Signed at Washington, DC, this 9th day of March, 1989.

**Donald E. Shasteen,**

*Assistant Secretary for Veterans' Employment and Training.*

## Employment and Training Administration

### Accusonic Systems Corp. et al.; Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than March 27, 1989.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than March 27, 1989.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street, NW., Washington, DC 20213.

Signed at Washington, DC this 27th day of February 1989.

**Marvin M. Fooks,**

### A.J. Boyd Industries, Inc., Andover, NJ; Notice of Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on January 30, 1989 in response to a worker petition which was filed on behalf of workers at A.J. Boyd Industries, Incorporated, Andover, New Jersey.

The petitioner has requested that the petition be withdrawn. Consequently further investigation in this case would serve no purpose; and the investigation has been terminated.

Signed at Washington, DC this 24th of February 1989.

### Cardinal Drilling Co.; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on January 12, 1989, applicable to all workers of Cardinal Drilling Company, Billings, Montana.

The certification notice is amended to include the States where worker separations have occurred at Cardinal Drilling. Worker separations have occurred since October 1985 at Cardinal Drilling in North Dakota, South Dakota, and Nevada.

The intent of the certification is to cover all workers of the Cardinal Drilling Company in all of its locations. The amended notice applicable to TA-W-21,603 is hereby issued as follows:

All workers of Cardinal Drilling Company, Billings, Montana and operating in the States of North Dakota, South Dakota and Nevada who became totally or partially separated on or after October 1, 1985 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

In the matter of Cardinal Drilling Co.; TA-W-21,603 Billings, Montana and operating at various locations in the following States TA-W-21,603A North Dakota, TA-W-21,603B South Dakota; TA-W-21,603C Nevada.

Signed at Washington, DC, this 28th day of February 1989.

### Dixilyn-Field Drilling Co.; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

TA-W-21,713 Houston, TX
TA-W-21,713A Lafayette, LA

In accordance with section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on January 9, 1989 applicable to all workers of Dixilyn-Field Drilling Company, Houston, Texas.

Based on new information from the company, additional workers were separated from Dixilyn-Field Drilling Company, Lafayette, Louisiana during the period applicable to the petition. The notice, therefore is amended by including the Lafayette, Louisiana location.

The amended notice applicable to TA-W-21,713 is hereby issued as follows:

All workers of Dixilyn-Field Drilling Company, Houston, Texas and Lafayette.

VOL 54 ISS 49 MR 15 1989 UMI

Louisiana who became totally or partially separated from employment on or after October 1, 1985 and before August 30, 1987 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

### Hobart Corp.; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In the matter of Hobart Corporation

TA-W-19,671 Torrence Street, Dayton, Ohio.

TA-W-19,671A Huffman Avenue, Dayton, Ohio.

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Notice of Revised Determinations on Reconsideration on September 21, 1987 applicable to all workers of the Torrence Street Plant in Dayton, Ohio. The Department's denial for workers of the Huffman Avenue Plant was affirmed. The Notice of Revised Determinations was published in the **Federal Register** on September 30, 1987 (52 FR 36845).

Based on new information from the company, an additional worker was retained a few weeks after the September 1, 1987 termination date set in the revised determination. The worker had his claim under appeal with the State Agency until November 29, 1988. The intent of the Department's certification is to include all workers at the Torrence Street plant.

The amended notice applicable to TA-W-19,671 is hereby issued as follows:

All workers of Hobart Corporation's Torrence Street Plant, Dayton, Ohio who became totally or partially separated from employment on or after March 1, 1987 and before October 1, 1987 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

All workers of Hobart Corporation's Huffman Avenue Plant, Dayton, Ohio are denied.

Signed at Washington, DC, this 27th day of February 1989.

**[TA-W-21,730]**

### Kirkwood Oil & Gas, Casper, Wyoming; Revised Determination on Reconsideration

On February 15, 1989, the Department issued an Affirmative Determination Regarding Application for Reconsideration for workers and former workers at Kirkwood Oil & Gas, Casper, Wyoming. The affirmed notice regarding application for reconsideration will soon be published in the **Federal Register**.

The company provided additional information claiming that it was substantially involved in geological exploration on oil and gas lease properties through 1988.

On reconsideration, the Department found that Kirkwood Oil & Gas has been historically involved in geological exploration on oil and gas lease properties. Approximately half of Kirkwood's revenues were derived from geological prospecting through 1988. Kirkwood's prospecting revenues decreased in 1988 compared to 1985 and declined to only a minor share of its total revenues in 1988.

The exploration and drilling end of the crude oil and natural gas industry is particularly sensitive to the level of imports and changes in the price of crude oil. The impact of crude oil imports and reduced price levels has resulted in sharply declining U.S. exploration and drilling activity since 1985. The total number of U.S. wells completed dropped in 1985, 1986 and 1987.

The declines in revenues at Kirkwood Oil & Gas and the declines in employment in 1985 and 1986 resulted from a decreased demand for exploration and drilling activities from oil and gas industry clients due to the 32 percent increase in U.S. crude oil imports between 1985 and 1987 and the 66 percent drop in U.S. oil wells drilled between 1984 and 1987.

The preponderance of activities performed by workers of Kirkwood Oil & Gas after 1986 are not related to oil and gas drilling and exploration; therefore, workers of the firm from January 1, 1987 to October 31, 1987 are not eligible for the retroactive provisions of section 1421(a)(1)(B) of the Omnibus Trade and Competitiveness Act of 1988. Workers of Kirkwood Oil and Gas falling under the provisions of the Trade Act prior to the 1988 amendments are outside the scope of the Act since they do not produce an article within the meaning of section 222(3) of the Act. Accordingly, a termination date of January 1, 1987 is set in the revised notice of determination.

**Conclusion**

After careful review of the additional facts obtained on reconsideration, it is concluded that increased imports of articles like or directly competitive with crude oil contributed importantly to the decline in exploration activities and to the total or partial separation of workers at Kirkwood Oil & Gas, Casper, Wyoming. In accordance with the provisions of the Act and the retroactive provisions of section 1421(a)(1)(B) of the Omnibus Trade and Competitiveness Act of 1988, I make the following revised determination:

All workers of Kirkwood Oil & Gas, Casper, Wyoming who became totally or partially separated from employment on or after October 1, 1985 and before January 1, 1987 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, DC, this 2nd day of March 1989.

**Barbara Ann Farmer,**

*Director, Office of Program Management, UIS.*

### The Lee Apparel Co. Inc.; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In the matter of The Lee Apparel Co., Inc.

TA-W-22,291 BROADWAY, VIRGINIA

TA-W-22,324 LENEXA, KANSAS

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued Certifications of Eligibility to Apply for Worker Adjustment Assistance on February 13, 1989 applicable to all workers of The Lee Apparel Company, Incorporated in Broadway, Virginia and Lenexa, Kansas. The Certifications will soon be published in the **Federal Register**.

The Department inadvertently reversed the impact dates for the two worker groups at The Lee Apparel Company. The Broadway petition was dated December 12, 1988 while the Lenexa petition was dated December 1, 1988. The certification notice, therefore is amended by changing the impact date for the Broadway worker group to December 12, 1987 and the Lenexa worker group to December 1, 1987.

The amended notice applicable to TA-W-22,291 and TA-W-22,324 is hereby issued as follows:

All workers of The Lee Apparel Company, Incorporated, Broadway, Virginia who became totally or partially separated from emloyment on or after December 12, 1987 and before November 30, 1988 and all workers of The Lee Apparel Company Incorporated, Lenexa, Kansas who became totally or partially separated from employment on or after December 1, 1987 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, DC, this 2nd day of March 1989.

### S & P Manufacturing Andover, MA; Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on January 3, 1989 in response to a worker petition received on January 3, 1989 which was filed by the International Ladies' Garment Workers' Union on behalf of workers at S & P Manufacturing, Andover, Massachusetts.

The petitioning group of workers are included in an investigation of Vatco Industries Corporation, Andover, Massachusetts. Vatco Industries Corporation is the subject of an ongoing investigation for which a determination has not yet been issued (TA-W-22,336). Consequently, further investigation is this case would serve no purpose, and the investigation has been terminated.

Signed at Washington, DC, this 28th day of February 1989.

### Shelby Drilling Co.; Amended Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

TA-W-22,069 Englewood, CO

TA-W-22,069A All Locations in Wyoming

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on January 12, 1989 applicable to all workers of Shelby Drilling Company, Englewood, Colorado.

Based on new information from the company, additional workers were separated from Shelby Drilling Company, at various locations in the State of Wyoming during the period applicable to the petition. The notice, therefore is amended by including all locations of Shelby Drilling in Wyoming.

The amended notice applicable to TA-W-22,069 is hereby issued as follows:

All workers of Shelby Drilling Company, Englewood, Colorado and all workers of Shelby Drilling Company in the State of Wyoming who became totally or partially separated from employment on or after October 1, 1985 and before January 1, 1989 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, DC, this 23rd day of February 1989.

**[TA-W-22,005]**

### Wright Drilling Co., Harriman, TN; Termination of Investigation

Purusant to section 221 of the Trade Act of 1974, an investigation was initiated on November 18, 1988 in response to a petition which was filed on behalf of workers and former workers at Wright Drilling Company, Harriman, Tennessee.

The investigation revealed that the petitioners worked at the Wright Drilling Company, Sunbright, Tennessee facility and not at the Company's Harriman, Tennessee facility. Workers at Wright Drilling Company, Sunbright, Tennessee are already covered under the Wright Drilling Company, Sunbright, Tennessee petition (TA-W-21,153). An active certification covering the petitioning group of workers remains in effect (TA-W-21,153). No new information is evident which would result in a reversal of the Department's previous determination. Consequently, further investigation in this case would serve no purpose; and the investigation has been terminated.

Signed at Washington, DC, this 23rd day of February 1989.
